National Agriculture Imagery Program (NAIP)

INFORMATION SHEET

April 2016

What is the National Agriculture Imagery Program (NAIP)?

NAIP is a USDA, Farm Service Agency (FSA) program to acquire “leaf on” aerial imagery during the peak growing season, and deliver this imagery to USDA County Service Centers. The NAIP imagery is used to maintain Common Land Unit (CLU) boundaries and assist with farm programs. The goal of NAIP is to collect 1-meter imagery for the entire conterminous United States. The imagery is acquired as a 4-band product, which can be viewed as either a natural color or color infrared image.

While the focus of NAIP is on agricultural areas, FSA funds and cost share partnerships between federal agencies are leveraged to acquire full state coverage.

Who acquires the imagery?

Independent contractors acquire the NAIP imagery. The current contract has three primary contractors acquiring imagery for the USDA Farm Service Agency (FSA).

Contractors are selected via “best value” criteria. Contract proposals are evaluated on past performance, ability and capacity to perform the work, and cost. Secondary contracts with NAIP vendors are allowed, subject to FSA approval.

A downloadable PDF of the contract can be found on the APFO website (http://www.apfo.usda.gov), under the Contract Services subject, Business Opportunities topic.

How is the imagery acquired?

When the NAIP program began, imagery was acquired from aircraft using film or digital cameras; at present, acquisition is entirely with digital sensors. Both film and digital cameras must meet rigid calibration specifications. The digital sensors currently in use may acquire imagery through a continuous collection technology, or may use set “exposures,” similar to film based acquisition.

Aircraft…what about satellites?

Commercial satellite imagery may also be used in NAIP contracts, although as of 2016 it has not been used. In 2004, the contract specified a spatial resolution of 1 meter or higher in all color bands. In 2005, the requirement was changed to allow pan-sharpening of color bands in satellite or aircraft acquired NAIP imagery.

What is the spectral resolution of the imagery?

The default is four-band imagery, containing red, green, blue, and near-infrared bands. Either natural color or color infrared imagery (CIR) can be displayed by changing the band assignments in the viewing software.

What spatial resolution is the imagery?

NAIP imagery has a 1-meter ground sample distance (GSD). Beginning with the 2011 NAIP season, ½-meter GSD imagery is an option through a contract “buy up” if the additional cost of the imagery is available from state or federal partners. The 2013 imagery for Idaho and 2015 imagery for Wyoming and New York were delivered at 0.5-meter GSD. In 2016, 0.6-meter GSD imagery will be acquired for: CA, CT, IN, KY, MA, MI, MO, MS, ND, NE, NH, RI, SD, & RI. In the first few years of NAIP, some states were flown at a 2-meter GSD for compliance uses.

What is reference ortho imagery?

Until 2006, the horizontal accuracy of all NAIP imagery was inspected by comparing the NAIP imagery to existing orthorectified imagery, the mosaicked digital ortho quarter quads (MDOQ), which were initially used to digitize FSA common land unit (CLU) data. The NAIP imagery was required to match within 5-meters to the existing MDOQs.

What is the absolute accuracy specification?

NAIP transitioned to an absolute accuracy specification beginning in 2006, which tied the imagery to true ground rather than another imagery source. The contract stated that “all well-defined points tested shall fall within 6 meters of true ground at a 95% confidence level”. Beginning in 2016 the requirement was changed from 6-meters to 4-meters.

Is the imagery reviewed to make sure it is accurate?

APFO has stringent imagery compliance guidelines. Products are inspected using automated and visual methods to ensure accuracy and compliance of the contract specifications.

How long has NAIP been in existence?

NAIP pilot projects began in 2002. The program has continued to grow ever since.

Each year several federal and/or state agencies contribute funds, which together with the FSA funds allow for greater acquisition of data. These NAIP funding partnerships reduce duplication of effort and fiscal waste.

The NAIP acquisition schedule avoids grouping states in areas where weather conditions make acquisition difficult.
In what formats can I receive the imagery?

