

Conservation Reserve Program – Continuous Enrollment Period

Beginning June 3, 2019

OVERVIEW

The U.S. Department of Agriculture (USDA) is announcing a continuous signup period under the Conservation Reserve Program (CRP signup 52). Offers may be accepted beginning June 3, 2019 through August 23, 2019.

The USDA Farm Service Agency's (FSA) CRP is a voluntary program that contracts with agricultural producers so that environmentally sensitive agricultural land is used for conservation benefits. CRP participants establish long-term, resource-conserving vegetative species, such as approved grasses or trees (known as "covers"), to control soil erosion, improve the water quality and enhance wildlife habitat. In return, FSA provides participants with annual rental payments and cost-share assistance. Continuous signup enrollment contracts are 10 to 15 years in duration.

The Food Security Act of 1985, as amended, authorized CRP. The program is also governed by regulations published in 7 CFR, part 1410. The program is implemented by FSA on behalf of USDA's Commodity Credit Corporation. More detailed information on

CRP is available in the FSA fact sheet, "Conservation Reserve Program," found at fsa.usda.gov/factsheets.

This fact sheet does not apply to Conservation Reserve Enhancement Program (CREP) enrollment, including re-enrollment.

BENEFITS

CRP protects millions of acres of American topsoil from erosion and is designed to safeguard the nation's natural resources. By reducing water runoff and sedimentation, CRP protects groundwater and helps improve the condition of lakes, rivers, ponds and streams. The vegetative covers also make CRP a major contributor to increased wildlife populations in many parts of the country.

ADMINISTRATION

FSA administers CRP while technical support functions are provided by:

- USDA's Natural Resources Conservation Service (NRCS);
- State forestry agencies;
- Local soil and water conservation districts; and
- Other non-federal providers of technical assistance

CONTINUOUS ENROLLMENT AND EFFECTIVE DATE

CRP Continuous (Non-CREP) Signup 52 offers may be accepted beginning June 3, 2019 through August 23, 2019.

Under continuous CRP signup, environmentally sensitive land devoted to certain conservation practices can be enrolled in CRP at any time. Offers are automatically accepted provided the land and producer meet certain eligibility requirements and the enrollment levels do not exceed the statutory cap. Unlike CRP enrollments under general CRP signups or CRP Grasslands, offers for continuous enrollment are not subject to competitive bidding during specific periods.

Producers submitting acceptable CRP offers for the listed conservation practices must have a conservation plan developed and the contract approved no later than September 30, 2019.

If the offered acres are currently enrolled in CRP under a CRP contract that expires September 30, 2019, then the effective start date of the new CRP contract must be October 1, 2019.

If the offered acres are not currently enrolled in CRP then the producer may choose to defer the effective start date of the new CRP contract for up to six months after the offer is approved. All acceptable signup 52 continuous offers must be approved no later than September 30, 2019.

To offer land for continuous enrollment, producers should contact their local FSA office.

WHO IS ELIGIBLE?

A producer must have owned or operated the land for at least 12 months prior to submitting the offer, unless:

- The new owner acquired the land due to the previous owner's death;
- The ownership change occurred due to foreclosure where the owner exercised a timely right of redemption in accordance with state law; or
- The circumstances of the acquisition present adequate assurance to FSA that the new owner did not acquire the land for the purpose of placing it in CRP.

ELIGIBLE LAND

Land must be cropland that is planted or considered planted to an agricultural commodity four of the six crop years from 2012 to 2017, and is physically and legally capable of being planted (no planting restrictions due to an easement or other legally binding instrument) in a normal manner to an agricultural commodity. Certain marginal pastureland that may be devoted to riparian buffers is also eligible.

ELIGIBLE PRACTICES

For the signup period beginning June 3, 2019, (CRP signup 52) the land must be eligible and suitable for any of the following conservation practices:

- Grass Waterway
- Shallow Water Area for Wildlife
- Contour Grass Strip
- Filter Strip
- Denitrifying Bioreactor on Filter Strip
- Saturated Filter Strip
- Riparian Buffer
- Denitrifying Bioreactor on Riparian Buffer
- Saturated Riparian Buffer
- Wetland Restoration on Floodplain and Non-floodplain
- Farmable Wetlands
- Farmable Wetland Buffer
- Marginal Pastureland Wetland Buffer

- Duck Nesting Habitat
- Farmable Wetlands Program (FWP) Constructed Wetland
- FWP Aquaculture Wetland Restoration
- FWP Flooded Prairie Wetland

PAYMENTS

Under CRP continuous signup, FSA provides eligible participants with annual rental payments and cost-share assistance.

Signup and practice incentives, as well as certain rental rate incentives are not available for the signup period that begins on June 3, 2019 (CRP signup 52).

Annual Rental Payments

- In return for establishing long-term, resource- conserving covers, FSA provides annual rental payments to eligible participants based on per acre cropland and marginal pasture land rental rates determined by FSA. Soil Rental Rates will be equal to 90 percent of the existing rates.
- The per-acre annual rental rate may not exceed the calculated rate determined in advance of enrollment. While enrollment under CRP continuous signup is not determined by a competitive offer process with the exception of CRP Grasslands, producers may elect to receive a rental rate amount less than the maximum payment rate. The maximum payment rate for continuous signup is \$300 per acre.

Cost-Share Assistance

Cost-share of up to 50 percent of the reimbursable cost of installing the practice is provided by FSA.

Cost-share assistance is not available for any management activity.
