Time is Running Out! First Deadline for Agricultural Risk Coverage (ARC) and Price Loss Coverage (PLC) is February 27, 2015

Producers are reminded that the deadline to update yield history and/or reallocate base acres is Feb. 27, 2015. Farm owners and producers can choose between the new 2014 Farm Bill established programs, Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) through March 31, 2015. The new programs, designed to help producers better manage risk, usher in one of the most significant reforms to U.S. farm programs in decades.

USDA helped create online tools to assist in the decision process, allowing farm owners and producers to enter information about their operation and see projections that show what ARC and/or PLC will mean for them under possible future scenarios.
Division Chiefs:
Doug Bailey
Jeff Koch
Kent Mason
Stan Wilson

Please contact your local FSA Office for questions specific to your operation or county.

Farm owners and producers can access the online resources, available at www.fsa.usda.gov/arc-plc, from the convenience of their home computer or mobile device at any time.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium grain rice (which includes short grain rice), safflower seed, sesame, soybeans, sunflower seed and wheat. Upland cotton is no longer a covered commodity.

Dates associated with ARC and PLC that farm owners and producers need to know:

Now through Feb. 27, 2015: Farm owners may visit their local Farm Service Agency office to update yield history and/or reallocate base acres.

Now through March 31, 2015: Producers make a one-time election between ARC and PLC for the 2014 through 2018 crop years.

Mid-April 2015 through summer 2015: Producers sign contracts for 2014 and 2015 crop years.

October 2015: Payments issued for 2014 crop year, if needed.

To learn more about which safety net options are most appropriate for specific farming operations, farmers can use new Web tools at www.fsa.usda.gov/arc-plc.

To learn more about upcoming educational meetings, farmers can contact their local Farm Service Agency county office at http://offices.sc.egov.usda.gov/locator/app.

USDA Provides Greater Protection for Fruit, Vegetable and Other Specialty Crop Growers

Free Basic Coverage Plans and Premium Discounts Available for New, Underserved and Limited Income Farmers

Greater protection is now available from the Noninsured Crop Disaster Assistance Program for crops that historically have been ineligible for federal crop insurance. The new options, created by the 2014 Farm Bill, provide greater coverage for losses when natural disasters affect specialty crops such as vegetables, fruits, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, maple sap, and energy crops.
Previously, the program offered coverage at 55 percent of the average market price for crop losses that exceed 50 percent of expected production. Producers can now choose higher levels of coverage, up to 65 percent of their expected production at 100 percent of the average market price.

The expanded protection will be especially helpful to beginning and socially disadvantaged producers, as well as farmers with limited resources, who will receive fee waivers and premium reductions for expanded coverage. More crops are now eligible for the program, including expanded aquaculture production practices, and sweet and biomass sorghum. For the first time, a range of crops used to produce bioenergy will be eligible as well.

To help producers learn more about the Noninsured Crop Disaster Assistance Program and how it can help them, USDA, in partnership with Michigan State University and the University of Illinois, created an online resource. The Web tool, available at www.fsa.usda.gov/nap, allows producers to determine whether their crops are eligible for coverage. It also gives them an opportunity to explore a variety of options and levels to determine the best protection level for their operation.

To learn more, visit the Farm Service Agency (FSA) website at www.fsa.usda.gov/nap or contact your local FSA office at offices.usda.gov. The Farm Service Agency (FSA), which administers the program, also wants to hear from producers and other interested stakeholders who may have suggestions or recommendations on the program.

**USDA Reminds Farmers of 2014 Farm Bill Conservation Compliance Changes**

The 2014 Farm Bill implements a change that requires farmers to have a Highly Erodible Land Conservation and Wetland Conservation Certification (AD-1026) on file.

For farmers to be eligible for premium support on their federal crop insurance, a completed and signed AD-1026 certification form must be on file with FSA. The Risk Management Agency (RMA), through the Federal Crop Insurance Corporation (FCIC), manages the federal crop insurance program that provides the modern farm safety net for American farmers and ranchers.

