Message from the State Executive Director

To the Illinois Agricultural Community,

It has been my honor to serve you these last 3 and a half years as the State Executive Director of Illinois FSA.

2020 has been especially interesting due to COVID19 and all the programs that were implemented from MFP1 and 2 to CFAP 1 and 2 to WHIP+, on top of the other “normal” FSA programs. Illinois FSA has a great staff that always tries to do their best to provide outstanding service to all Illinois farmers.
I appreciate your cooperation and understanding dealing with the challenges and restrictions we have operated under resulting from COVID-19.

To the greatest farmers in the world - Thank You!

William Graff

Maintaining the Quality of Farm- Stored Loan Grain

Bins are ideally designed to hold a level volume of grain. When bins are overfilled and grain is heaped up, airflow is hindered and the chance of spoilage increases.

Producers who take out marketing assistance loans and use the farm-stored grain as collateral should remember that they are responsible for maintaining the quality of the grain through the term of the loan.

Unauthorized Disposition of Grain

If loan grain has been disposed of through feeding, selling or any other form of disposal without prior written authorization from the county office staff, it is considered unauthorized disposition. The financial penalties for unauthorized dispositions are severe and a producer's name will be placed on a loan violation list for a two-year period. Always call before you haul any grain under loan

USDA Offers Secure New Options for Signing and Sharing Documents Online

Farmers and ranchers working with USDA's Farm Service Agency or Natural Resources Conservation Service can now sign and share documents online in just a few clicks. By using Box or OneSpan, producers can digitally complete business transactions without leaving their homes or agricultural operations. Both services are free, secure, and available for multiple FSA and NRCS programs.

Box is a secure, cloud-based site where FSA or NRCS documents can be managed and shared. Producers who choose to use Box can create a username and password to access their secure Box account, where documents can be downloaded, printed, manually signed, scanned, uploaded, and shared digitally with Service Center staff. This service is available to any FSA or NRCS customer with access to a mobile device or computer with printer connectivity.

OneSpan is a secure eSignature solution for FSA and NRCS customers. Like Box, no software downloads or eAuthentication is required for OneSpan. Instead, producers interested in eSignature through OneSpan can confirm their identity through two-factor authentication using a verification code sent to their mobile device or a personalized question and answer. Once identity is confirmed, documents can be reviewed and e-signed through OneSpan via the producer's personal email address. Signed documents immediately become available to the appropriate Service Center staff.
Box and OneSpan are both optional services for customers interested in improved efficiency in signing and sharing documents with USDA, and they do not replace existing systems using eAuthentication for digital signature. Instead, these tools provide additional digital options for producers to use when conducting business with FSA or NRCS.

USDA Service Center staff are available to help producers get started with Box and OneSpan through a few simple steps. Please visit farmers.gov/service-locator to find your local office and let Service Center staff know you’re interested in signing and sharing documents through these new features. In most cases, one quick phone call will be all that is needed to initiate the process.

Visit farmers.gov/mydocs to learn more about Box and OneSpan, steps for getting started, and additional resources for conducting business with USDA online.

To learn more about program flexibilities and Service Center status during the coronavirus pandemic, visit farmers.gov/coronavirus.

Submit Loan Requests for Financing Early

The Farm Loan teams in Illinois are already working on operating loans for spring 2021 and asks potential borrowers to submit their requests early so they can be timely processed. The farm loan teams can help determine which loan programs are best for applicants.

FSA offers a wide range of low-interest loans that can meet the financial needs of any farm operation for just about any purpose. The traditional farm operating and farm ownership loans can help large and small farm operations take advantage of early purchasing discounts for spring inputs as well expenses throughout the year.

Microloans are a simplified loan program that will provide up to $50,000 for both Farm Ownership and Operating Microloans to eligible applicants. These loans, targeted for smaller and non-traditional operations, can be used for operating expenses, starting a new operation, purchasing equipment, and other needs associated with a farming operation. Loans to beginning farmers and members of underserved groups are a priority.

Other types of loans available include:

Marketing Assistance Loans allow producers to use eligible commodities as loan collateral and obtain a 9-month loan while the crop is in storage. These loans provide cash flow to the producer and allow them to market the crop when prices may be more advantageous.

