USDA Assists Farmers, Ranchers, and Communities Affected by Recent Tornadoes

The U.S. Department of Agriculture (USDA) announced that assistance is available for communities and agricultural producers affected by the tornadoes that tore through Kentucky and five other states over the weekend.

“The devastation these tornadoes brought to our heartland, the lives they took, and the communities and livelihoods impacted are hard to measure,” said Agriculture Secretary Tom Vilsack. “As recovery efforts continue, I want everyone affected to know that USDA is there to help, and we will deploy all resources at our disposal to help families, communities and agricultural producers rebuild their operations – for as long as it takes.”

See full announcement here.

Western Kentucky Agriculture Disaster Relief

The Kentucky Department of Agriculture (KDA) has created a resource page on its website for those affected by this weekend’s disastrous weather events. The resource page, at kyagr.com/tornado, profiles a list of ways ag producers can find the help they need during this difficult time.
The page features:

- Disaster Assistance Programs from the U.S. Department of Agriculture’s Farm Service Agency (see Kentucky Agricultural Disaster Federal Resource Guide)
- An overview of federal assistance programs
- A tip sheet for ag producers for assessing damage
- Information from the Kentucky State Veterinarian’s office on livestock disposal
- Mental health resources

As more information is available and more resources are announced, the KDA will continually update the page to help ag producers find the help they need.

**The Kentucky Agriculture Relief Fund**

The Kentucky Agriculture Relief Fund is a cash donation portal managed by the Kentucky Farm Bureau Education Foundation. Funds collected will be administered through a grant process. The donations will be used to support farmers and agribusinesses in the affected areas.

Donations can be made to the Kentucky Agriculture Relief Fund at gofundme.com/KyAgReliefFund.

**Kentucky Ag Disaster Donations**

The Kentucky Department of Agriculture and the University of Kentucky College of Agriculture, Food and Environment’s Cooperative Extension Service are teaming up to coordinate an operation to identify the needs and supplies for individual farming operations in the impacted area.

Individuals in impacted areas should contact their county extension office, which will collect a list of needs from producers for their operation and provide that information to the KDA. The Department will then coordinate with farm organizations in the commonwealth and work to match the requested need with the donor of the item. This can include immediate needs such as hay or feed to longer-term items such as fencing material.

---

**USDA Offers Disaster Assistance for Producers Facing Inclement Weather**

Severe weather events create significant challenges and often result in catastrophic loss for agricultural producers. Despite every attempt to mitigate risk, your operation may suffer losses. USDA offers several programs to help with recovery.

**Risk Management**
For producers who have risk protection through Federal Crop Insurance or the Noninsured Crop Disaster Assistance Program (NAP), we want to remind you to report crop damage to your crop insurance agent or the local Farm Service Agency (FSA) office.

If you have crop insurance, contact your agency within 72 hours of discovering damage and be sure to follow up in writing within 15 days. If you have NAP coverage, file a Notice of Loss (also called Form CCC-576) within 15 days of loss becoming apparent, except for hand-harvested crops, which should be reported within 72 hours.

Disaster Assistance

USDA also offers disaster assistance programs, which is especially important to livestock, fruit and vegetable, specialty and perennial crop producers who have fewer risk management options.

First, the Livestock Indemnity Program (LIP) and Emergency Assistance for Livestock, Honeybee and Farm-raised Fish Program (ELAP) reimburses producers for a portion of the value of livestock, poultry and other animals that died as a result of a qualifying natural disaster event or for loss of grazing acres, feed and forage. And, the Livestock Forage Disaster Program (LFP) provides assistance to producers of grazed forage crop acres that have suffered crop loss due to a qualifying drought. Livestock producers suffering the impacts of drought can also request Emergency Haying and Grazing on Conservation Reserve Program (CRP) acres.

Next, the Tree Assistance Program (TAP) provides cost share assistance to rehabilitate and replant tree, vines or shrubs loss experienced by orchards and nurseries. This complements NAP or crop insurance coverage, which cover the crop but not the plants or trees in all cases.

