FSA Opens CFAP 2 Signup for Additional Enrollment; Updates Additional CFAP Provisions

The U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) is reminding farmers and ranchers that signup has reopened for the Coronavirus Food Assistance Program 2 (CFAP 2) as part of the Pandemic Assistance for Producers initiative. The initial CFAP 2 signup ended on Dec. 11, 2020, but USDA has reopened sign-up for CFAP 2 for at least 60 days as of April 5, 2021, for producers to apply or make modifications to existing CFAP 2 applications.

CFAP 2 provides direct financial relief to producers due to market disruptions and associated costs because of COVID-19. CFAP 2 payments will be made for three categories of commodities – Price Trigger Commodities, Flat-rate Crops and Sales Commodities. Visit farmers.gov/cfap/commodities for a full list of eligible commodities for each category.

Applying for CFAP 2

Visit farmers.gov/cfap for details on all eligible commodities, producer eligibility, payment limitations and structure and additional program resources.

Producers have multiple options to apply for CFAP 2, including through an online application portal and by working directly with the FSA office. Customers seeking one-on-one support with the CFAP 2 application process can call 877-508-8364 to speak directly with a USDA employee ready to offer assistance.

In Historic Move, USDA to Begin Loan Payments to Socially Disadvantaged Borrowers under American Rescue Plan Act Section 1005
The U.S. Department of Agriculture Farm Service Agency (FSA) published the first notice of funding availability (NOFA) (PDF, 242 KB) announcing loan payments for eligible borrowers with qualifying direct farm loans under the American Rescue Plan Act Section 1005. The official NOFA will be published in the Federal Register early this week and USDA expects payments to begin in early June and continue on a rolling basis. A subsequent notice addressing guaranteed loan balances and direct loans that no longer have collateral and have been previously referred to the Department of Treasury for debt collection for offset, will be published within 120 days.

Section 1005 of the American Rescue Plan Act of 2021 (ARPA) provides funding and authorization for USDA FSA to pay up to 120 percent of direct and guaranteed loan outstanding balances as of January 1, 2021, for socially disadvantaged farmers and ranchers as defined in Section 2501(a) of the Food, Agriculture Conservation, and Trade Act of 1990 (7 U.S.C. 2279(a)). Section 2501(a) defines a socially disadvantaged farmer or rancher as a farmer or rancher who is a member of a socially disadvantaged group, which is further defined as a group whose members have been subjected to racial or ethnic prejudice because of their identity as members of a group without regard to their individual qualities. Qualifying loans as part of today’s announcement are certain direct loans under the Farm Loan Programs (FLP) and Farm Storage Facility Loan Program (FSFL).

For much of the history of the USDA, socially disadvantaged farmers and ranchers have faced discrimination—sometimes overt and sometimes through deeply embedded rules and policies—that have prevented them from achieving as much as their counterparts who do not face these documented acts of discrimination. Over the past 30 years, several major civil rights lawsuits have compensated farmers for specific acts of discrimination—including Pigford I and Pigford II, Keepsseagle, and the Garcia cases. However, those settlements and other related actions did not address the systemic and cumulative impacts of discrimination over a number of decades that the American Rescue Plan now begins to address.

Sections 1005 and 1006 of ARPA provide USDA with new tools to address longstanding inequities for socially disadvantaged borrowers. Section 1006 of ARPA provides additional funding to begin long-term racial equity work within USDA, including to address heirs property claims and to stand up an Equity Commission to identify barriers to access USDA programming.

To learn more about the loan payments to socially disadvantaged farmers and ranchers, visit www.farmers.gov/americanrescueplan.

USDA touches the lives of all Americans each day in so many positive ways. In the Biden-Harris Administration, USDA is transforming America’s food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America. To learn more, visit www.usda.gov.

Share Your Planting Season Experience for #Plant2021

After a long winter and a challenging year, spring has finally come. As the world around us bursts into song and color, our farmers will begin to work the soil they’ve protected all winter and plant the seeds they will nurture for months to come. Later this year, the fruits of their labor will become the
food that feeds our communities, the fiber that clothes our families, and the fuel that powers industries.