Farm Storage Facility Loans can be used to build permanent structures used to store eligible commodities, for storage and handling trucks, or portable or permanent handling equipment. A variety of structures are eligible under this loan, including bunker silos, grain bins, hay storage structures, and refrigerated structures for vegetables and fruit. A producer may borrow up to $500,000 per loan.

Enrollment Begins for Agriculture Risk Coverage and Price Loss Coverage Programs for 2021

Agricultural producers can now make elections and enroll in the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs for the 2021 crop year. The signup period opened Tuesday, Oct. 13. These key U.S. Department of Agriculture (USDA) safety-net programs help producers weather fluctuations in either revenue or price for certain crops, and more than $6 billion in payments have been issued to producers who signed up for the 2019 crop year.

Enrollment for the 2021 crop year closes March 15, 2021.
ARC provides income support payments on historical base acres when actual crop revenue declines below a specified guaranteed level. PLC provides income support payments on historical base acres when the effective price for a covered commodity falls below its reference price.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

**2021 Elections and Enrollment**

Producers can elect coverage and enroll in crop-by-crop ARC-County or PLC, or ARC-Individual for the entire farm, for the 2021 crop year. Although election changes for 2021 are optional, enrollment (signed contract) is required for each year of the program. If a producer has a multi-year contract on the farm and makes an election change for 2021, it will be necessary to sign a new contract.

If an election is not submitted by the deadline of March 15, 2021, the election defaults to the current election for crops on the farm from the prior crop year.

For crop years 2022 and 2023, producers will have an opportunity to make new elections during those signups. Farm owners cannot enroll in either program unless they have a share interest in the farm.

**Web-Based Decision Tools**

In partnership with USDA, the University of Illinois and Texas A&M University offer web-based decision tools to assist producers in making informed, educated decisions using crop data specific to their respective farming operations. Tools include:

- [Gardner-farmdoc Payment Calculator](#), the University of Illinois tool that offers farmers the ability to run payment estimate modeling for their farms and counties for ARC-County and PLC.
- [ARC and PLC Decision Tool](#), the Texas A&M tool allows producers to analyze payment yield updates and expected payments for 2021. Producers who have used the tool in the past should see their username and much of their farm data already available in the system.

**More Information**

For more information on ARC and PLC, including two online decision tools that assist producers in making enrollment and election decisions specific to their operations, visit the [ARC and PLC webpage](#).

For additional questions and assistance, contact your local USDA service center. To locate your local FSA office, visit [farmers.gov/service-locator](#).

---

**USDA Announces CRP General Signup Ends February 12**

Agricultural producers and private landowners interested in the [Conservation Reserve Program](#) (CRP) can sign up for the popular program beginning Jan. 4, 2021, until Feb. 12, 2021. The competitive program, administered by USDA’s Farm Service Agency (FSA), provides annual rental payments for land devoted to conservation purposes.

Through CRP, farmers and ranchers establish long-term, resource-conserving plant species, such as approved grasses or trees, to control soil erosion, improve water quality and enhance wildlife habitat on cropland. Farmers and ranchers who participate in CRP help provide numerous benefits to their local region and the nation’s environment and economy. CRP general signup is held
annually and is competitive; general signup includes increased opportunities for wildlife habitat enrollment through the State Acres For Wildlife Enhancement (SAFE) initiative.

New cropland offered in the program must have been planted for four out of six crop years from 2012 to 2017. Additionally, producers with land already enrolled but expiring on Sept. 30, 2021, can re-enroll this year. The acreage offered by producers and landowners is evaluated competitively; accepted offers will begin Oct. 1, 2021.

Signed into law in 1985, CRP is one of the largest private-lands conservation programs in the United States. The program marked its 35-year anniversary in December 2020. Program successes include:

- Preventing more than 9 billion tons of soil from eroding, which is enough soil to fill 600 million dump trucks.
- Reducing nitrogen and phosphorous runoff relative to annually tilled cropland by 95% and 85%, respectively.
- Sequestering an annual average of 49 million tons of greenhouse gases, equal to taking 9 million cars off the road.
- Creating more than 3 million acres of restored wetlands while protecting more than 175,000 stream miles with riparian forest and grass buffers, which is enough to go around the world seven times.
- Benefiting bees and other pollinators and increasing populations of ducks, pheasants, turkey, bobwhite quail, prairie chickens, grasshopper sparrows, and many other birds

For more information on CRP General Signup, visit fsa.usda.gov, or contact your local FSA county office.

