Microloan Cap Grows to \$50,000

Farm Service Agency (FSA) reminds farmers and ranchers that the FSA borrowing limit for microloans increased from \$35,000 to \$50,000, effective Nov. 7. Microloans offer borrowers simplified lending with less paperwork.

The microloan change allows beginning, small and mid-sized farmers to access an additional \$15,000 in loans using a simplified application process with up to seven years to repay. Microloans are part of USDA's continued commitment to <u>small and</u> <u>midsized farming operations</u>.

To complement the microloan program additional changes to FSA eligibility requirements will enhance beginning farmers and ranchers access to land, a key barrier to entry level producers. FSA policies related to farm experience have changed so that other types of skills may be considered to meet the direct farming experience Palmer, AK 99645

County Executive Director Erin Sturdivant 907-761-7754 Fax: 907-761-7789 Email: erin.sturdivant@ak.usda.gov

Farm Loan Manager

Hours Monday-Friday 8:00 a.m. - 4:30 p.m.

Committee Meetings: Northern Co Jan TBA Southern Co Jan TBA required for farm ownership loan eligibility. Operation or management of non-farm businesses, leadership positions while serving in the military or advanced education in an agricultural field will now count towards the experience applicants need to show when applying for farm ownership loans. **Important Note**: Microloans cannot be used to purchase real estate.

Since 2010, FSA has made a record amount of farm loans — more than 165,000 loans totaling nearly \$23 billion. More than 50 percent of USDA's farm loans now go to beginning farmers. In addition, FSA has increased its lending to sociallydisadvantaged producers by nearly 50 percent since 2010.

Please review the FSA <u>Microloan Program</u> <u>Fact Sheet</u> for program application, eligibility and related information.

USDA Provides Greater Protection for Vegetable and Other Speciality Crop Growers

Free Basic Coverage Plans and Premium Discounts Available for New, Underserved and Limited Income Farmers

Greater protection is now available from the Noninsured Crop Disaster Assistance Program for crops that historically have been ineligible for federal crop insurance. The new options, created by the 2014 Farm Bill, provide greater coverage for losses when natural disasters affect specialty crops such as vegetables, fruits, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, and energy crops.

Previously, the program offered coverage at 55 percent of the average market price for crop losses that exceed 50 percent of expected production. Producers can now choose higher levels of coverage, up to 65 percent of their expected production at 100 percent of the average market price.

The expanded protection will be especially helpful to beginning and socially disadvantaged producers, as well as farmers with limited resources, who will receive fee waivers and premium reductions for expanded coverage. More crops are now eligible for the program, including expanded aquaculture production practices, and sweet and biomass sorghum. For the first time, a range of crops used to produce bioenergy will be eligible as well.

To help producers learn more about the Noninsured Crop Disaster Assistance Program and how it can help them, USDA, in partnership with Michigan State University and the University of Illinois, created an online resource. The Web tool, available at <u>www.fsa.usda.gov/nap</u>, allows producers to determine whether their crops are eligible for coverage. It also gives them an opportunity to explore a variety of options and levels to determine the best protection level for their operation.

If the application deadline for an eligible crop has already passed producers will have until Jan 14

2015, to choose expanded coverage through the Noninsured Crop Disaster Assistance Program. To learn more, visit the Farm Service Agency (FSA) website at <u>www.fsa.usda.gov/nap</u> or contact your local FSA office at <u>offices.usda.gov</u>. The Farm Service Agency (FSA), which administers the program, also wants to hear from producers and other interested stakeholders who may have suggestions or recommendations on the program. Written comments will be accepted until Feb. 13, 2015 and can be submitted through www.regulations.gov.

Important ARC/PLC Program Deadlines Approaching

Producers are reminded that the deadline to update yield history and/or reallocate base acres is Feb. 27, 2015. Farm owners and producers can choose between the new 2014 Farm Bill established programs, Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) through March 31, 2015. The new programs, designed to help producers better manage risk, usher in one of the most significant reforms to U.S. farm programs in decades.

USDA helped create online tools to assist in the decision process, allowing farm owners and producers to enter information about their operation and see projections that show what ARC and/or PLC will mean for them under possible future scenarios. Farm owners and producers can access the online resources, available at <u>www.fsa.usda.gov/arc-plc</u>, from the convenience of their home computer or mobile device at any time.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium grain rice (which includes short grain rice), safflower seed, sesame, soybeans, sunflower seed and wheat.

