USDA Issues Safety-Net Payments to Farmers Facing Market Downturn

USDA’s Farm Service Agency (FSA) has announced that beginning today, nearly one half of the 1.7 million farms that signed up for either the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs will receive safety-net payments for the 2014 crop year.

Unlike the old direct payments program, which paid farmers in good years and bad, the 2014 Farm Bill authorized a new safety-net that protects producers only when market forces or adverse weather cause unexpected drops in crop prices or revenues.

Example: The corn price for 2014 is 30 percent below the historical benchmark price used by the ARC-County program, and revenues of the farms participating in the ARC-County program are down by about $20 billion from the benchmark during the same period. The nearly $4 billion provided today by the ARC and PLC safety-net programs will give assistance to producers where revenues dropped below normal.”
The ARC/PLC programs primarily allow producers to continue to produce for the market by making payments on a percentage of historical base production, limiting the impact on production decisions.

Nationwide, 96 percent of soybean farms, 91 percent of corn farms, and 66 percent of wheat farms elected the ARC-County coverage option. Ninety-nine percent of long grain rice and peanut farms, and 94 percent of medium grain rice farms elected the PLC option. Overall, 76 percent of participating farm acres are protected by ARC-County, 23 percent by PLC, and 1 percent by ARC-Individual. For data about other crops, as well as state-by-state program election results, final PLC price and payment data, and other program information including frequently asked questions, visit www.fsa.usda.gov/arc-plc.

Crops receiving assistance include barley, corn, grain sorghum, lentils, oats, peanuts, dry peas, soybeans, and wheat. In the upcoming months, disbursements will be made for other crops after marketing year average prices are published by USDA’s National Agricultural Statistics Service. Any disbursements to participants in ARC-County or PLC for long and medium grain rice (except for temperate Japonica rice) will occur in November, for remaining oilseeds and also chickpeas in December, and temperate Japonica rice in early February 2016. ARC-individual payments will begin in November. Upland cotton is no longer a covered commodity.

The Budget Control Act of 2011, passed by Congress, requires USDA to reduce payments by 6.8 percent. For more information, producers are encouraged to visit their local Farm Service Agency office. To find a local Farm Service Agency office, visit http://offices.usda.gov.

USDA Announces $210 Million to be Invested in Renewable Energy Infrastructure through the Biofuel Infrastructure Partnership

21 States and Private Partners Match Federal Funds to Expand Infrastructure and Increase Fuel Options for Consumers

USDA is partnering with 21 states through the Biofuel Infrastructure Partnership (BIP) to nearly double the number of fueling pumps nationwide that supply renewable fuels to American motorists. In May 2015, USDA announced the availability of $100 million in grants through the BIP, and that to apply states and private partners match the federal funding by a 1:1 ratio. USDA received applications requesting over $130 million, outpacing the $100 million that is available. With the matching commitments by state and private entities, the BIP is investing a total of $210 million to strengthen the rural economy.

The 21 states participating in the BIP include Colorado, Florida, Illinois, Indiana, Iowa, Kansas, Louisiana, Maryland, Michigan, Minnesota, Missouri, Nebraska, North Carolina, North Dakota, Ohio, Pennsylvania, South Dakota, Texas, Virginia, West Virginia, and Wisconsin. The amount awarded to each state is available at:
The final awards being announced today are estimated to expand infrastructure by nearly 5,000 pumps at over 1,400 fueling stations.

A typical gas pump delivers fuel with 10 percent ethanol, which limits the amount of renewable energy that consumers can purchase. The new partnership will increase the number of pumps, storage and related infrastructure that offer higher blends of ethanol, such as E15, E85, and even intermediate combination blends.

USDA’s Office of the Chief Economist just released a comprehensive report on ethanol. The report, titled U.S. Ethanol: An Examination of Policy, Production, Use, Distribution, and Market Interactions, brings clarity to the complex interaction of ethanol production with agricultural markets and government policies. The corn ethanol industry is the largest biofuel producer in the country, with production increasing from about 1.6 billion gallons in 2000 to just over 14 billion gallons in 2014, stimulating economic activity in rural communities. Visit www.usda.gov/oce/reports/energy/EthanolExamination102015.pdf to read the complete report.

BIP is administered by the USDA Farm Service Agency. For more information, visit www.fsa.usda.gov/programs-and-services/energy-programs/index.

New USDA Commitments to Help Build Up Next Generation of Farmers and Ranchers

The U.S. Department of Agriculture today announced a commitment by the U.S. Department of Agriculture (USDA) to prioritize $5.6 billion over the next two years within USDA programs and services that serve new and beginning farmers and ranchers. Deputy Secretary Harden also announced a new, tailored web tool designed to connect burgeoning farm entrepreneurs with programs and resources available to help them get started.

The new web tool is available at www.usda.gov/newfarmers. The site was designed based on feedback from new and beginning farmers and ranchers around the country, who cited unfamiliarity with programs and resources as a challenge to starting and expanding their operations. The site features advice and guidance on everything a new farm business owner needs to know, from writing a business plan, to obtaining a loan to grow their business, to filing taxes as a new small business owner. By answering a series of questions about their operation, farmers can use the site’s Discovery Tool to build a personalized set of recommendations of USDA programs and services that may meet their needs.

