

Lawrence D. Igl
Research Ecologist
U.S. Geological Survey

Larry Igl is a Research Ecologist with Northern Prairie Wildlife Research Center of the U.S. Geological Survey. He received his B.S. degree in Wildlife Ecology, Biology, and Natural Resources Management from the University of Wisconsin-Stevens Point; an M.S. degree in Animal Ecology from Iowa State University; and a Ph.D. in Zoology from North Dakota State University. His research interests include avian ecology, conservation and management, with an emphasis on grassland, wetland, and agricultural ecosystems in the Midwest and Great Plains. He has conducted surveys of breeding, migrating, and wintering birds throughout the southern, central, and northern Great Plains. Recent investigations include a long-term evaluation of breeding bird communities in grasslands enrolled in the Conservation Reserve Program in North Dakota, South Dakota, Minnesota, and Montana; an evaluation of the effects of livestock stocking rates on breeding birds in grasslands managed by the U.S. Forest Service; and an investigation of the response of grassland birds to adaptive management treatments that are being used to restore floristic composition of native grasslands owned by the U.S. Fish and Wildlife Service. He is an elective member of the American Ornithologists' Union and a member of the The Wildlife Society, Cooper Ornithological Society, Wilson Ornithological Society, the Association of Field Ornithologists, and the Great Plains Natural Science Society.
