

CELEBRATE NATIONAL AG WEEK

ANNOUNCER:

America's farmers and ranchers were the country's first environmentalists. These dedicated stewards of the land work hard every day to maintain and improve the soil and natural resources passed on to future generations. For information on National Ag Week, celebrated from March 15th to the 21st, please visit www.agday.org. This message was brought to you by USDA's Farm Service Agency and the Agriculture Council of America. American agriculture provides our food and protects our lands!
