Overview
The U.S. Department of Agriculture (USDA) and Oklahoma Department of Wildlife Conservation (ODWC) are partners in implementing a State Acres for Wildlife Enhancement (SAFE) project to enroll agricultural land in 44 central and western Oklahoma counties. The purpose of the Oklahoma Habitat Restoration for Northern Bobwhite and Monarch Butterfly SAFE is to restore mixed-and tall-grass prairie type associations in western and central Oklahoma to benefit northern bobwhite, monarch butterfly, and other grassland obligate wildlife populations.

Background
SAFE is part of the USDA Conservation Reserve Program (CRP). CRP is a federally funded voluntary program that contracts with landowners and agricultural producers to establish and manage vegetative covers that control soil erosion, improve water quality, and provide wildlife habitat.

SAFE is a unique type of CRP that offers organizations the opportunity to partner with the USDA to establish habitat for high-priority wildlife species on agricultural land. SAFE sponsors work with the USDA to identify the wildlife species, the vegetative cover that provides habitat for the target species, and the location in the state where the habitat is needed. A partnership is formed between the SAFE sponsor and the USDA, and federal funds are made available to allow for CRP enrollment on eligible land within the SAFE project location.

Target Wildlife Species
The goal of the Oklahoma Habitat Restoration for Northern Bobwhite and Monarch Butterfly SAFE project is to provide habitat for grassland dependent wildlife, including northern bobwhite quail and monarch butterflies. These species are important to Oklahoma because each has suffered significant population declines and both play important economic and ecological roles.
Project Location
The Oklahoma Habitat Restoration for Northern Bobwhite and Monarch Butterfly SAFE project is located in part or all of Alfalfa, Beaver, Beckham, Blaine, Caddo, Canadian, Carter, Cleveland, Comanche, Cotton, Creek, Custer, Dewey, Ellis, Garfield, Garvin, Grant, Greer, Harmon, Harper, Jackson, Jefferson, Kay, Kingfisher, Kiowa, Logan, Love, Major, McClain, Murray, Noble, Okfuskee, Oklahoma, Osage, Pawnee, Payne, Roger Mills, Stephens, Texas, Tillman, Washita, Woods, Woodward counties.

Eligible CRP Practices
This SAFE project uses the following CRP practices:

- CP38E-2 Native Grasses and Legumes
- CP38E-4D Permanent Wildlife Habitat
- CP38E-25 Rare and Declining Habitat
- CP38E-42 Pollinator Habitat

Haying and Grazing
Non-emergency grazing is eligible for mid-contract management. Furthermore, grazing may be used every other year under the guidance of the NRCS Conservation Plan and 2-CRP (Rev.6) to increase stand diversity and bare ground while abiding by NRCS’ minimum grass height recommendation, except that an average minimum residual grazing height of 6 inches will be maintained. Emergency grazing is allowable but must comply with the managed grazing standards outlined within the contract. Emergency grazing will count in the frequency at which grazing can occur. Haying will not be allowed.

Eligibility Requirements
Because SAFE is part of CRP, certain land and participant eligibility rules apply. To begin with, land must be in the project area and meet cropping history. CRP participant eligibility rules also apply to SAFE.

Payments and Incentives
In exchange for participation in CRP SAFE, the Farm Service Agency (FSA) provides participants with annual per acre rental payments, cost-share to assist with habitat establishment expenses, and in some cases additional monetary incentives.
