Office Staff: Ross Eddy, District Director

Organic Producers and Handlers May Apply for Certification Cost Share Reimbursements

Starting March 20, 2017, organic producers and handlers will be able to visit over 2,100 USDA Farm Service Agency (FSA) offices to apply for federal reimbursement to assist with the cost of receiving and maintaining organic or transitional certification.

USDA reimburses organic producers up to 75 percent of the cost of organic certification, but only about half of the nation's organic operations currently participate in the program. Starting March 20, USDA will provide a uniform, streamlined process for organic producers and handlers to apply for organic cost share assistance either by mail or in person.

USDA is making changes to increase participation in the National Organic Certification Cost Share Program (NOCCSP) and the Agricultural Management Assistance Organic Certification Cost Share Program, and at the same time provide more opportunities for organic producers to access other USDA programs, such as disaster protection and loans for farms, facilities and marketing. Producers can also access information on nonfederal agricultural Randy Kleiner, Farm Loan Chief

Doris Ostrowski, Administrative Officer

Dawn Pindell, Outreach Specialist

Find your local office at: <u>www.fsa.usda.gov/ct</u>

resources, and get referrals to local experts, including organic agriculture, through USDA's Bridges to Opportunity service at the local FSA office.

The Connecticut Department of Agriculture can also accept applications for cost share assistance.

Eligible producers include certified producers or handlers who have paid organic certification fees to a <u>USDA-accredited certifying</u> agent. Application fees, inspection costs, fees related to equivalency agreement/ arrangement requirements, travel/per diem for inspectors, user fees, sales assessments and postage are all eligible for a cost share reimbursement from USDA.

Once certified, producers and handlers are eligible to receive reimbursement for up to 75 percent of certification costs each year up to a maximum of \$750 per certification scope—crops, livestock, wild crops and handling.

To learn more about organic certification cost share, please visit <u>www.fsa.usda.gov/organic</u> or contact your local FSA office at <u>www.fsa.usda.gov/ct</u>; choose County Offices in the left hand column to find the office nearest you.

March Loan Interest Rates

Farm Operating - Direct 3.00%

Farm Ownership: Direct 4.00%

Farm Ownership: Direct Down Payment, Beginning Farmer 1.50%

Farm Storage Facility Loan (7 years) 2.250%

USDA Packages Disaster Protection with Loans to Benefit Specialty Crop and Diversified Producers

Free basic coverage and discounted premiums available for new and underserved loan applicants

Producers who apply for FSA farm loans will be offered the opportunity to enroll in new disaster loss protections created by the 2014 Farm Bill. The new coverage, available from the Noninsured Crop Disaster Assistance Program (NAP), is available to FSA loan applicants who grow non-insurable crops, so this is especially important to fruit and vegetable producers and other specialty crop growers.

New, underserved and limited income specialty growers who apply for farm loans could qualify for basic loss coverage at no cost, or higher coverage for a discounted premium.

The basic disaster coverage protects at 55 percent of the market price for crop losses that exceed 50 percent of production. Covered crops include "specialty" crops, for instance, vegetables, fruits, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, hay, forage, grazing and energy crops. FSA allows beginning, underserved or limited income producers to obtain NAP coverage up to 90 days after the normal application closing date when they also apply for FSA credit.

In addition to free basic coverage, beginning, underserved or limited income producers are eligible for a 50 percent discount on premiums for the higher levels of coverage that protect up to 65 percent of expected production at 100 percent of the average market price. Producers also may work with FSA to protect value-added production, such as organic or direct market crops, at their fair market value in those markets. Targeted underserved groups eligible for free or discounted coverage are American Indians or Alaskan Natives, Asians, Blacks or African Americans, Native Hawaiians or other Pacific Islanders, Hispanics, and women.

FSA offers a variety of loan products, including farm ownership loans, operating loans and microloans that have a streamlined application process.

Growers need not apply for an FSA loan, nor be a beginning, limited resource, or underserved farmer, to be eligible for Noninsured Crop Disaster Assistance Program assistance. To learn more, visit <u>www.fsa.usda.gov/nap</u> or <u>www.fsa.usda.gov/farmloans</u>, or contact your local FSA office at <u>https://offices.usda.gov</u>.