Since enactment of the 1985 Farm Bill, eligibility for most commodity, disaster, and conservation programs has been linked to compliance with the highly erodible land conservation and wetland conservation provisions. The 2014 Farm Bill continues the requirement that producers adhere to conservation compliance guidelines to be eligible for most programs administered by FSA and NRCS. This includes most financial assistance such as the new price and revenue protection programs, the Conservation Reserve Program, the Livestock Disaster Assistance programs and Marketing Assistance Loans and most programs implemented by FSA. It also includes the Environmental Quality Incentives Program, the Conservation Stewardship Program, and other conservation programs implemented by NRCS.
Many FSA and Natural Resources Conservation Service (NRCS) programs already have implemented this requirement and therefore most producers should already have an AD-1026 form on file for their associated lands. If an AD-1026 form has not been filed or is incomplete, then farmers are reminded of the deadline of June 1, 2015.

When a farmer completes and submits the AD-1026 certification form, FSA and NRCS staff will review the associated farm records and outline any additional actions that may be required to meet the required compliance with the conservation compliance provisions.

FSA recently released a revised form AD-1026, which is available at USDA Service Centers and online at: [www.fsa.usda.gov](http://www.fsa.usda.gov). USDA will publish a rule later this year that will provide details outlining the connection of conservation compliance with crop insurance premium support. Producers can also contact their local USDA Service Center for information. A listing of service center locations is available at [offices.usda.gov](http://offices.usda.gov).

### 2015 Acreage Reporting Dates

Producers who file accurate and timely reports for all crops and land uses, including failed acreage can prevent the potential loss of FSA program benefits. Please pay close attention to the acreage reporting dates below, as some dates have changed.

In order to comply with FSA program eligibility requirements, all producers are encouraged to visit their local County FSA office to file an accurate crop certification report by the applicable deadline.

The following 2015 acreage reporting dates are applicable for Illinois:

- **September 30, 2014**: aquaculture, Christmas trees, turfgrass sod, floriculture
- **December 15, 2014**: perennial forage (with an intended use of haying or grazing), fall-seeded small grains
- **January 2, 2015**: honey
- **January 15, 2015**: apples, asparagus, blueberries, caneberries, cherries, grapes, nectarines, peaches, plums, strawberries
- **July 15, 2015**: cabbage (planted 3/15 – 5/31), perennial forage (with an intended use of cover only, green manure, left standing, or seed) and all other crops
- **August 15, 2015**: cabbage (planted 6/1 – 7/20)
- **September 15, 2015**: cucumbers (planted 6/1 – 8/15) in Gallatin, Lawrence, and White Counties

The following exceptions apply to the above acreage reporting dates:

- If the crop has not been planted by the above acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.

- If a producer acquires additional acreage after the above acreage reporting date, then the acreage must be reported no later than 30 calendars days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.

- If a perennial forage crop is reported with the intended use of “cover only,” “green manure,” “left standing,” or “seed,” then the acreage must be reported by July 15, 2014.
Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP covered crops is the earlier of the dates listed above or 15 calendar days before grazing or harvesting of the crop begins.

For questions regarding crop certification and crop loss reports, please contact your local County FSA office.

If filing for prevented planting, an acreage report and CCC-576 must be filed within 15 calendar days of the final planting date for the crop.

---

**Foreign Buyers Notification**

The Agricultural Foreign Investment Disclosure Act (AFIDA) requires all foreign owners of U.S. agricultural land to report their holdings to the Secretary of Agriculture. The Farm Service Agency administers this program for USDA.

All individuals who are not U.S. citizens, and have purchased or sold agricultural land in the county are required to report the transaction to FSA within 90 days of the closing. Failure to submit the AFIDA form (FSA-153) could result in civil penalties of up to 25 percent of the fair market value of the property. County government offices, Realtors, attorneys and others involved in real estate transactions are reminded to notify foreign investors of these reporting requirements.

---

**Breaking New Ground**

Agricultural producers are reminded to consult with FSA and NRCS before breaking out new ground for production as doing so without prior authorization may put a producer’s federal farm program benefits in jeopardy. This is especially true for land that must meet Highly Erodible Land (HEL) and Wetland Conservation (WC) provisions.