For many, 2020 was the first year they’d ever seen an empty shelf at the grocery store. And for the first time, many people realized how much they take farming and the people who make it possible for granted. Fewer and fewer Americans understand what our farmers do, who they are, and the hard work they put in. Let’s change that.

This planting season, let Farmers.gov showcase your work by participating in the #Plant2021 campaign. We’ll share your story on @FarmersGov on social media and a nationwide storymap. Here’s how:

Using your smartphone or digital camera, take photos of what’s happening on your operation during planting season. Videos may be too large to email as attachment, so you can email them to us via mail drop (iPhone), Google Photos (Android), or any other file sharing service. A few ideas:

- If you’re comfortable, we’d love to see the people that make it happen set against the backdrop of your agricultural operation.
- Take a photo from inside the tractor cab so we can see what you see.
- Photos at sunrise or sunset are always beautiful!
- Behind-the-scenes photos showing us the amount of planning and preparation it takes to have a successful planting season are welcomed.
- Emerging (baby) crops.

Submit your photos/videos along with the following information to us at SM.FP.Social@usda.gov:

- Your name if you’re comfortable sharing.
- Location of the operation (city or county and state).
- Information about what’s in the photo/video and what’s being planting.
- Your thoughts about this year’s planting season. Is this year different from previous years? How do you feel about the season? What are you hopeful about?
- If your operation has a Facebook, Twitter, and/or Instagram account, please include it so that we can tag you.

Please note that by submitting your photo/video, you are granting USDA permission to use these materials for outreach and education purposes. Follow @FarmersGov on Facebook, Twitter, and Instagram, and we look forward to sharing your story!

---

**USDA Announces Grants for Urban Agriculture and Innovative Production**

The U.S. Department of Agriculture (USDA) announced the availability of up to $4 million for grants to support the development of urban agriculture and innovative production projects. USDA’s Office of Urban Agriculture and Innovation Production is accepting proposals for planning and innovation projects, and these grants are part of USDA’s broader efforts to support urban agriculture. USDA will accept applications on Grants.gov until 11:59 p.m. Eastern Time on July 30, 2021.

“Urban agriculture can play an important role in food justice and equity,” said Jacque Johnson, Farm Service Agency Acting Executive Director in California.
“Such projects have the potential to educate, innovate, and unify communities to improve nutrition and food access and increase local food production in urban areas,” said Carlos Suarez, Natural Resources Conservation Service State Conservationist in California.

**Planning Projects** Planning projects initiate or expand efforts of farmers, gardeners, citizens, government officials, schools and other stakeholders in urban areas and suburbs. Projects may target areas of food access, education, business and start-up costs for new farmers, urban agroforestry or food forests, and development of policies related to zoning and other needs of urban production.

This is the second year USDA offered this grant opportunity. An example of previous planning projects include:

- **California’s Center for Land-Based Learning** is producing a comprehensive urban agriculture assessment of West Sacramento, mapping and documenting current activities, identifying opportunities for growth, and making recommendations to bolster the layers of positive impact urban agriculture has on communities.

**Implementation Projects** Implementation projects that accelerate existing and emerging models of urban, indoor and other agricultural practices that serve multiple farmers. Projects will improve local food access and collaborate with partner organizations and may support infrastructure needs, emerging technologies, educational endeavors and urban farming policy implementation. Examples of previous implementation projects include:

- **Arkansas Interfaith Power and Light** is improving access to local food by helping a network of urban gardeners and farmers build infrastructure and become self-sustainable. The organization is educating the community on the environmental benefits of local food and the nutritional value of plant-rich diets, mentoring youth in urban agricultural occupations and engaging more people in local, organic food production.

- **Atlanta’s The Greenleaf Foundation** is using the Greenleaf Community Farm as a hub for connecting and supporting entrepreneurial food projects and closing the food system gap in Council District 5. The project includes a community farm, a payflex farm stand and a community gathering space to connect and educate residents. It will also expand the Edible Neighborhoods program to provide equitable access to fresh produce, educate residents on edible landscaping and serve as an entry point into the food system.

**Webinar** A pre-recorded webinar will provide an overview of the grants’ purpose, project types, eligibility and basic requirements for submitting an application. The webinar will be posted at [farmers.gov/urban](http://farmers.gov/urban).

