November is here and as we look forward to the Thanksgiving Holiday, we have much to be thankful for. Many of us had the most wonderful summer weather for growing our crops and gardens. Personally, I irrigated more this year than ever before. History tells us many fun facts about the first Thanksgiving, the origins and traditions of this marvelous holiday.

This Thanksgiving, I express to each of you, my gratitude for you being a farmer. Because you chose to be a farmer, all have a wide variety and wonderful selection of safe foods to enjoy from all over Alaska and America. We also enjoy many non-food products to deepen that enjoyment. The traditional turkey, cranberry sauce, potatoes, rolls, pumpkin and pecan pie with ice cream, all come from dedicated, hardworking farmers. Without the farmer, we would not be able to celebrate the food traditions of this wonderful Holiday.

Do you know where all these traditional holiday foods come from? Can your family identify the state where it was grown? Is your turkey or ham from an Alaskan farmer or from a farm in Minnesota or North Carolina? Are the potatoes Alaskan grown, or from a farm in Idaho or Washington? Do the green beans for the traditional casserole come from your own garden or
It would be difficult to grow cranberries, pecans and sweet potatoes here, but I have known some valiant gardeners who attempted sweet potatoes. How much of your holiday meal can be sourced to an Alaskan farmer?

Our nation has the most productive farmers and ranchers in the world, each producing enough food to feed another 155 persons. An estimated 11% of the US workforce is employed in agriculture and related industries. This Thanksgiving season join others in sharing with your friends your Holiday celebration with Alaska Grown foods on social media. Encourage the kids to research where each food item comes from. Remember the Founding Farmers like George Washington who issued a proclamation designating a “Day of Public Thanksgiving” as the 4th Thursday in November. Lastly, in giving thanks, also Thank a Farmer.

Update Your Records

FSA is cleaning up our producer record database. If you have any unreported changes of address, zip code, phone number, email address or an incorrect name or business name on file they need to be reported to our office. Changes in your farm operation, like the addition of a farm by lease or purchase, need to be reported to our office as well. Producers participating in FSA and NRCS programs are required to timely report changes in their farming operation to the County Committee in writing and update their CCC-902 Farm Operating Plan. If you have any updates or corrections, please call your local FSA office to update your records.

Alaska FSA Encourages Farmers and Ranchers to Vote in County Committee Elections

The 2019 Farm Service Agency County Committee Elections will begin on Nov. 4, when ballots will be mailed to eligible voters. The deadline to return the ballots to local FSA offices, or to be postmarked, is Dec. 2, 2019.

County committee members are an important component of the operations of FSA and provide a link between the agricultural community and USDA. Farmers and ranchers elected to county committees help deliver FSA programs at the local level, applying their knowledge and judgment to make decisions on commodity price support programs; conservation programs; incentive indemnity and disaster programs for some commodities; emergency programs and eligibility. FSA committees operate within official regulations designed to carry out federal laws.

To be an eligible voter, farmers and ranchers must participate or cooperate in an FSA program. A person who is not of legal voting age but supervises and conducts the farming operations of an entire farm, may also be eligible to vote.

Eligible voters in the Northern County local administrative area (LAA 1) and the Southern County local administrative area (LAA 2), who do not receive a ballot can obtain one from their local USDA Service Center.

Newly elected committee members will take office Jan. 1, 2020.
The following are this year’s candidates who have been nominated in their LAA’s to serve as a committee member. All candidates have agreed to serve if elected.

**Northern County LAA-1** Includes the area that encompasses the following areas: North Slope, Northwest Arctic, Yukon-Koyukuk and Nome Census areas, as well as the Denali and Fairbanks North Star Borough.

**McLaren “Mac” Carter** resides in Central, AK, a diversified farmers market vegetable producer who raises a large variety of crops from tomatoes to potatoes and has lived and farmed in the Central, Alaska community for 23 years. The Carter’s are very involved with the community and each year celebrate an annual bringing in of the crops through a community festival for the whole area.

**Rebecca “Becky” Hammond** resides on an 80 acre farm east of Fairbanks, AK. For many years produced brome hay on their farm to feed their animals. Currently raises angora goats, merino sheep, and angora rabbits for fiber and meat. She also raises poultry for show, eggs, and meat. Becky stays very busy processing fibers by hand spinning, hand dying, and creating different wares from the fiber.

**Mark W. Kern** resides on Eielson Farm Road in Salcha, AK. Mark has a small farm that has produced grass hay and raised animals. Mark actively supports agriculture in Alaska.

**Election Ballots will be Counted in Public at the Northern County FSA Office at 10:00 a.m. on December 5, 2019.**

**Southern County LAA-2** Includes the municipality of Anchorage, Valdez/Cordova Census area south of Chugach Mtns. Kenai Peninsula Borough north of Kasilof River.

**Abby Ala,** a 2nd generation farmer in Soldotna on land that has been in her family for over 71 years. Abby operates a greenhouse, producing vegetables for local restaurants, markets and CSA.

