## USDA Accepting Applications to Help Cover Costs of Organic, Transitioning Producers

Agricultural producers and handlers who are certified organic, along with producers and handlers who are transitioning to organic production, can now apply for the U.S. Department of Agriculture's (USDA) [Organic and Transitional Education Certification Program](#) (OTECP) and [Organic Certification Cost Share Program](#) (OCCSP), which help producers and handlers cover the cost of organic certification, along with other related expenses. Applications for OTECP and OCCSP are both due October 31, 2022.

OTECP covers:

- Certification costs for organic producers and handlers (25% up to \$250 per category).
- Eligible expenses for transitional producers, including fees for pre-certification inspections and development of an organic system plan (75% up to \$750).
- Registration fees for educational events (75% up to \$200).
- Soil testing (75% up to \$100).

Meanwhile, OCCSP covers 50% or up to \$500 per category of certification costs in 2022.

This cost share for certification is available for each of these categories: crops, wild crops, livestock, processing/handling and State organic program fees.

Producers can receive cost share through both OTECP and OCCSP. Both OTECP and OCCSP cover costs incurred from October 1, 2021, to September 30, 2022. Producers have until October 31, 2022 to file applications, and FSA will make payments as applications are received.

To apply, producers and handlers should contact the Farm Service Agency (FSA) at their local USDA Service Center. As part of completing the OCCSP applications, producers and

handlers will need to provide documentation of their organic certification and eligible expenses. Organic producers and handlers may also apply for OCCSP through participating State agencies.

Additional details can be found on the [OTECP](#) and [OCCSP](#) webpages.

## Disaster Assistance for 2022 Livestock Forage Losses

Producers in the Hawaii, Honolulu and Maui Counties are eligible to apply for 2022 Livestock Forage Disaster Program (LFP). This program pertains to commercial livestock that are being grazed on pasture land.

LFP provides compensation if you suffer grazing losses for covered livestock due to drought on privately owned or cash leased land.

County committees can only accept LFP applications after notification is received by the National Office for qualifying drought. You must complete a CCC-853 and the required supporting documentation no later than January 30, 2023, for 2022 losses.

For additional information about LFP, including eligible livestock, contact your [local USDA Service Center](#) or visit [fsa.usda.gov](https://fsa.usda.gov).

## Pacific Islands Area Rancher is Featured in Fridays on the Farm

Cattle rancher, Jose Dela Cruz from Tinian Island in the Northern Mariana Islands shares his recipe for conservation success in a recent Farmers.gov series, [Fridays on the Farm](#). Dealing with overgrown invasive weeds, Jose's biggest difficulty was the infrastructure, clearing the land, fencing, and water-related issues. Read the [full story and other Fridays on the Farm stories](#) to meet other farmers, producers, and landowners who are working to improve their operations with USDA programs.

## USDA to Provide Approximately \$6 Billion to Commodity and Specialty Crop Producers Impacted by 2020 and 2021 Natural Disasters

*First Wave of Payments Based on Crop Insurance Data*

The U. S Department of Agriculture (USDA) today announced that commodity and specialty crop producers impacted by natural disaster events in 2020 and 2021 will soon begin receiving emergency relief payments totaling approximately \$6 billion through the Farm Service Agency's (FSA) new [Emergency Relief Program \(ERP\)](#) to offset crop yield and value losses.

## Background

On September 30, 2021, President Biden signed into law the *Extending Government Funding and Delivering Emergency Assistance Act* (P.L. 117-43), which includes \$10 billion in assistance to agricultural producers impacted by wildfires, droughts, hurricanes, winter storms, and other eligible disasters experienced during calendar years 2020 and 2021. FSA recently made payments to ranchers impacted by drought and wildfire through the first phase of the Emergency Livestock Relief Program (ELRP). ERP is another relief component of the Act.

For impacted producers, existing [Federal Crop Insurance](#) or [Noninsured Crop Disaster Assistance Program](#) (NAP) data is the basis for calculating initial payments. USDA estimates that phase one ERP benefits will reach more than 220,000 producers who received indemnities for losses covered by federal crop insurance and more than 4,000 producers who obtained NAP coverage for 2020 and 2021 crop losses.

### ERP Eligibility – Phase One

ERP covers losses to crops, trees, bushes, and vines due to a qualifying natural disaster event in calendar years 2020 and 2021. Eligible crops include all crops for which crop insurance or NAP coverage was available, except for crops intended for grazing. Qualifying natural disaster events include wildfires, hurricanes, floods, derechos, excessive heat, winter storms, freeze (including a polar vortex), smoke exposure, excessive moisture, qualifying drought, and related conditions.

For drought, ERP assistance is available if any area within the county in which the loss occurred was rated by the U.S. Drought Monitor as having a:

- D2 (severe drought) for eight consecutive weeks; or
- D3 (extreme drought) or higher level of drought intensity.

Lists of [2020](#) and [2021](#) drought counties eligible for ERP is available on the emergency relief website.

