Secretary Perdue Names FSA Administrator

U.S. Secretary of Agriculture Sonny Perdue announced today the appointment of Richard Fordyce to serve as Administrator of the U.S. Department of Agriculture’s (USDA) Farm Service Agency (FSA). In his role, Fordyce will provide leadership for FSA and its mission to support agricultural production across America through a network of over 2,100 county and 50 state offices.

Richard Fordyce, a fourth-generation farmer, most recently served as State Executive Director for FSA in Missouri. Prior to his appointment by the Trump Administration, Fordyce served as the director of the Missouri Department of Agriculture from 2013 to 2017. In 2015, Fordyce was awarded the Missouri Farm Bureau Distinguished Service Award and the Agricultural Leaders of Tomorrow Alumnus of the Year. He and his wife, Renee, have two children and grow soybeans, corn and beef cattle on the family farm.
FSA Releases Signup Information for Tree Assistance Program

USDA’s Farm Service Agency recently released signup information for the Tree Assistance Program, a nationwide program that provides orchardists and nursery tree growers with cost share assistance to replant eligible trees, bushes, and vines following a natural disaster.

The Bipartisan Budget Act of 2018 prescribed several changes to the program, including the removal of the $125,000 per person and legal entity payment limitation. The notice outlined when producers should file applications for any recent losses, given the changes to the program.

Eligible producers should file for TAP assistance by the later of these two dates:

- 90 days of the disaster or when damages from the disaster are noticed; or
- 60 days after the regulation is published on the Federal Register later this summer.

The following producers can file applications:

- Producers who did not previously apply for TAP for 2017 or 2018 losses; and
- Producers who had applied and received an adverse determination that their 2017 or 2018 TAP application was filed late.

Additionally, producers with 2017 losses can also file an application or revise an original application because of the changes made through the Act.

For more information on TAP, producers should contact their local USDA service center.

Perdue Announces Additional Hurricane and Wildfire Recovery Details

Under the direction of President Donald J. Trump, U.S. Secretary of Agriculture Sonny Perdue today announced new details on eligibility for a new U.S. Department of Agriculture (USDA) disaster program, 2017 Wildfires and Hurricanes Indemnity Program (2017 WHIP). In total, USDA’s Farm Service Agency (FSA) will deploy the up to $2.36 billion that Congress appropriated through the Bipartisan Budget Act of 2018 to help producers with recovery of their agricultural operations in at least nine states with hurricane damage and states impacted by wildfire. Following the announcement, Secretary Perdue issued this statement:

"Last year our nation experienced some of the most significant disasters we have seen in decades, some back-to-back, at the most critical time in their production year. While USDA has a suite of disaster programs as well as crop insurance available to help producers manage their risk, Congress felt it was important to provide extra assistance to our nation’s farms and ranches that were the hardest hit last year," Secretary Perdue said. "At President Trump’s direction, our team is
working as quickly as possible to make this new program available to farmers in need. Our aim is to provide excellent customer service, building on efforts which began the day the storm hit.”

Key Updates Include:

- Hurricane Recovery: To be eligible a crop, tree, bush or vine must be located in a primary disaster county with either a Presidential declaration or a Secretarial designation due to a 2017 hurricane. Crops, trees, bushes or vines located in other counties may also be eligible if the producer provides documentation the loss was caused by a 2017 hurricane.

- Wildfire Recovery: Any crop, tree, bush or vine, damaged by a 2017 wildfire is eligible.

- Eligible Producers: Eligibility will be determined on an individual basis, using the level of insurance coverage purchased for 2017 for the total crop acres on the area for which the WHIP application is made. Eligible producers who certify to an average adjusted gross income (AGI) of at least 75 percent derived from farming or ranching, including other agriculture and forestry-based businesses during the tax years 2013, 2014 and 2015, will be eligible for a $900,000 payment limitation with verification. All other eligible producers requesting 2017 WHIP benefits will be subject to a $125,000 payment limitation.

- Crop Insurance Requirement: Both insured and uninsured producers are eligible to apply for WHIP. However, all producers opting to receive 2017 WHIP payments will be required to purchase crop insurance at the 60% coverage level, or Noninsured Crop Disaster Assistance Program (NAP) at the 60% buy up coverage level if crop insurance is not available. Coverage must be in place for the next two applicable crop years to meet program requirements.

