In This Issue:

- USDA Designates Yavapai County, Arizona, as Primary Natural Disaster Area
- USDA Designates Maricopa County, Arizona, as Primary Natural Disaster Area
- USDA Designates Pinal County, Arizona as Primary Natural Disaster Areas
- USDA to Mail Additional Pre-Filled Applications to Producers Impacted
 by 2020, 2021 Disasters
- USDA Announces Assistance for On-Farm Food Safety Expenses for Specialty Crop Growers
- Borrower Training for Farm Loan Customers
- Using FSA Direct Farm Ownership Loans for Construction

USDA Designates Yavapai County, Arizona, as Primary Natural Disaster Area

This Secretarial natural disaster designation allows the United States Department of Agriculture (USDA) Farm Service Agency (FSA) to extend much-needed emergency credit to producers recovering from natural disasters through emergency loans. Emergency loans can be used to meet various recovery needs including the replacement of essential items such as equipment or livestock, reorganization of a farming operation or the refinance of certain debts. FSA will review the loans based on the extent of losses, security available and repayment ability.

According to the U.S. Drought Monitor, these counties suffered from a drought intensity value during the growing season of 1) D2 Drought-Severe for 8 or more consecutive weeks or 2) D3 Drought-Extreme or D4 Drought-Exceptional.

Impacted Area: Arizona

Triggering Disaster: Drought

Application Deadline: Jan. 13, 2023

Primary Counties Eligible: Yavapai

Contiguous Counties Also Eligible: Arizona: Coconino, Gila, La Paz, Maricopa and Mohave

More Resources

On farmers.gov, the Disaster Assistance Discovery Tool, Disaster Assistance-at-a-Glance fact sheet, and Farm Loan Discovery Tool can help you determine program or loan options. To file a Notice of Loss or to ask questions about available programs, contact your local USDA Service Center.

USDA Designates Maricopa County, Arizona, as Primary Natural Disaster Area

This Secretarial natural disaster designation allows the United States Department of Agriculture (USDA) Farm Service Agency (FSA) to extend much-needed emergency credit to producers recovering from natural disasters through <u>emergency loans</u>. Emergency loans can be used to meet various recovery needs including the replacement of essential items such as equipment or livestock, reorganization of a farming operation or the refinance of certain debts. FSA will review the loans based on the extent of losses, security available and repayment ability.

According to the <u>U.S. Drought Monitor</u>, these counties suffered from a drought intensity value during the growing season of 1) D2 Drought-Severe for 8 or more consecutive weeks or 2) D3 Drought-Extreme or D4 Drought-Exceptional.

Impacted Area: Arizona

Triggering Disaster: Drought

Application Deadline: Jan. 31, 2023

Primary Counties Eligible: Maricopa

Contiguous Counties Also Eligible:

Gila	Pima	Yavapai
La Paz	Pinal	Yuma

USDA to Mail Additional Pre-Filled Applications to Producers Impacted by 2020, 2021 Disasters

The U.S. Department of Agriculture (USDA) today announced another installment (phase) in assistance to commodity and specialty crop producers impacted by natural disaster events in 2020 and 2021. More than 18,000 producers will soon receive new or updated pre-filled disaster applications to offset eligible crop losses. Approximately \$6.4 billion has already been distributed to 165,000 producers through USDA's Farm Service Agency's (FSA) Emergency Relief Program (ERP).

FSA will begin mailing pre-filled applications in late August to producers who have potentially eligible losses and:

• Received crop insurance indemnities for qualifying 2020 and 2021 disaster events after May 2, 2022.

- Received crop insurance indemnities associated with Nursery, Supplemental Coverage Option (SCO), Stacked Income Protection Plan (STAX), Enhanced Coverage Option (ECO) and Margin Protection (MP) policies.
- New primary policyholders not included in the initial insured producer Phase 1 mailing from May 25, 2022, because their claim records had not been filled.
- Certain 2020 prevent plant losses related to qualifying 2020 disaster events that had only been recorded in crop insurance records as related to 2019 adverse weather events and, as such, were not previously provided in applications sent earlier this year.
- New Substantial Beneficial Interest (SBI) records, including SBIs where tax identification numbers were corrected.