For LIP and ELAP, you will need to file a Notice of Loss for livestock and grazing or feed losses within 30 days and honeybee losses within 15 days. For TAP, you will need to file a program application within 90 days.

Documentation

It’s critical to keep accurate records to document all losses following this devastating cold weather event. Livestock producers are advised to document beginning livestock numbers by taking time and date-stamped video or pictures prior to after the loss.

Other common documentation options include:

- Purchase records
- Production records
- Vaccination records
- Bank or other loan documents
- Third-party certification

Other Programs
The Emergency Conservation Program and Emergency Forest Restoration Program can assist landowners and forest stewards with financial and technical assistance to restore damaged farmland or forests.

Additionally, FSA offers a variety of loans available including emergency loans that are triggered by disaster declarations and operating loans that can assist producers with credit needs. You can use these loans to replace essential property, purchase inputs like livestock, equipment, feed and seed, or refinance farm-related debts, and other needs.

Meanwhile, USDA’s Natural Resources Conservation Service (NRCS) provides financial resources through its Environmental Quality Incentives Program to help with immediate needs and long-term support to help recover from natural disasters and conserve water resources. Assistance may also be available for emergency animal mortality disposal from natural disasters and other causes.

Additional Resources

Additional details – including payment calculations – can be found on our NAP, ELAP, LIP, and TAP fact sheets. On farmers.gov, the Disaster Assistance Discovery Tool, Disaster-at-a-Glance fact sheet, and Farm Loan Discovery Tool can help you determine program or loan options.

While we never want to have to implement disaster programs, we are here to help. To file a Notice of Loss or to ask questions about available programs, contact your local USDA Service Center. All USDA Service Centers are open for business, including those that restrict in-person visits or require appointments because of the pandemic.

**FSA Offers Safety Net Programs for Honeybee Producers**

The Farm Service Agency (FSA) administers two programs that have specific safety net benefits for producers of honeybees and honey. The Noninsured Crop Disaster Assistance Program (NAP) and the Emergency Assistance for Livestock, Honeybees and Farm-Raised Fish Program (ELAP) assist producers when disasters impact honey production or damage or destroy colonies, hives or honeybee feed.

NAP is designed to reduce financial losses when natural disasters result in lower yields or crop losses, including honey. NAP coverage is equivalent to catastrophic insurance, meaning it covers up to 50 percent of a producer’s normal yield (must have at least a 50 percent loss) at 55 percent of the average market price. The 2018 Farm Bill reinstates higher levels of coverage, from 50 to 65 percent of expected production in 5 percent increments, at 100 percent of the average market price. Producers of organics and crops marketed directly to consumers also may exercise the “buy-up” option to obtain NAP
coverage of 100 percent of the average market price at the coverage levels of between 50 and 65 percent of expected production.

The NAP service fee is the lesser of $325 per crop or $825 per producer per administrative county, not to exceed a total of $1,950 for a producer with farming interests in multiple counties.

You must apply for NAP coverage by Dec. 31 prior to the year for which you're seeking coverage.

ELAP covers colony losses, honeybee hive losses (the physical structure) and honeybee feed losses in instances where the colony, hive or feed has been destroyed by a natural disaster or, in the case of colony losses, because of Colony Collapse Disorder. Colony losses must be in excess of normal mortality.

Both the NAP and ELAP programs require you to report the number of colonies you have in production to FSA by Jan. 2, 2022. You must notify FSA within 30 calendar days of changes in the total number of colonies or when honeybees are moved to another county.

For both programs, you must notify FSA within 15 calendar days of when a loss occurs or from when the loss is apparent.

To learn more about programs for honey and honeybee producers, please contact your local FSA office. To locate your local FSA office visit farmers.gov/service-center-locator.

## USDA Packages Disaster Protection with Loans to Benefit Specialty Crop and Diversified Producers

*Free basic coverage available for new and underserved loan applicants*

Producers who apply for Farm Service Agency (FSA) farm loans will be offered the opportunity to enroll in the Noninsured Crop Disaster Assistance Program (NAP). NAP is available to producers who grow noninsurable crops and is especially important to fruit, vegetable, and other specialty crop growers.