- Acreage Reporting Requirements: In addition, for the applicable crop years, all producers are required to file an acreage report and report production (if applicable).

- Payment Formula: FSA will calculate WHIP payments with this formula:

\[
\text{Payment} = \text{Expected Value of the Crop} \times \text{WHIP Factor} - \text{Value of Crop Harvested} - \text{Insurance Indemnity}
\]

The WHIP factor ranges from 65 percent to 95 percent. Producers who did not insure their crops in 2017 will receive a 65 percent WHIP Factor. Insured producers, or producers who had NAP, will receive between 70 percent and 95 percent WHIP Factors; those purchasing higher levels of coverage will receive higher WHIP Factors.

Other USDA Disaster Assistance
Drought, wildfires and other disasters continue to impact farmers and ranchers, and 2017 WHIP is just one of many programs available through USDA to help with recovery. From crop insurance to on-the-ground rehabilitation programs like the Emergency Conservation Program (ECP) and Environmental Quality Incentives Program (EQIP), USDA is here to help. The Bipartisan Budget Act of 2018 provided funding for ECP and the Emergency Watershed Protection Program. The Act also provided amendments to make programs like the Emergency Assistance for Livestock, Honeybees and Farm-raised Fish Program, Tree Assistance Program and Livestock Indemnity Program even more responsive.

More Information:
FSA will hold a sign-up for 2017 WHIP no later than July 16. Additional information on WHIP is available on FSA’s 2017 WHIP webpage. For immediate assistance under any of our other disaster programs, please contact a local USDA service center or learn more at www.fsa.usda.gov/disaster.
Farm Service Agency Makes Administrative Change to the Livestock Indemnity Program

Starting today, agricultural producers who have lost livestock to disease, resulting from a weather disaster, have an additional way to become eligible for the Livestock Indemnity Program.

In the event of disease, this change by USDA’s Farm Service Agency (FSA) authorizes local FSA county committees to accept veterinarian certifications that livestock deaths were directly related to adverse weather and unpreventable through good animal husbandry and management. The committees may then use this certification to allow eligibility for producers on a case-by-case basis for LIP.

LIP provides benefits to agricultural producers for livestock deaths in excess of normal mortality caused by adverse weather, disease or by attacks by animals reintroduced into the wild by the federal government. Eligible weather events include earthquakes, hail, tornadoes, hurricanes, storms, blizzard and flooding.

Producers interested in LIP or other USDA disaster assistance programs should contact their local USDA service center.

USDA to Immediately Assist Producers for Qualifying Livestock, Honeybee and Farm-raised Fish Program Losses

$34 Million in Payments for 2017 Losses Part of Broad Suite of Programs Aiding Ag Operations

USDA will issue $34 million to help agricultural producers recover from 2017 natural disasters through the Emergency Assistance for Livestock, Honeybees and Farm-raised Fish Program (ELAP), which covers losses not covered by certain other USDA disaster assistance programs. These payments are being made available today, and they are part of a broader USDA effort to help producers recover from hurricanes Harvey, Irma and Maria, wildfires and drought. A large portion of this assistance will be made available in federally designated disaster areas.

ELAP aims to help eligible producers of livestock, honeybees and farm-raised fish for losses due to disease, certain adverse weather events or loss conditions, including blizzards and wildfires, as determined by the Secretary. ELAP assistance is provided for losses not covered by other disaster assistance programs such as the Livestock Forage Disaster Program (LFP) and the Livestock Indemnity Program (LIP).

The increased amount of assistance through ELAP was made possible by the Bipartisan Budget Act of 2018, signed earlier this year. The Act amended the 2014 Farm Bill to enable USDA’s Farm Service Agency (FSA) to provide assistance to producers without an annual funding cap and immediately for 2017. It also enables FSA to pay ELAP applications as they are filed for 2018 and subsequent program years.

Other USDA Disaster Assistance Programs

The Act removed program year payment limitations and increased the acreage cap for the Tree Assistance Program (TAP), a nationwide program that provides owners of orchards, vineyards and nurseries with cost share assistance to replant eligible trees, bushes, and vines following a natural disaster. For example, the program will help owners of citrus groves in Florida, avocado trees in California, coffee plantations in Puerto Rico and vineyards reduce the cost of replanting, and speed recovery from the loss of fruit and nut trees, bushes, and vines.

Prior to the Act, there was a combined program year payment limitation of $125,000 for ELAP, LIP and LFP per person or legal entity. The Tree Assistance Program (TAP) had its own $125,000 payment limitation. The Act removed the program year per person and legal entity payment limitation for LIP and TAP. As a result of the Act, a $125,000 per person and legal entity single payment limitation applies to the total amount of program year payments received under both ELAP and the Livestock Forage Disaster Program (LFP) and program payments under LIP and TAP no
longer have payment limits.

Under the updated program, as amended by the Act, growers are eligible to be partly reimbursed for losses on up to 1,000 acres per program year, double the previous acreage limit of 500 acres.

In total, it is estimated that the Act will enable USDA to provide more than $3 billion in disaster assistance, including the $2.36 billion announced last week to be made available through FSA’s new 2017 Wildfires and Hurricanes Indemnity Program. This includes $400 million made available for the Emergency Conservation Program, which helps farmers and ranchers repair damage to farmlands caused by natural disasters. As signups across the country are completed, additional applications will be funded.

According to the U.S. National Oceanic and Atmospheric Administration (NOAA), the United States was impacted by 16 separate billion-dollar disaster events in 2017 including: three tropical cyclones, eight severe storms, two inland floods, a crop freeze, drought and wildfire. More than 25 million people – almost eight percent of the population – were affected by major disasters. From severe flooding in Puerto Rico and Texas to mudslides and wildfires in California, major natural disasters caused catastrophic damages, with an economic impact totaling more than $300 billion.

For Assistance
Producers with operations impacted by natural disasters and diseases in 2018 are encouraged to contact their local USDA service center to apply for assistance through ELAP, TAP, LIP and LFP. Producers with 2017 ELAP claims need to take no action as FSA will begin paying those claims today.

Reporting Solar Panels Constructed on Cropland
Producers who have solar panels constructed on their farms should notify the local Farm Service Agency office. Any area that is no longer considered suitable as cropland (producing annual or perennial crops) should be designated in FSA’s records and aerial photography maps. When base acres on a farm are converted to a non-agricultural commercial or industrial use, the total base acres on the farm must be reduced accordingly. Non-cropland areas used for solar panels might impact payments calculated using base acres, such as Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) and Conservation Reserve Program (CRP) annual rental payments.

USDA Reopens Enrollment for Improved Dairy Safety Net Tool
USDA’s Farm Service Agency encourages dairy producers to consider enrolling in the new and improved Margin Protection Program for Dairy (MPP-Dairy), which will provide better protections for dairy producers from shifting milk and feed prices. With changes authorized under the Bipartisan Budget Act of 2018, the U.S. Department of Agriculture’s (USDA) Farm Service Agency (FSA) has set the enrollment period to run from April 9, 2018 to June 1, 2018.

About the Program:
The program protects dairy producers by paying them when the difference between the national all-milk price and the national average feed cost (the margin) falls below a certain dollar amount elected by the producer.

Changes include:

- Calculations of the margin period is monthly rather than bi-monthly.
- Covered production is increased to 5 million pounds on the Tier 1 premium schedule, and premium rates for Tier 1 are substantially lowered.
- An exemption from paying an administrative fee for limited resource, beginning, veteran, and disadvantaged producers. Dairy operators enrolled in the previous 2018 enrollment
period that qualify for this exemption under the new provisions may request a refund.

Dairy operations must make a new coverage election for 2018, even if you enrolled during the previous 2018 signup period. Coverage elections made for 2018 will be retroactive to January 1, 2018. All dairy operations desiring coverage must sign up during the enrollment period and submit an appropriate form (CCC-782) and dairy operations may still “opt out” by not submitting a form. All outstanding balances for 2017 and prior years must be paid in full before 2018 coverage is approved.

