USDA Sees Strong Demand for Conservation Reserve Program

Deadline to Submit Offers for Competitive Enrollment is Feb. 26

USDA reminds farmers and ranchers that the competitive sign-up deadline for its most popular voluntary conservation program, the Conservation Reserve Program (CRP), is Feb. 26, 2016. This will be one of the most competitive general sign-up periods in history, in part due a statutory limit on the number of acres that can be enrolled in the program. The most competitive applications will be those that combine multiple conservation benefits, such as water quality and wildlife habitat.

For the past thirty years, CRP has provided financial incentives to farmers and ranchers to remove environmentally sensitive agricultural land from production to be planted with certain grasses, shrubs and trees that improve water quality, prevent soil erosion and increase wildlife habitat. Since 1985, CRP has sequestered an annual average of 49 million tons of greenhouse gases, equal to taking 9 million cars off the road; prevented 9 billion tons of soil from erosion,
enough to fill 600 million dump trucks; and reduced nitrogen and phosphorous runoff by 95 and 85 percent, respectively. CRP also protects more than 170,000 stream miles with forests and grasses, enough to go around the world seven times. The program has allowed for the restoration of 2.7 million acres of wetland.

As of January 2016, 23.6 million acres were enrolled in CRP, with contracts for more than 1.6 million acres set to expire this fall. The statutory cap on acres that can be enrolled is 24 million acres. Submissions will be ranked according to environmental benefits in comparison to all other offers nationwide. USDA will announce accepted offers after the enrollment period ends and offers are reviewed. For an interactive tour of CRP success stories from across the U.S., visit [www.fsa.usda.gov/CRPis30](http://www.fsa.usda.gov/CRPis30), or follow on Twitter at #CRPis30.

### FSA Issues Fiscal Year 2015 Impacts Report

2015 marks the 20th anniversary of USDA’s Farm Service Agency, but FSA’s roots date back nearly 80 years, to the days of the Great Depression and the Dust Bowl, when the rural economy was in crisis and America’s farmers and ranchers needed assistance. At that time, Congress empowered USDA to provide a strong safety-net for farm families, helping them navigate the unpredictability of natural disasters and volatile market conditions.

Today, technological advancements in equipment, crop and veterinary sciences, soil and water conservation, and pest and nutrient management, all have resulted in agriculture becoming stronger than we’ve ever known - - certainly far stronger than the days of our grandparents and great-grandparents. But the unpredictability of weather and markets remain. That means the FSA mission is as important as it’s ever been to ensure the domestic agriculture sector continues to deliver an abundant, safe, and affordable food and fiber supply for the American people.

The [FSA Impacts Report](http://www.fsa.usda.gov) shows selected highlights for fiscal year 2015. This report highlights the achievements of FSA and will ensure that the path forward continues to demonstrate our commitment to rural America.
USDA To Offer Certificates for Farm Commodities Pledged to Marketing Loans

Producers who have crops pledged as collateral for a marketing assistance loan can now purchase a commodity certificate that may be exchanged for the outstanding loan collateral. The authority is provided by the 2016 Consolidated Appropriations Act, legislation enacted by Congress in December. Commodity certificates are available beginning with the 2015 crop in situations where the applicable marketing assistance loan rate exceeds the exchange rate. Currently, the only eligible commodity is cotton.

USDA’s Farm Service Agency (FSA) routinely provides agricultural producers with marketing assistance loans that provide interim cash flow without having to sell the commodities when market prices are at harvest time lows. The loans allow the producer to store and delay the sale of the commodity until more favorable market conditions emerge, while also providing for a more orderly marketing of commodities throughout the marketing year.

These loans are considered “nonrecourse” because the loan can be redeemed by delivering the commodity pledged as collateral to the government as full payment for the loan upon maturity. Commodity certificates are available to loan holders having outstanding nonrecourse loans for wheat, upland cotton, rice, feed grains, pulse crops (dry peas, lentils, large and small chickpeas), peanuts, wool, soybeans and designated minor oilseeds. These certificates can be purchased at the posted county price (or adjusted world price or national posted price) for the quantity of commodity under loan, and must be immediately exchanged for the collateral, satisfying the loan.

Producers may contact their FSA office that maintains their loan or their loan service agent for additional information. Producers who do business with Cooperative Marketing Associations (CMA) or Designated Marketing Associations (DMA) may contact their respective associations for additional information. To learn more about commodity certificates, visit www.fsa.usda.gov/pricesupport.

USDA Expands Microloans to Help Farmers Purchase Farmland and Improve Property

Producers, Including Beginning and Underserved Farmers, Have a New Option to Gain Access to Land

The U.S. Department of Agriculture (USDA) will begin offering farm ownership microloans, creating a new financing avenue for farmers to buy and improve property. These microloans will be especially helpful to beginning or underserved farmers, U.S. veterans looking for a career in farming, and those who have small and mid-sized farming operations.

The microloan program, which celebrates its third anniversary this week, has been hugely successful, providing more than 16,800 low-interest loans, totaling over $373 million to producers across the country. Microloans have helped farmers and ranchers with operating costs, such as feed, fertilizer, tools, fencing, equipment, and living expenses since 2013. Seventy percent of loans have gone to new farmers.

Now, microloans will be available to also help with farm land and building purchases, and soil and water conservation improvements. FSA designed the expanded program to simplify the application process, expand eligibility requirements and expedite smaller real estate loans to help farmers strengthen their operations. Microloans provide up to $50,000 to qualified producers, and can be issued to the applicant directly from the USDA Farm Service Agency (FSA).