**Amy Daugherty** has been a resident of Southeast Alaska for 45 years. She and her husband owned and operated Merryweather Farm in remote Gustavus, near Glacier Bay National Park for seven years. Their farm sold to inns, restaurants and local food enthusiasts at farmer’s market type venues.

**Election Ballots will be Counted in Public at the Southern County FSA Office at 2:00 p.m. on December 5, 2019.**

More information on county committees, such as fact sheets, can be found on the FSA website at [https://www.fsa.usda.gov/elections](https://www.fsa.usda.gov/elections) or at [https://www.fsa.usda.gov/ak](https://www.fsa.usda.gov/ak).

**USDA Safety Net Program Enrollment Opens for 2020**

Agricultural producers now can enroll in the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs – two U.S. Department of Agriculture (USDA) safety net programs – for the 2020 crop year. Meanwhile, producers who enrolled farms for the 2018 crop year have started receiving more than $1.5 billion for covered commodities for which payments were triggered under such programs.

ARC provides income support payments on historical base acres when actual crop revenue declines below a specified guaranteed level. PLC provides income support payments on historical base acres when the effective price for a covered commodity falls below its reference price. The 2018 Farm Bill reauthorized and updated both programs.
Signup for the 2020 crop year closes June 30, 2020, while signup for the 2019 crop year closes March 15, 2020. Producers who have not yet enrolled for 2019 can enroll for both 2019 and 2020 during the same visit to an FSA county office.

ARC and PLC have options for the farm operator who is actively farming the land as well as the owner of the land. Farm owners also have a one-time opportunity to update PLC payment yields beginning with crop year 2020. If the farm owner and producer visit the FSA county office together, FSA can also update yield information during that visit.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

2018 Crop Year ARC and PLC Payments

FSA began processing payments last week for 2018 ARC-County (ARC-CO) and PLC on covered commodities that met payment triggers on enrolled farms in the 2018 crop year. In addition to the $1.5 billion now in process, FSA anticipates it will issue another $1 billion in November once USDA’s National Agricultural Statistics Service publishes additional commodity prices for the 2018 crop.

Producers who had 2018 covered commodities enrolled in ARC-CO can visit www.fsa.usda.gov/arc-plc for payment rates applicable to their county and each covered commodity. For farms and covered commodities enrolled in 2018 PLC, the following crops met payment triggers: barley, canola, corn, dry peas, grain sorghum, lentils, peanuts, and wheat.

Oats and soybeans did not meet 2018 PLC payment triggers.

2018 PLC payment rates for the following covered commodities have not been determined: crambe, flaxseed, large and small chickpeas, long and medium grain rice, mustard seed, rapeseed, safflower, seed cotton, sesame seed, sunflower seed and temperate Japonica rice.

More Information

For more information on ARC and PLC including two online decision tools that assist producers in making enrollment and election decisions specific to their operations, visit the ARC and PLC webpage.

New Farmers.gov Feature Helps Producers Find Farm Loans that Fit Their Operation

A new online tool can help farmers and ranchers find information on U.S. Department of Agriculture (USDA) farm loans that may best fit their operations. USDA has launched the new Farm Loan Discovery Tool as the newest feature on farmers.gov, the Department’s self-service website for farmers.

USDA’s Farm Service Agency (FSA) offers a variety of loan options to help farmers finance their operations. From buying land to financing the purchase of equipment, FSA loans can help. Compared to this time last year, FSA has seen an 18 percent increase in the amount it has obligated for direct farm ownership loans, and through the 2018 Farm Bill, has increased the limits for several loan products.

USDA conducted field research in eight states, gathering input from farmers and FSA farm loan staff to better understand their needs and challenges.
How the Tool Works

Farmers who are looking for financing options to operate a farm or buy land can answer a few simple questions about what they are looking to fund and how much money they need to borrow. After submitting their answers, farmers will be provided information on farm loans that best fit their specific needs. The loan application and additional resources also will be provided.

Farmers can download application quick guides that outline what to expect from preparing an application to receiving a loan decision. There are four guides that cover loans to individuals, entities, and youth, as well as information on microloans. The guides include general eligibility requirements and a list of required forms and documentation for each type of loan. These guides can help farmers prepare before their first USDA service center visit with a loan officer.

Farmers can access the Farm Loan Discovery Tool by visiting farmers.gov/fund and clicking the “Start” button. Follow the prompts and answer five simple questions to receive loan information that is applicable to your agricultural operation. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

About Farmers.gov

In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where farmers will be able to apply for programs, process transactions, and manage accounts.

The Farm Loan Discovery Tool is one of many resources on farmers.gov to help connect farmers to information that can help their operations. Earlier this year, USDA launched the My Financial Information feature, which enables farmers to view their loan information, history, payments, and alerts by logging into the website.

USDA is building farmers.gov for farmers, by farmers. In addition to the interactive farm loan features, the site also offers a Disaster Assistance Discovery Tool. Farmers can visit farmers.gov/recover/disaster-assistance-tool#step-1 to find disaster assistance programs that can help their operation recover from natural disasters.

With feedback from customers and field employees who serve those customers, farmers.gov delivers farmer-focused features through an agile, iterative process to deliver the greatest immediate value to America’s agricultural producers – helping farmers and ranchers do right, and feed everyone.

