This catalog listing indicates the various imagery coverage used by the U.S. Department of Agriculture (USDA) from 1955 to the present. It shows imagery used primarily by the Farm Service Agency (FSA) and the Natural Resources and Conservation Service (NRCS). For imagery prior to 1955, please contact the National Archives & Records Administration:

Cartographic & Architectural References (NWCS-Cartographic)
Aerial Photographs Team

carto@nara.gov

Coverage is listed alphabetically by county. A Federal Information Processing Standard (FIPS) numerical code was assigned to each county after July 1, 1971. The prior years of imagery were assigned an alpha code, shown in parenthesis. Visit the FIPS Index at:

http://www.fsa.usda.gov/Internet/FSA_File/alphafips.pdf

Some form of an index (i.e. digital, line, photo, spot) is available for most imagery projects. The number of index sheets required for each project is shown on this listing.

Current aerial imagery is now obtainable in digital format on CD, DVD, flash or hard drive media. Compressed County Mosaics (CCM) and associated Quarter Quads (QQ) are available as indicated in the listing. NAIP 2002 will have no CCM's.

Scanning aerial imagery film on repository at GEO (1955 - present) can also produce digital imagery products. Contact our Customer Service Section for ordering information, instructions and further details on available products at:
