### January 2021

### USDA Service Centers Provide Free, One-on-One Help for Farmers

At USDA, we are committed to helping farmers complete loan applications, environmental reviews, and other paperwork free of charge. One-on-one support is available at more than 2,300 USDA Service Centers nationwide. USDA’s Farm Service Agency and Natural Resources Conservation Service staff are usually co-located at these Service Centers and can help guide farmers to the best USDA assistance based on their unique goals, whether it is loans, conservation programs, or insurance.

Service Center staff can guide farmers through the process of preparing and submitting required paperwork on their own, with no need to hire a paid preparer. Language translation service is available in all USDA Service Centers, so one-on-one assistance with a Service Center employee can be translated in real time for farmers requiring it. And while some

**Acting State Executive Director:**
Shirley Nakamura

**Chief Program Specialist:**
Patrick Lewis

**Chief, Farm Loan Program:**
Theresa Correa

**Upcoming County Committee Meetings:**
FSA Announces County Committee Election Results

The United States Department of Agriculture (USDA) Farm Service Agency (FSA) announced that County Committee elections are over, and the ballots have been counted.

The following producers were elected to seats in their respective counties:

- Guam County: Michael E.D. Aguon
- Commonwealth of the Northern Mariana Islands: Ramon Muna Dela Cruz of Tinian
- Kauai County: Waylon H. Brun and Sheila Louis will serve as the first alternate
- Hawaii County: Michelle Galimba
- Honolulu County: Thoune Hongphao
- Maui County: Chauncy Monden

County committee members are a critical component of the day-to-day operations of FSA. They help deliver programs at the county level and work to serve the needs of local producers. All recently elected county committee members will take office in January 2021 and will be joining the existing committee. Every FSA office is required to have a county committee, which are made up of local farmers, ranchers and foresters elected by local producers.

County committee members impact the administration of FSA within a community by applying their knowledge and judgment to help FSA make important decisions on commodity support programs, conservation programs, indemnity and disaster programs, emergency programs and eligibility.

County committee members serve local producers through their decision making and help shape the culture of a local FSA office. They also ensure the fair and equitable administration of FSA farm programs in their counties and are accountable to the Secretary of Agriculture. Members conduct hearings and reviews as requested by the state committee, ensure underserved farmers, ranchers and foresters are fairly represented, make recommendations to the state committee on existing programs, monitor changes in farm programs and inform farmers of the purpose and provisions of program and loan applications do have an administrative fee for filing, there is never a charge for preparation services provided by USDA staff.

Farmers who work with the USDA Service Center can:

- Establish their farm by registering for a farm number, which is required for USDA programs and assistance.
- Learn how to meet conservation compliance provisions.
- Verify eligibility for USDA programs.
- Discuss their business and conservation goals.
- Create a conservation plan.
- Fill out and file loan and program applications.

We are committed to delivering USDA programs and services to America’s farmers and ranchers while taking safety measures in response to COVID-19. We encourage you to check the status of your local USDA Service Center and make an appointment to discuss your business needs.
FSA programs. They also assist with outreach and inform underserved producers, such as beginning farmers, ranchers and foresters, about FSA opportunities.

For more information, visit the FSA website at fsa.usda.gov/elections or contact your local County FSA office.

**USDA Seeks Members for Advisory Committee on Urban Agriculture**

The U.S. Department of Agriculture (USDA) is seeking members for a new advisory committee on urban agriculture, part of a broader effort to focus on the needs of urban farmers. The 12-person committee will advise the Secretary of Agriculture on the development of policies and outreach relating to urban, indoor and other emerging agricultural production practices as well as identify any barriers to urban agriculture.

USDA is seeking nominations for individuals representing a broad spectrum of expertise, including:

- Four agricultural producers (two agricultural producers in an urban area or urban cluster and two agricultural producers who use innovative technology).
- Two representatives from an institution of higher education or extension program.
- One representative of a nonprofit organization, which may include a public health, environmental or community organization.
- One representative of business and economic development, which may include a business development entity, a chamber of commerce, a city government or a planning organization.
- One individual with supply chain experience, which may include a food aggregator, wholesale food distributor, food hub or an individual who has direct-to-consumer market experience.
- One individual from a financing entity.
- Two individuals with related experience or expertise in urban, indoor and other emerging agriculture production practices, as determined by the Secretary.

Any interested person or organization may nominate qualified individuals for membership. Self-nominations are also welcome.

Nominations should include a cover letter, resume and a background form. Nomination packages must be submitted by mail or email by March 5, 2021. They should be addressed to Ronald Harris, Designated Federal Officer, Director of Outreach and Partnerships, Natural Resources Conservation Service (NRCS), Department of Agriculture, 1400 Independence Avenue, S.W., Room 6006-S, Washington, D.C. 20250, or emailed to Ronald.Harris@usda.gov.

The 2018 Farm Bill established the Office of Urban Agriculture and Innovative Production and directed USDA to form this advisory committee as well as make other advancements related to urban agriculture. It is led by the NRCS and works in partnership with numerous USDA agencies that support urban agriculture. Its mission is to encourage and promote urban, indoor and other emerging agricultural practices, including community composting and food waste reduction. More information is available in this notice on the Federal Register or at farmers.gov/urban.

**USDA Announces Increase to Certain Incentive Payments for Continuous Conservation Reserve Program**

The U.S. Department of Agriculture is increasing incentive payments for practices installed on land enrolled in the Continuous Conservation Reserve Program (CRP). USDA’s Farm Service Agency (FSA) is upping the Practice Incentive Payment for installing practices, from 5 percent to 20 percent. Additionally, producers will receive a 10 percent incentive payment for water quality practices on
land enrolled in CRP’s continuous signup. FSA administers CRP on behalf of the Commodity Credit Corporation.

