USDA Announces Restart of Biomass Crop Assistance Program for Renewable Energy

The U.S. Department of Agriculture (USDA) today announced that incentives will resume this summer for farmers, ranchers and forest landowners interested in growing and harvesting biomass for renewable energy. The support comes through the Biomass Crop Assistance Program (BCAP), which was reauthorized by the 2014 Farm Bill. BCAP provides financial assistance to establish and maintain new crops of energy biomass, or who harvest and deliver forest or agricultural residues to a qualifying energy facility.

Financial assistance is available through BCAP for costs associated with harvesting and transporting agriculture or forest residues to facilities that convert biomass crops into energy. Eligible crops may include corn residue, diseased or insect infested wood materials, or orchard waste. The energy facility must first be approved by USDA to accept the biomass crop. Facilities can apply for, or renew, their BCAP qualification status beginning June 1 and ending June 12, 2015. $11.5 million of federal funds will be allocated to support the delivery of biomass materials through December 2015. Last year, more than 200,000 tons of dead or diseased trees from National Forests and Bureau of Land Management lands were removed and used to produce renewable energy, while reducing the risk of forest fire. Nineteen energy facilities in 10 states participated in the program.
Farmers, ranchers and forest landowners can also receive financial assistance to grow biomass crops that will be converted into energy in selected BCAP project areas. New BCAP project area proposals will be solicited beginning this summer and accepted through fall 2015, with new project area announcements and enrollments taking place in early spring 2016. The extended proposal submission period allows project sponsors time to complete any needed environmental assessments and allows producers enough lead time to make informed decisions on whether or not to pursue the BCAP project area enrollment opportunity. This fiscal year USDA’s Farm Service Agency (FSA) will allocate up to $8 million for producer enrollment to expand and enhance existing BCAP project areas. Additionally, in accordance with the 2014 Farm Bill, underserved farmers are eligible for a higher establishment cost share. BCAP projects have supported over 50,000 acres across 74 counties in 11 different project areas.

**Secretary Vilsack Announces Additional 800,000 Acres Dedicated to Conservation Reserve Program for Wildlife Habitat and Wetlands**

*Secretary Hails Program’s 30th Anniversary, Announces General Signup Period*

Agriculture Secretary Tom Vilsack recently announced that an additional 800,000 acres of highly environmentally sensitive land may be enrolled in Conservation Reserve Program (CRP) under certain wetland and wildlife initiatives that provide multiple benefits on the same land.

The U.S. Department of Agriculture (USDA) will accept new offers to participate in CRP under a general signup to be held Dec. 1, 2015, through Feb. 26, 2016. Eligible existing program participants with contracts expiring Sept. 30, 2015, will be granted an option for one-year extensions. Farmers and ranchers interested in removing sensitive land from agricultural production and planting grasses or trees to reduce soil erosion, improve water quality and restore wildlife habitat are encouraged to enroll.

For 30 years, the Conservation Reserve Program has helped farmers and ranchers prevent more than 8 billion tons of soil from eroding, reduce nitrogen and phosphorous runoff relative to cropland by 95 and 85 percent respectively, and even sequester 43 million tons of greenhouse gases annually, equal to taking 8 million cars off the road.

The voluntary Conservation Reserve Program allows USDA to contract with agricultural producers so that environmentally sensitive land is conserved. Participants establish long-term, resource-conserving plant species to control soil erosion, improve water quality and develop wildlife habitat. In return, USDA’s Farm Service Agency (FSA) provides participants with rental payments and cost-share assistance. Contract duration is between 10 and 15 years.

CRP protects water quality and restores significant habitat for ducks, pheasants, turkey, quail, deer and other important wildlife which spurs economic development like hunting and fishing, outdoor
recreation and tourism across rural America. Today’s announcement allows an additional 800,000 acres for duck nesting habitat and other wetland and wildlife habitat initiatives to be enrolled in the program.

Farmers and ranchers should consider the various CRP continuous sign-up initiatives that may help target specific resource concerns. Financial assistance is offered for many practices including conservation buffers and pollinator habitat plantings, and initiatives such as the highly erodible lands, bottomland hardwood tree and longleaf pine.

Farmers and ranchers may visit their FSA county office for additional information. The 2014 Farm Bill authorized the enrollment of grasslands in CRP and information on grasslands enrollment will be available after the regulation is published later this summer.

