USDA to Provide Payments to Livestock Producers Impacted by Drought or Wildfire

New Emergency Livestock Relief benefits to be delivered through two-phased approach; compensation for 2021 forage losses

The U.S. Department of Agriculture (USDA) today announced that ranchers who have approved applications through the 2021 Livestock Forage Disaster Program (LFP) for forage losses due to severe drought or wildfire in 2021 will soon begin receiving emergency relief payments for increases in supplemental feed costs in 2021 through the Farm Service Agency's (FSA) new [Emergency Livestock Relief Program \(ELRP\)](#).

Background

On September 30, 2021, President Biden signed into law the *Extending Government Funding and Delivering Emergency Assistance Act* (P.L. 117-43). This Act includes \$10 billion in assistance to agricultural producers impacted by wildfires, droughts, hurricanes,

winter storms and other eligible disasters experienced during calendar years 2020 and 2021. Additionally, the Act specifically targets \$750 million to provide assistance to livestock producers for losses incurred due to drought or wildfires in calendar year 2021. ELRP is part of FSA's implementation of the Act.

For impacted producers, USDA will leverage LFP data to deliver immediate relief for increases in supplemental feed costs in 2021. LFP is an important tool that provides up to 60% of the estimated replacement feed cost when an eligible drought adversely impacts grazing lands or 50% of the monthly feed cost for the number of days the producer is prohibited from grazing the managed rangeland because of a qualifying wildfire.

FSA received more than 100,000 applications totaling nearly \$670 million in payments to livestock producers under LFP for the 2021 program year.

Congress recognized requests for assistance beyond this existing program and provided specific funding for disaster-impacted livestock producers in 2021.

ELRP Eligibility – Phase One

To be eligible for an ELRP payment under phase one of program delivery, livestock producers must have suffered grazing losses in a county rated by the U.S. Drought Monitor as having a D2 (severe drought) for eight consecutive weeks or a D3 (extreme drought) or higher level of drought intensity during the 2021 calendar year, and have applied and been approved for 2021 LFP.

Additionally, producers whose permitted grazing on federally managed lands was disallowed due to wildfire are also eligible for ELRP payments, if they applied and were approved for 2021 LFP.

As part of FSA's efforts to streamline and simplify the delivery of ELRP phase one benefits, producers are not required to submit an application for payment; however, they must have the following forms on file with FSA within a subsequently announced deadline as determined by the Deputy Administrator for Farm Programs:

- CCC-853, *Livestock Forage Disaster Program Application*
- Form AD-2047, *Customer Data Worksheet*.
- Form CCC-902, *Farm Operating Plan* for an individual or legal entity.
- Form CCC-901, *Member Information for Legal Entities* (if applicable).
- Form FSA-510, *Request for an Exception to the \$125,000 Payment Limitation for Certain Programs* (if applicable).
- Form CCC-860, *Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification*, if applicable, for the 2021 program year.
- A highly erodible land conservation (sometimes referred to as HELC) and wetland conservation certification (Form AD-1026 *Highly Erodible Land Conservation*

(*HELIC*) and *Wetland Conservation (WC) Certification*) for the ELRP producer and applicable affiliates.

ELRP Payment Calculation – Phase One

To further expedite payments to eligible livestock producers, determine eligibility, and calculate an ELRP phase one payment, FSA will utilize livestock inventories and drought-affected forage acreage or restricted animal units and grazing days due to wildfire already reported by the producer when they submitted a 2021 CCC-853, *Livestock Forage Disaster Program Application* form.

Phase one ELRP payments will be equal to the eligible livestock producer's gross 2021 LFP calculated payment multiplied by a payment percentage, to reach a reasonable approximation of increased supplemental feed costs for eligible livestock producers in 2021.

The ELRP payment percentage will be 90% for historically underserved producers, including beginning, limited resource, and veteran farmers and ranchers, and 75% for all other producers. These payments will be subject to a payment limitation.

To qualify for the higher payment percentage, eligible producers must have a CCC-860, *Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification*, form on file with FSA for the 2021 program year.

Payments to eligible producers through phase one of ELRP are estimated to total more than \$577 million.

ELRP - Phase Two

Today's announcement is only Phase One of relief for livestock producers. FSA continues to evaluate and identify impacts of 2021 drought and wildfire on livestock producers to ensure equitable and inclusive distribution of much-needed emergency relief program benefits.

Emergency Relief Program (ERP) Assistance for Crop Producers

FSA is developing a two-phased process to provide assistance to diversified, row crop and specialty crop operations that were impacted by an eligible natural disaster event in calendar years 2020 or 2021.

This program will provide assistance to crop producers and will follow a two-phased process similar to that of the livestock assistance with implementation of the first phase in the coming weeks. Phase one of the crop assistance program delivery will leverage existing [Federal Crop Insurance](#) or [Noninsured Crop Disaster Assistance Program](#) data as the basis for calculating initial payments.

Making the initial payments using existing safety net and risk management data will both speed implementation and further encourage participation in these permanent programs, including the Pasture, Rangeland, Forage Rainfall Index Crop Insurance Program, as Congress intended.

The second phase of the crop program will be intended to fill additional assistance gaps and cover eligible producers who did not participate in existing risk management programs.

Through proactive communication and outreach, USDA will keep producers and stakeholders informed as ERP implementation details are made available.

Additional Livestock Drought Assistance

Due to the persistent drought conditions in the Great Plains and West, FSA will be offering additional relief through the [Emergency Assistance for Livestock, Honeybees and Farm-raised Fish Program \(ELAP\)](#) to help ranchers cover above normal costs of hauling livestock to forage. This policy enhancement complements previously announced ELAP compensation for hauling feed to livestock. Soon after FSA announced the assistance for hauling feed to livestock, stakeholders were quick to point out that producers also were hauling the livestock to the feed source as well and encouraged this additional flexibility.

It is important to note that, unlike ELRP emergency relief benefits which are only applicable for eligible losses incurred in the 2021 calendar year, this ELAP livestock and feed hauling compensation will not only be retroactive for 2021 but will also be available for losses in 2022 and subsequent years.

To calculate ELAP program benefits, an [online tool](#) is currently available to help producers document and estimate payments to cover feed transportation cost increases caused by drought and will soon be updated to assist producers with calculations associated with drought related costs incurred for hauling livestock to forage

More Information

Additional USDA disaster assistance information can be found on farmers.gov, including USDA resources specifically for producer impacted by [drought](#) and [wildfire](#) and the [Disaster Assistance Discovery Tool](#), [Disaster-at-a-Glance fact sheet](#), and [Farm Loan Discovery Tool](#). For FSA and Natural Resources Conservation Service programs, producers should contact their local [USDA Service Center](#). For assistance with a crop insurance claim, producers and landowners should contact their [crop insurance agent](#).

USDA Encourages Producers to Enroll in Grasslands CRP

*Producers Must Apply by **May 13***

The U.S. Department of Agriculture (USDA) encourages producers and landowners to enroll in the Grassland Conservation Reserve Program (CRP) starting next week through May 13, 2022. Grassland CRP provides a unique opportunity for farmers, ranchers, and agricultural landowners to keep land in agricultural production and supplement their income while improving their soils and permanent grass cover. The program had its highest enrollment in history in 2021 and is part of the Biden-Harris

Administration's broader effort to equip producers with the tools they need to help address climate change and invest in the long-term health of our natural resources.

[Grassland CRP](#) is a federally funded voluntary working lands program. Through the program, USDA's Farm Service Agency (FSA) provides annual rental payments to landowners to maintain and conserve grasslands while allowing producers to graze, hay, and produce seed on that land. Maintaining the existing permanent cover provides several benefits, including reducing erosion, providing wildlife habitat and migration corridors, and capturing and maintaining carbon in the soil and cover.

FSA provides participants with annual rental payments and cost-share assistance. The annual rental rate varies by county with a national minimum rental rate of \$13 per acre for this signup. Contract duration is 10 or 15 years.

Grassland CRP National Priority Zones

Because Grassland CRP supports not only grazing operations but also biodiversity and conserving environmentally sensitive land such as that prone to wind erosion, FSA created two [National Priority Zones](#) in 2021: the Greater Yellowstone Migration Corridor and Dust Bowl Zone. As part of the Biden-Harris Administration's focus on conservation in important wildlife corridors and key seasonal ranges, for this year's signup, FSA is expanding the Greater Yellowstone Wildlife Migration Corridor Priority Zone to include seven additional counties across Montana, Wyoming, and Utah, to help protect the big-game animal migration corridor associated with Wyoming elk, mule deer, and antelope.

Offers within one of these National Priority Zones will receive an additional 15 ranking points and \$5 per acre if at least 50% of the offer is located in the zone.

Alongside Grassland CRP, producers and landowners can also enroll acres in Continuous CRP under the ongoing sign up, which includes projects available through the Conservation Reserve Enhancement Program (CREP) and State Acres for Wildlife Enhancement (SAFE).

Broadening Reach of Program

As part of the Agency's Justice40 efforts, producers and landowners who are historically underserved, including beginning farmers and military veterans, will receive 10 additional ranking points to enhance their offers.

Additionally, USDA is working to broaden the scope and reach of Grassland CRP by leveraging the [Conservation Reserve Enhancement Program](#) (CREP) to engage historically underserved communities. CREP is a partnership program that enables states, Tribal governments, non-profit, and private entities to partner with FSA to implement CRP practices and address high priority conservation and environmental objectives. Interested entities are encouraged to contact FSA.