Producers with HEL determined soils must apply tillage, crop residue and rotation requirements as specified in their conservation plan.

Producers should notify FSA prior to conducting land clearing or drainage projects to ensure compliance. If you intend to clear any trees to create new cropland, these areas will need to be reviewed to ensure any work will not risk your eligibility for benefits.

Landowners and operators can complete form AD-1026 Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification to determine whether a referral to Natural Resources Conservation Service (NRCS) is necessary.

---

**Microloan Cap Grows to $50,000**

Farm Service Agency (FSA) reminds farmers and ranchers that the FSA borrowing limit for microloans increased from $35,000 to $50,000, effective Nov. 7. Microloans offer borrowers simplified lending with less paperwork.

The microloan change allows beginning, small and mid-sized farmers to access an additional $15,000 in loans using a simplified application process with up to seven years to repay. Microloans are part of USDA’s continued commitment to small and midsized farming operations.

To complement the microloan program additional changes to FSA eligibility requirements will enhance beginning farmers and ranchers access to land, a key barrier to entry level producers. FSA policies related to farm experience have changed so that other types of skills may be considered to meet the direct farming experience required for farm ownership loan eligibility. Operation or management of non-farm businesses, leadership positions while serving in the military or advanced education in an agricultural field will now count towards the experience applicants need to show when applying for farm ownership loans.
**Important Note:** Microloans cannot be used to purchase real estate.

Since 2010, FSA has made a record amount of farm loans — more than 165,000 loans totaling nearly $23 billion. More than 50 percent of USDA's farm loans now go to beginning farmers. In addition, FSA has increased its lending to socially-disadvantaged producers by nearly 50 percent since 2010.

Please review the FSA [Microloan Program Fact Sheet](https://www.egov.usda.gov) for program application, eligibility and related information.

**Conduct USDA Business Online by Creating an eAUTHENTICATION Account**

The Internet allows you, the customer, access to USDA information 24 hours a day, seven days a week. You can fill out and submit electronic forms (eForms) any time of the day or night from anywhere you have Internet access. This new service delivery option allows you to complete and file your own forms or applications online, because your signature is already electronically "on file."

Information submitted to the Federal Government remains safe and secure because every customer has a unique User ID and password; only authorized USDA employees can access your information. It's safe, saves paper, saves a visit to your local USDA Service Center and provides electronic tracking of all your USDA transactions.

**How to Sign Up for eAuth :**

Begin the process by reviewing the information at the USDA Website [https://www.eauth.usda.gov](https://www.eauth.usda.gov).

This website describes the services available for Level 1 and Level 2 Accounts. Level 1 and Level 2 accounts require that you have an email address so you can register, create a customer profile, and be able to respond to a confirmation email. Level 1 Accounts do not require you to provide proof of your identity at a local USDA Service Center. Level 1 Accounts provide limited access to certain USDA Web site portals that require no authentication or authorization. A Level 2 Account does require a visit to a USDA Service Center with proof of your identity. That is because a Level 2 account allows you access to complete and submit documents and forms electronically.

**LEVEL 1 ACCOUNT**

**STEP 1.** To obtain a Level 1 Account, you may self-register online at [www.eauth.egov.usda.gov](http://www.eauth.egov.usda.gov).

Scroll down and click on the button that says “Sign Up for a Level 1 Account.” Complete the brief customer profile.

**STEP 2.** You will receive a confirmation email, and you must respond to it within 7 days to activate your account.

**LEVEL 2 ACCOUNT**

**STEP 1.** To obtain a Level 2 Account, you must complete an 18 question customer profile and prove your identity by presenting state or federal photo ID at a local USDA Service Center. Go to [www.eauth.egov.usda.gov](http://www.eauth.egov.usda.gov), scroll down and click on “Sign Up for a Level 2 Account.” Complete your customer profile, which includes designating your user ID and password created by you, contact information and email information. The data you enter in your customer profile must match the data on the document you use as identification at your local USDA Service Center. Example: Your first and last names and address must match the government-issued photo ID you plan to use to prove your identity. Identify proof can only be verified by one of the following documents: Current State Driver’s License, State Photo ID, US Military ID, or United States Passport.

