Agriculture Risk Coverage and Price Loss Deadline is March 16

USDA’s Farm Service Agency (FSA) encourages agricultural producers to enroll now in the Agriculture Risk Loss (ARC) and Price Loss Coverage (PLC) programs. March 16, 2020 is the enrollment deadline for the 2019 crop year.

Although more than 200,000 producers have enrolled to date, FSA anticipates 1.5 million producers will enroll for ARC and PLC. By enrolling soon, producers can beat the rush as the deadline nears.

FSA offices have multiple programs competing for the time and attention of our staff. Because of the importance and complexities of the ARC and PLC programs; and to ensure FSA meets your program delivery expectations, please do not wait to start the
enrollment process. Call your FSA county office and make an appointment soon to ensure your elections are made and contracts signed well ahead of the deadlines.

ARC and PLC provide financial protections to farmers from substantial drops in crop prices or revenues and are vital economic safety nets for most American farms.

The programs cover the following commodities: barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

Until March 16, producers who have not yet enrolled in ARC or PLC for 2019 can enroll for both 2019 and 2020 during the same visit to an FSA county office unless yield updates are requested. Additionally, farm owners have a one-time opportunity to update PLC payment yields that take effect beginning with crop year 2020. If the owner accompanies the producer to the office, the yield update and enrollments may be completed during the same office visit.

More Information

For more information on ARC and PLC, download our program fact sheet or our 2014-2018 farm bills comparison fact sheet. Online ARC and PLC election decision tools are available at fsa.usda.gov/arc/plc. To enroll, contact your FSA county office for an appointment.

USDA Opens Signup March 23 for Added Causes Under WHIP+

USDA announced additional disaster assistance available to agricultural producers, including producers impacted by drought and excess moisture as well as sugar beet growers. Through WHIP+, USDA is helping producers recover from losses related to 2018 and 2019 natural disasters.

USDA’s Farm Service Agency (FSA) will open signup on March 23 for producers to apply for eligible losses of drought (D3 or above) and excess moisture. USDA is also entering into agreements with six sugar beet processing cooperatives to distribute $285 million to grower members of those cooperatives who experienced loss.

In June 2019, more than $3 billion was made available through a disaster relief package passed by Congress and signed by President Trump. In December 2019, Congress passed, and President Trump signed the Further Consolidated Appropriations Act of 2020 that provides an additional $1.5 billion for the continuation of disaster assistance program delivery.

WHIP+ New Qualifying Disaster Events
The bill added excessive moisture and D3 and D4 drought as qualifying losses for WHIP+ assistance.

Beginning March 23, producers who suffered either of these types of loss in 2018 and/or 2019 can apply for WHIP+ assistance at their local FSA office. For drought, a producer is eligible if any area of the county in which the loss occurred was rated D3 (Extreme Drought) or higher on the U.S. Drought Monitor during calendar years 2018 or 2019.

**WHIP+ Sugar Beet Loss Assistance**

As also directed in the bill, USDA will provide $285 million through sugar beet processing cooperatives to compensate grower members for sugar beet crop losses in 2018 and 2019. Details will be finalized in agreements between USDA and participating sugar beet processing cooperatives. Sugar beet producers who are members of these cooperatives and experienced losses may contact their cooperative for more information about how this sugar beet crop assistance will be administered.

**WHIP+ for Quality Loss**

In addition, producers have reported widespread crop quality loss from eligible disaster events that results in price deductions or penalties when marketing the damaged crops. The Appropriations bill expands WHIP+ to include assistance for crop quality loss. FSA is gathering data and input from producers and stakeholders regarding the extent and types of quality loss nationwide.