Using the new web tool and other outreach activities, and operating within its existing resources, USDA has set a new goal of increasing beginning farmer and rancher participation by an additional 6.6 percent across key USDA programs, which were established or strengthened by the 2014 Farm Bill, for a total investment value of approximately $5.6 billion. Programs were targeted for expanded outreach and commitment based on their impact on expanding opportunity for new and beginning farmers and ranchers, including starting or expanding an operation, developing new markets, supporting more effective farming and conservation practices, and having access to relevant training and education opportunities. USDA will provide quarterly updates on its progress towards meeting its goal. A full explanation of the investment targets, benchmarks and outcomes is available at BFR-Commitment-Factsheet.
As the average age of the American farmer now exceeds 58 years, and data shows that almost 10 percent of farmland in the continental United States will change hands in the next five years, we have no time to lose in getting more new farmers and ranchers established. Equally important is encouraging young people to pursue careers in industries that support American agriculture. According to an employment outlook report released by USDA’s National Institute of Food and Agriculture (NIFA) and Purdue University, one of the best fields for new college graduates is agriculture. Nearly 60,000 high-skilled agriculture job openings are expected annually in the United States for the next five years, yet only 35,000 graduates with a bachelor’s degree or higher in agriculture related fields are expected to be available to fill them. The report also shows that women make up more than half of the food, agriculture, renewable natural resources, and environment higher education graduates in the United States. USDA recently released a series of fact sheets showcasing the impact of women in agriculture nationwide.

Today’s announcement builds on USDA’s ongoing work to engage its resources to inspire a strong next generation of farmers and ranchers by improving access to land and capital; building market opportunities; extending conservation opportunities; offering appropriate risk management tools; and increasing outreach and technical support. To learn more about USDA’s efforts, visit the Beginning Farmers and Ranchers Results Page.

**USDA Extends Dairy Margin Protection Program Deadline**

USDA’s Farm Service Agency (FSA) announced that the deadline to enroll for the dairy Margin Protection Program for coverage in 2016 has been extended until Nov. 20, 2015. The voluntary program, established by the 2014 Farm Bill, provides financial assistance to participating farmers when the margin – the difference between the price of milk and feed costs – falls below the coverage level selected by the farmer.

Producers are encouraged to use the online Web resource at [www.fsa.usda.gov/mpptool](http://www.fsa.usda.gov/mpptool) to calculate the best levels of coverage for their dairy operation. The secure website can be accessed via computer, smartphone or tablet.

Producers who were enrolled in 2015 will need to make a coverage election for 2016 and pay the $100 administration fee. Although any unpaid premium balances for 2015 must be paid in full by the enrollment deadline to remain eligible for higher coverage levels in 2016, premiums for 2016 are not due until Sept. 1, 2016. Also, producers can work with milk marketing companies to remit premiums on their behalf.

Payments under the program may be reduced by a certain percentage due to a sequester order required by Congress and issued pursuant to the Balanced Budget and Emergency Deficit Control Act of 1985. Should a payment reduction be necessary, FSA will reduce the payment by the required amount.

---

**2016 Acreage Reporting of PRF and Perennial Forage (grass intended for grazing or hay)**

In order to comply with FSA program eligibility requirements, all producers are encouraged to visit their local FSA Office to file an accurate crop certification report by the applicable deadline for PRF/Perennial Forage. Programs that require certification of PRF and/or Perennial Forage include the Noninsured Crop Disaster Assistance Program (NAP), Livestock Forage Disaster Program (LFP) and the Agriculture Risk Coverage (ARC) and Price Loss Coverage Program (PLC).

Perennial Forage includes but is not limited to grass, alfalfa, birdsfoot trefoil, clover and mixed forage intended for hay or grazing. PRF includes acreage insured as PRF with crop insurance.
The acreage reporting deadline for PRF/Perennial Forage is November 15, 2015.

The following exceptions apply to the above acreage reporting date:

- If the crop has not been planted by the above acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is complete.

- If a producer acquires additional acreage after the above acreage reporting date, then the acreage must be reported no later than 30 calendars days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.

- If a perennial forage crop is reported with the intended use of “cover only,” “green manure,” “left standing” or “seed,” then the acreage must be reported by July 15th.

NAP policy holders should note that the acreage reporting date for NAP covered crops is the earlier of the dates listed above or 15 calendar days before grazing or harvesting of the crop begins.

For questions regarding crop certification and crop loss reports, please contact your local FSA office.

---

**USDA Encourages Producers to Consider Risk Protection Coverage before Fall Crop Sales Deadlines**

*Disaster Assistance is Available for Crops that are Ineligible for Federal Insurance*

Farm Service Agency today encouraged producers to examine the available U.S. Department of Agriculture (USDA) crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the sales deadline for fall crops.

