Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) Educational Tool Available for Farms with Generic Base Acres that Planted Seed Cotton

Farm Service Agency (FSA) is notifying farmers with generic base acres that planted seed cotton that a new tool is available to assist them in understanding how the new seed cotton program may affect their FSA payments. It helps a producer make decisions on how to allocate generic base acres to other covered crops based on a producer’s planting history.

The educational tool can be viewed at https://www.afpc.tamu.edu/tools/cotton-base.

Developed by Texas A&M University, the tool is for educational purposes only, and by using the tool, it is agreed that the results are not a guarantee of future FSA program parameters or payments. Users also acknowledge that this tool is provided with absolutely no warranty, without even the implied warranty of fitness for a particular purpose.
The Bipartisan Budget Act of 2018 included seed cotton as a covered commodity under the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) program effective for the 2018 crop year. The Act also authorizes owners of a farm with generic base acres and a recent history of covered commodities a one-time opportunity to update the farm’s payment yield for seed cotton.

Complete details of this decision are available by reading the Notice (https://www.fsa.usda.gov/Internet/FSA_Notice/arcplc50.pdf) or by contacting your State or County FSA office http://offices.usda.gov.

USDA to Help Producers Prepare for Addition of Seed Cotton to Two Key Safety Net Programs

The U.S. Department of Agriculture (USDA) is sending acreage history and yield reports to agricultural producers with generic base acres covered by the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs.

The Bipartisan Budget Act of 2018 amended the 2014 Farm Bill, adding seed cotton as a covered commodity under the ARC and PLC programs. This week, FSA will start sending information on current generic base acres, yields and 2008-2012 planting history.

The updates are an important part of preparing agricultural producers to make decisions on allocating generic basic acres and updating yields for seed cotton. This summer, producers will have an opportunity to allocate their generic base acres and update their seed cotton yield.

All producers electing to participate in either the ARC or PLC program will be required to make a one-time, unanimous and irrevocable election, choosing between price protection and county revenue protection for the 2018 crop year for seed cotton only. Producers who elected ARC with the individual farm option will continue with that option since that election is applicable to all base acre on the farm. The final step to participate requires producers with farms with seed cotton base acres to sign contracts for ARC or PLC for 2018 this summer.

The anticipated timeline is:

- June 29: Producers are mailed letters notifying them of current generic base acres and yields and 2008 to 2012 planting history.
- July: An online decision tool for ARC and PLC becomes available. Producers have opportunity to update yields and allocate generic base acres for ARC and PLC.
- Late July: ARC and PLC one-time elections occur for seed cotton.
- Late July: ARC and PLC sign-up for 2018 starts for farms with seed cotton base acres.
Crop Insurance Deadline Nears in Florida

Fresh Market Sweet Corn, Fresh Market Tomato, and Pepper Growers Need to Make Insurance Decisions Soon

VALDOSTA, Ga., July 9, 2018 - USDA’s Risk Management Agency (RMA) reminds Florida fresh market sweet corn, fresh market tomato, and pepper growers that the final date to apply for crop insurance coverage is July 31. Current policyholders who wish to make changes to their existing coverage also have until the July 31 sales closing date to do so.

Federal crop insurance is critical to the farm safety net. It helps producers and owners manage revenue risks and strengthens the rural economy. Coverage is available for fresh market sweet corn in Broward, De Soto, Glades, Hendry, Indian River, Lake, Martin, Miami-Dade, Orange, Palm Beach, and Suwannee counties. Coverage is also available for fresh market tomatoes in Broward, Charlotte, Collier, De Soto, Glades, Hardee, Hendry, Hillsborough, Lee, Manatee, Martin, Miami-Dade, Palm Beach, Polk, Sarasota, and St. Lucie counties. Coverage is available for peppers in Broward, Charlotte, Collier, Glades, Hardee, Hendry, Hillsborough, Lee, Manatee, Martin, Palm Beach, Sarasota, and St. Lucie counties.

Growers are encouraged to visit their crop insurance agent soon to learn specific details for the 2019 crop year. A list of crop insurance agents is available at all USDA Service Centers and online at the RMA Agent Locator. Growers can use the RMA Cost Estimator to get a premium amount estimate of their insurance needs online.