**Eligibility**

To be eligible for WHIP+, producers must have suffered losses of certain crops, trees, bushes, or vines in counties with a Presidential Emergency Disaster Declaration or a Secretarial Disaster Designation (primary counties only) for the following named natural disaster events; hurricanes, floods, tornadoes, typhoons, volcanic activity, snowstorms, wildfires, and now excessive moisture that occurred in 2018 or 2019. Also, losses located in a county not designated by the Secretary as a primary county may be eligible if the producer provides documentation showing that the loss was due to a qualifying natural disaster event.

For drought, counties having a D3 or D4 Drought Monitor classification in any portion of the county anytime during calendar year 2018 or 2019 will also be eligible.

A list of counties that received qualifying hurricane declarations and designations is available at [farmers.gov/recover/whip-plus](https://farmers.gov/recover/whip-plus). The California Drought Monitor is available at: [https://www.drought.gov/drought/states/california](https://www.drought.gov/drought/states/california)

Because livestock losses are covered by other disaster recovery programs offered through FSA, these losses are not eligible for WHIP+.

**USDA Announces Updates for Honeybee Producers**

The U.S. Department of Agriculture’s Farm Service Agency (FSA) announced updates to the Emergency Assistance for Livestock, Honeybees and Farm-Raised Fish Program (ELAP). These updates include changes required by the 2018 Farm Bill as well as discretionary changes intended to improve the administration of the program and clarify existing program requirements. ELAP was previously administered based on FSA’s fiscal year but will now run according to the calendar year.
Producers are still required to submit an application for payment within 30 calendar days of the end of the program year. This is not a policy change but will affect the deadline. The signup deadline for calendar year 2020 losses is January 30, 2021.

Starting in 2020, producers will have 15 days from when the loss is first apparent, instead of 30 days, to file a honeybee notice of loss. This change provides consistency between ELAP and the Noninsured Crop Disaster Assistance Program, which also has a 15-day notice of loss period for honey. For other covered losses, including livestock feed, grazing and farm-raised fish losses, the notice of loss deadline for ELAP will remain 30 days from when the loss is first apparent to the producer.

Program participants who were paid for the loss of a honeybee colony or hive in either or both of the previous two years will be required to provide additional documentation to substantiate how current year inventory was acquired.

If the honeybee colony loss incurred was because of Colony Collapse Disorder, program participants must provide a producer certification that the loss was a direct result of at least three of the five symptoms of Colony Collapse Disorder, which include:

- the loss of live queen and/or drone bee populations inside the hives;
- rapid decline of adult worker bee population outside the hives, leaving brood poorly or completely unattended;
- absence of dead adult bees inside the hive and outside the entrance of the hive;
- absence of robbing collapsed colonies; and
- at the time of collapse, varroa mite and Nosema populations are not at levels known to cause economic injury or population decline.

For honeybees, ELAP covers colony losses, honeybee hive losses (the physical structure) and honeybee feed losses in instances where the colony, hive or feed has been destroyed by a natural disaster or, in the case of colony losses, because of Colony Collapse Disorder. Colony losses must be in excess of normal mortality.

ELAP also provides emergency assistance to eligible producers of livestock and farm-raised fish including for feed and grazing losses. It covers losses because of eligible adverse weather or loss conditions, including blizzards and wildfires on federally managed lands. ELAP also covers losses resulting from the cost of transporting water to livestock due to an eligible drought.

For more information on ELAP visit farmers.gov/recover or contact your FSA County Office. To locate your local FSA office, visit farmers.gov/service-locator.

---

**FSA to Open Signup March 16 for Conservation Reserve Program Grasslands**

Farmers and ranchers may apply to enroll grasslands in the Conservation Reserve Program (CRP) Grasslands signup beginning March 16. The signup runs through May 15.

“Through this CRP Grasslands signup, farmers and ranchers can protect grasslands, rangelands and pastures, while maintaining the land as working grazing lands,” said State Executive Director Connie Conway. “The program emphasizes support for grazing operations and plant and animal biodiversity, while protecting land under the greatest threat of conversion or development.”
Through CRP Grasslands, participants retain the right to conduct common grazing practices, such as haying, mowing or harvesting seed from the enrolled land. Timing of some activities may be restricted by the primary nesting season of birds.