Producers are expected to receive assistance direct deposited into their bank account within three business days after they sign and return the pre-filled application to the FSA county office and the county office enters the application into the system.

Before applying any program payment factors or eligibility criteria, it is estimated that this next installment (phase) may generate about \$756 million in assistance.

Emergency Relief Payments to Date

This emergency relief under ERP complements ERP assistance recently provided to more than 165,000 producers who had received crop insurance indemnities and Noninsured Crop Disaster Assistance Program (NAP) payments for qualifying losses. USDA has processed more than 255,000 applications for ERP, and to date, has made approximately \$6.4 billion in payments to commodity and specialty crop producers to help offset eligible losses from qualifying 2020 and 2021 natural disasters. Also, earlier this year, staff processed more than 100,000 payments through the Emergency Livestock Relief Program (ELRP) and paid eligible producers more than \$601.3 million for 2021 grazing losses within days of the program announcement.

Phase Two

The second phase of both ERP and ELRP will be aimed at filling gaps and provide assistance to producers who did not participate in or receive payments through the existing risk management programs that are being leveraged for phase one implementation. USDA will keep producers and stakeholders informed as program details are made available.

More Information

In addition, on Aug. 18, 2022, USDA published a technical correction to the <u>Notice of</u> <u>Funds Availability</u> for ERP and ELRP to clarify how income from the sale of farm equipment and the provision of production inputs and services to farmers, ranchers, foresters, and farm operations are to be considered in the calculation of average adjusted gross farm income. Producers whose average adjusted gross farm income is at least 75% of the producer's the average Adjusted Gross Income can gain access to a higher payment limitation.

ERP and the previously announced ELRP are authorized by the *Extending Government Funding and Delivering Emergency Assistance Act*, which President Biden signed into law

in 2021. The law provided \$10 billion to help agricultural producers impacted by wildfires, droughts, hurricanes, winter storms and other eligible disasters experienced during calendar years 2020 and 2021.

For more information on ERP and ELRP eligibility, program provisions for historically underserved producers as well as Frequently Asked Questions, producers can visit <u>FSA's Emergency Relief webpage</u>. A <u>new public-facing dashboard</u> on the ERP webpage has information on ERP payments that can be sorted by crop type – specialty or non-specialty– specific commodities and state. FSA will update the dashboard every Monday.

Additional USDA disaster assistance information can be found on <u>farmers.gov</u>, including the <u>Disaster Assistance Discovery Tool</u>, <u>Disaster-at-a-Glance fact sheet</u> and <u>Farm Loan</u> <u>Discovery Tool</u>. For FSA and Natural Resources Conservation Service programs, producers should contact their local <u>USDA Service Center</u>. For assistance with a crop insurance claim, producers and landowners should contact their <u>crop insurance agent</u>.

USDA Announces Assistance for On-Farm Food Safety Expenses for Specialty Crop Growers

Agriculture Secretary Tom Vilsack announced that the U.S. Department of Agriculture (USDA) plans to provide up to \$200 million in assistance for specialty crop producers who incur eligible on-farm food safety program expenses to obtain or renew a food safety certification in calendar years 2022 or 2023. USDA's new Food Safety Certification for Specialty Crops (FSCSC) program will help to offset costs for specialty crop producers to comply with regulatory requirements and market-driven food safety certification requirements, which is part of USDA's broader effort to transform the food system to create a more level playing field for small and medium producers and a more balanced, equitable economy for everyone working in food and agriculture.

Specialty crop operations can apply for assistance for eligible expenses related to a 2022 food safety certificate issued on or after June 21, 2022, beginning June 27, 2022. USDA is delivering FSCSC to provide critical assistance for specialty crop operations, with an emphasis on equity in program delivery while building on lessons learned from the COVID-19 pandemic and supply chain disruptions. Vilsack made the announcement from Hollis, N.H., where he toured a local, family-owned farm and highlighted USDA's efforts to help reduce costs for farmers and support local economies by providing significant funding to cut regulatory costs and increase market opportunities for farmers in New Hampshire and across the nation.

