USDA Reminds Producers of Feb. 28 Deadline for Conservation Reserve Program General Signup

The U.S. Department of Agriculture (USDA) reminds agricultural producers interested in the Conservation Reserve Program (CRP) 2020 general signup to enroll by February 28, 2020. This signup is available to farmers and private landowners who are either enrolling for the first time or re-enrolling for another 10- to 15-year term.

Farmers and ranchers who enroll in CRP receive yearly rental payments for voluntarily establishing long-term, resource-conserving plant species, such as approved grasses or trees (known as “covers”), which can control soil erosion, improve water quality and develop wildlife habitat on marginally productive agricultural lands.

CRP has 22 million acres enrolled, but the 2018 Farm Bill lifted the cap to 27 million acres.

Signed into law in 1985, CRP is one of the largest private-lands conservation programs in the U.S. It was originally intended to...
primarily control soil erosion and potentially stabilize commodity prices by taking marginal lands out of production. The program has evolved over the years, providing many conservation and economic benefits. Marking its 35th anniversary in 2020, CRP has had many successes, including:

• Preventing more than 9 billion tons of soil from eroding, enough soil to fill 600 million dump trucks;
• Reducing nitrogen and phosphorous runoff relative to annually tilled cropland by 95 and 85 percent respectively;
• Sequestering an annual average of 49 million tons of greenhouse gases, equal to taking 9 million cars off the road;
• Creating more than 3 million acres of restored wetlands while protecting more than 175,000 stream miles with riparian forest and grass buffers, enough to go around the world 7 times; and
• Benefiting bees and other pollinators and increased populations of ducks, pheasants, turkey, bobwhite quail, prairie chickens, grasshopper sparrows and many other birds.

The CRP continuous signup is ongoing, which enables producers to enroll for certain practices. FSA plans to open the Soil Health and Income Protection Program, a CRP pilot program, in early 2020, and the 2020 CRP Grasslands signup runs from March 16, 2020 to May 15, 2020.

To enroll in CRP, contact your local FSA county office or visit fsa.usda.gov/crp. To locate your local FSA office, visit farmers.gov/service-locator.

FSA Encourages Producers to Enroll Soon in Agriculture Risk Coverage and Price Loss Coverage Programs

USDA’s Farm Service Agency (FSA) encourages agricultural producers to enroll now in the Agriculture Risk Loss (ARC) and Price Loss Coverage (PLC) programs. March 15, 2020 is the enrollment deadline for the 2019 crop year.

Although more than 200,000 producers have enrolled to date, FSA anticipates 1.5 million producers will enroll for ARC and PLC. By enrolling soon, producers can beat the rush as the deadline nears.

FSA offices have multiple programs competing for the time and attention of our staff. Because of the importance and complexities of the ARC and PLC programs; and to ensure FSA meets your program delivery expectations, please do not wait to start the enrollment process. Call your FSA county office and make an appointment soon to ensure your elections are made and contracts signed well ahead of the deadlines.

ARC and PLC provide financial protections to farmers from substantial drops in crop prices or revenues and are vital economic safety nets for most American farms.

The programs cover the following commodities: barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.
Until March 15, producers who have not yet enrolled in ARC or PLC for 2019 can enroll for both 2019 and 2020 during the same visit to an FSA county office unless yield updates are requested. Additionally, farm owners have a one-time opportunity to update PLC payment yields that take effect beginning with crop year 2020. If the owner accompanies the producer to the office, the yield update and enrollments may be completed during the same office visit.

More Information

For more information on ARC and PLC, download our program fact sheet or our 2014-2018 farm bills comparison fact sheet. Online ARC and PLC election decision tools are available at fsa.usda.gov/arc/plc. To enroll, contact your FSA county office for an appointment.

The Importance of Responding to NASS Surveys

The U.S. Department of Agriculture’s National Agricultural Statistics Service (NASS) conducts hundreds of surveys every year and prepares reports covering virtually every aspect of U.S. agriculture.

Producers who receive survey questionnaires should respond quickly and online if possible.

The results of the surveys help determine the structure of USDA farm programs, such as soil rental rates for the Conservation Reserve Program and prices and yields used for the Agriculture Risk Coverage and Price Loss Coverage programs. This county-level data is critical for USDA farm payment determinations. Survey responses also help associations, businesses and policymakers advocate for their industry and help educate others on the importance of agriculture.