Under continuous CRP, producers can enroll environmentally sensitive land devoted to certain conservation practices with signup available at any time. FSA automatically accepts offers provided the land and producer meet certain eligibility requirements and the enrollment levels do not exceed the number of acres FSA is allowed to enroll in CRP, which was set by the 2018 Farm Bill.

Signed into law in 1985, CRP is one of the largest private-lands conservation programs in the United States. It was originally intended primarily to control soil erosion and potentially stabilize commodity prices by taking marginal lands out of production. The program has evolved over the years, providing many conservation and economic benefits. The program marks its 35-year anniversary this month. Program successes include:

- Preventing more than 9 billion tons of soil from eroding, which is enough soil to fill 600 million dump trucks;
- Reducing nitrogen and phosphorous runoff relative to annually tilled cropland by 95% and 85%, respectively;
- Sequestering an annual average of 49 million tons of greenhouse gases, equal to taking 9 million cars off the road;
- Creating more than 3 million acres of restored wetlands while protecting more than 175,000 stream miles with riparian forest and grass buffers, which is enough to go around the world seven times; and
- Benefiting bees and other pollinators and increasing populations of ducks, pheasants, turkey, bobwhite quail, prairie chickens, grasshopper sparrows and many other birds.

The successes of CRP contribute to USDA's Agriculture Innovation Agenda and its goal of reducing the environmental footprint of U.S. agriculture by half by 2050. Earlier this year, U.S. Secretary of Agriculture Sonny Perdue announced the Department-wide initiative to align resources, programs, and research to position American agriculture to better meet future global demands.

For more information on CRP, visit fsa.usda.gov, or contact your local FSA county office.

**FSA Implements Set-Aside Loan Provision for Customers Impacted by COVID-19**

*Set-Aside Delays Loan Payments for Borrowers*

USDA’s Farm Service Agency (FSA) will broaden the use of the Disaster Set-Aside (DSA) loan provision, normally used in the wake of natural disasters, to allow farmers with USDA farm loans who are affected by COVID-19, and are determined eligible, to have their next payment set aside. In some cases, FSA may also set aside a second payment for farmers who have already had one payment set aside because of a prior designated disaster.

FSA direct loan borrowers will receive a letter with the details of the expanded Disaster Set-Aside authorities, which includes the possible set-aside of annual operating loans, as well as explanations of the additional loan servicing options that are available. To discuss or request a loan payment Set-Aside, borrowers should call or email the farm loan staff at their local FSA county office.

The set-aside payment’s due date is moved to the final maturity date of the loan or extended up to twelve months in the case of an annual operating loan. Any principal set-aside will continue to accrue interest until it is repaid. This aims to improve the borrower's cashflow in the current production cycle.

FSA previously announced it was relaxing the loan-making process and adding flexibilities for servicing direct and guaranteed loans to provide credit to producers in need. Direct loan applicants and borrowers are encouraged to contact their local FSA county office to discuss loan making and
servicing flexibilities and other needs or concerns. Customers participating in FSA's guaranteed loan programs are encouraged to contact their lender. Information on these flexibilities, and office contact information, can be found on farmers.gov/coronavirus.

FSA will be accepting most forms and applications by facsimile or electronic signature. Some services are also available online to customers with an eAuth account, which provides access to the farmers.gov portal where producers can view USDA farm loan information and certain program applications and payments. Customers can track payments, report completed practices, request conservation assistance and electronically sign documents. Customers who do not already have an eAuth account can enroll at farmers.gov/sign-in.

### 2021 Acreage Reporting Dates

In order to comply with FSA program eligibility requirements, all producers are encouraged to visit their local FSA office to file an accurate crop certification report by the applicable deadline.

Acreage reporting dates vary by crop and by county so please contact your local FSA office for a list of county-specific deadlines.

The following exceptions apply to acreage reporting dates:
• If the crop has not been planted by the applicable acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
• If a producer acquires additional acreage after the applicable acreage reporting date, then the acreage must be reported no later than 30 calendars days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.
• Perennial forage and hemp crop, regardless of intended use, acreage must be reported by February 15th.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP covered crops is the earlier of the applicable dates or 15 calendar days before grazing or harvesting of the crop begins.

In order to maintain program eligibility and benefits, you must file timely acreage reports. Failure to file an acreage report by the crop acreage reporting deadline may cause ineligibility for future program benefits. FSA will not accept acreage reports provided more than a year after the acreage reporting deadline.

Producers are encouraged to file their acreage reports as soon as planting is completed.

### January 2021 Interest Rates

- Farm Operating Loans 1.375 %
- Farm Ownership Loans 2.5%
- Farm Ownership Loans Direct Down Payment for Beginning Farmer or Rancher 1.5%
- Emergency Loans 2.375 %

### Dates to Remember

- **February 12, 2021** - Sign-up deadline for Conservation Reserve Program
- **February 15, 2021** - Acreage reporting deadline for perennial forage and hemp
- **March 5, 2021** - Deadline to submit nomination packet for Advisory Committee on Urban Agriculture
March 15, 2021 - Acreage reporting deadline for coffee

March 31, 2021 - Acreage reporting deadline the subsequent year for crops covered by the Non-Insured Crops Disaster Assistance Program, fruits and vegetables. Contact your county office for a full
