U.S. Department of Agriculture (USDA) initiated an Assistance Program for Natural Disaster and Plant-Related Harm (EFRP), to help farmers make immediate repairs to damaged agricultural facilities and crops. USDA's Farm Service Agency (FSA) has established an EFRP program to provide immediate assistance to farmers affected by natural disasters or plant-related harms.

EFRP provides financial assistance to farmers for the repair and replacement of damaged agricultural facilities and crops. The program is available to farmers who have sustained losses as a result of natural disasters or plant-related harms.

To be eligible for EFRP, farmers must have sustained losses as a result of natural disasters or plant-related harms. The losses must be significant enough to warrant assistance.

The assistance provided under EFRP is based on the extent of the losses sustained by the farmer. Assistance may include the repair or replacement of damaged agricultural facilities and crops.

Farmers interested in applying for EFRP assistance should contact their local USDA Farm Service Agency office for more information.