Participants will receive an annual rental payment and may receive up to 50 percent cost-share for establishing approved conservation practices. The duration of the CRP contract is either 10 or 15 years. FSA will rank applications using a number of factors including existence of expiring CRP land, threat of conversion or development, existing grassland, and predominance of native species cover, and cost.

The 2018 Farm Bill set aside 2 million acres for CRP Grassland enrollment. CRP is one of the largest conservation programs at USDA. CRP marks its 35-year anniversary in 2020 with 22 million acres currently enrolled.

For more information or to enroll in CRP Grasslands, contact your local FSA county office or visit fsa.usda.gov/crp. To locate your local FSA office, visit farmers.gov/serviceLocator.

**USDA Deadline is March 16 for Risk Management Programs for Hemp Producers**

The U.S. Department of Agriculture (USDA) has two programs that protect hemp producers’ crops from natural disasters. A pilot hemp insurance program through Multi-Peril Crop Insurance (MPCI) which provides coverage against loss of yield because of insurable causes of loss for hemp grown for fiber, grain or Cannabidiol (CBD) oil and the Noninsured Crop Disaster Assistance Program (NAP) coverage protects against losses associated with lower yields, destroyed crops or prevented planting where no permanent federal crop insurance program is available. Producers may apply now, and the deadline to sign up for both programs is March 16, 2020.

**Noninsured Crop Disaster Assistance Program**

NAP provides coverage against loss for hemp grown for fiber, grain, seed or CBD for the 2020 crop year where no permanent federal crop insurance program is available.

NAP basic 50/55 coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production. Buy-up coverage is available in some cases. The 2018 Farm Bill allows for buy-up levels of NAP coverage from 50 to 65 percent of expected production in 5 percent increments, at 100 percent of the average market price. Premiums apply for buy-up coverage.

For all coverage levels, the NAP service fee is $325 per crop or $825 per producer per county, not to exceed $1,950 for a producer with farming interests in multiple counties.

**Multi-Peril Crop Insurance Pilot Insurance Program**

The MPCI pilot insurance is a new crop insurance option for hemp producers in select counties of 21 states for the 2020 crop year. The program is available for eligible producers in certain counties in Alabama, California, Colorado, Illinois, Indiana, Kansas, Kentucky, Maine, Michigan, Minnesota, Montana, New Mexico, New York, North Carolina, North Dakota, Oklahoma, Oregon, Pennsylvania, Tennessee, Virginia and Wisconsin. Information on eligible counties is accessible through the USDA Risk Management Agency’s Actuarial Information Browser.
Among other requirements, to be eligible for the pilot program, a hemp producer must have at least one year of history producing the crop and have a contract for the sale of the insured hemp. In addition, the minimum acreage requirement is 5 acres for CBD and 20 acres for grain and fiber. Hemp will not qualify for replant payments or prevented plant payments under MPCI.

This pilot insurance coverage is available to hemp growers in addition to revenue protection for hemp offered under the Whole-Farm Revenue Protection plan of insurance. Also, beginning with the 2021 crop year, hemp will be insurable under the Nursery crop insurance program and the Nursery Value Select pilot crop insurance program. Under both nursery programs, hemp will be insurable if grown in containers and in accordance with federal regulations, any applicable state or tribal laws and terms of the crop insurance policy.

**Eligibility Requirements**

Under a regulation authorized by the 2018 Farm Bill and issued in October 2019, all growers must have a license to grow hemp and must comply with applicable state, tribal or federal regulations or operate under a state or university research pilot, as authorized by the 2014 Farm Bill.

Producers must report hemp acreage to FSA after planting to comply with federal and state law enforcement. The Farm Bill defines hemp as containing 0.3 percent or less tetrahydrocannabinol (THC) on a dry-weight basis. Hemp having THC above the federal statutory compliance level of 0.3 percent is an uninsurable or ineligible cause of loss and will result in the hemp production being ineligible for production history purposes.

