County Committee Nominations Open

The nomination period for Farm Service Agency (FSA) county committees is June 15, 2015 through August 3, 2015. To be eligible to serve on an FSA county committee a person must participate or cooperate in a program administered by FSA, be eligible to vote in a county committee election, and reside in the local administrative area where the person is nominated.

Farmers and ranchers may nominate themselves or others. Organizations representing minorities and women may also nominate candidates. To become a candidate an eligible individual must sign the nomination form, FSA-669A. The form and other information about FSA county committee elections are available at www.fsa.usda.gov/elections. Nomination forms for the 2015 election must be postmarked or received in the FSA County Office by close of business on August 3, 2015. Elections will take place this fall.

County committees make decisions on disaster and conservation programs, emergency programs and other agricultural issues. Members serve three-year terms, and in Hawaii and the Pacific Basin committees consist of three members that are elected by eligible producers.

Farm Service Agency will mail ballots to eligible voters beginning November 9, 2015. Ballots are due back to the local county office via mail or in person by December 7, 2015. Newly elected committee members and alternates take office on January 1, 2016.

Disaster Assistance for Guam and CNMI

Commercial producers in Guam and the Commonwealth of the Northern Mariana Islands (CNMI) impacted by Typhoon Dolphin should contact their Farm Service Agency (FSA) County Office regarding disaster assistance and low-interest loan programs to assist in their recovery efforts.

Available programs and loans include:

- **Non-Insured Crop Disaster Assistance** (NAP) provides financial assistance to producers of non-insurable crops when low yields, loss of inventory, or prevented planting occur due to natural disasters. Eligible producers must have signed-up for NAP coverage for 2015 crops.

- **Tree Assistance Program** (TAP) is available for qualifying fruit orchardists of papaya, banana and tropical fruits. The program provides cost share to clean up and replant.

- **Livestock Indemnity Program** (LIP) helps offset ranchers’ losses of cattle, goats or sheep.

- **Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program** (ELAP) provides emergency relief for losses due to feed or water shortages, disease, adverse weather, or other conditions, which are not adequately addressed by other disaster programs. Producers must submit a

Disaster Assistance… Continued
notice of loss to their local FSA office within 30
calendar days of when the loss is apparent. The
Program also covers up to 150 lost grazing days in
instances when a producer has been forced to remove
livestock from a grazing pasture due to floodwaters.
For beekeepers, ELAP covers beehive losses (the
physical structure) in instances where the hive has
been destroyed by a natural disaster including
flooding and high winds.

Farm Loan Programs offers low-interest loans,
including Emergency Loans to assist producers. Additionally, producers with existing
loans with FSA should contact their loan officer once
they anticipate having problems making their regular
payments, as FSA may be able to modify their
payment schedule or meet other needs.

To obtain more information or to schedule an
appointment, call FSA Guam/CNMI County Office at
(671) 472-7568 in Guam or from the CNMI call (670)
234-0896 toll free or fax to (855) 356-9491.
**Matthew checks back-in with FSA**

In November 2013, the Farm Service Agency (FSA) newsletter featured the article below highlighting Matthew Kawamura’s successes raising livestock; the benefits he gained through participation in 4-H on the island of Kauai; and how three FSA Youth Loans taught him the business side of raising animals. Recently, Matthew took a few minutes to share with FSA where he is today and his plans for the future.

*MK:* This is my last year at Kauai Community College before transferring to the University of Hawaii at Manoa to study travel industry management. Why travel you ask; well, I have been to Japan, France, Greece and Italy. Yes, I do like to travel.

*FSA:* So no more livestock or 4-H?

*MK:* Oh, I will be around animals when I go back home to help out, and I am a Junior Leader with the Garden Island 4-H Ranchers so there is an active leadership role for me to play guiding young students interested in livestock.

*FSA:* Once a leader, always a leader. Matthew, it has been really good talking to you, and best wishes in all your future journeys.

---

**Making the Best Better through 4-H and FSA Youth Loans**

Matthew Kawamura, 18, has experienced both success and unmatched opportunity through his participation in 4-H. He began raising his first pig at the age of six as a member of the 4-H Clover Bud Club. Matthew’s interest in 4-H was sparked by his older brother and sister who were successful members of the Kauai 4-H Livestock Club. 4-H runs deep within the Kawamura family history as both his father and uncle raised many animals for the Kauai County Farm Bureau Fairs (KCFBF) between the late 70s and early 80s.

During his 12 years as a 4-H member, Matthew has received a number of awards at both the KCFBF and Hawaii State Farm Fair, including Grand Champion Showmanship and Reserve Champion Showmanship for his various lamb and steer projects, and awards for Carcass Evaluation. Through his experiences in 4-H Matthew has learned the importance of time management, hard work, communication, and persistence. These skills helped him become a leader and discover his love for assisting others including mentoring younger 4-H members.

The Farm Service Agency (FSA) Youth loan program assisted Matthew by covering the expenses involved with raising his show animals. This provided him with the opportunity to learn the fiscal side of “what it takes” to operate a business at an early age. He learned valuable lessons in money management, staying within budget, and tracking all of his expenditures. He also assured that his animals were ready to show at the right market weight to yield the best possible profit. Matthew obtained his own checking and savings account, to manage all of his loan payments. By successfully paying off three youth loans, Matthew established good financial credit history, something many students his age lack, or are unaware of.

Thanks to the profits from his multiple 4-H projects, Matthew was able to attend two 4-H National Conferences held in Atlanta and Washington DC, meeting other 4-H members from across the United States. “I met Secretary of Agriculture, Tom Vilsack and was able to personally meet Senator Daniel Akaka, Congresswoman Colleen Hanabusa, and then Congresswoman Mazie Hirono,” Matthew states. “I strongly recommend 4-H to other youth due to the life skills they can learn and the financial benefits they can obtain through a FSA Youth Loan.“

“I want to personally thank those who have been very supportive of me, teaching me to be responsible through my 4-H projects and through the family business and encouraging me to take on leadership roles in 4-H.” Matthew continues, “I also want to thank the FSA Loan Officer, T.J. Nii, and Program Technician, Mary Pigao, for their assistance in helping me with my youth loans.”

**Acreage Reporting Dates**

In order to comply with Farm Service Agency (FSA) program eligibility requirements, all producers are encouraged to make an appointment with their FSA County Office to file an accurate crop certification report by the following deadlines:

<table>
<thead>
<tr>
<th>Date</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>July 15</td>
<td>Banana, Papaya, Conservation Reserve Enhancement Program (CREP)</td>
</tr>
<tr>
<td>September 30</td>
<td>Aquaculture, Floriculture, Ginseng, Mushrooms, Turfgrass Sod for the ensuing year</td>
</tr>
<tr>
<td>December 16</td>
<td>Grazed Forage – 15 days before the onset of grazing</td>
</tr>
<tr>
<td>January 2</td>
<td>Honey – for crop year 2016</td>
</tr>
<tr>
<td>March 15</td>
<td>Coffee – for 2016</td>
</tr>
</tbody>
</table>

If a producer acquires additional acreage after the above acreage reporting date, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office. For questions regarding crop certification and crop loss reports, please contact your local FSA County Office.
