USDA Extends Deadlines for Dairy Margin Coverage Program and Market Facilitation Program to Dec. 20, 2019

Due to the prolonged and extensive impacts of weather events this year, the U.S. Department of Agriculture (USDA) extended the deadline to December 20 for producers to enroll in the Dairy Margin Coverage (DMC) program for the 2020 calendar year. The deadline had been December 13. USDA announced it is also continuing...
accept applications for the Market Facilitation Program through December 20.

2019 has challenged the country’s ag sector – prevented or late planting followed by a delayed harvest has been further complicated by wet and cold weather. Because many producers are still in the field, time to conduct business at the local USDA office is at a premium. USDA hopes this deadline extension will allow producers the opportunity to participate in these important programs.

Authorized by the 2018 Farm Bill and available through USDA’s Farm Service Agency (FSA), the program offers reasonably priced protection to dairy producers when the difference between the all-milk price and the average feed cost (the margin) falls below a certain dollar amount selected by the producer.

The Market Facilitation Program is part of a relief strategy to support American agricultural producers while the Administration continues to work on free, fair, and reciprocal trade deals to open more markets to help American farmers compete globally. MFP payments are aimed at assisting farmers suffering from damage due to unjustified trade retaliation by foreign nations.

For more information, visit the DMC webpage, the MFP webpage or your local USDA service center. To locate your local FSA office, visit farmers.gov/service-locator.

USDA Has Opened Signup for Conservation Reserve Program

USDA opened signup for the Conservation Reserve Program (CRP) on December 9, 2019. The deadline for agricultural producers to sign up for general CRP is February 28, 2020, while signup for continuous CRP is ongoing.

Farmers and ranchers who enroll in CRP receive a yearly rental payment for voluntarily establishing long-term, resource-conserving plant species, such as approved grasses or trees (known as “covers”) to control soil erosion, improve water quality and develop wildlife habitat on marginally productive agricultural lands.

CRP has 22 million acres enrolled, but the 2018 Farm Bill lifted the cap to 27 million acres. This means farmers and ranchers have a chance to enroll in CRP for the first time or continue their participation for another term.

By enrolling in CRP, producers are improving water quality, reducing soil erosion, and restoring habitat for wildlife. This in turn spurs hunting, fishing, recreation, tourism, and other economic development across rural America.

CRP Enrollment Options
**General Signup**

CRP general signup will be held annually. The competitive general signup will now include increased opportunities for enrollment of wildlife habitat through the State Acres For Wildlife Enhancement (SAFE) initiative.

**Continuous Signup**

While some practices under SAFE will remain available through continuous signup, CRP continuous signup will focus primarily on water quality with the Clean Lakes, Estuaries, and Rivers (CLEAR) Initiative. The 2018 Farm Bill prioritizes water quality practices such as contour grass strips, filter strips, riparian buffers, wetlands and a new prairie strip.

USDA will also be working with Conservation Reserve Enhancement Program (CREP) partners to relaunch CREP continuous options in each state under new statutory provisions. CREP will continue to target high-priority local, state or regional conservation concerns.

**Grasslands Signups**

CRP Grasslands signup helps landowners and operators protect grassland, including rangeland, and pastureland and certain other lands while maintaining the areas as grazing lands. A separate CRP Grasslands signup will be offered each year following general signup.

**Pilot Programs**

Later in 2020, (FSA will roll out pilot programs within CRP: CLEAR 30, which allows contracts expiring with CLEAR practices to be reenrolled in 30-year contracts and in the Soil Health and Income Protection Program (SHIPP) in the prairie pothole region. More information on these programs will be announced in the new year.

**Land Transition**

The CRP Transition Incentives Program (TIP) is an option for producers interested in transitioning land to a beginning farmer or rancher or a member of a socially disadvantaged group to return land to production for sustainable grazing or crop production. CRP contract holders no longer need to be a retired or retiring owner or operator to transition their land. TIP participants may have a lease less than five years with an option to purchase, and they have two years before the end of the CRP contract to make conservation and land improvements.

**Previously Expired Land**

Land enrolled in CRP under a 15-year contract that expired in September 2017, 2018 or 2019, may be eligible for enrollment if there was no opportunity for re-enrollment and the practice under the expired contract has been maintained.

**CRP Rates and Payments**

FSA recently posted updated soil rental rates for CRP. County average rates are posted on the [CRP Statistics webpage](#). Soil rental rates are statutorily prorated at 90 percent for continuous signup and 85 percent for general signup. The rental rates will be assessed annually. Under
Agricultural producers now can enroll in the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs – two U.S. Department of Agriculture (USDA) safety net programs – for the 2019 and 2020 crop year.

ARC provides income support payments on historical base acres when actual crop revenue declines below a specified guaranteed level. PLC provides income support payments on historical base acres when the effective price for a covered commodity falls below its reference price. The 2018 Farm Bill reauthorized and updated both programs.

Signup for the 2019 crop year closes March 15, 2020, while signup for the 2020 crop year closes June 30, 2020. Producers who have not yet enrolled for 2019 can enroll for both 2019 and 2020 during the same visit to an FSA county office.

ARC and PLC have options for the farm operator who is actively farming the land as well as the owner of the land. Farm owners also have a one-time opportunity to update PLC payment yields beginning with crop year 2020. If the farm owner and producer visit the FSA county office together, FSA can also update yield information during that visit.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

2018 Crop Year ARC and PLC Payments

FSA began processing payments last week for 2018 ARC-County (ARC-CO) and PLC on covered commodities that met payment triggers on enrolled farms in the 2018 crop year. In addition to the $1.5 billion now in process, FSA anticipates it will issue another $1 billion in November once USDA’s National Agricultural Statistics Service publishes additional commodity prices for the 2018 crop.

Producers who had 2018 covered commodities enrolled in ARC-CO can visit www.fsa.usda.gov/arc-plc for payment rates applicable to their county and each covered commodity. For farms and covered commodities enrolled in 2018 PLC, the following crops met payment triggers: barley, canola, corn, dry peas, grain sorghum, lentils, peanuts, large chickpeas, sunflower seed, flaxseed, rapeseed, seed cotton, long grain rice, medium/short grain rice and wheat.

Oats, small chickpeas, mustard seed, safflower, crambe, sesame seed and soybeans did not meet 2018 PLC payment triggers.

2018 PLC payment rates for the following covered commodities have not been determined: temperate Japonica rice.
More Information

For more information on ARC and PLC including two online decision tools that assist producers in making enrollment and election decisions specific to their operations, visit the [ARC and PLC webpage](http://www.fsa.usda.gov).

**USDA Encourages Producers to Consider NAP Risk Protection Coverage Before Crop Sales Deadlines**

The Farm Service Agency encourages producers to examine available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the applicable crop sales deadline.

Producers are reminded that crops not covered by insurance may be eligible for NAP. Beginning, underserved and limited resource farmers are now eligible for free catastrophic level coverage.

Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent federal crop insurance program is available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

Producers can determine if crops are eligible for federal crop insurance or NAP by visiting [https://webapp.rma.usda.gov/apps/ActuarialInformationBrowser2018/CropCriteria.aspx](https://webapp.rma.usda.gov/apps/ActuarialInformationBrowser2018/CropCriteria.aspx).

The 2018 Farm Bill reinstates higher levels of coverage, from 50 to 65 percent of expected production in 5 percent increments, at 100 percent of the average market price. Producers of organics and crops marketed directly to consumers also may exercise the “buy-up” option to obtain NAP coverage of 100 percent of the average market price at the coverage levels of between 50 and 65 percent of expected production. NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production.

For all coverage levels, the NAP service fee is the lesser of $325 per crop or $825 per producer per county, not to exceed a total of $1,950 for a producer with farming interests in multiple counties.

Deadlines for coverage vary by state and crop. To learn more about NAP visit [www.fsa.usda.gov/nap](http://www.fsa.usda.gov/nap) or contact your local USDA Service Center. To find your local USDA Service Centers go to [http://offices.usda.gov](http://offices.usda.gov).

**Higher Limits Now Available on USDA Farm Loans**

Higher limits are now available for borrowers interested in USDA’s farm loans, which help agricultural producers purchase farms or cover operating expenses. The 2018 Farm Bill increased the amount that producers can borrow through direct and guaranteed loans available through
USDA’s Farm Service Agency (FSA) and made changes to other loans, such as microloans and emergency loans.

Key changes include:

- The Direct Operating Loan limit increased from $300,000 to $400,000, and the Guaranteed Operating Loan limit increased from $1.429 million to $1.75 million. Operating loans help producers pay for normal operating expenses, including machinery and equipment, seed, livestock feed, and more.
- The Direct Farm Ownership Loan limit increased from $300,000 to $600,000, and the Guaranteed Farm Ownership Loan limit increased from $1.429 million to $1.75 million. Farm ownership loans help producers become owner-operators of family farms as well as improve and expand current operations.
- Producers can now receive both a $50,000 Farm Ownership Microloan and a $50,000 Operating Microloan. Previously, microloans were limited to a combined $50,000. Microloans provide flexible access to credit for small, beginning, niche, and non-traditional farm operations.
- Producers who previously received debt forgiveness as part of an approved FSA restructuring plan are now eligible to apply for emergency loans. Previously, these producers were ineligible.
- Beginning and socially disadvantaged producers can now receive up to a 95 percent guarantee against the loss of principal and interest on a loan, up from 90 percent.