NAIP imagery comes in two main formats:

1. Compressed County Mosaic (CCM)
   a. Mosaics are generated by compressing digital ortho quarter quads (DOQQs) into a single mosaic.
   b. Compression for 2005 – 2016 (except 2008) is MrSID MG3, Natural Color at a ratio of 15:1 for 1-meter and 60:1 for 0.5 and 0.6-meter imagery.
   c. In 2008, 4-band NAIP imagery was compressed with JPEG 2000. For all other years of NAIP since 2005, 3-band, MG3 has been used.
   d. Compression for 2004 NAIP and earlier was MrSID MG2 at a ratio of 50:1 for 1-m and 20:1 for 2-m resolution imagery.
   e. The compressed county mosaic may cover all or portions of an individual county or project area.

2. Digital Ortho Quarter Quad (DOQQ)
   a. Each individual image tile (DOQQ) within the mosaic covers a 3.75 x 3.75 minute quarter quadrangle plus a 300-meter buffer on all four sides.
   b. The DOQQs are available in GeoTIFF format, and all individual DOQQs and resulting mosaics are rectified to the specified UTM coordinate system zone.
   c. DOQQs can be purchased through the APFO Customer Service Section. For detailed information on NAIP availability and other items, please see the NAIP Status maps or contact the Customer Service Section at 801-844-2922, or by email at apfo.sales@slc.usda.gov.

How can I get NAIP imagery?

1. Compressed County Mosaics (CCMs) are available 45 days or less after the end of the state flying season. The natural color CCMs are available to the general public through the USDA Geospatial Data Gateway. All years of available imagery may be downloaded as 0.5, 0.6, 1, or 2 meter CCMs depending on the original spatial resolution. Downloads are free. CCMs with a file size larger than 8 GB may not be downloaded from the Gateway; they can be obtained by contacting the APFO Customer Service Section. Pricing and delivery methods can be found in the contact information listed below.

2. Full resolution digital ortho quarter quads (DOQQs) are delivered to APFO within 30 days after the acquisition period ends. The DOQQ imagery is also made available through a four band public facing web service, after imagery for the entire state has been received at APFO. The four band DOQQs are available for purchase. Media options for delivery include hard copy photos, CD/DVD, USB flash drive, and portable hard disk drive.

3. Orders for CCMs and DOQQs on media can be placed at the Aerial Photography Field Office (APFO) in person, by phone, or email. Additional information can be found on the APFO website under Related Topics, Ordering Instructions.

4. NAIP DOQQs can be viewed through APFOs image service. Detailed instructions for using this web service can be found on the APFO website. Select Support Documents, White Papers, and then Adding Public ArcGIS Server 10x.

How much does NAIP imagery cost?

Costs vary greatly by product and volume. Contact the APFO Customer Service Section at: apfo.sales@slc.usda.gov or 801-844-2922 for detailed information.

What software is needed to view the imagery?

1. NAIP CCMs from 2005 – present require software that reads the MG3 or JPEG 2000 format. Pre-2005 CCMs used the MG2 format. Four band imagery will require software which can recognize all four bands. A list of free viewing software is available at the APFO website. Select Support Document, Information Sheets, Data Viewers. This list is provided for convenience; USDA-FSA-APFO does not support or endorse these products or services.

2. The NAIP DOQQs are in the GeoTIFF format. Most image viewing software will display this format.

Who do I contact for more information?

1. NAIP acquisition and other information can be found on the NAIP Status Maps site. National Geospatial Data Assets (NGDA) links are also available at Data.gov NAIP info and planned acquisition and Geoplatform NAIP info and planned acquisition.

2. For sales information, contact USDA-FSA-APFO at 2222 W 2300 S, Salt Lake City UT, 84119-2020, call 801-844-2922, or visit the APFO website.

3. For further information contact NAIP project manager Bridget Barlow 801-844-2911, or GIS specialists David Davis 801-844-2933, Nathan Pugh 801-844-2927, or Joan Biediger 801-844-2951.

“In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident. Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA’s TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English. To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at http://www.ascr.usda.gov/complaint_filing_cust.html and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture Office of the Assistant Secretary for Civil Rights 1400 Independence Avenue, SW Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov. USDA is an equal opportunity provider, employer, and lender.”