Dairy producers can participate in FSA’s MPP-Dairy or the Risk Management Agency’s Livestock Gross Margin Insurance Plan for Dairy Cattle (LGM-Dairy), but not both. During the 2018 enrollment period, only producers with an active LGM-Dairy policy who have targeted marketings insured in 2018 months will be allowed to enroll in MPP-Dairy by June 1, 2018; however, their coverage will start only after active target marketings conclude under LGM-Dairy.

USDA has a web tool to help producers determine the level of coverage under the MPP-Dairy that will provide them with the strongest safety net under a variety of conditions. The online resource, which will be updated and available by April 9 at www.fsa.usda.gov/mpptool, allows dairy farmers to quickly and easily combine unique operation data and other key variables to calculate their coverage needs based on price projections. Producers can also review historical data or estimate future coverage based on data projections. The secure site can be accessed via computer, smartphone, tablet or any other platform.

USDA is mailing postcards advising dairy producers of the changes. For more information, visit www.fsa.usda.gov/dairy or contact your local USDA service center.

---

**ARC/PLC Acreage Maintenance**

Producers enrolled in the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs must protect all cropland and noncropland acres on the farm from wind and water erosion and noxious weeds. Producers who sign ARC county or individual contracts and PLC contracts agree to effectively control noxious weeds on the farm according to sound agricultural practices. If a producer fails to take necessary actions to correct a maintenance problem on a farm that is enrolled in ARC or PLC, the County Committee may elect to terminate the contract for the program year.

---

**Supervised Credit**

Farm Service Agency (FSA) Farm Loan programs are considered supervised credit. Unlike loans from a commercial lender, FSA loans are intended to be temporary in nature. Therefore, it is our goal to help you graduate to commercial credit, and our farm loan staff is available to help borrowers through training and credit counseling.

The FSA team will help borrowers identify their goals to ensure financial success. Through this process, FSA staff will advise borrowers in developing strategies and a plan to meet your operation’s goals and graduate to commercial credit. Ultimately, the borrower is responsible for the success of the farming operation, but FSA’s staff will help in an advisory role to provide the tools necessary to help you achieve your operational goals and manage your finances.

For more information on FSA farm loan programs, visit www.fsa.usda.gov.

---

**Farm Loan Graduation Reminder**

FSA Direct Loans are considered a temporary source of credit that is available to producers who do not meet normal underwriting criteria for commercial banks.
FSA periodically conducts Direct Loan graduation reviews to determine a borrower’s ability to graduate to commercial credit. If the borrower’s financial condition has improved to a point where they can refinance their debt with commercial credit, they will be asked to obtain other financing and partially or fully pay off their FSA debt.

By the end of a producer’s operating cycle, the Agency will send a letter requesting a current balance sheet, actual financial performance and a projected farm budget. The borrower has 30 days to return the required financial documents. This information will be used to evaluate the borrower’s potential for refinancing to commercial credit.

If a borrower meets local underwriting criteria, FSA will send the borrower’s name, loan type, balance sheet and projected cash flow to commercial lenders. The borrower will be notified when loan information is sent to local lenders.

If any lenders are interested in refinancing the borrower’s loan, FSA will send the borrower a letter with a list of lenders that are interested in refinancing the loan. The borrower must contact the lenders and complete an application for commercial credit within 30 calendar days.

If a commercial lender rejects the borrower, the borrower must obtain written evidence that specifies the reasons for rejection and submit to their local FSA farm loan office.

If a borrower fails to provide the requested financial information or to graduate, FSA will notify the borrower of noncompliance, FSA’s intent to accelerate the loan, and appeal rights.

**ASKFSA**

Are you looking for answers to your FSA questions? Then ASK FSA at [askfsa.custhelp.com](http://askfsa.custhelp.com).

AskFSA is an online resource that helps you easily find information and answers to your FSA questions no matter where you are or what device you use. It is for ALL customers, including underserved farmers and ranchers who wish to be enrolled in FSA loans, farm, and conservation programs.

Through AskFSA you can:

- Access our knowledge base 24/7
- Receive answers to your questions faster
- Submit a question and receive a timely response from an FSA expert
- Get notifications when answers important to you and your farming operation are updated

Customize your account settings and view responses at any time
