Report Livestock Losses

The Livestock Indemnity Program (LIP) provides assistance to eligible producers for livestock death losses in excess of normal mortality due to adverse weather and attacks by animals reintroduced into the wild by the federal government or protected by federal law. LIP compensates livestock owners and contract growers for livestock death losses in excess of normal mortality due to adverse weather, including losses due to hurricanes, floods, blizzards, wildfires, extreme heat or extreme cold.

For 2016, eligible losses must occur on or after Jan. 1, 2016, and before December 31, 2016. A notice of loss must be filed with FSA within 30 days of when the loss of livestock is apparent. Participants must provide the following supporting documentation to their local FSA office no later than 30 calendar days after the end of the calendar year for which benefits are requested:

- Proof of death documentation
- Copy of growers contracts
- Proof of normal mortality documentation

USDA has established normal mortality rates for each type and weight range of eligible livestock, i.e. Adult Beef Cow = 1.5% and Non-Adult Beef Cattle (less than 400 pounds) = 3.9%. These established percentages reflect losses that are considered expected or typical under “normal” conditions. Producers who suffer livestock losses in 2016 must file both of the following:

- A notice of loss the earlier of 30 calendar days of when the loss was apparent or by January 30, 2017

Additional Information about LIP is available at your local FSA office or online at: www.fsa.usda.gov.
Filing a Notice of Loss

The CCC-576, Notice of Loss, is used to report failed acreage and prevented planting and may be completed by any producer with an interest in the crop. Timely filing a Notice of Loss is required for all crops including grasses. For losses on crops covered by the Non-Insured Crop Disaster Assistance Program (NAP), you must file a CCC-576, Notice of Loss, in the FSA County Office within 15 days of the occurrence of the disaster or when losses become apparent or 15 calendar days after the normal harvest date.

Producers of hand-harvested crops must notify FSA of damage or loss through the administrative County Office within 72 hours of the date of damage or loss first becomes apparent. This notification can be provided by filing a CCC-576, email, fax or phone. Producers who notify the County Office by any method other than by filing the CCC-576 are still required to file a CCC-576, Notice of Loss, within the required 15 calendar days.

If filing for prevented planting, an acreage report and CCC-576 must be filed within 15 calendar days of the final planting date for the crop.

Emergency Assistance for Livestock, Honeybee, and Farm-Raised Fish Program (ELAP)

The Emergency Assistance for Livestock, Honeybees and Farm-Raised Fish Program (ELAP) provides emergency assistance to eligible livestock, honeybee, and farm-raised fish producers who have losses due to disease, adverse weather or other conditions, such as blizzards and wildfires, not covered by other agricultural disaster assistance programs.

Eligible livestock losses include grazing losses not covered under the Livestock Forage Disaster Program (LFP), loss of purchased feed and/or mechanically harvested feed due to an eligible adverse weather event, additional cost of transporting water because of an eligible drought and additional cost associated with gathering livestock to treat for cattle tick fever.

Eligible honeybee losses include loss of purchased feed due to an eligible adverse weather event, cost of additional feed purchased above normal quantities due to an eligible adverse weather condition, colony losses in excess of normal mortality due to an eligible weather event or loss condition, including CCD, and hive losses due to eligible adverse weather.

Eligible farm-raised fish losses include death losses in excess of normal mortality and/or loss of purchased feed due to an eligible adverse weather event.

Producers who suffer eligible livestock, honeybee, or farm-raised fish losses from October 1, 2015 to September 30, 2016 must file:

- A notice of loss the earlier of 30 calendar days of when the loss is apparent or by November 1, 2016
- An application for payment by November 1, 2016

The Farm Bill caps ELAP disaster funding at $20 million per federal fiscal year.

The following ELAP Fact Sheets (by topic) are available online:

- ELAP for Farm-Raised Fish Fact Sheet
- ELAP for Livestock Fact Sheet
- ELAP for Honeybees Fact Sheet

To view these and other FSA program fact sheets, visit the FSA fact sheet web page at www.fsa.usda.gov/factsheets.

FSA Offers Improved Program to Limit Losses on Forages

Reduced forage quality is now considered a production loss for weather disaster assistance coverage under the new buy-up provisions of the Farm Service Agency (FSA) Noninsured Crop Disaster Assistance Program (NAP).

This safety net is important for cattlemen who produce non-insurable forages for feeding livestock. Previously, FSA only considered a decrease in overall forage tonnage produced when determining if the producer suffered a compensable loss after a qualifying weather event. Under FSA’s new NAP buy-up provisions, a decrease in forage quality – such as protein content – is also considered.

To receive coverage for the 2017 crop year, producers must enroll their eligible forage in NAP by December 1, 2016. Beginning, limited resource and targeted
underserved farmers or ranchers are eligible for a waiver of the NAP service fee and a 50 percent premium reduction in buy-up provisions.