Quality Loss Assistance Now Available for Eligible Producers Affected by 2018, 2019 Natural Disasters

The U.S. Department of Agriculture’s (USDA) Farm Service Agency (FSA) today announced that signup for the Quality Loss Adjustment (QLA) Program began Wednesday, January 6, 2021. Funded by the Further Consolidated Appropriations Act of 2020, this new program provides assistance to producers who suffered eligible crop quality losses due to natural disasters occurring in 2018 and 2019. The deadline to apply for QLA is Friday, March 5, 2021.

Eligible Crops

Eligible crops include those for which federal crop insurance or Noninsured Crop Disaster Assistance Program (NAP) coverage is available, except for grazed crops and value loss crops, such as honey, maple sap, aquaculture, floriculture, mushrooms, ginseng root, ornamental nursery, Christmas trees, and turfgrass sod.

Additionally, crops that were sold or fed to livestock or that are in storage may be eligible; however, crops that were destroyed before harvest are not eligible. Crop quality losses occurring after harvest, due to deterioration in storage, or that could have been mitigated, are also not eligible.

Assistance is based on a producer’s harvested affected production of an eligible crop, which must have had at least a 5% quality loss reflected through a quality discount; or for forage crops, a nutrient loss, such as total digestible nutrients.

Qualifying Disaster Events

Losses must have been a result of a qualifying disaster event (hurricane, excessive moisture, flood, qualifying drought, tornado, typhoon, volcanic activity, snowstorm, or wildfire) or related condition that occurred in calendar years 2018 and/or 2019.
Assistance is available for eligible producers in counties that received a qualifying Presidential 
Emergency Disaster Declaration or Secretarial Disaster Designation because of one or more of the 
qualifying disaster events or related conditions.

Lists of counties with Presidential Emergency Disaster Declarations and Secretarial Disaster 
Designations for all qualifying disaster events for 2018 and 2019 are available here. For drought, 
producers are eligible for QLA if the loss occurred in an area within a county rated by the U.S. 
Drought Monitor as having a D3 (extreme drought) or higher intensity level during 2018 or 2019.

Producers in counties that did not receive a qualifying declaration or designation may still apply but 
must also provide supporting documentation to establish that the crop was directly affected by a 
qualifying disaster event.

To determine QLA eligibility and payments, FSA considers the total quality loss caused by all 
qualifying natural disasters in cases where a crop was impacted by multiple events.

**Applying for QLA**

When applying, producers are asked to provide verifiable documentation to support claims of quality 
loss or nutrient loss in the case of forage crops. For crops that have been sold, grading must have 
been completed within 30 days of harvest, and for forage crops, a laboratory analysis must have 
been completed within 30 days of harvest.

Some acceptable forms of documentation include sales receipts from buyers, settlement sheets, 
truck or warehouse scale tickets, written sales contracts, similar records that represent actual and 
specific quality loss information, and forage tests for nutritional values.

**Payments Calculations and Limitations**

QLA payments are based on formulas for the type of crop (forage or non-forage) and loss 
documentation submitted. Based on this documentation FSA is calculating payments based on the 
producer’s own individual loss or based on the county average loss. More information on payments 
can be found on farmers.gov/quality-loss.

FSA will issue payments once the application period ends. If the total amount of calculated QLA 
payments exceeds available program funding, payments will be prorated.

For each crop year, 2018, 2019 and 2020, the maximum amount that a person or legal entity may 
receive, directly or indirectly, is $125,000. Payments made to a joint operation (including a general 
partnership or joint venture) will not exceed $125,000, multiplied by the number of persons and legal 
entities that comprise the ownership of the joint operation. A person or legal entity is ineligible for 
QLA payment if the person’s or legal entity’s average Adjusted Gross Income exceeds $900,000, 
unless at least 75% is derived from farming, ranching or forestry-related activities.

