The gardening season is now in full harvest mode. In past months, I wrote about soil samples and soil tests. Then I wrote about getting a proper fertilizer recommendation from our USDA partners at the Extension service and Soil Conservation District. I even wrote about the economics and possible cost savings of applying only the recommended fertilizers that your soils need. At home I applied these practices in my garden, in the strawberry beds, the raspberry beds and in the pasture. I spent less money by applying the practice that I would have if I had made a experienced guess.

My pastures (all two acres) are carrying 7 calves and producing enough grass to feed them all. It is gratifying to see that actual science at work when properly applied. In the garden, everything we planted is now or will be soon ready for the picking, are plentiful, large and full of flavor. Things we can control are the variety planted, soil nutrition, nutrients in the right proportions and moisture level through irrigation. Things we cannot control are sunlight, rain, wind and air temperature which are provided by mother nature.
Next to consider is storage for all our production from the past year. Vegetables need sold, canned or frozen. Field crops stored in cleaned bins, cleaned hay sheds and readied for sale or personal use throughout the fall and winter.

A critical aspect here is to consider the business side of agriculture. All summer has been cash expenditures. Selling product now or later will bring cash in and determine our overall financial success. By holding it for a later sale, will the product increase or decrease in value. All these decisions are made and hopefully increase the success we all work so hard to accomplish.

There never seems to be enough time to do it all, even though we try to. My experience in Alaska is residents here try to do more than elsewhere due to it being light later and earlier in the day. That means we can all do more work or more play or both.

Soil Rental Rates for the Conservation Reserve Program Updated for 2018

The Farm Service Agency (FSA) has released updated 2018 Conservation Reserve Program (CRP) for Soil Rental Rates. These rental rates are soil-specific estimates of dryland rental rates that FSA uses to set maximum payment rates for CRP offer and contracts. Soil Rental Rates were last updated in 2017. Virtually all Soil Rental Rates have changes for 2018. The average Soil Rental Rate for Alaska is $45.00. The CRP – Grasslands rental rate is $4.00. For soil-specific rental rate information, please contact your local USDA service center. For more information on the Conservation Reserve Program, please visit www.fsa.usda.gov/CRP.

USDA Announced Signup for the 2018 Reimbursement Transportation Program

Program Helps Offset Cost for Farmers and Ranchers Outside the Contiguous U.S.

The U.S. Department of Agriculture (USDA) Alaska Farm Service Agency (FSA) announced to farmers and ranchers residing outside the contiguous continental United States that the Reimbursement Transportation Cost Payment Program (RTCP) for fiscal year 2018 began on July 16, 2018, and will end on Sept. 7, 2018.

The 2014 Farm Bill reauthorized RTCP, which offsets a portion of the costs of transporting agricultural products over long distances. The program allows farmers and ranchers in Alaska, Hawaii and insular areas including the Commonwealth of Puerto Rico, Guam, American Samoa, Commonwealth of Northern Mariana Islands, Virgin Islands of the United States, Federated States of Micronesia, Republic of the Marshall Islands and Republic of Palau, to recover any transportation costs.
RTCP payments are calculated based on the costs incurred for transportation of the agricultural commodity or inputs during a fiscal year, subject to an $8,000 per producer cap per fiscal year. In the event that claims for payments exceed the funds available from the program for a fiscal year, payments will be reduced on a pro-rata basis.

For more information on RTCP, farmers and ranchers in the eligible areas can visit their administrative FSA county office or the FSA website at [www.fsa.usda.gov/pricesupport](http://www.fsa.usda.gov/pricesupport). To find your local FSA county office, visit [http://offices.usda.gov](http://offices.usda.gov) or [www.fsa.usda.gov/ak](http://www.fsa.usda.gov/ak).

**Farm Reconstitutions**

When changes in farm ownership or operation take place, a farm reconstitution is necessary. The reconstitution — or recon — is the process of combining or dividing farms or tracts of land based on the farming operation.

To be effective for the current Fiscal Year (FY), farm combinations and farm divisions must be requested by **August 1 of the FY** for farms subject to the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) program. A reconstitution is considered to be requested when all:

- of the required signatures are on FSA-155
- other applicable documentation, such as proof of ownership, is submitted.

Total Conservation Reserve Program (CRP) and non-ARC/PLC farms may be reconstituted at any time.

The following are the different methods used when doing a farm recon:

**Estate Method** — the division of bases, allotments and quotas for a parent farm among heirs in settling an estate;

**Designation of Landowner Method** — may be used when (1) part of a farm is sold or ownership is transferred; (2) an entire farm is sold to two or more persons; (3) farm ownership is transferred to two or more persons; (4) part of a tract is sold or ownership is transferred; (5) a tract is sold to two or more persons; or (6) tract ownership is transferred to two or more persons. In order to use this method the land sold must have been owned for at least three years, or a waiver granted, and the buyer and seller must sign a Memorandum of Understanding;

**DCP Cropland Method** — the division of bases in the same proportion that the DCP cropland for each resulting tract relates to the DCP cropland on the parent tract;

**Default Method** — the division of bases for a parent farm with each tract maintaining the bases attributed to the tract level when the reconstitution is initiated in the system.