For more information on NAP, visit www.fsa.usda.gov/nap.

**Reporting Organic Crops**

Producers who want to use the Noninsured Crop Disaster Assistance Program (NAP) organic price and selected the "organic" option on their NAP application must report their crops as organic.

When certifying organic acres, the buffer zone acreage must be included in the organic acreage.

Producers must also provide a current organic plan, organic certificate or documentation from a certifying agent indicating an organic plan is in effect.

Documentation must include:

- name of certified individuals
- address
- telephone number
- effective date of certification
- certificate number
- list of commodities certified
- name and address of certifying agent
- a map showing the specific location of each field of certified organic, including the buffer zone acreage

Certification exemptions are available for producers whose annual gross agricultural income from organic sales totals $5,000 or less. Although exempt growers are not required to provide a written certificate, they are still required to provide a map showing the specific location of each field of certified organic, transitional and buffer zone acreage.

For questions about reporting organic crops, contact your local FSA office. To find your local office, visit http://offices.usda.gov.

**MAL and LDP Policy Changes for Crop Years 2015-2018**

The Agricultural Act of 2014 authorized 2014-2018 crop year Marketing Assistance Loans (MALs) and Loan Deficiency Payments (LDPs), with a few minor policy changes.

Among the changes, farm-stored MAL collateral transferred to warehouse storage will retain the original loan rate, be allowed to transfer only the outstanding farm-stored quantity with no additional quantity allowed and will no longer require producers to have a paid for measurement service when moving or commingling loan collateral.

MALs and LDPs provide financing and marketing assistance for wheat, feed grains, soybeans, and other oilseeds, pulse crops, rice, peanuts, cotton, wool and honey. MALs provide producers interim financing after harvest to help them meet cash flow needs without having to sell their commodities when market prices are typically at harvest-time lows. A producer who is eligible to obtain a loan, but agrees to forgo the loan, may obtain an LDP if such a payment is available. Marketing loan provisions and LDPs are not available for sugar and extra-long staple cotton.

FSA is now accepting requests for 2016 MALs and LDPs for all eligible commodities after harvest.

Before MAL repayments with a market loan gain or LDP disbursements can be made, producers must meet the requirements of actively engaged in farming, cash rent tenant and member contribution.

Commodity certificates are available to loan holders who have outstanding nonrecourse loans for wheat, upland cotton, rice, feed grains, pulse crops (dry peas, lentils, large and small chickpeas), peanuts, wool, soybeans and designated minor oilseeds. These certificates can be purchased at the posted county price (or adjusted world price or national posted price) for the quantity of commodity under loan, and must be immediately exchanged for the collateral, satisfying the loan. MALs redeemed with commodity certificates are not subject to the actively engaged in farming, cash rent tenant, Adjusted Gross Income provisions or the payment limitation.

To be considered eligible for an LDP, producers must have form CCC-633EZ, Page 1 on file at their local FSA
Office before losing beneficial interest in the crop. Pages 2, 3 or 4 of the form must be submitted when payment is requested.

The 2014 Farm Bill also establishes payment limitations per individual or entity not to exceed $125,000 annually on certain commodities for the following program benefits: price loss coverage payments, agriculture risk coverage payments, marketing loan gains (MLGs) and LDPs. These payment limitations do not apply to MAL loan disbursements or redemptions using commodity certificate exchange.

Adjusted Gross Income (AGI) provisions were modified by the 2014 Farm Bill, which states that a producer whose total applicable three-year average AGI exceeds $900,000 is not eligible to receive an MLG or LDP. Producers must have a valid CCC-941 on file to earn a market gain of LDP. The AGI does not apply to MALs redeemed with commodity certificate exchange.

For more information and additional eligibility requirements, please visit a nearby USDA Service Center or FSA’s website www.fsa.usda.gov.

Filing CCC-941 Adjusted Gross Income (AGI) Certifications

Many producers have experienced delays in receiving Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) payments, Loan Deficiency Payments (LDPs) and Market Gains on Marketing Assistance Loans (MALs) because they have not filed form CCC-941. Adjusted Gross Income Certification. LDPs will not be paid until all eligible producers, including landowners who share in the crop, have filed a valid CCC-941.

Producers without a valid CCC-941 certifying their compliance with the average adjusted gross income provisions will not receive payments that have been processed. All farm operator/tenants/owners who have not filed a CCC-941 and have pending payments should IMMEDIATELY file the form with their recording county FSA office. Farm operators and tenants are encouraged to ensure that their landowners have filed the form. FSA has been issuing 2015 LDPs and Market Gains and will be issuing potential 2015 ARC/PLC payments in October.