For more information on USDA risk management programs for hemp producers, visit farmers.gov/hemp to read our [frequently asked questions](#). For more information on the U.S. Domestic Hemp Production Program, visit USDA’s Agricultural Marketing Services’ website to read their [frequently asked questions](#).

---

**New Farmers.gov Feature Helps Producers Find Farm Loans that Fit Their Operation**

A new online tool can help farmers and ranchers find information on U.S. Department of Agriculture (USDA) farm loans that may best fit their operations. USDA has launched the new Farm Loan Discovery Tool as the newest feature on farmers.gov, the Department’s self-service website for farmers.

USDA's Farm Service Agency (FSA) offers a variety of loan options to help farmers finance their operations. From buying land to financing the purchase of equipment, FSA loans can help. Compared to this time last year, FSA has seen an 18 percent increase in the amount it has obligated for direct farm ownership loans, and through the 2018 Farm Bill, has increased the limits for several loan products.

USDA conducted field research in eight states, gathering input from farmers and FSA farm loan staff to better understand their needs and challenges.

**How the Tool Works**

Farmers who are looking for financing options to operate a farm or buy land can answer a few simple questions about what they are looking to fund and how much money they need to borrow.
After submitting their answers, farmers will be provided information on farm loans that best fit their specific needs. The loan application and additional resources also will be provided.

Farmers can download application quick guides that outline what to expect from preparing an application to receiving a loan decision. There are four guides that cover loans to individuals, entities, and youth, as well as information on microloans. The guides include general eligibility requirements and a list of required forms and documentation for each type of loan. These guides can help farmers prepare before their first USDA service center visit with a loan officer.

Farmers can access the *Farm Loan Discovery Tool* by visiting [farmers.gov/fund](http://farmers.gov/fund) and clicking the “Start” button. Follow the prompts and answer five simple questions to receive loan information that is applicable to your agricultural operation. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

**About Farmers.gov**

In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where farmers will be able to apply for programs, process transactions, and manage accounts.

The *Farm Loan Discovery Tool* is one of many resources on farmers.gov to help connect farmers to information that can help their operations. Earlier this year, USDA launched the *My Financial Information* feature, which enables farmers to view their loan information, history, payments, and alerts by logging into the website.

USDA is building farmers.gov for farmers, by farmers. In addition to the interactive farm loan features, the site also offers a Disaster Assistance Discovery Tool. Farmers can visit [farmers.gov/recover/disaster-assistance-tool#step-1](http://farmers.gov/recover/disaster-assistance-tool#step-1) to find disaster assistance programs that can help their operation recover from natural disasters.

With feedback from customers and field employees who serve those customers, farmers.gov delivers farmer-focused features through an agile, iterative process to deliver the greatest immediate value to America’s agricultural producers – helping farmers and ranchers do right, and feed everyone.

For more information or to locate your USDA Service Center, visit [farmers.gov](http://farmers.gov).

**Higher Limits Now Available on USDA Farm Loans**

Higher limits are now available for borrowers interested in USDA’s farm loans, which help agricultural producers purchase farms or cover operating expenses. The 2018 Farm Bill increased the amount that producers can borrow through direct and guaranteed loans available through USDA’s Farm Service Agency (FSA) and made changes to other loans, such as microloans and emergency loans.

Key changes include:

- The Direct Operating Loan limit increased from $300,000 to $400,000, and the Guaranteed Operating Loan limit increased from $1.429 million to $1.75 million. Operating loans help
producers pay for normal operating expenses, including machinery and equipment, seed, livestock feed, and more.