**Farm Storage Facility Loans**

FSA’s Farm Storage Facility Loan (FSFL) program provides low-interest financing to producers to build or upgrade storage facilities and to purchase portable (new or used) structures, equipment and storage and handling trucks.

The low-interest funds can be used to build or upgrade permanent facilities to store commodities. Eligible commodities include corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley, minor oilseeds harvested as whole grain, pulse crops (lentils, chickpeas and dry peas), hay, honey, renewable biomass, fruits, nuts and
vegetables for cold storage facilities, floriculture, hops, maple sap, rye, milk, cheese, butter, yogurt, meat and poultry (unprocessed), eggs, and aquaculture (excluding systems that maintain live animals through uptake and discharge of water). Qualified facilities include grain bins, hay barns and cold storage facilities for eligible commodities.

Loans up to $50,000 can be secured by a promissory note/security agreement and loans between $50,000 and $100,000 may require additional security. Loans exceeding $100,000 require additional security.

Producers do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.

To learn more about the FSA Farm Storage Facility Loan, visit www.fsa.usda.gov/price-support or contact your local FSA county office. To find your local FSA county office, visit http://offices.usda.gov.

Maintaining the Quality of Farm-Stored Loan Grain

Bins are ideally designed to hold a level volume of grain. When bins are overfilled and grain is heaped up, airflow is hindered and the chance of spoilage increases.

Producers who take out marketing assistance loans and use the farm-stored grain as collateral should remember that they are responsible for maintaining the quality of the grain through the term of the loan.

Unauthorized Disposition of Grain

If loan grain has been disposed of through feeding, selling or any other form of disposal without prior written authorization from the county office staff, it is considered unauthorized disposition. The financial penalties for unauthorized dispositions are severe and a producer’s name will be placed on a loan violation list for a two-year period. Always call before you haul any grain under loan.

Livestock Inventory Records

Producers are reminded to keep updated livestock inventory records. These records are necessary in the event of a natural disaster.

When disasters strike, the USDA Farm Service Agency (FSA) can assist producers who suffered excessive livestock death losses and grazing or feed losses due to eligible natural disasters.

To participate in livestock disaster assistance programs, producers will be required to provide verifiable documentation of death losses resulting from an eligible adverse weather event and must submit a notice of loss to their local FSA office within 30 calendar days of when the loss of livestock is apparent. For grazing or feed losses, producers must submit a notice of loss to their local FSA office within 30 calendar days of when the loss is apparent and should maintain documentation and receipts.

Producers should record all pertinent information regarding livestock inventory records including:

- Documentation of the number, kind, type, and weight range of livestock
- Beginning inventory supported by birth recordings or purchase receipts;
USDA Offers Targeted Farm Loan Funding for Underserved Groups and Beginning Farmers

The USDA Farm Service Agency (FSA) reminds producers that FSA offers targeted farm ownership and farm operating loans to assist underserved applicants as well as beginning farmers and ranchers.

USDA defines underserved applicants as a group whose members have been subjected to racial, ethnic, or gender prejudice because of their identity as members of the group without regard to their individual qualities. For farm loan program purposes, targeted underserved groups are women, African Americans, American Indians and Alaskan Natives, Hispanics and Asians and Pacific Islanders.

Underserved or beginning farmers and ranchers who cannot obtain commercial credit from a bank can apply for either FSA direct loans or guaranteed loans. Direct loans are made to applicants by FSA. Guaranteed loans are made by lending institutions who arrange for FSA to guarantee the loan. FSA can guarantee up to 95 percent of the loss of principal and interest on a loan. The FSA guarantee allows lenders to make agricultural credit available to producers who do not meet the lender's normal underwriting criteria.

The direct and guaranteed loan program provides for two types of loans: farm ownership loans and farm operating loans. In addition to customary farm operating and ownership loans, FSA now offers Microloans through the direct loan program. The focus of Microloans is on the financing needs of small, beginning farmer, niche and non-traditional farm operations. Microloans are available for both ownership and operating finance needs. To learn more about microloans, visit www.fsa.usda.gov/microloans.
To qualify as a beginning producer, the individual or entity must meet the eligibility requirements outlined for direct or guaranteed loans. Additionally, individuals and all entity members must have operated a farm for less than 10 years. Applicants must materially or substantially participate in the operation.

For more information on FSA’s farm loan programs and targeted underserved and beginning farmer guidelines, visit www.fsa.usda.gov/farmloans.

Persons with disabilities who require accommodations to attend or participate in these meetings and/or events should contact Lloyd Wilhelm, Northern CED, at (907) 895-4242, Erin Sturdivant, Southern CED, at (907) 761-7754 or Federal Relay Service at 1-800-877-8339.

USDA is an equal opportunity provider, employer and lender.