FSA can accept the CCC-941 for 2015 and 2016. Unlike the past, producers must have the CCC-941 certifying their AGI compliance before any payments can be issued.

Dairy Producers Can Enroll to Protect Milk Production Margins

USDA Farm Service Agency (FSA) in Idaho announced that dairy producers can enroll for 2017 coverage in the Margin Protection Program for Dairy (MPP-Dairy) starting July 1. The voluntary program, established by the 2014 Farm Bill, provides financial assistance to participating dairy producers when the margin – the difference between the price of milk and feed costs – falls below the coverage level selected by the producer.

The Margin Protection Program gives participating dairy producers the flexibility to select coverage levels best suited for their operation. Enrollment began July 1 and ends on Sept. 30, 2016, for coverage in calendar year 2017. Participating farmers will remain in the program through 2018 and pay a minimum $100 administrative fee each year. Producers have the option of selecting a different coverage level during open enrollment each year.
USDA has a web tool to help producers determine the level of coverage under the Margin Protection Program that will provide them with the strongest safety net under a variety of conditions. The online resource, available at www.fsa.usda.gov/mpptool, allows dairy farmers to quickly and easily combine unique operation data and other key variables to calculate their coverage needs based on price projections. Producers can also review historical data or estimate future coverage needs, based on data projections. The secure site can be accessed via computer, Smartphone or tablet 24 hours a day, seven days a week.

To complete enrollment, producers must make coverage elections during the enrollment period and pay the annual $100 administrative fee that provides basic catastrophic protection that covers 90 percent of milk production at a $4 margin coverage level. For additional premiums, operations can protect 25 to 90 percent of production history with margin coverage levels from $4.50 to $8, in 50 cent increments. Once enrolled, dairy operations are required to participate through 2018 by making coverage elections each year. Producers can mail the appropriate form to the producer’s administrative county FSA office, along with applicable fees without necessitating a trip to the local FSA office. If electing higher coverage for 2017, dairy producers can either pay the premium in full at the time of enrollment or pay 100 percent of the premium by Sept. 1, 2017. Premium fees may be paid directly to FSA or producers can work with their milk handlers to remit premiums on their behalf.

Also beginning July 1, 2016, FSA will begin accepting applications for intergenerational transfers, allowing program participants who added an adult child, grandchild or spouse to the operation during calendar year 2014 or 2015, or between Jan. 1 and June 30, 2016, to increase production history by the new cows bought into the operation by the new family members. For intergenerational transfers occurring on or after July 1, 2016, notification to FSA must be made within 60 days of purchasing the additional cows.

Dairy operations enrolling in the new program must meet conservation compliance provisions and cannot participate in the Livestock Gross Margin Dairy Insurance Program.

For more information, visit FSA online at www.fsa.usda.gov/dairy or stop by a local FSA office to learn more about the Margin Protection Program. To find a local FSA office in your area, visit http://offices.usda.gov.

Sugar producers to be eligible for sugar loans through amalgamated sugar company
Sugar producers are reminded to be eligible for program benefits (sugar loans), sugar must have been processed from beets delivered by a producer, owner, or operator who complies with HELC and WC provisions and producers are required to file:

- Form AD-1026, Highly Erodible land Conservation (HELC) and Wetland Conservation (WC) Certification
- FSA-578, Report of Acreage, annually, before the final acreage reporting date established for the county

Persons shall not be eligible for program benefits during the crop year in which the producer does not comply with HELC and WC provisions

CRP Payment Limitation
Payments and benefits received under the Conservation Reserve Program (CRP) are subject to the following:

- payment limitation by direct attribution
- foreign person rule
- average adjusted gross income (AGI) limitation

The 2014 Farm Bill continued the $50,000 maximum CRP payment amount that can be received annually, directly or indirectly, by each person or legal entity. This payment limitation includes all annual rental payments and incentive payments (Sign-up Incentive Payments and Practice Incentive Payments). Annual rental payments are attributed (earned) in the fiscal year in which program performance occurs. Sign-up Incentive Payments (SIP) are attributed (earned) based on the fiscal year in which the contract is approved, not the fiscal year the contract is effective. Practice Incentive Payments (PIP) are attributed (earned) based on the fiscal year in which the cost-share documentation is completed and the producer or technical service provider certifies performance of practice completion to the county office.

Such limitation on payments is controlled by direct attribution.

- Program payments made directly or indirectly to a person are combined with the pro rata interest held in any legal entity that received payment,
unless the payments to the legal entity have been reduced by the pro rata share of the person.

- Program payments made directly to a legal entity are attributed to those persons that have a direct and indirect interest in the legal entity, unless the payments to the legal entity have been reduced by the pro rata share of the person.
- Payment attribution to a legal entity is tracked through four levels of ownership. If any part of the ownership interest at the fourth level is owned by another legal entity, a reduction in payment will be applied to the payment entity in the amount that represents the indirect interest of the fourth level entity in the payment entity.

