**Vitamin A and iron permitted variations in the finished product (i.e., including intrinsic and premix contributions) are:

	Minimum	Maximum
Vitamin A	1662 IU/lb	3300 IU/lb
Iron	18.2 mg/lb	30 mg/lb

- (1) When used for fortifying soy fortified cornmeal at the level of 1662 IU/lb or more, the premix containing Vitamin A Palmitate and 18.2 mg/lb of Iron shall not contribute any off-flavor or odor to the dry mix, or to the cooked products prepared from the fortified meal.
- (2) The Vitamin A shall have been tested by the vitamin manufacturers in cornmeal having moisture content in the range of 13.5 to 14.0 percent to assure stability of the vitamin.

³Vitamin A Palmitate shall be added in spray-dried, encapsulated form containing 250,000 IU Vitamin A Palmitate/g. Particle size must comply with the requirement that at least 98 percent will pass through a U.S. Standard No. 50 sieve, at least 90 percent through a U.S. Standard No. 60 sieve and at least 45 percent through a U.S. Standard No. 100 sieve. The product shall be not less than 95 percent of the all-trans isomer as determined by the USP assay procedure. The Vitamin A Palmitate shall have storage stability such that not more than 20 percent of its original activity will be lost when stored for 21 days at 45° C in a sealed container at a level of 8,800 IU/lb in cornmeal or wheat flour having a moisture content in the range of 13.5 to 14.5 percent.

Between 110 and 120 grams of fortified cornmeal are placed in each bottle, leaving about one inch head space, the lids are tightened, and the upper portion of the bottle and the complete lid are coated with paraffin by inverting and dipping in a bath of melted wax to prevent moisture loss.
- (4) Bottles are stored at 45° C for 21 days, and assayed for Vitamin A, using minimum sample size of 25 grams for each determination. Loss is determined by assaying in duplicate three bottles of cornmeal before and after storage.
- (5) Analysis of concentrates and of original and stored blends shall be carried out by the following method: Carr-Price blue color method, “Methods of Vitamin Assay, Association of Vitamin Chemists, Inc.,” Interscience Publishers, Inc., New York, (1951).
- (6) A given lot of Vitamin A does not require retesting unless its potency as determined by the USP XVII analytical procedure has fallen below the manufacturer’s label claim for the product.

Section 1.2 QUALITY ASSURANCE

- A. The contractor shall perform the product testing and quality analysis to ensure that the product meets the commodity specifications. The results shall be evidenced by a Certificate of Analysis (COA). Copies of the original COA must be submitted as part of the invoice package. The COA shall provide the results of all tests specified. **The contractor will obtain a certificate of analysis from their micronutrient supplier that indicates the level and chemical form of each micronutrient in the premix. That COA will be submitted as part of the invoice package.**
- B. The contractor will test each production lot for: moisture, fat, crude fiber, protein, granulation, aflatoxin, calcium, vitamin A and iron. Presence of other micronutrients can be attested with the correspondent COA from the micronutrient premix manufacturer at the required level. Vitamin A and iron will serve as markers for these other micronutrients. The government reserves the right to perform verification testing for all requirements specified in 1.1.B. If quality discounts are provided in the contract, and the product to be delivered by the contractor falls within the quality discount table, those factors shall be identified by an asterisk on the copies of the COA.
- C. Contractors shall notify the Government immediately of lots that fail to meet contract requirements.
- D. Unless otherwise specified, test methods for the finished product, and any ingredients therein, shall be those of the AOAC INTERNATIONAL, the American Association of Cereal Chemists (AACC), or the American Oil Chemists' Society (AOCS), as applicable and in effect on the date of issuance of the solicitation, or in accordance with methods that give equivalent results.