Program Details

FSCSC will assist specialty crop operations that incurred eligible on-farm food safety certification and related expenses related to obtaining or renewing a food safety certification in calendar years 2022 and 2023. For each year, FSCSC covers a percentage of the specialty crop operation's cost of obtaining or renewing their certification, as well as a portion of their related expenses.

To be eligible for FSCSC, the applicant must be a specialty crop operation; meet the definition of a small business or very small business; and have paid eligible expenses related to the 2022 (issued on or after June 21, 2022) or 2023 certification.

Specialty crop operations may receive assistance for the following costs:

- Developing a food safety plan for first-time food safety certification.
- Maintaining or updating an existing food safety plan.
- Food safety certification.
- Certification upload fees.
- Microbiological testing for products, soil amendments and water.

FSCSC payments are calculated separately for each category of eligible costs. A higher payment rate has been set for socially disadvantaged, limited resource, beginning and veteran farmers and ranchers. Details about the payment rates and limitations can be found at <u>farmers.gov/food-safety</u>.

Applying for Assistance

The FSCSC application period for 2022 is June 27, 2022, through January 31, 2023, and the application period for 2023 will be announced at a later date. FSA will issue payments at the time of application approval for 2022 and after the application period ends for 2023. If calculated payments exceed the amount of available funding, payments will be prorated.

Interested specialty crop producers can apply by completing the FSA-888, Food Safety Certification for Specialty Crops Program (FSCSC) application. The application, along with other required documents, can be submitted to the FSA office at any USDA Service Center nationwide by mail, fax, hand delivery or via electronic means.

Producers can visit <u>farmers.gov/food-safety</u> for additional program details, eligibility information and forms needed to apply.

Borrower Training for Farm Loan Customers

Borrower training is available for all Farm Service Agency (FSA) customers. This training is required for all direct loan applicants, unless the applicant has a waiver issued by the agency.

Borrower training includes instruction in production and financial management. The purpose is to help the applicants develop and improve skills that are necessary to successfully operate a farm and build equity in the operation. It aims to help the producer become financially successful. Borrower training is provided, for a fee, by agency approved vendors. Contact your local FSA Farm Loan Manager for a list of approved vendors.

Using FSA Direct Farm Ownership Loans for Construction

The USDA Farm Service Agency's (FSA) <u>Direct Farm Ownership loans</u> are a resource to help farmers and ranchers become owner-operators of family farms, improve and expand current operations, increase agricultural productivity, and assist with land tenure to save farmland for future generations.

There are three types of Direct Farm Ownership Loans: regular, down payment and joint financing. FSA also offers a <u>Direct Farm Ownership Microloan</u> option for smaller financial needs up to \$50,000.

Direct Farm Ownership Loans can be used to construct, purchase or improve farm dwellings, service buildings or other facilities, and to make improvements essential to an operation.

Applicants must provide FSA with an estimate of the total cost of all planned development that completely describe the work, prior to loan approval and must show proof of sufficient funds to pay for the total cost of all planned development at or before loan closing. In some instances, applicants may be asked to provide certified plans, specifications or contract documents. The applicant cannot incur any debts for materials or labor or make any expenditures for development purposes prior to loan closing with the expectation of being reimbursed from FSA funds.

Construction and development work may be performed either by the contract method or the borrower method. Under the contract method, construction and development contractors perform work according to a written contract with the applicant or borrower. If applying for a direct loan to finance a construction project, the applicant must obtain a surety bond that guarantees both payment and performance in the amount of the construction contract from a construction contractor.

A surety bond is required when a contract exceeds \$100,000. An authorized agency official determines that a surety bond appears advisable to protect the borrower against default of the contractor or a contract provides for partial payments in excess of the amount of 60 percent of the value of the work in place.

Under the borrower method, the applicant or borrower will perform the construction and development work. The borrower method may only be used when the authorized agency official determines, based on information from the applicant, that the applicant possesses or arranges to obtain the necessary skill and managerial ability to complete the work satisfactorily and that such work will not interfere with the applicant's farming operation or work schedule.

Potential applicants should visit with FSA early in the initial project planning process to ensure environmental compliance.

For more eligibility requirements and information about FSA Loan programs, contact your local USDA Service Center or visit <u>fsa.usda.gov</u>.