For more information about crop insurance and the modern farm safety net, visit www.rma.usda.gov.

Actively Engaged Provisions for Non-Family Joint Operations or Entities

Many Farm Service Agency programs require all program participants, either individuals or legal entities, to be “actively engaged in farming.” This means participants provide a significant contribution to the farming operation, whether it is capital, land, equipment, active personal labor and/or management. For entities, each partner, stockholder or member with an ownership interest, must contribute active personal labor and/or management to the operation on a regular basis.

Joint operations comprised of non-family members or partners, stockholders or persons with an ownership in the farming operation must meet additional payment eligibility provisions. Joint operations comprised of family members are exempt from these additional requirements. For 2016 and subsequent crop years, non-family joint operations can have one member that may use a significant contribution of active personal management exclusively to meet the requirements to be determined “actively engaged in farming.” The person or member will be defined as the farm manager for the purposes of administering these management provisions.

Non-family joint operations may request to add up to two additional managers for their farming operation based on the size and/or complexity of the operation. If additional farm managers are requested and approved, all members who contribute management are required to complete form CCC-902MR, Management Activity Record. The farm manager should use the form to record management activities including capital, labor and agronomics, which includes crop selection, planting decisions, acquisition of inputs, crop management and marketing decisions. One form should be used for each month and the farm manager should enter the number of hours of time
spent for each activity under the date of the month the actions were completed. The farm manager must also document if each management activity was completed on the farm or remotely.

The records and supporting business documentation must be maintained and timely made available for review by the appropriate FSA reviewing authority, if requested.

If the farm manager fails to meet these requirements, their contribution of active personal management to the farming operation for payment eligibility purposes will be disregarded and their payment eligibility status will be re-determined for the applicable program year.

In some instances, additional persons or members of a non-family member joint operation who meet the definition of farm manager may also be allowed to use such a contribution of active personal management to meet the eligibility requirements. However, under no circumstances may the number of farm managers in a non-family joint operation exceed a total of three in any given crop and program year.

**Eligibility for Nominations for the 2018 County Committee Elections**

The U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) county committees are a critical component of the day-to-day operations of FSA and allow grassroots input and local administration of federal farm programs.

Committees are comprised of locally elected agricultural producers responsible for the fair and equitable administration of FSA farm programs in their counties. Committee members are accountable to the Secretary of Agriculture. If elected, members become part of a local decision making and farm program delivery process.

A county committee is composed of three to 11 elected members from local administrative areas (LAA). Each member serves a three-year term. To be eligible for nomination and hold office as a committee member or alternate, a person must fulfill each of the following requirements: (1) be a producer with an interest in farming or ranching operations, (2) participate or cooperate in any FSA program provided for by law, (3) be a U.S. citizen, (4) be of legal voting age, (5) meet the basic eligibility requirements, and (6) reside in the county or multi-county jurisdiction in which they will be serving.

All nomination forms for the 2018 election must be postmarked or received in the local USDA service center by Aug. 1, 2018. For more information on FSA county committee elections and appointments, refer to the FSA fact sheet: Eligibility to Vote and Hold Office as a COC Member available online at: [www.fsa.usda.gov/elections](http://www.fsa.usda.gov/elections).

**Reporting Solar Panels Constructed on Cropland**

Producers who have solar panels constructed on their farms should notify the local Farm Service Agency office. Any area that is no longer considered suitable as cropland (producing annual or perennial crops) should be designated in FSA’s records and aerial photography maps. When base acres on a farm are converted to a non-agricultural commercial or industrial use, the total base acres on the farm must be reduced accordingly. Non-cropland areas used for solar panels might impact payments calculated using base acres, such as Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) and Conservation Reserve Program (CRP) annual rental payments.
Submit Loan Requests for Financing Early

It is important that potential borrowers submit their requests early so they can be timely processed. The farm loan team can help determine which loan programs are best for applicants.

FSA offers a wide range of low-interest loans that can meet the financial needs of any farm operation for just about any purpose. The traditional farm operating and farm ownership loans can help large and small farm operations take advantage of early purchasing discounts for spring inputs as well expenses throughout the year.

