Some of our Alaska high schools offer Agriculture Education as part of the educational curriculum. Many more schools in Alaska do not. When considering Agriculture Education, there is an opportunity to add to, enhance and grow a student’s educational resume. Urban Agriculture is one of the many growth areas for many who want to be involved in Agriculture. The latest Census of Agriculture has some very curious, informative and telling information about Alaskan Agriculture.

Consider these facts about agriculture in Alaska and nationwide.

1. One U.S. farm feeds 166 people annually in the U.S. and abroad.
2. 25% of all farmers are beginning farmers.
3. The average age of all U.S. farmers is 56.
4. Women make up 36% of farm operators.
5. About 11% of U.S. farmers are serving or have served in the military
6. Alaska has the highest growth of new farmers than any other state
7. More than half of America’s farmers intentionally provide habitat for wildlife.
8. Over 50,000 jobs in agriculture are available per year in the U.S. yet there aren’t enough qualified graduates to fill the spots.
9. Jobs in Agriculture can be in the field, the lab, factory, transportation, restaurant, classroom, even the board room.
10. Everyone participates in agriculture every day, eating 3 meals/day and the clothes we wear.

Agriculture Education for high school students is much bigger than another math or science class. Agriculture Education and the associated FFA program prepares students to enter the work force, enter college or trade school. Being able to talk to people, give presentations, stand in front of a group, conduct meetings, and lead a team are all taught and practiced in Agriculture Education and the associated Future Farmers of America (FFA) chapter. No other part of a student’s high school education can match what Ag. Ed. and FFA does. Farming today in the words of Earl Coke is, “a highly integrated profession, practiced by professionals, who apply modern business techniques, scientific knowledge and mechanical innovations to their operations”. In short, they feed the world.

As a shout out to the Alaska FFA programs state wide. 5 years ago, there were 6 chapters and now there are 18. Members have grown in the same period from 117 to 406. I would encourage all who read this to consider ways to help, grow, begin, cheer for and sustain the future of Ag. Ed and FFA in Alaska’s schools, then act of those considerations.

---

**USDA Reminds Farmers and Ranchers of Nov. 1 Deadline to Submit Your RTCP Receipts**

The Reimbursement Transportation Cost Program (RTCP) signup ended on September 6, 2019. This program covered transportation expenses incurred from October 1, 2018 through September 30, 2019. If you applied for the RTCP program, and have not turned all your receipts in to the FSA office, now is the time to do so. Applicants will have until COB on Nov. 1, 2019, to provide supporting documentation. If you have any questions, contact your local FSA office.

For more information on RTCP, farmers and ranchers in the eligible areas can visit their FSA county office or the FSA website at [fsa.usda.gov/pricesupport](http://fsa.usda.gov/pricesupport). To find your local FSA county office, visit [www.fsa.usda.gov](http://www.fsa.usda.gov).
USDA Opens Signup for Market Facilitation Program

Enrollment Open through Dec. 6

Signup is ongoing for the Market Facilitation Program (MFP), a U.S. Department of Agriculture (USDA) program to assist farmers who continue to suffer from damages because of unjustified trade retaliation from foreign nations. Through MFP, USDA will provide up to $14.5 billion in direct payments to impacted producers, part of a broader trade relief package announced in late July. The sign-up period runs through Dec. 6, 2019.

MFP payments will be made to producers of certain non-specialty and specialty crops as well as dairy and hog producers.

Non-Specialty Crops

MFP payments will be made to producers of alfalfa hay, barley, canola, corn, crambe, dried beans, dry peas, extra-long staple cotton, flaxseed, lentils, long grain and medium grain rice, millet, mustard seed, oats, peanuts, rapeseed, rye, safflower, sesame seed, small and large chickpeas, sorghum, soybeans, sunflower seed, temperate japonica rice, triticale, upland cotton, and wheat.

MFP assistance for 2019 crops is based on a single county payment rate multiplied by a farm’s total plantings to the MFP-eligible crops in aggregate in 2019. Those per acre payments are not dependent on which of those crops are planted in 2019. A producer’s total payment-eligible plantings cannot exceed total 2018 plantings. View payment rates by county.

Dairy and Hogs

Dairy producers who were in business as of June 1, 2019, will receive a per hundredweight payment on production history, and hog producers will receive a payment based on the number of live hogs owned on a day selected by the producer between April 1 and May 15, 2019.

Specialty Crops

MFP payments will also be made to producers of almonds, cranberries, cultivated ginseng, fresh grapes, fresh sweet cherries, hazelnuts, macadamia nuts, pecans, pistachios, and walnuts. Each specialty crop will receive a payment based on 2019 acres of fruit or nut bearing plants, or in the case of ginseng, based on harvested acres in 2019.