NASS safeguards the privacy of all respondents and publishes only aggregate data, ensuring that no individual operation or producer can be identified.

NASS data is available online at www.nass.usda.gov/Publications and through the searchable Quick Stats database. Watch a video on how NASS data is used at https://www.youtube.com/watch?v=m-4zjnh26io&feature=youtu.be.

USDA Swine Small Enterprise Study

From July 2020 through January 2021, the U.S. Department of Agriculture’s (USDA) National Animal Health Monitoring System (NAHMS), in collaboration with the USDA’s National Agricultural Statistics Service (NASS), will conduct its third national study of U.S. small enterprise swine operations.

Florida producers are included in this study that will take an in-depth look at small enterprise swine operations (fewer than 1,000 pigs) and provide new information regarding animal health and management practices used on these operations, as well as the alternative marketing strategies they implement.

Approximately 5,000 swine operations from 38 states will be asked to participate in the study. These states account for about 95 percent of U.S. swine operations with fewer than 1,000 pigs.

Participation in any NAHMS study is voluntary. In June 2020, selected producers will be mailed a letter describing the study and be provided with a questionnaire to complete and return. Producers who don’t respond to the questionnaire will be called by a NASS representative to arrange a convenient time to complete the questionnaire via a telephone interview.
The privacy of every questionnaire participant is protected. Data will only be presented in an aggregate or summary manner.

For more information, please contact Charles Haley at 970-494-7216 or charles.a.haley@aphis.usda.gov.

**Maintaining Good Credit History**

Farm Service Agency (FSA) Farm Loan programs require that applicants have a satisfactory credit history. A credit report is requested for all FSA direct farm loan applicants. These reports are reviewed to verify outstanding debts, if bills are paid timely and to determine the impact on cash flow.

Information found on a customer’s credit report is strictly confidential and is used only as an aid in conducting FSA business.

Our farm loan staff will discuss options with you if you have an unfavorable credit report and will provide a copy of your report. If you dispute the accuracy of the information on the credit report, it is up to you to contact the issuing credit report company to resolve any errors or inaccuracies.

There are multiple ways to remedy an unfavorable credit score.

- Make sure to pay bills on time. Setting up automatic payments or automated reminders can be an effective way to remember payment due dates.
- Pay down existing debt.
- Keep your credit card balances low.
- Avoid suddenly opening or closing existing credit accounts.

FSA’s farm loan staff will guide you through the process, which may require you to reapply for a loan after improving or correcting your credit report.

For more information on FSA farm loan programs, visit [www.fsa.usda.gov](http://www.fsa.usda.gov).

---

**Supervised Credit**

Farm Service Agency (FSA) Farm Loan programs are considered supervised credit. Unlike loans from a commercial lender, FSA loans are intended to be temporary in nature. Therefore, it is our goal to help you graduate to commercial credit, and our farm loan staff is available to help borrowers through training and credit counseling.

The FSA team will help borrowers identify their goals to ensure financial success. Through this process, FSA staff will advise borrowers in developing strategies and a plan to meet your operation’s goals and graduate to commercial credit. Ultimately, the borrower is responsible for the success of the farming operation, but FSA’s staff will help in an advisory role to provide the tools necessary to help you achieve your operational goals and manage your finances.

For more information on FSA farm loan programs, visit [www.fsa.usda.gov](http://www.fsa.usda.gov).

---

**Changing Bank Accounts**

FSA program payments are issued electronically into your bank account. In order to make timely payments, you need to notify your FSA servicing office if you close your account or if your bank information is changed for whatever reason (such as your financial institution merging or being
purchased). Payments can be delayed if FSA is not notified of changes to account and bank routing numbers.

For some programs, payments are not made until the following year. For example, payments for crop year 2018 through the Agriculture Risk Coverage and Price Loss Coverage program aren’t paid until 2019. If the bank account was closed due to the death of an individual or dissolution of an entity or partnership before the payment was issued, please notify your local FSA office as soon as possible to claim your payment.

Dates to Remember

February 28 - Conservation Reserve Program General Signup Deadline

March 15 - Agriculture Risk Loss (ARC) and Price Loss Coverage (PLC) deadline for the 2019 crop year