**Future Insurance Coverage Requirements**

All producers receiving QLA Program payments are required to purchase crop insurance or NAP 
coverage for the next two available crop years at the 60% coverage level or higher. Wildlife and 
Hurricane Indemnity Program Plus (WHIP+) participants who already met the WHIP+ requirement 
to purchase crop insurance or NAP coverage are considered to have thereby met the requirement 
to purchase crop insurance or NAP coverage for QLA. If eligible, QLA participants may meet the 
insurance purchase requirement by purchasing Whole-Farm Revenue Protection coverage offered 
through USDA’s Risk Management Agency.

**More Information** For more information, visit farmers.gov/quality-loss, or contact your local USDA 
Service Center. Producers can also obtain one-on-one support with applications by calling 
877-508-8364.
Farm Storage Facility Loans

FSA’s Farm Storage Facility Loan (FSFL) program provides low-interest financing to producers to build or upgrade storage facilities and to purchase portable (new or used) structures, equipment and storage and handling trucks.

The low-interest funds can be used to build or upgrade permanent facilities to store commodities. Eligible commodities include corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley, minor oilseeds harvested as whole grain, pulse crops (lentils, chickpeas and dry peas), hay, honey, renewable biomass, fruits, nuts and vegetables for cold storage facilities, floriculture, hops, maple sap, rye, milk, cheese, butter, yogurt, meat and poultry (unprocessed), eggs, and aquaculture (excluding systems that maintain live animals through uptake and discharge of water). Qualified facilities include grain bins, hay barns and cold storage facilities for eligible commodities.

Loans up to $50,000 can be secured by a promissory note/security agreement and loans between $50,000 and $100,000 may require additional security. Loans exceeding $100,000 require additional security.

Producers do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.

To learn more about the FSA Farm Storage Facility Loan, visit www.fsa.usda.gov/pricesupport or contact your local FSA county office. To find your local FSA county office, visit http://offices.usda.gov.

Get Signed up for Wetland Reserve Easements

Ivan Dozier, State Conservationist, announced the application period for the 2021 Agricultural Conservation Easement Program (ACEP-WRE). USDA’s Natural Resources Conservation Service (NRCS) helps provide long-term protection of Illinois’ farmland, wetlands and grasslands through ACEP. The first application cut-off date has been established and NRCS is accepting applications for Wetland Reserve Easements (WRE). Applications received and that meet program eligibility by February 5, 2021 will be considered for the 2021 program.

For ACEP-WRE in FY21, Illinois was allocated $4.5 million. NRCS may establish a second application funding cutoff opportunity later this year if all funds are not used in the first application cutoff or if more funds become available. Dozier reminds farmers and landowners they can apply for ACEP—and all conservation programs—at any time, as sign-up is continuous and applications can be submitted any time.

NRCS offers two types of easements through ACEP: Agricultural Land Easements (ALE) and Wetland Reserve Easements (WRE). NRCS will establish an application cutoff for ALE at a later date. NRCS is still finalizing ranking criteria for fiscal year 2021. The Geographic Area Rate Caps (GARCs) are DRAFT but available for applicants to view. The GARCs establish the rate per acre that NRCS pays to landowners for the ACEP-WRE easement.

The purpose of the Wetland Reserve Easements (WRE) is to help landowners enhance and protect habitat for wetland wildlife on their lands, reduce impacts from flooding, recharge groundwater, provide outdoor recreation, and increase habitat for migratory waterfowl.

NRCS provides technical and financial assistance directly to private landowners to restore, protect and enhance wetlands through the purchase of these easements, and eligible landowners can choose to enroll in either a permanent easement or a 30-year easement. To apply for a wetlands easement through ACEP - WRE, visit NRCS at your local USDA Service Center.
Find more information about ACEP and other NRCS conservation programs in Illinois online at https://www.nrcs.usda.gov/wps/portal/nrcs/il/programs/.

Farmers.gov Feature Helps Producers Find Farm Loans that Fit Their Operation

Farmers and ranchers can use the Farm Loan Discovery Tool on farmers.gov to find information on USDA farm loans that may best fit their operations.