More Information

Payments will be made in up to three tranches, with the second and third tranches evaluated as market conditions and trade opportunities dictate. If conditions warrant, the second and third tranches will be made in November and early January.

MFP payments are limited to a combined $250,000 for non-specialty crops per person or legal entity. MFP payments are also limited to a combined $250,000 for dairy and hog producers and a combined $250,000 for specialty crop producers. However, no applicant can receive more than $500,000. Eligible applicants must also have an average adjusted gross income (AGI) for tax years 2015, 2016, and 2017 of less than $900,000, or 75 percent of the person’s or legal entity’s average
AGI for those tax years must have been derived from farming and ranching. Applicants must also comply with the provisions of the Highly Erodible Land and Wetland Conservation regulations.

More information can be found on farmers.gov/mfp, including payment information and a program application.

**USDA Opens 2019 Enrollment for Agriculture Risk Coverage and Price Loss Coverage Programs**

Agricultural producers can now enroll in the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs, two popular safety net programs, for the 2019 crop year. Interested producers must sign up for either program by March 15, 2020.

The 2018 Farm Bill reauthorized and made updates to these two USDA Farm Service Agency (FSA) programs. ARC provides income support payments on historical base acres when actual crop revenue declines below a specified guarantee level. PLC program provides income support payments on historical base acres when the price for a covered commodity falls below its effective reference price.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium grain rice (which includes short grain rice), safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

Updated provisions in the 2018 Farm Bill allow producers with an interest in a farm to enroll and elect coverage in crop-by-crop ARC-County or PLC, or ARC-Individual for the entire farm, for program year 2019. The election applies to both the 2019 and 2020 crop years. If a 2019 election is not submitted by the deadline of March 15, 2020, the election defaults to the current elections of the crops on the farm established under the 2014 Farm Bill. No payments will be earned in 2019 if the election defaults.

For crop years 2021 through 2023, producers will have an opportunity to make new elections. Farm owners cannot enroll in either program unless they have a share interest in the farm.

Once the 2019 election and enrollment are completed, producers on the farm for 2020 can complete an enrollment contract for the 2020 crop year beginning Oct. 7, 2019 and ending June 30, 2020.

Although 2019 enrollment begins Sept. 3, 2019 and must occur first, a producer waiting until Oct. 7, 2019 to enroll is afforded the opportunity to enroll in either program for both 2019 and 2020 during the same office visit. During this time, farm owners have a one-time opportunity to update PLC payment yields that takes effect beginning with crop year 2020. If the owner accompanies the producer to the office, the yield update may be completed during the same office visit.

In partnership with USDA, the University of Illinois and Texas A&M University are offering web-based decision tools to assist producers in making informed, educated decisions using crop data specific to their respective farming operations. These decision tools can be found at fsa.usda.gov/arc-plc.

Producers are reminded that enrolling in ARC or PLC programs can impact eligibility for some forms of crop insurance. Producers who elect and enroll in PLC also have the option of purchasing
Supplemental Coverage Option (SCO) through the USDA Risk Management Agency (RMA). Producers of covered commodities who elect ARC are ineligible for SCO on their planted acres.

Upland cotton farmers who choose to enroll seed cotton base acres in ARC or PLC are ineligible for the stacked income protection plan (STAX) on their planted cotton acres. To be eligible for STAX coverage, producers must not enroll their seed cotton base acres into the ARC or PLC programs.

For more information on ARC and PLC, download our program fact sheet or our 2014-2018 farm bills comparison fact sheet, or visit fsa.usda.gov/arc-plc.

2019 Livestock Forage Losses

Producers in Kenai Peninsula, Anchorage, Matanuska Susitna, and Ketchikan Gateway Boroughs are eligible to apply for 2019 Livestock Forage Disaster Program (LFP) benefits on improved pasture.

LFP provides compensation to eligible livestock producers who suffer grazing losses for covered livestock due to drought on privately owned or cash leased land or fire on federally managed land.

County committees can only accept LFP applications after notification is received by the National Office of qualifying drought or if a federal agency prohibits producers from grazing normal permitted livestock on federally managed lands due to qualifying fire. Eligible livestock producers must complete a CCC-853 and the required supporting documentation no later than January 30, 2020, for 2019 losses. Additional Information about LFP, including eligible livestock and fire criteria, is available at your local FSA office or online at: www.fsa.usda.gov.

New Farmers.gov Feature Helps Producers Find Farm Loans that Fit Their Operation

A new online tool can help farmers and ranchers find information on U.S. Department of Agriculture (USDA) farm loans that may best fit their operations. USDA has launched the new Farm Loan Discovery Tool as the newest feature on farmers.gov, the Department’s self-service website for farmers.