More Information on CRP

Landowners and producers interested in Grassland CRP should contact their local [USDA Service Center](#) to learn more or to apply for the program before the May 13 deadline. Additionally, fact sheets and other resources are available at fsa.usda.gov/crp.

Signed into law in 1985, CRP is one of the largest voluntary private-lands conservation programs in the United States. The working lands signup announced today demonstrates how much it has evolved from the original program that was primarily intended to control soil erosion and only had the option to take enrolled land out of production. The program has expanded over the years and now supports a greater variety of conservation and wildlife benefits, along with the associated economic benefits.

Environmental Review Required Before Project Implementation

The National Environmental Policy Act (NEPA) requires Federal agencies to consider all potential environmental impacts for federally funded projects before the project is approved.

For all Farm Service Agency (FSA) programs, an environmental review must be completed before actions are approved, such as site preparation or ground disturbance. These programs include, **but are not limited to**, the Emergency Conservation Program (ECP), Farm Storage Facility Loan (FSFL) program and farm loans. If project implementation begins before FSA has completed an environmental review, the request will be denied. Although there are exceptions regarding the Stafford Act and emergencies, it's important to wait until you receive written approval of your project proposal before starting any actions.

Applications cannot be approved until FSA has copies of all permits and plans. Contact your local FSA office early in your planning process to determine what level of environmental review is required for your program application so that it can be completed timely.

Community Alliance with Family Farmers Offers Small Farm Tech Hub

How can technology help expand market opportunities and increase business efficiencies for small farms?

Community Alliance with Family Farmers (CAFF) Tech Hub is here to Help!

Free Consultation services available to small scale farmers, food hubs and farmers markets operating out of California.

USDA Extends Deadline for Spot Market Hog Pandemic Program

Farm Service Agency Will Accept Applications Through April 15

Hog producers who sold hogs through a spot market sale during the COVID-19 pandemic now have until April 15, 2022, to submit their applications for the U.S. Department of Agriculture's (USDA) Spot Market Hog Pandemic Program (SMHPP). SMHPP, which is part of USDA's [Pandemic Assistance for Producers](#) initiative, originally had a deadline to submit applications by Feb. 25, 2022.

SMHPP assists hog producers who sold hogs through a spot market sale from April 16, 2020, through Sept. 1, 2020, the period during which these producers faced the greatest reduction in market prices due to the pandemic. USDA is offering SMHPP in response to a reduction in packer production and supply chain issues due to the COVID-19 pandemic, which resulted in fewer negotiated hogs being procured and subsequent lower market prices. USDA's Farm Service Agency (FSA) began accepting applications for SMHPP on Dec. 15, 2021.

In response to stakeholder feedback and our analysis of the program to date, USDA will be making adjustments to clarify the definition of a spot market sale and to hog eligibility, while including documentation requirements to prevent erroneous payments. USDA will also be announcing those updates soon and wants to assure hog producers that there will be ample time to submit their applications for assistance.

Applying for Assistance

Eligible hog producers can apply for SMHPP by completing the FSA-940, Spot Market Hog Pandemic Program application. Visit farmers.gov/smhpp to learn more.

Applications can be submitted to the FSA office at any USDA Service Center nationwide by mail, fax, hand delivery or via electronic means. To find their local FSA office, producers can visit farmers.gov/service-locator. Hog producers can also call 877-508-8364 to speak directly with a USDA employee ready to offer assistance. Service Center staff continue to work with agricultural producers via phone, email, and other digital tools. Because of the pandemic, some [USDA Service Centers](#) are open to limited visitors.

Contact your Service Center to set up an in-person or phone appointment. Additionally, more information related to USDA's response and relief for producers can be found at farmers.gov/coronavirus.

Noninsured Crop Coverage Helps Producers Manage Risks

The Farm Service Agency's (FSA) Noninsured Crop Disaster Assistance Program (NAP) helps you manage risk through coverage for both crop losses and crop planting that was prevented due to natural disasters. The eligible or "noninsured" crops include agricultural commodities not covered by federal crop insurance.

You must be enrolled in the program and have purchased coverage for the eligible crop in the crop year in which the loss incurred to receive program benefits following a qualifying natural disaster.

NAP Buy-Up Coverage Option

NAP offers higher levels of coverage, from 50 to 65 percent of expected production in 5 percent increments, at 100 percent of the average market price. Buy-up levels of NAP coverage are available if the producer can show at least one year of previously successfully growing the crop for which coverage is being requested.

Producers of organics and crops marketed directly to consumers also may exercise the "buy-up" option to obtain NAP coverage of 100 percent of the average market price at the coverage levels of between 50 and 65 percent of expected production.

NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production.

Buy-up coverage is not available for crops intended for grazing.

NAP Service Fees

For all coverage levels, the NAP service fee is the lesser of \$325 per crop or \$825 per producer per county, not to exceed a total of \$1,950 for a producer with farming interests in multiple counties.