Essentially, all payments will be “attributed” to a person’s Social Security Number. Given the current CRP annual rental rates in many areas, it is important producers are aware of how CRP offered acreages impact their $50,000 annual payment limitation. Producers should contact their local FSA office for additional information.

NOTE: The information in the above article only applies to contracts subject to 4-PL and 5-PL regulations. It does not apply to contracts subject to 1-PL regulations.

USDA Farm Service Agency (FSA) Online Hay and Grazing Acres Locator Tool

FSA’s Hay Net website www.fsa.usda.gov/haynet is the "go to" online resource for agricultural producers to list information concerning the need for hay and grazing acres or the availability of hay and grazing acres.

If, due to extenuating circumstances, producers are in need of hay and/or grazing acres to support livestock, please use Hay Net to post an advertisement seeking these resources. Likewise, landowners who have hay and/or grazing acres available for livestock producers should post a Hay Net advertisement as well.

A few things to remember when using the Hay Net website:

- There is a one-time registration process that should be completed by all users who want to post an ad online.
- Users who just want to browse ads DO NOT NEED to have an eAuthentication user id.

- Hay and grazing acre ads will be automatically removed after a period of 13 months.
- Please help your fellow farmer and rancher by keeping ads current and up to date and remove ads you no longer need or want advertised on Hay Net. Please, no corporate advertisements on this site.

Hay Net is brought to you by FSA as a public service. The sole purpose of this online resource is to provide a site for the exchange of information. FSA does not endorse, guarantee, or otherwise make representations of any kind regarding any user of this site and FSA is not responsible for defining the terms of grazing agreements or lease contracts.

For more information about Hay Net and other FSA services and programs, please contact your local FSA office. For local FSA Service Center contact information, please visit: offices.usda.gov.

Maintaining the Quality of Farm-Stored Loan Grain and Unauthorized Disposition of Grain

Bins are ideally designed to hold a level volume of grain. When bins are overfilled and grain is heaped up, airflow is hindered and the chance of spoilage increases.

Producers who take out marketing assistance loans and use the farm-stored grain as collateral should remember that they are responsible for maintaining the quality of the grain through the term of the loan.

If loan grain has been disposed of through feeding, selling or any other form of disposal without prior written authorization from the county office staff, it is considered unauthorized disposition. The financial penalties for unauthorized dispositions are severe and a producer’s name will be placed on a loan violation list for a two-year period. Always call before you haul any grain under loan.

USDA Expands Microloans to Help Farmers Purchase Farmland and Improve Property

Producers, Including Beginning and Underserved Farmers, Have a New Option to Gain Access to Land

The U.S. Department of Agriculture (USDA) is offering farm ownership microloans, creating a new financing avenue for farmers to buy and improve property. These microloans are especially helpful to beginning or
underserved farmers, U.S. veterans looking for a career in farming, and those who have small and mid-sized farming operations.

The microloan program, which celebrates its third anniversary this week, has been hugely successful, providing more than 16,800 low-interest loans, totaling over $373 million to producers across the country. Microloans have helped farmers and ranchers with operating costs, such as feed, fertilizer, tools, fencing, equipment, and living expenses since 2013. Seventy percent of loans have gone to new farmers.

Now, microloans will be available to also help with farm land and building purchases, and soil and water conservation improvements. FSA designed the expanded program to simplify the application process, expand eligibility requirements and expedite smaller real estate loans to help farmers strengthen their operations. Microloans provide up to $50,000 to qualified producers, and can be issued to the applicant directly from the USDA Farm Service Agency (FSA).

This microloan announcement is another USDA resource for America’s farmers and ranchers to utilize, especially as new and beginning farmers and ranchers look for the assistance they need to get started. To learn more about the FSA microloan program visit www.fsa.usda.gov/microloans, or contact your local FSA office. To find your nearest office location, please visit http://offices.usda.gov.

**Guaranteed Loan Program**

FSA guaranteed loans allow lenders to provide agricultural credit to farmers who do not meet the lender’s normal underwriting criteria. Farmers and ranchers apply for a guaranteed loan through a lender, and the lender arranges for the guarantee. FSA can guarantee up to 95 percent of the loss of principal and interest on a loan. Guaranteed loans can be used for both farm ownership and operating purposes.

Guaranteed farm ownership loans can be used to purchase farmland, construct or repair buildings, develop farmland to promote soil and water conservation or to refinance debt.

Guaranteed operating loans can be used to purchase livestock, farm equipment, feed, seed, fuel, farm chemicals, insurance and other operating expenses.