USDA’s Farm Service Agency (FSA) offers a variety of loan options to help farmers finance their operations. From buying land to financing the purchase of equipment, FSA loans can help.

USDA conducted field research in eight states, gathering input from farmers and FSA farm loan staff to better understand their needs and challenges.

How the Tool Works

Farmers who are looking for financing options to operate a farm or buy land can answer a few simple questions about what they are looking to fund and how much money they need to borrow. After submitting their answers, farmers will receive information on farm loans that best fit their specific needs. The loan application and additional resources also will be provided.

Farmers can download application quick guides that outline what to expect from preparing an application to receiving a loan decision. There are four guides that cover loans to individuals, entities, and youth, as well as information on microloans. The guides include general eligibility requirements and a list of required forms and documentation for each type of loan. These guides can help farmers prepare before their first USDA service center visit with a loan officer.

Farmers can access the Farm Loan Discovery Tool by visiting farmers.gov/fund and clicking the “Start” button. Follow the prompts and answer five simple questions to receive loan information that is applicable to your agricultural operation. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

About Farmers.gov

In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where farmers will be able to apply for programs, process transactions, and manage accounts.

The Farm Loan Discovery Tool is one of many resources on farmers.gov to help connect farmers to information that can help their operations. Earlier this year, USDA launched the My Financial Information feature, which enables farmers to view their loan information, history, payments, and alerts by logging into the website.

USDA is building farmers.gov for farmers, by farmers. In addition to the interactive farm loan features, the site also offers a Disaster Assistance Discovery Tool. Farmers can visit farmers.gov/recover/disaster-assistance-tool#step-1 to find disaster assistance programs that can help their operation recover from natural disasters.

For more information, contact your local County USDA Service Center or visit farmers.gov.

Noninsured Crop Coverage Helps Producers Manage Risks
The Farm Service Agency’s (FSA) Noninsured Crop Disaster Assistance Program (NAP) helps you manage risk through coverage for both crop losses and crop planting that was prevented due to natural disasters. The eligible or “noninsured” crops include agricultural commodities not covered by federal crop insurance.

You must be enrolled in the program and have purchased coverage for the eligible crop in the crop year in which the loss incurred to receive program benefits following a qualifying natural disaster.

**NAP Buy-Up Coverage Option**

NAP offers higher levels of coverage, from 50 to 65 percent of expected production in 5 percent increments, at 100 percent of the average market price. Buy-up levels of NAP coverage are available if the producer can show at least one year of previously successfully growing the crop for which coverage is being requested.

Producers of organics and crops marketed directly to consumers also may exercise the “buy-up” option to obtain NAP coverage of 100 percent of the average market price at the coverage levels of between 50 and 65 percent of expected production.

NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production.

Buy-up coverage is not available for crops intended for grazing.

**NAP Service Fees**

For all coverage levels, the NAP service fee is the lesser of $325 per crop or $825 per producer per county, not to exceed a total of $1,950 for a producer with farming interests in multiple counties.

**NAP Enhancements for Qualified Military Veterans**

Qualified veteran farmers or ranchers are eligible for a service fee waiver and premium reduction, if the NAP applicant meets certain eligibility criteria.

Beginning, limited resource and targeted underserved farmers or ranchers remain eligible for a waiver of NAP service fees and premium reduction when they file form CCC-860, "Socially Disadvantaged, Limited Resource and Beginning Farmer or Rancher Certification."

For NAP application, eligibility and related program information, contact your local County USDA Service Center or visit [fsa.usda.gov/nap](http://fsa.usda.gov/nap).