About Farm Loans

Direct farm loans, which include microloans and emergency loans, are financed and serviced by FSA, while guaranteed farm loans are financed and serviced by commercial lenders. For guaranteed loans, FSA provides a guarantee against possible financial loss of principal and interest.

For more information on FSA farm loans, visit [www.fsa.usda.gov](http://www.fsa.usda.gov) or contact your local USDA service center.

Supervised Credit

Farm Service Agency (FSA) Farm Loan programs are considered supervised credit. Unlike loans from a commercial lender, FSA loans are intended to be temporary in nature. Therefore, it is our goal to help you graduate to commercial credit, and our farm loan staff is available to help borrowers through training and credit counseling.

The FSA team will help borrowers identify their goals to ensure financial success. Through this process, FSA staff will advise borrowers in developing strategies and a plan to meet your operation’s goals and graduate to commercial credit. Ultimately, the borrower is responsible for the success of the farming operation, but FSA’s staff will help in an advisory role to provide the tools necessary to help you achieve your operational goals and manage your finances.

For more information on FSA farm loan programs, visit [www.fsa.usda.gov](http://www.fsa.usda.gov).

Communication is Key in Lending
Farm Service Agency (FSA) is committed to providing our farm loan borrowers the tools necessary to be a success. A part of ensuring this success is providing guidance and counsel from the loan application process through the borrower’s graduation to commercial lending institutions. While it is FSA’s commitment to advise borrowers as they identify goals and evaluate progress, it is crucial for borrowers to communicate with their farm loan staff when changes occur. It is the borrower’s responsibility to alert FSA to any of the following:

- Any proposed or significant changes in the farming operation;
- Any significant changes to family income or expenses;
- The development of problem situations;
- Any losses or proposed significant changes in security

In addition, if a farm loan borrower cannot make payments to suppliers, other creditors, or FSA on time, contact your farm loan staff immediately to discuss loan servicing options. For more information on FSA farm loan programs, visit [www.fsa.usda.gov](http://www.fsa.usda.gov).

**USDA Microloans Help Farmers Purchase Farmland and Improve Property**

*Producers, Including Beginning and Underserved Farmers, Have a New Option to Gain Access to Land*

The U.S. Department of Agriculture (USDA) is offering farm ownership microloans, creating a new financing avenue for farmers to buy and improve property. These microloans are especially helpful to beginning or underserved farmers, U.S. veterans looking for a career in farming, and those who have small and mid-sized farming operations.

The microloan program has been hugely successful, providing more than 16,800 low-interest loans, totaling over $373 million to producers across the country. Microloans have helped farmers and ranchers with operating costs, such as feed, fertilizer, tools, fencing, equipment, and living expenses since 2013. Seventy percent of loans have gone to new farmers.

Now, microloans will be available to also help with farm land and building purchases, and soil and water conservation improvements. FSA designed the expanded program to simplify the application process, expand eligibility requirements and expedite smaller real estate loans to help farmers strengthen their operations. Microloans provide up to $50,000 to qualified producers and can be issued to the applicant directly from the USDA Farm Service Agency (FSA).

To learn more about the FSA microloan program visit [www.fsa.usda.gov/microloans](http://www.fsa.usda.gov/microloans), or contact your local FSA office.

---

**Youth Loans**

The Farm Service Agency makes loans to youth to establish and operate agricultural income-producing projects in connection with 4-H clubs, FFA and other agricultural groups. Projects must be planned and operated with the help of the organization advisor, produce sufficient income to repay the loan and provide the youth with practical business and educational experience. The maximum loan amount is $5,000.
Youth Loan Eligibility Requirements:

- Be a citizen of the United States (which includes Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands) or a legal resident alien
- Be 10 years to 20 years of age
- Comply with FSA’s general eligibility requirements
- Be unable to get a loan from other sources
- Conduct a modest income-producing project in a supervised program of work as outlined above
- Demonstrate capability of planning, managing and operating the project under guidance and assistance from a project advisor. The project supervisor must recommend the youth loan applicant, along with providing adequate supervision.

Stop by the county office for help preparing and processing the application forms.

Beginning Farmer Loans

FSA assists beginning farmers to finance agricultural enterprises. Under these designated farm loan programs, FSA can provide financing to eligible applicants through either direct or guaranteed loans. FSA defines a beginning farmer as a person who:

- Has operated a farm for not more than 10 years
- Will materially and substantially participate in the operation of the farm
- Agrees to participate in a loan assessment, borrower training and financial management program sponsored by FSA
- Does not own a farm in excess of 30 percent of the county's average size farm.

Additional program information, loan applications, and other materials are available at your local USDA Service Center. You may also visit [www.fsa.usda.gov](http://www.fsa.usda.gov).