New, underserved and limited income specialty growers who apply for farm loans could qualify for basic loss coverage at no cost.

The basic disaster coverage protects at 55 percent of the market price for crop losses that exceed 50 percent of production. Covered “specialty” crops include vegetables, fruits, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, hay, forage, grazing and energy crops. FSA allows beginning, underserved or limited income producers to obtain NAP coverage up to 90 days after the normal application closing date when they also apply for FSA credit.

Producers can also protect value-added production, such as organic or direct market crops, at their fair market value in those markets. Targeted underserved groups eligible for free or discounted coverage include American Indians or Alaskan Natives, Asians,
Blacks or African Americans, Native Hawaiians or other Pacific Islanders, Hispanics, and women.

FSA offers a variety of loan products, including farm ownership loans, operating loans and microloans that have a streamlined application process.

NAP coverage is not limited to FSA borrowers, beginning, limited resource, or underserved farmers. Any producer who grows eligible NAP crops can purchase coverage. To learn more,

**Communication is Key in Lending**

Farm Service Agency (FSA) is committed to providing our farm loan borrowers the tools necessary to be successful. FSA staff will provide guidance and counsel from the loan application process through the borrower’s graduation to commercial credit. While it is FSA’s commitment to advise borrowers as they identify goals and evaluate progress, it is crucial for borrowers to communicate with their farm loan staff when changes occur. It is the borrower’s responsibility to alert FSA to any of the following:

- Any proposed or significant changes in the farming operation
- Any significant changes to family income or expenses
• The development of problem situations
• Any losses or proposed significant changes in security

If a farm loan borrower can’t make payments to suppliers, other creditors, or FSA on time, contact your farm loan staff immediately to discuss loan servicing options.

For more information on FSA farm loan programs, contact your local FSA office. To locate your local FSA office visit farmers.gov/service-center-locator or visit fsa.usda.gov.

---

**Applying for NAP Payments**

The Noninsured Crop Disaster Assistance Program (NAP) provides financial assistance to you for crops that aren’t eligible for crop insurance to protect against lower yields or crops unable to be planted due to natural disasters including freeze, hail, excessive moisture, excessive wind or hurricanes, flood, excessive heat and qualifying drought (includes native grass for grazing), among others.

In order to participate, you must obtain NAP coverage for the crop year by the applicable deadline using form CCC-471 “Application for Coverage” and pay the service fee. Application closing dates vary by crop. Producers are also required to submit an acceptable crop acreage report. Additionally, NAP participants must provide:

• The quantity of all harvested production of the crop in which the producer held an interest during the crop year
• The disposition of the harvested crop, such as whether it is marketable, unmarketable, salvaged or used differently than intended
• Acceptable crop production records (when requested by FSA)

Producers who fail to report acreage and production information for NAP-covered crops could see reduced or zero NAP assistance. These reports are used to calculate the approved yield.

If your NAP-covered crops are affected by a natural disaster, notify your FSA office by completing Part B of form CCC-576 “Notice of Loss and Application for Payment.” This must be completed within 15 calendar days of the occurrence of the disaster or when losses become apparent or 15 days of the final harvest date. For hand-harvested crops and certain perishable crops, you must notify FSA within 72 hours of when a loss becomes apparent.

To receive benefits, you must also complete Parts D, E, F and G of the CCC-576 “Notice of Loss and Application for Payment” within 60 days of the last day of coverage for the crop year for any NAP covered crops. The CCC-576 requires acceptable appraisal information. Producers must provide evidence of production and note whether the crop was marketable, unmarketable, salvaged or used differently than intended.

Eligible crops must be commercially produced agricultural commodities for which crop insurance is not available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.
For more information on NAP, contact your local FSA office. To locate your local FSA office visit farmers.gov/service-center-locator or visit fsa.usda.gov/nap.