**More Information** The Office of Urban Agriculture and Innovative Production was established through the 2018 Farm Bill, and, through these grant opportunities, it offers opportunities for engagements as well as cooperative agreements. It includes representatives from many USDA agencies, including the Farm Service Agency and the Agricultural Marketing Service, and is led by the Natural Resources Conservation Service. More information is available at [farmers.gov/urban](http://farmers.gov/urban).

Additional resources that may be of interest to urban agriculture entities include AMS grants to improve domestic and international opportunities for U.S. growers and producers and FSA loans.
California Agricultural Mediation Program (CALAMP) helps farmers and ranchers

The USDA Farm Service Agency (FSA) in California has partnered with the California Agriculture Mediation Program to provide free mediation services. Mediation can be an effective tool for farmers and ranchers who are experiencing challenges with their farm loans, creditors, neighbors, leases, or USDA agencies.

Mediation is free to any producer for debt/credit issues, family farm transitions, leases, neighbor disputes, organic certification, adverse USDA decisions, and more. If your issue is not included in our authorized list of covered topics, we’ll work with you to find an affordable option.

Discussions and notes made during mediation cannot be shared unless everyone agrees to do so. Keeping information private helps create a safe space for difficult conversations. If you come to an agreement or plan, the parties may then decide to share it outside of the meeting.

Mediators are trained to help people talk to each other in a productive way. The mediator does not take a “side” in the conversation, but instead is there to support the conversation and move it forward to address the issue at hand. All of our mediators have agricultural backgrounds, so they understand the issues that are unique to the industry.

The mediator leads a discussion about reaching an agreement or plan. Should the parties reach an agreement, the mediator will draft a settlement document, which is a binding contract. But the parties, not the mediator, decide the outcome and course of action.

Statistically, 75 percent of mediations result in an agreement. Sometimes even if a final agreement is not reached, everyone gains a better understanding of the issue. Mediation can go hand-in-hand with other processes such as working with an estate planner or applying for a farm loan. Mediation can reopen lines of communication and help the participants continue productive conversations outside the meeting.

For more information, submit a request for mediation at www.calamp.org

Or contact:

Free Farm Manager Apprentice Training

Farmers, are you searching for your future manager or supervisor? Whether you have a current employee who could use some additional training, or are seeking to hire a new team member, The Beginning Farm and Ranch Management Apprenticeship provides a structured pathway for aspiring farm managers to develop the knowledge and skills they need to be successful on your farm. The Center for Land-Based Learning covers all tuition for coursework and provides support for farmers...
USDA Offers Drought Impacted California Farmers and Ranchers Immediate Disaster Assistance

USDA’s Farm Service Agency (FSA) offers disaster assistance and low-interest loan programs to assist you in your recovery efforts following drought. Available programs and loans include:

- **Non-Insured Crop Disaster Assistance Program (NAP)** - provides financial assistance to producers of non-insurable crops when low yields, loss of inventory, or prevented planting occur due to natural disasters including qualifying drought (includes native grass for grazing).

- **Livestock Forage Disaster Program (LFP)** – provides compensation to eligible livestock producers who suffered grazing losses for covered livestock due to drought on privately owned or cash leased land.

- **Livestock Indemnity Program (LIP)** - offers payments to eligible producers for livestock death losses in excess of normal mortality due to adverse weather. Drought is not an eligible adverse weather event, except when associated with anthrax, a condition that occurs because of drought and directly results in the death of eligible livestock.

- **Tree Assistance Program (TAP)** – provides assistance to eligible orchardists and nursery tree growers for qualifying tree, shrub and vine losses due to natural disasters including excessive wind and qualifying drought.

- **Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program (ELAP)** - provides emergency relief for losses due to feed or water shortages, disease, adverse weather, or other conditions, which are not adequately addressed by other disaster programs.

- **Emergency Conservation Reserve Program (CRP) Haying and Grazing** - Haying and Grazing of CRP acres provides relief to livestock producers in areas affected by drought or similar natural disaster.

- **Emergency Forest Restoration Program (EFRP)** - Helps the owners of non-industrial private forests restore forest health damaged by natural disasters, including drought.

