

Burley Tobacco

2000 Support Program and Related Information

Statutory Authority

Farm marketing quotas on a poundage basis are in effect for 2000-crop burley tobacco. Since 1971, the Agricultural Adjustment Act of 1938, as amended, has authorized burley poundage quotas in lieu of acreage allotments. The statutory authority was further amended in 1986 to revise the formulas for the marketing quota and price support level. By 97.5 percent, producers voting in a February 1998 referendum approved the poundage program for the 1998-2000 crops. The marketing year for burley tobacco begins October 1.

Marketing Quotas

The national marketing quota for the 2000 burley crop is 247 million pounds, 45 percent less than the 1999-crop quota. Under poundage marketing quotas, if the marketings from a farm are less than the poundage quota for the farm, the difference is added to the farm's quota for the next crop year. Marketings above a farm's poundage quota are deducted from the next year's quota.

Loan Level

The national support level for the 2000-crop burley tobacco is 182.4 cents per pound, 2.5 cents above that for 1999. USDA sets individual grade rates before the marketing season begins.

Assessments

As a condition of price support eligibility, both burley tobacco producers and buyers must pay a no-net-cost assessment for the 2000 crop. The no-net-cost assessment has been set at 3 cents per pound for both producers and buyers for the 2000-crop year.

Support Method

Price support is available to qualified growers through the Burley Tobacco Growers Cooperative Association and the Burley Stabilization Corporation under contractual agreement with USDA's Commodity Credit Corporation (CCC).

The stabilization cooperatives automatically buy the tobacco not sold at the support rate, using funds loaned by CCC. Up to 103 percent of a farm's poundage quota is eligible for support. Producers are required to certify that pesticides used to produce their tobacco crop have been approved by the Environmental Protection Agency and that these products have been used in accordance with label directions.

Loan Inventory

As of June 1, 2000, the two stabilization cooperatives held 275 million pounds of tobacco, packed weight.