Microloans are a simplified loan program that will provide up to $50,000 to eligible applicants. These loans, targeted for smaller operations and non-traditional operations, can be used for operating expenses, starting a new agricultural enterprise, purchasing equipment, and other needs associated with a farming operation. The staff at the local FSA office can provide more details on farm operating and microloans and provide loan applications. Loans to beginning farmers and members of underserved groups are a priority.

Other types of loans available include:

Marketing Assistance Loans allow producers to use eligible commodities as loan collateral and obtain a 9-month loan while the crop is in storage. These loans provide cash flow to the producer and allow them to market the crop when prices may be more advantageous.

Farm Storage Facility Loans can be used to build permanent structures used to store eligible commodities, or for storage and handling trucks, or portable or permanent handling equipment. A variety of structures are eligible under this loan, including bunker silos, grain bins, hay storage structures and refrigerated structures for vegetables and fruit. A producer may borrow up to $500,000 per loan.

Please call your local County office if you have questions about any of the loans available through FSA. To find your local FSA office, visit http://offices.usda.gov.

Using FSA Direct Farm Ownership Loans for Construction

The USDA Farm Service Agency's (FSA) Direct Farm Ownership loans are a resource to help farmers and ranchers become owner-operators of family farms, improve and expand current operations, increase agricultural productivity, and assist with land tenure to save farmland for future generations.

Depending on the applicant's needs, there are three types of Direct Farm Ownership Loans: regular, down payment and joint financing. FSA also offers a Direct Farm Ownership Microloan option for smaller financial needs up to $50,000.

Amongst other purposes, Direct Farm Ownership Loans can be used to construct, purchase or improve farm dwellings, service buildings or other facilities and improvements essential to an operation.

To do this, applicants must provide FSA with an estimate of the total cost of all planned development that completely describe the work, prior to loan approval and must show proof of sufficient funds to pay for the total cost of all planned development at or before loan closing. In some instances, applicants may be asked to provide certified plans, specifications or contract documents. The applicant cannot incur any debts for materials or labor or make any expenditures for development purposes prior to loan closing with the expectation of being reimbursed from FSA funds.

Construction and development work may be performed either by the contract method or the borrower method. Under the contract method, construction and development contractors perform work according to a written contract with the applicant or borrower. An applicant for a direct loan to
finance a construction project must obtain a surety bond that guarantees both payment and performance in the amount of the construction contract from a construction contractor.

A surety bond is required when a contract exceeds $100,000, an authorized agency official determines that a surety bond appears advisable to protect the borrower against default of the contractor or a contract provides for partial payments in excess of the amount of 60 percent of the value of the work in place.

Under the borrower method, the applicant or borrower will perform the construction and development work. The borrower method may only be used when the authorized agency official determines, based on information from the applicant, that the applicant possesses or arranges to obtain the necessary skill and managerial ability to complete the work satisfactorily and that such work will not interfere with the applicant’s farming operation or work schedule.

Potential applicants should visit with FSA early in the initial project planning process to ensure environmental compliance.

For more eligibility requirements and information about FSA Loan programs, contact your local FSA office or visit www.fsa.usda.gov. To find your local FSA office, visit http://offices.usda.gov.

**Organic Certification Cost Share Program**

The Organic Certification Cost Share Program (OCCSP) provides cost share assistance to producers and handlers of agricultural products who are obtaining or renewing their certification under the National Organic Program (NOP). Certified operations may receive up to 75 percent of their certification costs paid from Oct. 1, 2017, through Sept. 30, 2018, not to exceed $750 per certification scope.

Eligible costs include application fees, inspection costs, fees related to equivalency agreement/arrangement requirements, travel/per diem for inspectors, user fees, sales assessments and postage.

Ineligible costs include equipment, materials, supplies, transitional certification fees, late fees and inspections necessary to address National Organic Program regulatory violations.

Producers and handlers may submit OCCSP applications to FSA county offices or they may apply through participating State Agencies, which will be listed at https://www.fsa.usda.gov/programs-and-services/occsp/index as their agreements to administer the program are finalized.

The FSA OCCSP application form is available at USDA’s eForms site, by selecting "Browse forms" and entering "OCCSP" in the "title or keywords" field on the search page.

To learn more about organic certification cost share, visit www.fsa.usda.gov/organic or contact a local FSA office by visiting http://offices.usda.gov.