NAP Enhancements for Qualified Military Veterans

Qualified veteran farmers or ranchers are eligible for a service fee waiver and premium reduction, if the NAP applicant meets certain eligibility criteria.

Beginning, limited resource and targeted underserved farmers or ranchers remain eligible for a waiver of NAP service fees and premium reduction when they file form CCC-860, "*Socially Disadvantaged, Limited Resource and Beginning Farmer or Rancher Certification*."

For NAP application, eligibility and related program information, contact your local County USDA Service Center or visit fsa.usda.gov/nap.

Farmers.gov Feature Helps Producers Find Farm Loans that Fit Their Operation

Farmers and ranchers can use the *Farm Loan Discovery Tool* on farmers.gov to find information on USDA farm loans that may best fit their operations.

USDA's Farm Service Agency (FSA) offers a variety of loan options to help farmers finance their operations. From buying land to financing the purchase of equipment, FSA loans can help.

USDA conducted field research in eight states, gathering input from farmers and FSA farm loan staff to better understand their needs and challenges.

How the Tool Works

Farmers who are looking for financing options to operate a farm or buy land can answer a few simple questions about what they are looking to fund and how much money they need to borrow. After submitting their answers, farmers will receive information on farm loans that best fit their specific needs. The loan application and additional resources also will be provided.

Farmers can download application quick guides that outline what to expect from preparing an application to receiving a loan decision. There are four guides that cover loans to individuals, entities, and youth, as well as information on microloans. The guides include general eligibility requirements and a list of required forms and documentation for each type of loan. These guides can help farmers prepare before their first USDA service center visit with a loan officer.

Farmers can access the *Farm Loan Discovery Tool* by visiting farmers.gov/fund and clicking the "Start" button. Follow the prompts and answer five simple questions to receive loan information that is applicable to your agricultural operation. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

About Farmers.gov

In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where farmers will be able to apply for programs, process transactions, and manage accounts.

The *Farm Loan Discovery Tool* is one of many resources on farmers.gov to help connect farmers to information that can help their operations. Earlier this year, USDA launched the *My Financial Information* feature, which enables farmers to view their loan information, history, payments, and alerts by logging into the website.

USDA is building farmers.gov for farmers, by farmers. In addition to the interactive farm loan features, the site also offers a Disaster Assistance Discovery Tool. Farmers can visit farmers.gov/recover/disaster-assistance-tool#step-1 to find disaster assistance programs that can help their operation recover from natural disasters.

Communication is Key in Lending

Farm Service Agency (FSA) is committed to providing our farm loan borrowers the tools necessary to be successful. FSA staff will provide guidance and counsel from the loan application process through the borrower's graduation to commercial credit. While it is FSA's commitment to advise borrowers as they identify goals and evaluate progress, it is crucial for borrowers to communicate with their farm loan staff when changes occur. It is the borrower's responsibility to alert FSA to any of the following:

- Any proposed or significant changes in the farming operation
- Any significant changes to family income or expenses
- The development of problem situations
- Any losses or proposed significant changes in security

If a farm loan borrower can't make payments to suppliers, other creditors, or FSA on time, contact your farm loan staff immediately to discuss loan servicing options.

California Agricultural Mediation Program (CALAMP) helps farmers and ranchers

The USDA Farm Service Agency (FSA) in California has partnered with the California Agriculture Mediation Program to provide free mediation services. Mediation can be an effective tool for farmers and ranchers who are experiencing challenges with their farm loans, creditors, neighbors, leases, or USDA agencies.

Mediation is free to any producer for debt/credit issues, family farm transitions, leases, neighbor disputes, organic certification, adverse USDA decisions, and more. If your issue is not included in our authorized list of covered topics, we'll work with you to find an affordable option.

Discussions and notes made during mediation cannot be shared unless everyone agrees to do so. Keeping information private helps create a safe space for difficult conversations. If you come to an agreement or plan, the parties may then decide to share it outside of the meeting.

Mediators are trained to help people talk to each other in a productive way. The mediator does not take a "side" in the conversation, but instead is there to support the conversation and move it forward to address the issue at hand. All of our mediators have agricultural backgrounds, so they understand the issues that are unique to the industry.

The mediator leads a discussion about reaching an agreement or plan. Should the parties reach an agreement, the mediator will draft a settlement document, which is a binding contract. But the parties, not the mediator, decide the outcome and course of action.

Statistically, 75 percent of mediations result in an agreement. Sometimes even if a final agreement is not reached, everyone gains a better understanding of the issue. Mediation can go hand-in-hand with other processes such as working with an estate planner or applying for a farm loan. Mediation can reopen lines of communication and help the participants continue productive conversations outside the meeting.

For more information, submit a request for mediation at www.calamp.org
