USDA to Measure Final 2017 Row Crop Production and Grain Stocks with Two End-of-Year Surveys

The U.S. Department of Agriculture's National Agricultural Statistics Service (NASS) is encouraging producers to respond to two upcoming surveys – the December Agricultural Survey and the County Agricultural Production Survey – that are critical to row crop producers around the country. The results of the surveys help determine the structure of the 2017 farm payment and risk management programs administered by USDA’s Farm Service Agency and Risk Management Agency.

The County Agricultural Production Survey was sent to 170,000 row crop producers beginning Nov. 3. Responses are due by Jan. 15, 2018, and NASS will publish county-level results for corn, soybeans, sunflowers, and sorghum on Feb. 22, 2018, in the Quick Stats database. These county-level data are critical for USDA farm payment determinations.

The December Agricultural Survey will go to 84,000 producers beginning Nov. 29. Responses are due by Dec. 21, 2017, and NASS publishes results in the Crop Production 2017 Summary report on Jan. 12, 2018. Information collected in this survey also feeds into the county estimates for row crops. The survey also asks about grain stocks stored on-farm.

When producers receive the surveys, they have the option to respond using the secure online questionnaire or return it by mail. NASS
safeguards the privacy of all respondents and publishes only aggregate data, ensuring that no individual operation or producer can be identified.

These and all NASS data are available online at [www.nass.usda.gov/Publications](http://www.nass.usda.gov/Publications) and the searchable [Quick Stats database](http://www.nass.usda.gov/Publications). Watch a video on how NASS data are used at [www.youtube.com/watch?v=rBW-g1FgLNs](http://www.youtube.com/watch?v=rBW-g1FgLNs).

The Census of Agriculture is a Producer's Voice, Future, and Opportunity

In December farmers and ranchers across the nation will receive the 2017 Census of Agriculture. Producers can mail in their completed census form, or respond online via the improved web questionnaire. The online questionnaire has been revised extensively to make it more convenient for producers.

Conducted once every five years, the census of agriculture is a complete count of all U.S. farms, ranches, and those who operate them; it is the only source of uniform, comprehensive, and impartial agriculture data for every state and county in the nation.

Farmers and ranchers, trade associations, government, extension educators, researchers, and many others rely on census of agriculture data when making decisions that shape American agriculture – from creating and funding farm programs to boosting services for communities and the industry. The census of agriculture is a producer’s voice, future, and opportunity.

For more information about the 2017 Census of Agriculture, visit [www.agcensus.usda.gov](http://www.agcensus.usda.gov) or call (800) 727-9540.

2018 Acreage Reporting Dates

In order to comply with FSA program eligibility requirements, all producers are encouraged to visit their local FSA office to file an accurate crop certification report by the applicable deadline.

The following upcoming acreage reporting dates are applicable for Alabama:

**November 15, 2017**  Apiculture, PRF/Perennial Forage, Onions

**January 2, 2018**  Honey (If colonies are acquired after January 2, 2018, the crop must be reported within 30 calendar days of the date colonies of bees are acquired, brought into, or removed from the county.)

**January 15, 2018**  Blueberries, Canola, Rapeseed, Fall Oats, Peaches, Fall Wheat

**March 15, 2018**  Pecans, Potatoes (planted Jan. 1- Mar. 1)

**May 15, 2018**  Sweet Corn, Potatoes (planted Mar. 2-Apr. 15), Tobacco, Tomatoes

**May 31, 2018**  Nursery Crops
Acreage reporting dates vary by crop and by county so please contact your local FSA office for a list of county-specific deadlines.

The following exceptions apply to acreage reporting dates:

- If the crop has not been planted by the applicable acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
- If a producer acquires additional acreage after the applicable acreage reporting date, then the acreage must be reported no later than 30 calendars days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.
- If a perennial forage crop is reported with the intended use of “cover only,” “green manure,” “left standing,” or “seed,” then the acreage must be reported by July 15th.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP covered crops is the earlier of the applicable dates or 15 calendar days before grazing or harvesting of the crop begins.

For questions regarding crop certification and crop loss reports, please contact your local FSA office.

**Recourse Seed Cotton Loans**

Cotton producers can request a recourse seed cotton loan at their local Farm Service Agency (FSA) office. Due to this year’s large cotton crop and delayed ginning, these seed cotton loans can provide interim financing to producers until their cotton is ginned.