For more information on CRP and other FSA programs, please visit www.fsa.usda.gov.

**USDA Packages Disaster Protection with Loans to Benefit Specialty Crop and Diversified Producers**

*Free basic coverage and discounted premiums available for new and underserved loan applicants*

U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) today announced that producers who apply for FSA farm loans also will be offered the opportunity to enroll in new disaster loss protections created by the 2014 Farm Bill. The new coverage, available from the Noninsured Crop Disaster Assistance Program (NAP), is available to FSA loan applicants who grow non-insurable crops, so this is especially important to fruit and vegetable producers and other specialty crop growers.

New, underserved and limited income specialty growers who apply for farm loans could qualify for basic loss coverage at no cost, or higher coverage for a discounted premium.

The basic disaster coverage protects at 55 percent of the market price for crop losses that exceed 50 percent of production. Covered crops include “specialty” crops, for instance, vegetables, fruits, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, hay, forage, grazing and energy crops. FSA allows beginning, underserved or limited income producers to obtain NAP coverage up to 90 days after the normal application closing date when they also apply for FSA credit.

In addition to free basic coverage, beginning, underserved or limited income producers are eligible for a 50 percent discount on premiums for the higher levels of coverage that protect up to 65 percent of expected production at 100 percent of the average market price. Producers also may work with FSA to protect value-added production, such as organic or direct market crops, at their fair market value in those markets. Targeted underserved groups eligible for free or discounted coverage are American Indians or Alaskan Natives, Asians, Blacks or African Americans, Native Hawaiians or other Pacific Islanders, Hispanics, and women.

FSA offers a variety of loan products, including farm ownership loans, operating loans and microloans that have a streamlined application process.

Growers need not apply for an FSA loan, nor be a beginning, limited resource, or underserved farmer, to be eligible for Noninsured Crop Disaster Assistance Program assistance. To learn more, visit www.fsa.usda.gov/nap or www.fsa.usda.gov/farmloans, or contact your local FSA office at https://offices.usda.gov.
**2015 Crop Acreage Reporting Dates**

In order to comply with FSA program eligibility requirements, all producers are encouraged to visit the local County FSA office to file an accurate crop certification report by the applicable deadline.

The following acreage reporting dates are applicable for Alabama:

- **November 15, 2014** - Apiculture, PRF/Perennial Forage, Onions
- **January 2, 2015** - Honey (If colonies are acquired after January 2, 2015, the crop must be reported within 30 calendar days of the date colonies of bees are acquired, brought into, or removed from the county.)
- **January 15, 2015** - Blueberries, Canola, Rapeseed, Fall Oats, Peaches, Fall Wheat
- **March 15, 2015** - Pecans, Potatoes (planted Jan. 1- Mar. 1)
- **May 15, 2015** - Sweet Corn, Potatoes (planted Mar. 2-Apr. 15), Tobacco, Tomatoes
- **July 15, 2015** - All Other Crops

The following exceptions apply to the above acreage reporting dates:

- If the crop has not been planted by the above acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
- If a producer acquires additional acreage after the above acreage reporting date, then the acreage must be reported no later than 30 calendars days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.
- If a perennial forage crop is reported with the intended use of “cover only,” “green manure,” “left standing,” or “seed,” then the acreage must be reported by July 15th.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP covered crops is the earlier of the dates listed above or 15 calendar days before grazing or harvesting of the crop begins.

**Producers Must Report Prevented Planting and Failed Acres**

USDA Farm Service Agency (FSA) reminds producers to report prevented planting and failed acres in order to establish or retain FSA program eligibility.

Producers must report crop acreage they intended to plant, but due to natural disaster, were prevented from planting. Prevented planting acreage must be reported on form FSA-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and Risk Management Agency (RMA).

The final planting date for crops may vary; therefore, producers should contact their local FSA Office for final planting dates for crops in their County.

If a producer is unable to report the prevented planting acreage within the 15 calendar days following the final planting date, a late-filed report can be submitted. Late-filed reports will only be accepted if FSA conducts a farm visit to assess the eligible disaster condition that prevented the crop from being planted. A measurement service fee will be charged.

Additionally, producers with failed acres should also use form FSA-576, Notice of Loss, to report failed acres.