- **Emergency Loan Program** – available to producers with agriculture operations located in a county under a primary or contiguous Secretarial Disaster designation. These low interest loans help producers recover from production and physical losses.

- **Emergency Conservation Program (ECP)** - provides emergency funding for farmers and ranchers to rehabilitate land severely damaged by natural disasters and to implement emergency water conservation measures in periods of severe drought.

To establish or retain FSA program eligibility, you must report prevented planting and failed acres (crops and grasses). Prevented planting acreage must be reported on form FSA-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and Risk Management Agency (RMA).

For more information on these programs, contact your local county USDA Service Center or visit [fsa.usda.gov/disaster](http://fsa.usda.gov/disaster).
ELAP Covers Losses from Additional Cost of Transporting Water to Livestock

If you've incurred additional operating costs for transporting water to livestock due to an eligible drought, assistance may be available to you through the Emergency Assistance for Livestock, Honeybees and Farm-Raised Fish Program (ELAP).

An eligible drought means that part or all of your county is designated D3 (extreme drought) or higher as indicated by the U.S. Drought Monitor.

Eligible livestock must be adult or non-adult dairy cattle, beef cattle, buffalo and beefalo, as well as alpacas, deer, elk, emus, equine, goats, llamas, reindeer, or sheep. Additionally, the livestock must have been owned 60 calendar days prior to the beginning of the drought and be physically located in the county designated as a disaster area due to drought. Adequate livestock watering systems or facilities must have existed before the drought occurred and producers are only eligible if they do not normally transport water to the livestock.

Livestock that were or would have been in a feedlot are not eligible for transporting water. ELAP covers the additional cost of transporting water and does not cover the cost of the water itself.

You must file a notice of loss on form CCC-851 the earlier of 30 calendar days of when the loss is apparent to you or by Jan. 31, 2022. Additionally, the deadline to submit an application for payment for 2020 ELAP assistance is Jan. 31, 2022.

You'll have to provide documentation to FSA that shows the method used to transport the water, the number of gallons of water transported and the number of eligible livestock to which water was transported.

To make an appointment to sign up for ELAP and to learn more about eligibility, application and documentation requirements, contact your local county USDA Service Center or visit fsa.usda.gov.

Sign-up for the Tree Assistance Program (TAP)

If you’re an orchardist or nursery tree grower who experienced losses from natural disasters during calendar year 2021, you must submit a TAP application either 90 calendar days after the disaster event or the date when the loss is apparent.

TAP provides financial assistance to help you replant or rehabilitate eligible trees, bushes and vines damaged by natural disasters.

Eligible tree types include trees, bushes or vines that produce an annual crop for commercial purposes. Nursery trees include ornamental, fruit, nut and Christmas trees that are produced for commercial sale. Trees used for pulp or timber are ineligible.

To qualify for TAP, orchardists must suffer a qualifying tree, bush or vine loss in excess of 15 percent mortality from an eligible natural disaster, plus an adjustment for normal mortality. The eligible trees, bushes or vines must have been owned when the natural disaster occurred; however, eligible growers are not required to own the land on which the eligible trees, bushes and vines were planted.
If the TAP application is approved, the eligible trees, bushes and vines must be replaced within 12 months from the date the application is approved. The cumulative total quantity of acres planted to trees, bushes or vines, for which you can receive TAP payments, cannot exceed 1,000 acres annually.

**Report Noninsured Crop Disaster Assistance Program (NAP) Losses**

NAP provides financial assistance to you for crops that aren’t eligible for crop insurance to protect against lower yields or crops unable to be planted due to natural disasters including freeze, hail, excessive moisture, excessive wind or hurricanes, flood, excessive heat and qualifying drought (includes native grass for grazing), among others.

To receive payment, you had to purchase NAP coverage for 2021 crops and file a notice of loss the earlier of 15 days of the occurrence of the disaster or when losses become apparent or 15 days of the final harvest date.

For hand-harvested crops and certain perishable crops, you must notify FSA within 72 hours of when a loss becomes apparent.

Eligible crops must be commercially produced agricultural commodities for which crop insurance is not available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

For more information on NAP, contact your local USDA Service Center or visit fsa.usda.gov/nap.