USDA’s Farm Service Agency (FSA) offers a variety of loan options to help farmers finance their operations. From buying land to financing the purchase of equipment, FSA loans can help. Compared to this time last year, FSA has seen an 18 percent increase in the amount it has obligated for direct farm ownership loans, and through the 2018 Farm Bill, has increased the limits for several loan products.

USDA conducted field research in eight states, gathering input from farmers and FSA farm loan staff to better understand their needs and challenges.

How the Tool Works

Farmers who are looking for financing options to operate a farm or buy land can answer a few simple questions about what they are looking to fund and how much money they need to borrow.
After submitting their answers, farmers will be provided information on farm loans that best fit their specific needs. The loan application and additional resources also will be provided.

Farmers can download application quick guides that outline what to expect from preparing an application to receiving a loan decision. There are four guides that cover loans to individuals, entities, and youth, as well as information on microloans. The guides include general eligibility requirements and a list of required forms and documentation for each type of loan. These guides can help farmers prepare before their first USDA service center visit with a loan officer.

Farmers can access the *Farm Loan Discovery Tool* by visiting [farmers.gov/fund](http://farmers.gov/fund) and clicking the “Start” button. Follow the prompts and answer five simple questions to receive loan information that is applicable to your agricultural operation. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

**About Farmers.gov**

In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where farmers will be able to apply for programs, process transactions, and manage accounts.

The *Farm Loan Discovery Tool* is one of many resources on farmers.gov to help connect farmers to information that can help their operations. Earlier this year, USDA launched the *My Financial Information* feature, which enables farmers to view their loan information, history, payments, and alerts by logging into the website.

USDA is building farmers.gov for farmers, by farmers. In addition to the interactive farm loan features, the site also offers a Disaster Assistance Discovery Tool. Farmers can visit [farmers.gov/recover/disaster-assistance-tool#step-1](http://farmers.gov/recover/disaster-assistance-tool#step-1) to find disaster assistance programs that can help their operation recover from natural disasters.

With feedback from customers and field employees who serve those customers, farmers.gov delivers farmer-focused features through an agile, iterative process to deliver the greatest immediate value to America’s agricultural producers – helping farmers and ranchers do right, and feed everyone.

For more information or to locate your USDA Service Center, visit [farmers.gov](http://farmers.gov).

---

**Disaster Set-Aside (DSA) Program**

FSA borrowers with farms located in designated primary or contiguous disaster areas who are unable to make their scheduled FSA loan payments should consider the Disaster Set-Aside (DSA) program.

DSA is available to producers who suffered losses as a result of a natural disaster and is intended to relieve immediate and temporary financial stress. FSA is authorized to consider setting aside the portion of a payment/s needed for the operation to continue on a viable scale.

Borrowers must have at least two years left on the term of their loan in order to qualify.
Borrowers have eight months from the date of the disaster designation to submit a complete application. The application must include a written request for DSA signed by all parties liable for the debt along with production records and financial history for the operating year in which the disaster occurred. FSA may request additional information from the borrower in order to determine eligibility.

All farm loans must be current or less than 90 days past due at the time the DSA application is complete. Borrowers may not set aside more than one installment on each loan.

The amount set-aside, including interest accrued on the principal portion of the set-aside, is due on or before the final due date of the loan.

For more information, contact your local FSA farm loan office.

---

**Several Areas in Alaska are Eligible for Emergency Loans**

Anchorage, Kenai Peninsula, and Matanuska-Susitna Boroughs were declared a primary disaster due to drought and heat using the streamlined Secretarial Disaster Designation process. In addition, producers in the contiguous Alaska boroughs of Denali, Kodiak Island, and Lake and Peninsula, along with the census areas of Bethel, Southeast Fairbanks, Valdez-Cordova, and Yukon-Koyukuk, are included in this designation. Under this designation, producers with operations in any primary or contiguous county are eligible to apply for low interest emergency loans.

The streamlined disaster designation process issues a drought disaster declaration when a county has experienced a drought intensity value of at least a D2 (severe drought) level for eight consecutive weeks based on the U.S. Drought Monitor during the crop year.

Emergency loans help producers recover from production and physical losses due to drought, flooding and other natural disasters or quarantine.

Producers have eight months from the date of the declaration to apply for emergency loan assistance. FSA will consider each loan application on its own merits, taking into account the extent of losses, security available and repayment ability. Producers can borrow up to 100 percent of actual production or physical losses, to a maximum amount of $500,000.

For more information about emergency loans, please contact your local FSA office or visit [www.fsa.usda.gov](http://www.fsa.usda.gov).

---

All Alaska State and County FSA Offices will be closed on October 14, 2019.

Persons with disabilities who require accommodations to attend or participate in these meetings and/or events should contact Lloyd Wilhelm, Northern CED, at (907) 895-4242, Erin Sturdivant, Southern CED, at (907) 761-7754 or Federal Relay Service at 1-800-877-8339.