For losses on crops covered by the Non-Insured Crop Disaster Assistance Program (NAP) and crop insurance, producers must file a Notice of Loss within 15 days of the occurrence of the disaster or when losses become apparent. Producers must timely file a Notice of Loss for failed acres on all
crops including grasses.

Please contact your local County FSA Office to file a Notice of Loss. To find your local FSA office visit http://offices.usda.gov.

---

**Filing a Notice of Loss**

The CCC-576, Notice of Loss, is used to report failed acreage and prevented planting and may be completed by any producer with an interest in the crop. Timely filing a Notice of Loss is required for all crops including grasses. For losses on crops covered by the Non-Insured Crop Disaster Assistance Program (NAP) and crop insurance, you must file a CCC-576, Notice of Loss, in the FSA County Office within 15 days of the occurrence of the disaster or when losses become apparent.

Producers of hand-harvested crops must notify FSA of damage or loss through the administrative County Office within 72 hours of the date of damage or loss first becomes apparent. This notification can be provided by filing a CCC-576, email, fax or phone. Producers who notify the County Office by any method other than by filing the CCC-576 are still required to file a CCC-576, Notice of Loss, within the required 15 calendar days.

If filing for prevented planting, an acreage report and CCC-576 must be filed within 15 calendar days of the final planting date for the crop.

---

**Agricultural Producers in Alabama Still Have Time to Apply for Direct Farm Ownership Loan Program**

*Low-Interest Loans Can Help Producers Start or Expand Farms*

The U.S. Department of Agriculture (USDA) Alabama Farm Service Agency (FSA) today announced that farmers and ranchers still have time to apply for low interest loans available through the FSA direct farm ownership program. Applications must be approved by Sept. 30, 2015, to take advantage of the funding available.

Eligible farmers and ranchers can borrow up to $300,000 to buy farmland, construct or repair buildings, pay closing costs, or promote soil and water conservation. The interest rate can be as low as 1.5 percent with up to 40 years to repay.

New farmers and ranchers, military veterans, and underserved farmers and ranchers also are encouraged to apply. Each year Congress targets 80 percent of available loan funds to beginning and targeted underserved farmers and ranchers. Targeted underserved groups include American Indians or Alaskan Natives, Asians, Blacks or African Americans, Native Hawaiians, or other Pacific Islanders, Hispanics and women.

For more information about farm loan, visit www.fsa.usda.gov/farmloans, or contact your local FSA office. To find your local FSA county office, visit https://offices.usda.gov.

---

**Guaranteed Loan Program**

FSA guaranteed loans allow lenders to provide agricultural credit to farmers who do not meet the lender's normal underwriting criteria. Farmers and ranchers apply for a guaranteed loan through a lender, and the lender arranges for the guarantee. FSA can guarantee up to 95 percent of the loss of principal and interest on a loan. Guaranteed loans can be used for both farm ownership and operating purposes.
Guaranteed farm ownership loans can be used to purchase farmland, construct or repair buildings, develop farmland to promote soil and water conservation or to refinance debt.

Guaranteed operating loans can be used to purchase livestock, farm equipment, feed, seed, fuel, farm chemicals, insurance and other operating expenses.

FSA can guarantee farm ownership and operating loans up to $1,392,000. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

**Farm Service Agency (FSA) and Risk Management Agency (RMA) to Prevent Fraud, Waste, and Abuse**

FSA supports the RMA in the prevention of fraud, waste and abuse of the Federal Crop Insurance Program. FSA has been, and will continue to, assist RMA and insurance providers by monitoring crop conditions throughout the growing season. FSA will continue to refer all suspected cases of fraud, waste and abuse directly to RMA. Producers can report suspected cases to the county office staff, the RMA office, or the Office of the Inspector General.

**AskFSA**

Are you looking for answers to your FSA questions? Then ASK FSA at askfsa.custhelp.com.

AskFSA is an online resource that helps you easily find information and answers to your FSA questions no matter where you are or what device you use. It is for ALL customers, including underserved farmers and ranchers who wish to be enrolled in FSA loans, farm, and conservation programs.

Through AskFSA you can:

- Access our knowledge base 24/7
- Receive answers to your questions faster
- Submit a question and receive a timely response from an FSA expert
- Get notifications when answers important to you and your farming operation are updated
- Customize your account settings and view responses at any time