Preauthorized Debit Available for Farm Loan Borrowers

USDA Farm Service Agency (FSA) has implemented pre-authorized debit (PAD) for Farm Loan Program (FLP) borrowers. PAD is a voluntary and alternative method for making weekly, bi-weekly, monthly, quarterly, semi-annual or annual payments on loans.

PAD payments are pre-authorized transactions that allow the National Financial and Accounting Operations Center (NFAOC) to electronically collect loan payments from a customer’s account at a financial institution.

PAD may be useful for borrowers who use nonfarm income from regular wages or salary to make payments on loans or adjustment offers or for payments from seasonal produce stands. PAD can only be established for future payments.

To request PAD, customers, along with their financial institution, must fill out form RD 3550-28. This form has no expiration date, but a separate form RD 3550-28 must be completed for each loan to which payments are

If you have a “filter” on the account at your financial institution, you will need to provide the financial institution with the following information: Origination ID: 1220040804, Agency Name: USDA RD DCFO.

PAD is offered by FSA at no cost. Check with your financial institution to discuss any potential cost. Preauthorized debit has no expiration date, but you can cancel at any time by submitting a written request to your local FSA office. If a preauthorized debit agreement receives three payment rejections within a three-month period, the preauthorized debit agreement will be cancelled by FSA. The payment amount and due date of your loan is not affected by a cancellation of preauthorized debit. You are responsible to ensure your full payment is made by the due date.

For more information about PAD, contact your local FSA office. To find a local FSA office, visit http://offices.usda.gov

Environmental Review Required Before Project Implementation

The National Environmental Policy Act (NEPA) requires Federal agencies to consider all potential environmental impacts for federally-funded projects before the project is approved.

For all Farm Service Agency (FSA) programs, an environmental review must be completed before actions are approved, such as site preparation or ground disturbance. These programs include, but are not limited to, the Emergency Conservation Program (ECP), Farm Storage Facility Loan (FSFL) program and Farm Loans. If project implementation begins before FSA has completed an environmental review, this will result in a denial of the request. There are exceptions regarding the Stafford Act and emergencies. It is important to wait until you receive written approval of your project proposal before starting any actions, including, but not limited to, vegetation clearing, site preparation or ground disturbance.

Remember to contact your local FSA office early in your planning process to determine what level of environmental review is required for your program application so that it can be completed timely.

Applications cannot be approved contingent upon the completion of an environmental review. FSA must have copies of all permits and plans before an application can be approved.

Payments to Deceased Producers

In order to claim a Farm Service Agency (FSA) payment on behalf of a deceased producer, all program conditions for the payment must have been met before the applicable producer’s date of death.

If a producer earned a FSA payment prior to his or her death, the following is the order of precedence for the representatives of the producer:

- administrator or executor of the estate
- the surviving spouse
- surviving sons and daughters, including adopted children
- surviving father and mother
- surviving brothers and sisters
- heirs of the deceased person who would be entitled to payment according to the State law
In order for FSA to release the payment, the legal representative of the deceased producer must file a form FSA-325, to claim the payment for themselves or an estate. The county office will verify and determine that the application, contract, loan agreement, or other similar form requesting payment issuance, was signed by the applicable deadline for such form, by the deceased or a person legally authorized to act on their behalf at that time of application.

If the application, contract or loan agreement form was signed by someone other than the participant who is deceased, FSA will determine whether the person submitting the form has the legal authority to submit the form to compel FSA to pay the deceased participant.

Payments will be issued to the respective representative’s name using the deceased program participant’s tax identification number. Payments made to representatives are subject to offset regulations for debts owed by the deceased.

FSA is not responsible for advising persons in obtaining legal advice on how to obtain program benefits that may be due to a participant who has died, disappeared or who has been declared incompetent.

Livestock Inventory Records

Producers are reminded to keep updated livestock inventory records. These records are necessary in the event of a natural disaster.

When disasters strike, the USDA Farm Service Agency (FSA) can assist producers who suffered excessive livestock death losses and grazing or feed losses due to eligible natural disasters.

To participate in livestock disaster assistance programs, producers will be required to provide verifiable documentation of death losses resulting from an eligible adverse weather event and must submit a notice of loss to their local FSA office within 30 calendar days of when the loss of livestock is apparent. For grazing or feed losses, producers must submit a notice of loss to their local FSA office within 30 calendar days of when the loss is apparent and should maintain documentation and receipts.

Producers should record all pertinent information regarding livestock inventory records including:

- Documentation of the number, kind, type, and weight range of livestock
- Beginning inventory supported by birth recordings or purchase receipts

For more information on documentation requirements, contact your local FSA office.

All Alaska State and County FSA Offices will be closed on November 28, 2019.

Persons with disabilities who require accommodations to attend or participate in these meetings and/or events should contact Lloyd Wilhelm, Northern CED, at (907) 895-4242, Erin Sturdivant, Southern CED, at (907) 761-7754 or Federal Relay Service at 1-800-877-8339.