---

**Great Lakes Restoration Initiative “Chicago Style”**

The Forest Preserve District of Cook County and the USDA Natural Resources Conservation Service (NRCS) have worked together since 2011 on restoring three critical habitats in Illinois’ Great Lakes Watershed: Turnbull Woods, Powderhorn Prairie and Marsh and Eggers Grove and Marsh. All three sites have been significantly improved and one of the sites - Turnbull Woods – has become the first Forest Preserve site to be completely free of invasive brush. Since the partnership project commenced, NRCS has provided $399,605 in Great Lakes Restoration Initiative (GLRI) funding; the Forest Preserve has matched those funds with $410,905. According to Michelle Uting, FPD Grant Administrator, the long-term, steady funding and support we received from NRCS is what helped them utterly transform these tracts of land. Restoration activities at these sites included the removal of many species of invasive plants, thinning invasive trees to allow increased sunlight to reach the ground, and planting native trees. Dozier acknowledges that while funding levels for this effort may seem small in comparison to other farm conservation programs in Illinois,
this effort truly qualifies as a success story. NRCS can announce with confidence that the targeted resource concerns on these sites in Turnbull Woods have been addressed.

Marketing Assistance Available for 2020 Crops

The 2018 Farm Bill extends loan authority through 2023 for Marketing Assistance Loans (MALs) and Loan Deficiency Payments (LDPs).

MALs provide financing and marketing assistance for commodities such as wheat, feed grains, soybeans and other oilseeds, pulse crops, rice, wool and honey. MALs provide producers interim financing after harvest to help them meet cash flow needs without having to sell their commodities when market prices are typically at harvest-time lows.

A producer who is eligible to obtain a MAL, but agrees to forgo the loan, may obtain an LDP if such a payment is available.

To be eligible for a MAL, producers must have a beneficial interest in the commodity, in addition to other requirements. A producer retains beneficial interest when control of and title to the commodity is maintained.

For more information regarding MALs, please contact your local county FSA Office.

Environmental Review Required Before Project Implementation

The National Environmental Policy Act (NEPA) requires Federal agencies to consider all potential environmental impacts for federally-funded projects before the project is approved.

For all Farm Service Agency (FSA) programs, an environmental review must be completed before actions are approved, such as site preparation or ground disturbance. These programs include, but are not limited to, the Emergency Conservation Program (ECP), Farm Storage Facility Loan (FSFL) program and farm loans. If project implementation begins before FSA has completed an environmental review, the request will be denied. Although there are exceptions regarding the Stafford Act and emergencies, it’s important to wait until you receive written approval of your project proposal before starting any actions.

Applications cannot be approved until FSA has copies of all permits and plans. Contact your local FSA office early in your planning process to determine what level of environmental review is required for your program application so that it can be completed timely.

FSA is Accepting CRP Continuous Enrollment Offers

The Farm Service Agency (FSA) is accepting offers for specific conservation practices under the Conservation Reserve Program (CRP) Continuous Signup.

In exchange for a yearly rental payment, farmers enrolled in the program agree to remove environmentally sensitive land from agricultural production and to plant species that will improve environmental health and quality. The program’s long-term goal is to re-establish valuable land cover to improve water quality, prevent soil erosion, and reduce loss of wildlife habitat. Contracts for land enrolled in CRP are 10-15 years in length.

Under continuous CRP signup, environmentally sensitive land devoted to certain conservation practices can be enrolled in CRP at any time. Offers for continuous enrollment are not subject to competitive bidding during specific periods. Instead they are automatically accepted provided the...
land and producer meet certain eligibility requirements and the enrollment levels do not exceed the statutory cap.

For more information, including a list of acceptable practices, contact your local County USDA Service Center or visit fsa.usda.gov/crp.

### Transitioning Expiring CRP Acres

CRP contract holders are encouraged to transition their Conservation Reserve Program (CRP) acres to beginning, veteran or socially disadvantaged farmers or ranchers through the Transition Incentives Program (TIP). TIP provides annual rental payments to the landowner or operator for up to two additional years after the CRP contract expires.

CRP contract holders no longer need to be a retired or retiring owner or operator to transition their land. TIP participants must agree to sell, have a contract to sell, or agree to lease long term (at least five years) land enrolled in an expiring CRP contract to a beginning, veteran, or socially disadvantaged farmer or rancher who is not a family member.

Beginning, veteran or social disadvantaged farmers and ranchers and CRP participants may enroll in TIP beginning two years before the expiration date of the CRP contract. The TIP application must be submitted prior to completing the lease or sale of the affected lands. New landowners or renters that return the land to production must use sustainable grazing or farming methods.

For more information, contact your County USDA Service Center or visit fsa.usda.gov.