Weather the Storm: FEMA Mobile App Provides Weather Alerts and Safety Tips

USDA offers programs to help producers recover from disasters; FEMA can help you prepare ahead of time.

The Federal Emergency Management Agency (FEMA) recently launched a free mobile app that will instruct the public on what to do before, during and after emergencies. The app is available for download for Apple, Android and Blackberry mobile devices.

Download the app to:

- Receive alerts from the National Weather Service for up to five locations
- Get safety reminders, read tips to survive natural disasters and customize your emergency checklist
- Locate open shelters and where to talk to FEMA in person (or on the phone)
- Upload and share your disaster photos to help first responders.

For more information about the FEMA app, visit <u>fema.gov/mobile-app</u>. To download the FEMA app from the Apple Store visit <u>https://itunes.apple.com/us/app/fema/id474807486?mt=8</u>. To download the FEMA app on Google Play for Android visit: https://play.google.com/store/apps/details?id=gov.fema.mobile.android&hl=en

Agriculture Meetings & Program Deadlines

March 15th - Deadline to enroll in Noninsured Disaster Assistance Program (NAP) for spring planted annual crops. Visit your county FSA office.

March 17th - Agriculture Day at the Capitol, 10 to 1; www.ctaginfocouncil.org (rescheduled due to snowstorm) Note: Outstanding Young Farmer Program and Awards takes place at 10:00 am in the Hall of Flags.

March 18th to 19th - Hebron Maple Festival; http://www.hebronmaplefest.com/

March 21st - FSA Farm+ and Client Gateway Workshop, Norwich USDA Service Center, 9 to 12:30; come learn how these USDA tools can help you access your farm information from home/farm. Hands on demonstrations. Contact 860-887-9941 for information.

March 30th - One on One Session, 9 to 3, New London County Extension Center, Norwich , CED Sarah Woodward will be meeting with farmers; <u>http://www.ctfarmrisk.uconn.edu/one-on-one.php</u>

April 5th - FSA Farm+ and Client Gateway Workshop, Litchfield USDA Service Center, Torrington, 9 to 12:30; come learn how these USDA tools can help you access your farm information from home or farm. Hands on demonstrations. Contact 860-626-8852 for information.

New USDA Commitments to Help Build Up Next Generation of Farmers and Ranchers

A new web tool is available at <u>www.usda.gov/newfarmers</u>. The site was designed based on feedback from new and beginning farmers and ranchers around the country, who cited unfamiliarity with programs and resources as a challenge to starting and expanding their operations. The site features advice and guidance on everything a new farm business owner needs to know, from writing a business plan, to obtaining a loan to grow their business, to filing taxes as a new small business owner. By answering a series of questions about their operation, farmers can use the site's Discovery Tool to build a personalized set of recommendations of USDA programs and services that may meet their needs.

Using the new web tool and other outreach activities, and operating within its existing resources, USDA has set a new goal of increasing beginning farmer and rancher participation by an additional 6.6 percent across key USDA programs, which were established or strengthened by the 2014 Farm Bill, for a total investment value of approximately \$5.6 billion. Programs were targeted for expanded outreach and commitment based on their impact on expanding opportunity for new and beginning farmers and ranchers, including starting or expanding an operation, developing new markets, supporting more effective farming and conservation practices, and having access to relevant training and education opportunities.

As the average age of the American farmer now exceeds 58 years, and data shows that almost 10 percent of farmland in the continental United States will change hands in the next five years, we have no time to lose in getting more new farmers and ranchers established. Equally important is encouraging young people to pursue careers in industries that support American agriculture. According to an employment outlook report released by USDA's National Institute of Food and Agriculture (NIFA) and Purdue University, one of the best fields for new college graduates is agriculture. Nearly 60,000 high-skilled agriculture job openings are expected annually in the United States for the next five years, yet only 35,000 graduates with a bachelor's degree or higher in agriculture related fields are expected to be available to fill them. The report also shows that women make up more than half of the food, agriculture, renewable natural resources, and environment

higher education graduates in the United States. USDA recently released a <u>series of fact sheets</u> showcasing the impact of women in agriculture nationwide.

The announcement builds on USDA's ongoing work to engage its resources to inspire a strong next generation of farmers and ranchers by improving access to land and capital; building market opportunities; extending conservation opportunities; offering appropriate risk management tools; and increasing outreach and technical support.