Deadlines are quickly approaching to purchase coverage for fall-seeded crops. Producers are reminded that crops not covered by insurance may be eligible for the Noninsured Crop Disaster Assistance Program. The 2014 Farm Bill expanded NAP to include higher levels of protection. Beginning, underserved and limited resource farmers are now eligible for free catastrophic level coverage, as well as discounted premiums for additional levels of protection.

Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent federal crop insurance program is available, including forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

USDA has partnered with Michigan State University and the University of Illinois to create an online tool at [www.fsa.usda.gov/nap](http://www.fsa.usda.gov/nap) that allows producers to determine whether their crops are eligible for federal crop insurance or NAP and to explore the best level of protection for their operation. NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production, with higher levels of coverage, up to 65 percent of their expected production at 100 percent of the average market price, including coverage for organics and crops marketed directly to consumers.

Deadlines for coverage vary by state and crop. To learn more about NAP visit [www.fsa.usda.gov/nap](http://www.fsa.usda.gov/nap) or contact your local USDA Service Center. To find your local USDA Service Centers go to [http://offices.usda.gov](http://offices.usda.gov).

Farmers to Receive Documentation of USDA Services

Local Offices Issue Receipts for Services Provided

Farm Service Agency (FSA) reminds agricultural producers that FSA provides a receipt to customers who request or receive assistance or information on FSA programs.

As part of FSA’s mission to provide enhanced customer service, producers who visit FSA will receive documentation of services requested and provided. From December through June, FSA issued more than 327,000 electronic receipts.

The 2014 Farm Bill requires a receipt to be issued for any agricultural program assistance requested from FSA, the Natural Resources Conservation Service (NRCS) and Rural Development (RD). Receipts include the date, summary of the visit and any agricultural information, program and/or loan assistance provided to an individual or entity.

In some cases, a form or document – such as a completed and signed program enrollment form – serve as the customer receipt instead of a printed or electronic receipt. A service is any information, program or loan assistance provided whether through a visit, email, fax or letter.

To learn more about FSA, visit www.fsa.usda.gov or to find your local USDA office, visit http://offices.usda.gov.

USDA Packages Disaster Protection with Loans to Benefit Specialty Crop and Diversified Producers

Free basic coverage and discounted premiums available for new and underserved loan applicants

U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) today announced that producers who apply for FSA farm loans also will be offered the opportunity to enroll in new disaster loss protections created by the 2014 Farm Bill. The new coverage, available from the Noninsured Crop Disaster Assistance Program (NAP), is available to FSA loan applicants who grow non-insurable crops, so this is especially important to fruit and vegetable producers and other specialty crop growers.

New, underserved and limited income specialty growers who apply for farm loans could qualify for basic loss coverage at no cost, or higher coverage for a discounted premium.

The basic disaster coverage protects at 55 percent of the market price for crop losses that exceed 50 percent of production. Covered crops include “specialty” crops, for instance, vegetables, fruits, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, hay, forage, grazing and energy crops. FSA allows beginning, underserved or limited income producers to obtain NAP coverage up to 90 days after the normal application closing date when they also apply for FSA credit.

In addition to free basic coverage, beginning, underserved or limited income producers are eligible for a 50 percent discount on premiums for the higher levels of coverage that protect up to 65 percent of expected production at 100 percent of the average market price. Producers also may work with FSA to protect value-added production, such as organic or direct market crops, at their fair market value in those markets. Targeted underserved groups eligible for free or discounted coverage are American Indians or Alaskan Natives, Asians, Blacks or African Americans, Native Hawaiians or other Pacific Islander, Hispanics, and women.

FSA offers a variety of loan products, including farm ownership loans, operating loans and microloans that have a streamlined application process.
Growers need not apply for an FSA loan, nor be a beginning, limited resource, or underserved farmer, to be eligible for Noninsured Crop Disaster Assistance Program assistance. To learn more, visit www.fsa.usda.gov/nap or www.fsa.usda.gov/farmloans, or contact your local FSA office at https://offices.usda.gov.

Direct Loans
FSA offers direct farm ownership and direct farm operating Loans to producers who want to establish, maintain or strengthen their farm or ranch. FSA loan officers process, approve and service direct loans.

Direct farm operating loans can be used to purchase livestock and feed, farm equipment, fuel, farm chemicals, insurance and other costs including family living expenses. Operating loans can also be used to finance minor improvements or repairs to buildings and to refinance some farm-related debts, excluding real estate.

Direct farm ownership loans can be used to purchase farmland, enlarge an existing farm, construct and repair buildings, and to make farm improvements.

The maximum loan amount for both direct farm ownership and operating loans is $300,000 and a down payment is not required. Repayment terms vary depending on the type of loan, collateral and the producer’s ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact your local FSA office for more information or to apply for a direct farm ownership or operating loan.

Selected Interest Rates for November 2015

90-Day Treasury Bill - .125%

Farm Operating Loans — Direct - 2.50%

Farm Ownership Loans — Direct - 3.875%

Farm Ownership Loans — Direct Down Payment, Beginning Farmer or Rancher - 1.50%

Emergency Loans - 3.50%

Dates to Remember

Nov 26 - Federal Holiday. Offices Closed.