Dates associated with ARC and PLC that farm owners and producers need to know:

• Now through Feb. 27, 2015: Farm owners may visit their local Farm Service Agency office to update yield history and/or reallocate base acres.

• Now through March 31, 2015: Producers make a one-time election between ARC and PLC for the 2014 through 2018 crop years.

- Mid-April 2015 through summer 2015: Producers sign contracts for 2014 and 2015 crop years.
- · October 2015: Payments issued for 2014 crop year, if needed.

To learn more about which safety net options are most appropriate for specific farming operations, farmers can use new Web tools at <u>www.fsa.usda.gov/arc-plc</u>, which can be accessed from the convenience of a home computer or a mobile device at any time. To learn more about upcoming educational meetings, farmers can contact their local Farm Service Agency county office at <u>http://offices.sc.egov.usda.gov/locator/app</u>.

Farm Bill Allows Early Termination for Certain CRP Contracts

The Farm Service Agency reminds producers with acres under contract through the Conservation Reserve Program (CRP) that they can apply for early contract termination, as required by the 2014 Farm Bill. The deadline to request early CRP contract termination is Jan. 30, 2015.

This is a unique opportunity to request early termination afforded by the 2014 Farm Bill. The earliest effective date for this early termination is October 1, 2014. The requesting CRP contract must have been in effect for at least five years and additional eligibility conditions must be met to qualify. The

2014 Farm Bill identifies a list of 10 exceptions whereby land will not be eligible for the early termination provisions. For a complete list of these exceptions, please view the program fact sheet online at http://www.fsa.usda.gov/Internet/FSA_File/crp_opt_out_fact_sht.pdf

Once a CRP contract termination request is approved by the FSA County Committee, the decision may not be reversed and the terminated contract will not be reinstated. Once the land is no longer considered under the CRP contract all participants must meet HEL/WC and other conservation compliance provisions for all associated lands.

For more information or to verify eligibility for early termination (opt-out) for existing CRP contracts, please contact your local FSA office. For local FSA Service Center contact information, please visit: <u>offices.usda.gov</u>.

Breaking New Ground

Agricultural producers are reminded to consult with FSA and NRCS before breaking out new ground for production as doing so without prior authorization may put a producer's federal farm program benefits in jeopardy. This is especially true for land that must meet Highly Erodible Land (HEL) and Wetland Conservation (WC) provisions.

Producers with HEL determined soils must apply tillage, crop residue and rotation requirements as specified in their conservation plan.

Producers should notify FSA prior to conducting land clearing or drainage projects to ensure compliance. If you intend to clear any trees to create new cropland, these areas will need to be reviewed to ensure any work will not risk your eligibility for benefits.

Landowners and operators can complete form AD-1026 Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification to determine whether a referral to Natural Resources Conservation Service (NRCS) is necessary.

Youth Loans

The Farm Service Agency makes loans to youth to establish and operate agricultural incomeproducing projects in connection with 4-H clubs, FFA and other agricultural groups. Projects must be planned and operated with the help of the organization advisor, produce sufficient income to repay the loan and provide the youth with practical business and educational experience. The maximum loan amount is \$5000.

Youth Loan Eligibility Requirements:

- Be a citizen of the United States (which includes Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands) or a legal resident alien
- Be 10 years to 20 years of age
- Comply with FSA's general eligibility requirements
- Be unable to get a loan from other sources
- Conduct a modest income-producing project in a supervised program of work as outlined above
- Demonstrate capability of planning, managing and operating the project under guidance and assistance from a project advisor. The project supervisor must recommend the youth loan applicant, along with providing adequate

supervision.

Stop by the county office for help preparing and processing the application forms..

Farming Operation Changes

Producers who have bought or sold land, or added or dropped rented land from their operation must report those changes to the FSA office as soon as possible. A copy of the deed or recorded land contract for purchase property is needed to maintain accurate records with FSA. Failure to do so can lead to possible program ineligibility and penalties. While making record updates, be sure to update signature authorizations. Making record changes now will save time in the spring.

Bank Account Changes

Current policy mandates that FSA payments be electronically transferred into a bank account. In order for timely payments to be made, producers need to notify the FSA county office when an account has been changed or if another financial institution purchases the bank where payments are sent. Payments can be delayed if the FSA office is not aware of updates to bank accounts and routing numbers.