This microloan announcement is another USDA resource for America’s farmers and ranchers to utilize, especially as new and beginning farmers and ranchers look for the assistance they need to get started. To learn more about the FSA microloan program visit www.fsa.usda.gov/microloans, or
contact your local FSA office. To find your nearest office location, please visit [http://offices.usda.gov](http://offices.usda.gov).

### Final Planting Dates
All producers are encouraged to contact their local FSA office for more information on the final planting date for specific crops. The final planting dates vary by crop, planting period and county so please contact your local FSA office for a list of county-specific planting deadlines. The timely planting of a crop, by the final planting date, may prevent loss of program benefits.

### CRP Payment Limitation
Payments and benefits received under the Conservation Reserve Program (CRP) are subject to the following:

- payment limitation by direct attribution
- foreign person rule
- average adjusted gross income (AGI) limitation

The 2014 Farm Bill continued the $50,000 maximum CRP payment amount that can be received annually, directly or indirectly, by each person or legal entity. This payment limitation includes all annual rental payments and incentive payments (Sign-up Incentive Payments and Practice Incentive Payments). Annual rental payments are attributed (earned) in the fiscal year in which program performance occurs. Sign-up Incentive Payments (SIP) are attributed (earned) based on the fiscal year in which the contract is approved, not the fiscal year the contract is effective. Practice Incentive Payments (PIP) are attributed (earned) based on the fiscal year in which the cost-share documentation is completed and the producer or technical service provider certifies performance of practice completion to the county office.

Such limitation on payments is controlled by direct attribution.

- Program payments made directly or indirectly to a person are combined with the pro rata interest held in any legal entity that received payment, unless the payments to the legal entity have been reduced by the pro rata share of the person.
- Program payments made directly to a legal entity are attributed to those persons that have a direct and indirect interest in the legal entity, unless the payments to the legal entity have been reduced by the pro rata share of the person.
- Payment attribution to a legal entity is tracked through four levels of ownership. If any part of the ownership interest at the fourth level is owned by another legal entity, a reduction in payment will be applied to the payment entity in the amount that represents the indirect interest of the fourth level entity in the payment entity.

Essentially, all payments will be “attributed” to a person’s Social Security Number. Given the current CRP annual rental rates in many areas, it is important producers are aware of how CRP offered acreages impact their $50,000 annual payment limitation. Producers should contact their local FSA office for additional information.

NOTE: The information in the above article only applies to contracts subject to 4-PL and 5-PL regulations. It does not apply to contacts subject to 1-PL regulations.

### Fire Management on CRP Acres
Landowners who participate in the Conservation Reserve Program (CRP) are responsible for fire management on their CRP acreage. Fireguard technical practices should be outlined in the
Conservation Plan of Operations (CPO).

Landowners must complete the necessary management activities outside of the Primary Nesting Season. In Florida, the Primary Nesting Season is March 1st through July 15th. The goal is to suppress the amount of fuel in the event of a wildfire while still promoting the diversity of the conservation cover.

FSA encourages producers to be proactive in preventing the spread of wildfire. Fire management includes installing firebreaks, which should be included in the contract support document and installed according to NRCS firebreak standards.

Barren firebreaks will only be allowed in high risk areas, such as transportation corridors, rural communities, and adjacent farmsteads. A conservationist must certify that there will not be an erosion hazard from the barren firebreak. If erosion becomes a problem, remedial action will be taken.

---

**Disaster Set-Aside (DSA) Program**

FSA borrowers with farms located in designated primary or contiguous disaster areas who are unable to make their scheduled FSA loan payments should consider the Disaster Set-Aside (DSA) program.

DSA is available to producers who suffered losses as a result of a natural disaster and is intended to relieve immediate and temporary financial stress. FSA is authorized to consider setting aside the portion of a payment/s needed for the operation to continue on a viable scale. Borrowers must have at least two years left on the term of their loan in order to qualify.

Borrowers have eight months from the date of the disaster designation to submit a complete application. The application must include a written request for DSA signed by all parties liable for the debt along with production records and financial history for the operating year in which the disaster occurred. FSA may request additional information from the borrower in order to determine eligibility.

All farm loans must be current or less than 90 days past due at the time the DSA application is complete. Borrowers may not set aside more than one installment on each loan.

The amount set-aside, including interest accrued on the principal portion of the set-aside, is due on or before the final due date of the loan.

For more information, contact your local FSA farm loan office.

---

**Farm Loan Graduation Reminder**

FSA Direct Loans are considered a temporary source of credit that is available to producers who do not meet normal underwriting criteria for commercial banks.

FSA periodically conducts Direct Loan graduation reviews to determine a borrower’s ability to graduate to commercial credit. If the borrower’s financial condition has improved to a point where they can refinance their debt with commercial credit, they will be asked to obtain other financing and partially or fully pay off their FSA debt.

By the end of a producer’s operating cycle, the Agency will send a letter requesting a current balance sheet, actual financial performance and a projected farm budget. The borrower has 30 days to return the required financial documents. This information will be used to evaluate the borrower’s potential for refinancing to commercial credit.

If a borrower meets local underwriting criteria, FSA will send the borrower’s name, loan type,
balance sheet and projected cash flow to commercial lenders. The borrower will be notified when loan information is sent to local lenders.

If any lenders are interested in refinancing the borrower’s loan, FSA will send the borrower a letter with a list of lenders that are interested in refinancing the loan. The borrower must contact the lenders and complete an application for commercial credit within 30 calendar days.

If a commercial lender rejects the borrower, the borrower must obtain written evidence that specifies the reasons for rejection and submit to their local FSA farm loan office.

If a borrower fails to provide the requested financial information or to graduate, FSA will notify the borrower of noncompliance, FSA’s intent to accelerate the loan, and appeal rights.
