Payment Information
Payment Calculation

PLIP payments are based on a single payment rate, for each category of livestock and poultry, that compensates eligible livestock and poultry owners based on 80 percent of both the:

- loss of the eligible livestock and/or poultry depopulated, and

- cost of depopulation and disposal.
Payment Calculation

PLIP payments are calculated as follows:

• Number of head of livestock and/or poultry depopulated, times

• Applicable payment rate per head, minus

• Applicable payment reductions.
Payment Rates

PLIP has determined one single payment rate per head of each category of livestock and poultry, that includes:

• depopulation cost, based on estimates of the average costs used to depopulate animals

• disposal cost, based on common disposal methods and rates used in EQIP.