- The Direct Farm Ownership Loan limit increased from $300,000 to $600,000, and the Guaranteed Farm Ownership Loan limit increased from $1.429 million to $1.75 million. Farm ownership loans help producers become owner-operators of family farms as well as improve and expand current operations.
- Producers can now receive both a $50,000 Farm Ownership Microloan and a $50,000 Operating Microloan. Previously, microloans were limited to a combined $50,000. Microloans provide flexible access to credit for small, beginning, niche, and non-traditional farm operations.
- Producers who previously received debt forgiveness as part of an approved FSA restructuring plan are now eligible to apply for emergency loans. Previously, these producers were ineligible.
- Beginning and socially disadvantaged producers can now receive up to a 95 percent guarantee against the loss of principal and interest on a loan, up from 90 percent.

About Farm Loans

Direct farm loans, which include microloans and emergency loans, are financed and serviced by FSA, while guaranteed farm loans are financed and serviced by commercial lenders. For guaranteed loans, FSA provides a guarantee against possible financial loss of principal and interest.

For more information on FSA farm loans, visit www.fsa.usda.gov or contact your local USDA service center.

USDA Microloans Help Farmers Purchase Farmland and Improve Property

Producers, Including Beginning and Underserved Farmers, Have a New Option to Gain Access to Land

The U.S. Department of Agriculture (USDA) is offering farm ownership microloans, creating a new financing avenue for farmers to buy and improve property. These microloans are especially helpful to beginning or underserved farmers, U.S. veterans looking for a career in farming, and those who have small and mid-sized farming operations.

The microloan program has been hugely successful, providing more than 16,800 low-interest loans, totaling over $373 million to producers across the country. Microloans have helped farmers and ranchers with operating costs, such as feed, fertilizer, tools, fencing, equipment, and living expenses since 2013. Seventy percent of loans have gone to new farmers.

Now, microloans will be available to also help with farm land and building purchases, and soil and water conservation improvements. FSA designed the expanded program to simplify the application process, expand eligibility requirements and expedite smaller real estate loans to help farmers strengthen their operations. Microloans provide up to $50,000 to qualified producers and can be issued to the applicant directly from the USDA Farm Service Agency (FSA).

To learn more about the FSA microloan program visit www.fsa.usda.gov/microloans, or contact your local FSA office.
Guaranteed Loan Program

FSA guaranteed loans allow lenders to provide agricultural credit to farmers who do not meet the lender's normal underwriting criteria. Farmers and ranchers apply for a guaranteed loan through a lender, and the lender arranges for the guarantee. FSA can guarantee up to 95 percent of the loss of principal and interest on a loan. Guaranteed loans can be used for both farm ownership and operating purposes.

Guaranteed farm ownership loans can be used to purchase farmland, construct or repair buildings, develop farmland to promote soil and water conservation or to refinance debt.

Guaranteed operating loans can be used to purchase livestock, farm equipment, feed, seed, fuel, farm chemicals, insurance and other operating expenses.

FSA can guarantee farm ownership and operating loans up to $1,776,000. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact your lender or local FSA farm loan office for more information on guaranteed loans.

The Importance of Responding to NASS Surveys

The U.S. Department of Agriculture's National Agricultural Statistics Service (NASS) conducts hundreds of surveys every year and prepares reports covering virtually every aspect of U.S. agriculture.

Producers who receive survey questionnaires should respond quickly and online if possible.

The results of the surveys help determine the structure of USDA farm programs, such as soil rental rates for the Conservation Reserve Program and prices and yields used for the Agriculture Risk Coverage and Price Loss Coverage programs. This county-level data is critical for USDA farm payment determinations. Survey responses also help associations, businesses and policymakers advocate for their industry and help educate others on the importance of agriculture.

NASS safeguards the privacy of all respondents and publishes only aggregate data, ensuring that no individual operation or producer can be identified.

NASS data is available online at www.nass.usda.gov/Publications and through the searchable Quick Stats database. Watch a video on how NASS data is used at https://www.youtube.com/watch?v=m-4zjnh26io&feature=youtu.be.