Recourse seed cotton loans are available from the beginning of harvest through March 31, 2018. Seed cotton loans must be repaid by May 31, 2018.

After the cotton has been ginned, the seed cotton loan is repaid with proceeds from the ginned cotton.

County Offices will provide written or e-mail notification to every Cooperative Marketing Association (CMA) or Loan Servicing Agent (LSA) used by the producer to ensure that the proceeds from a ginned cotton loan are used to repay a seed cotton loan obligation. Any proceeds obtained from LSA or CMA, whether from a loan or Loan Deficiency Payment (LDP), will be jointly payable to the producer and to the Commodity Credit Corporation if these proceeds are from a loan for the same cotton that is collateral for the seed cotton loan.

Contact your local FSA office to learn about eligible requirements or to request a seed cotton loan.

**Acreage Reporting**

Filing an accurate crop and acreage report at your local FSA office can prevent the loss of benefits for a variety of programs. Failed acreage is acreage that was timely planted with the intent to harvest, but because of disaster related conditions, the crop failed before it could be brought to harvest.

Prevented planting must be reported no later than 15 days after the final planting date. Annual acreage reports are required for most Farm Service Agency programs. Annual crop report deadlines vary based
on region, crop, perennial vs. annual crop type, NAP or non-NAP crop and fall or winter seeding. Consult your local FSA office for deadlines in your area.

To be eligible for the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) program or a Marketing Assistance Loan (MAL) or Loan Deficiency Payment (LDP), producers must submit an acreage report to account for all cropland on all farms.

**Change in Farming Operation**

If you have bought or sold land, or if you have picked up or dropped rented land from your operation, make sure you report the changes to the office as soon as possible. You need to provide a copy of your deed or recorded land contract for purchased property. Failure to maintain accurate records with FSA on all land you have an interest in can lead to possible program ineligibility and penalties. Making the record changes now will save you time in the spring. Update signature authorization when changes in the operation occur. Producers are reminded to contact the office if there is a change in operations on a farm so that records can be kept current and accurate.

**Highly Erodible Land (HEL) and Wetland Conservation Compliance**

Landowners and operators are reminded that in order to receive payments from USDA, compliance with Highly Erodible Land (HEL) and Wetland Conservation (WC) provisions are required. Farmers with HEL determined soils are reminded of tillage, crop residue, and rotation requirements as specified per their conservation plan. Producers are to notify the USDA Farm Service Agency prior to conducting land clearing or drainage projects to insure compliance. Failure to obtain advance approval for any of these situations can result in the loss of eligibility and all Federal payments.

**FSA Offers Joint Financing Option on Direct Farm Ownership Loans**

The USDA Farm Service Agency’s (FSA) Direct Farm Ownership loans are a resource to help farmers and ranchers become owner-operators of family farms, improve and expand current operations, increase agricultural productivity, and assist with land tenure to save farmland for future generations.

Depending on the applicant’s needs, there are three types of Direct Farm Ownership Loans: regular, down payment and joint financing. FSA also offers a Direct Farm Ownership Microloan option for smaller financial needs up to $50,000.

Joint financing allows FSA to provide more farmers and ranchers with access to capital. FSA lends up to 50 percent of the total amount financed. A commercial lender, a State program or the seller of the property being purchased, provides the balance of loan funds, with or without an FSA guarantee. The maximum loan amount for a Joint Financing loan is $300,000 and the repayment period for the loan is up to 40 years.

To be eligible, the operation must be an eligible farm enterprise. Farm Ownership loan funds cannot be used to finance nonfarm enterprises and all applicants must be able to meet general eligibility requirements. Loan applicants are also required to have participated in the business operations of a farm or ranch for at least three years out of the 10 years prior to the date the application is submitted. The
applicant must show documentation that their participation in the business operation of the farm or ranch was not solely as a laborer.

For more information about FSA Loan programs, contact your local FSA office or visit www.fsa.usda.gov. To find your local FSA office, visit http://offices.usda.gov.

---

**Borrower Training**

Borrower training is available for all Farm Service Agency customers. This training is required for all direct loan applicants, unless the applicant has a waiver issued by the agency.

Borrower training includes instruction in production and financial management. The purpose is to help the applicant develop and improve skills that are necessary to successfully operate a farm and build equity in the operation. It aims to help the producer become financially successful. Borrower training is provided, for a fee, by agency approved vendors. Contact your local FSA Farm Loan Manager for a list of approved vendors.