To streamline and simplify the delivery of ERP phase one benefits, FSA will send pre-filled application forms to producers where crop insurance and NAP data are already on file. This form includes eligibility requirements, outlines the application process and provides ERP payment calculations. Producers will receive a separate application form for each program year in which an eligible loss occurred. Receipt of a pre-filled application is not confirmation that a producer is eligible to receive an ERP phase one payment.

Additionally, producers must have the following forms on file with FSA within 60 days of the ERP phase one deadline, which will later be announced by FSA's Deputy Administrator for Farm Programs:

- Form AD-2047, *Customer Data Worksheet*.
- Form CCC-902, *Farm Operating Plan* for an individual or legal entity.
- Form CCC-901, *Member Information for Legal Entities* (if applicable).
- Form FSA-510, *Request for an Exception to the \$125,000 Payment Limitation for Certain Programs* (if applicable).
- Form CCC-860, *Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification*, if applicable, for the 2021 program year.
- A highly erodible land conservation (sometimes referred to as HELC) and wetland conservation certification (Form AD-1026 *Highly Erodible Land Conservation*

(*HELIC*) and *Wetland Conservation (WC) Certification*) for the ERP producer and applicable affiliates.

Most producers, especially those who have previously participated in FSA programs, will likely have these required forms on file. However, those who are uncertain or want to confirm the status of their forms can contact their [local FSA county office](#).

### **ERP Payment Calculations – Phase One**

For crops covered by crop insurance, the ERP phase one payment calculation for a crop and unit will depend on the type and level of coverage obtained by the producer. Each calculation will use an ERP factor based on the producer's level of crop insurance or NAP coverage.

- **Crop Insurance** – the ERP factor is 75% to 95% depending on the level of coverage ranging from catastrophic to at least 80% coverage.
- **NAP** – the ERP factor is 75% to 95% depending on the level of coverage ranging from catastrophic to 65% coverage.

Full ERP payment calculation factor tables are available on the emergency relief website and in the program [fact sheet](#).

Applying ERP factors ensures that payments to producers do not exceed available funding and that cumulative payments do not exceed 90% of losses for all producers as required by the Act.

Also, there will be certain payment calculation considerations for area plans under crop insurance policies.

The ERP payment percentage for historically underserved producers, including beginning, limited resource, socially disadvantaged, and veteran farmers and ranchers will be increased by 15% of the calculated payment for crops having insurance coverage or NAP.

To qualify for the higher payment percentage, eligible producers must have a CCC-860, *Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification*, form on file with FSA for the 2021 program year.

Because the amount of loss due to a qualifying disaster event in calendar years 2020 and 2021 cannot be separated from the amount of loss caused by other eligible causes of loss as defined by the applicable crop insurance or NAP policy, the ERP phase one payment will be calculated based on the producer's loss due to *all eligible causes of loss*.

### **Future Insurance Coverage Requirements**

All producers who receive ERP phase one payments, including those receiving a payment based on crop, tree, bush, or vine insurance policies, are statutorily required to purchase crop insurance, or NAP coverage where crop insurance is not available, for the next two available crop years, as determined by the Secretary. Participants must obtain crop insurance or NAP, as may be applicable:

- At a coverage level equal to or greater than 60% for insurable crops; or
- At the catastrophic level or higher for NAP crops.

Coverage requirements will be determined from the date a producer receives an ERP payment and may vary depending on the timing and availability of crop insurance or NAP

for a producer's particular crops. The final crop year to purchase crop insurance or NAP coverage to meet the second year of coverage for this requirement is the 2026 crop year.

### **Emergency Relief – Phase Two (*Crop and Livestock Producers*)**

Today's announcement is only phase one of relief for commodity and specialty crop producers. Making the initial payments using existing safety net and risk management data will both speed implementation and further encourage participation in these permanent programs, such as Federal crop insurance, as Congress intended.

The second phase of both ERP and ELRP programs will fill gaps and cover producers who did not participate in or receive payments through the existing programs that are being leveraged for phase one implementation. When phase one payment processing is complete, the remaining funds will be used to cover gaps identified under phase two.

Through proactive communication and outreach, USDA will keep producers and stakeholders informed as program details are made available. More information on ERP can be found in the [Notice of Funding Availability](#).

### **Additional Commodity Loss Assistance**

The Milk Loss Program and On-Farm Stored Commodity Loss Program are also funded through the *Extending Government Funding and Delivering Emergency Assistance Act* and will be announced in a future rule in the Federal Register.

### **More Information**

Additional USDA disaster assistance information can be found on [farmers.gov](https://farmers.gov), including the [Disaster Assistance Discovery Tool](#), [Disaster-at-a-Glance fact sheet](#), and [Farm Loan Discovery Tool](#). For FSA and Natural Resources Conservation Service programs, producers should contact their local [USDA Service Center](#). For assistance with a crop insurance claim, producers and landowners should contact their [crop insurance agent](#).

USDA touches the lives of all Americans each day in so many positive ways. Under the Biden-Harris Administration, USDA is transforming America's food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America. To learn more, visit [usda.gov](https://usda.gov).
