

Wisconsin Glacial Habitat Restoration Area SAFE

State Acres for Wildlife Enhancement (SAFE)

Overview

The U.S. Department of Agriculture (USDA) and Pheasants Forever are partners in implementing a State Acres for Wildlife Enhancement (SAFE) project to enroll agricultural land in parts of Winnebago, Fond du Lac, Dodge, and Columbia counties. The purpose of the Wisconsin Glacial Habitat Restoration Area is to establish a mosaic of grasslands and wetlands in a predominately agricultural landscape, resulting in more favorable habitat conditions for self-sustaining populations of grassland songbirds, wetland wildlife and waterfowl, as well as pheasants.

Background

SAFE is part of the USDA Conservation Reserve Program (CRP). CRP is a federally funded voluntary program that contracts with landowners and agricultural producers to establish and manage vegetative covers that control soil erosion, improve water quality, and provide wildlife habitat.

SAFE is a unique type of CRP that offers organizations the opportunity to partner with the USDA to establish habitat for high-priority wildlife species on agricultural land. SAFE sponsors work with the USDA to identify the wildlife species, the vegetative cover that provides habitat for the target species, and the location in the state where the habitat is needed. A partnership is formed between the SAFE sponsor and the USDA, and federal funds are made available to allow for CRP enrollment on eligible land within the SAFE project location.

Target Wildlife Species

The goal of the Wisconsin Glacial Habitat Restoration Area project is to provide habitat for grassland songbirds such as Dickcissel, Eastern Meadowlark, Bobolink, and Grasshopper Sparrow. Grassland birds are important to Wisconsin because all target species listed are documented as Species of Greatest Conservation Need within the Wisconsin Wildlife Action Plan and their habitat needs address other important wildlife species such as Ring-necked Pheasant, White-tailed Deer, and Wild Turkey.

Habitat

Landowners and agricultural producers participating in Wisconsin Glacial Habitat Restoration Area are required to develop a conservation plan with assistance from the USDA Natural Resources Conservation Service (NRCS) or a technical service provider. The conservation plan will provide details on how to plant, establish, and manage habitat for grassland songbirds. The habitat being established will be a diverse mix of native grasses and wildflowers or surrogate introduced grasses and flowers. After the habitat is established, it will need to be maintained and managed by prescribed burning, mowing, herbicide, or interseeding. Proper habitat establishment, maintenance, and management will maximize benefits for grassland songbirds and associated wildlife species.

Project Location

The Wisconsin Glacial Habitat Restoration Area project is located within portions of Columbia, Dodge, Fond du Lac, and Winnebago counties.

Eligible CRP Practices

This SAFE project uses the following CRP practices:

- ◆ CP38B-9, SAFE Shallow Water Areas for Wildlife
- ◆ CP38B-23, SAFE Wetland Restoration
- ◆ CP38B-23A, SAFE Wetland Restoration, Non-Floodplain
- ◆ CP38E-1, SAFE Establishment of Introduced Grasses and Legumes
- ◆ CP38E-2, SAFE Establishment of Permanent Native Grass
- ◆ CP38E-25, SAFE Rare and Declining Habitat — Tallgrass Prairie
- ◆ CP38E-25, SAFE Rare and Declining Habitat — Oak Savana Prairie

Haying and Grazing

Haying and Grazing activities are not allowed on Wisconsin Glacial Habitat Restoration Area practices.

Eligibility Requirements

Because SAFE is part of CRP, certain land and participant eligibility rules apply. To begin with, land must be in the project area and meet cropping history. CRP participant eligibility rules also apply to SAFE.

Payments and Incentives

In exchange for participation in CRP SAFE, the Farm Service Agency (FSA) provides participants with annual per acre rental payments, cost-share to assist with habitat establishment expenses, and in some cases additional monetary incentives.

For More Information

This fact sheet is provided for informational purposes only; other restrictions or requirements may apply. Consult your local FSA office for details. For more information, contact your local service center and USDA Farm Service Agency office: farmers.gov/service-locator.