**STEP 2.** After completing your customer profile and submitting it online, you will receive a confirmation email, and you must respond to it within 7 days to activate your account.
STEP 3. Then you must complete the “Identify Proofing” process by visiting a local USDA Service Center. You will be required to present the eligible photo ID to an USDA employee who will verify your identity and enter the expiration date of the ID document used.

STEP 4. The USDA employee then will update your customer profile to a Level 2 Account. You will have access to USDA online applications and forms within one hour of your account being updated.

You now have access to complete and submit documents and forms electronically. USDA continues to update and make more forms and programs available electronically.

**USDA Creates More Bird Habitat Opportunities on Irrigated Farmland**

USDA’s Farm Service Agency (FSA) announces more bird habitats to be established in irrigated farmland regions through the Conservation Reserve Program (CRP).

Declines in upland bird populations, such as the northern bobwhite, pheasant, and prairie chicken, led to the creation of new Conservation Reserve Program features to help restore habitats for these species in these agricultural areas. Since the program’s creation in 2004, more than 240,000 acres of marginal cropland has been converted to native grasslands, spurring an increase in upland bird populations.

In recent years, however, applications for this type of habitat creation have slowed. To encourage more participation, USDA’s new policy focuses on farmland with center-pivot irrigation systems where there are circular areas of cropland with patches of land beyond the reach of irrigation. Until now, these patches – known as pivot corners – were only eligible for habitat creation when connected by a linear strip of grassland also enrolled in the program. The new policy allows producers interested in habitat creation to use disconnected pivot corners to help increase the population of upland birds.

Other species that can benefit from today’s change include the mourning dove, wild turkey, several sparrows, meadowlark and bobolinks.

The Conservation Reserve Program is a voluntary program. FSA contracts with agricultural landowners so that environmentally sensitive land is not farmed but instead used for conservation. Participants establish long-term plant species that control soil erosion, sequester carbon, improve water quality, and strengthen declining wildlife populations. In return, participants receive annual rental payments between 10 and 15 years.

Interested landowners can enroll pivot corners in the Conservation Reserve Program at any time. Participants and land must meet certain eligibility requirements. Other restrictions may apply. For additional details, contact your local Farm Service Agency office at offices.usda.gov or visit the website at www.fsa.usda.gov/conservation.

**Important Dates to Remember**

December or March 15, 2015 (depending on the crop) - NAP sales closing date

February 16, 2015 Presidents Day - Office Closed

February 27, 2015 - Deadline to update yield history and/or reallocate base acres

March 31, 2015 - Deadline to make a one-time election between ARC and PLC for 2014 through 2018 crop years

September 30, 2018 - Extension of Dairy Indemnity Payment Program (DIPP)
Ongoing - FSFL (Farm Facility Loans)
Livestock Disaster Assistance Sign-up Underway

---

**February Interest Rates**

90-Day Treasury Bill: .125%
Farm Operating Loans - Direct: 2.625%
Farm Ownership Loans - Direct: 3.75%
Farm Ownership Loans Direct Downpayment, Beginning Farmer or Rancher: 1.50%
Emergency Loans: 3.625%
Farm Storage Facility Loans (7 years): 1.875 %
Farm Storage Facility Loans (10 years): 2.00 %
Farm Storage Facility Loans (12 years): 2.125 %
Commodity Loans: 1.250%

---

**2014 Farm Bill Informational/Producer Education Meetings**

Farm Service Agency and the Illinois Farm Bureau are conducting several 2014 Farm Bill Informational/Producer Education Meetings throughout the state. For a complete listing of the Farm Bureau informational meetings that the Illinois Farm Bureau is providing please visit FarmWeekNow.com and for a complete listing of the Producers Education Meetings that FSA is providing please visit [www.fsa.usda.gov/il](http://www.fsa.usda.gov/il).
