USDA Now Making Payments for New Dairy Margin Coverage Program

Income-over-feed margin for May triggers fifth payment for 2019

The U.S. Department of Agriculture's Farm Service Agency (FSA) opened enrollment for the [Dairy Margin Coverage](#) (DMC) program on June 17 and has started issuing payments to producers who purchased coverage. Producers can enroll through Sept. 20, 2019.

Authorized by the 2018 Farm Bill, DMC replaces the Margin Protection Program for Dairy (MPP-Dairy). The program offers protection to dairy producers when the difference between the all-milk price and the average feed cost (the margin) falls below a certain dollar amount selected by the producer. To date, nearly 10,000 operations have signed up for the new program, and FSA has begun paying approximately \$100 million to producers for January through May.

May Margin Payment

DMC provides coverage retroactive to January 1, 2019, with applicable payments following soon after enrollment.

The May 2019 income over feed cost margin was \$9.00 per hundredweight (cwt.), triggering the fifth payment for eligible dairy producers who purchase the \$9.50 level of coverage under DMC. Payments for January, February, March and April also were triggered.

With the 50 percent hay blend, FSA's revised April 2019 income over feed cost margin is \$8.82 per cwt. The revised margins for January, February and March are, respectively, \$7.71, \$7.91 and \$8.66.

Coverage Levels and MPP Reimbursements

Dairy producers can choose coverage levels from \$4 up to \$9.50 at the time of signup. More than 98 percent of the producers currently enrolled have elected \$9.50 coverage on up to 95 percent of their production history.

More Information

On December 20, 2018, President Trump signed into law the 2018 Farm Bill, which provides support, certainty and stability to our nation's farmers, ranchers and land stewards by enhancing farm support programs, improving crop insurance, maintaining disaster programs and promoting and supporting voluntary conservation. FSA is committed to implementing these changes as quickly and effectively as possible, and today's updates are part of meeting that goal.

For more information, visit farmers.gov [DMC webpage](#) or contact your local USDA service center. To locate your local FSA office, visit farmers.gov/service-locator.

USDA Opens Signup for Market Facilitation Program

Enrollment Now Open through Dec. 6

Signup opens today for the Market Facilitation Program (MFP), a U.S. Department of Agriculture (USDA) program to assist farmers who continue to suffer from damages because of unjustified trade retaliation from foreign nations. Through MFP, USDA will provide up to \$14.5 billion in direct payments to impacted producers, part of a broader trade relief package announced in late July. The sign-up period runs through Dec. 6.

MFP payments will be made to producers of certain non-specialty and specialty crops as well as dairy and hog producers.

Non-Specialty Crops

MFP payments will be made to producers of alfalfa hay, barley, canola, corn, crambe, dried beans, dry peas, extra-long staple cotton, flaxseed, lentils, long grain and medium grain rice, millet, mustard seed, oats, peanuts, rapeseed, rye, safflower, sesame seed, small and large chickpeas, sorghum, soybeans, sunflower seed, temperate japonica rice, triticale, upland cotton, and wheat.

MFP assistance for 2019 crops is based on a single county payment rate multiplied by a farm's total plantings to the MFP-eligible crops in aggregate in 2019. Those per acre payments are not dependent on which of those crops are planted in 2019. A producer's total payment-eligible plantings cannot exceed total 2018 plantings. [View payment rates by county.](#)

Dairy and Hogs

Dairy producers who were in business as of June 1, 2019, will receive a per hundredweight payment on production history, and hog producers will receive a payment based on the number of live hogs owned on a day selected by the producer between April 1 and May 15, 2019.

Specialty Crops

MFP payments will also be made to producers of almonds, cranberries, cultivated ginseng, fresh grapes, fresh sweet cherries, hazelnuts, macadamia nuts, pecans, pistachios, and walnuts. Each specialty crop will receive a payment based on 2019 acres of fruit or nut bearing plants, or in the case of ginseng, based on harvested acres in 2019.

More Information

Payments will be made in up to three tranches, with the second and third tranches evaluated as market conditions and trade opportunities dictate. If conditions warrant, the second and third tranches will be made in November and early January.

MFP payments are limited to a combined \$250,000 for non-specialty crops per person or legal entity. MFP payments are also limited to a combined \$250,000 for dairy and hog producers and a combined \$250,000 for specialty crop producers. However, no applicant can receive more than \$500,000. Eligible applicants must also have an average adjusted gross income (AGI) for tax years 2015, 2016, and 2017 of less than \$900,000, or 75 percent of the person's or legal entity's average AGI for those tax years must have been derived from farming and ranching. Applicants must also

comply with the provisions of the Highly Erodible Land and Wetland Conservation regulations.

More information can be found on farmers.gov/mfp, including payment information and a program application.

Storage and Handling Trucks Eligible for Farm Storage Facility Loans

Farm Storage Facility Loans (FSFL) provide low-interest financing so producers can build or upgrade facilities to store commodities. Some storage and handling trucks are eligible for the FSFL. These include:

- **Cold Storage Trucks**-A van or truck designed to carry perishable freight at specific temperatures. Cold storage trucks can be ice-cooled or equipped with any variety of mechanical refrigeration systems.
- **Flatbed Trucks**-Truck with an open body in the form of a platform with no side walls for easy loading and unloading. These trucks can be categorized into different sizes which range from light, medium, or heavy duty, compact or full-size, or short and expandable beds.
- **Grain Trucks**-A piece of farm equipment specially made to accommodate grain products and are traditionally truck chassis units with a mounted grain “dump” body where grain commodities are transported from a field to either a grain elevator or a storage bin.
- **Storage Trucks with a Chassis Unit**-Commonly referred to as a box truck, box van or straight truck, is a truck with a cargo body mounted on the same chassis with the engine and cab.

To be eligible for FSFL, the storage and handling truck must be less than 15 years old and have a maximum of four axles with a gross weight rating of 60,000 pounds or less. Pick-up trucks, semi-trucks, dump trucks, and simple insulated and ventilated vans are ineligible for FSFL.

FSFL for storage and handling trucks must be \$100,000 or less. FSFL-financed storage and handling trucks must be used for the purpose for which they were acquired for the entire FSFL term.

Eligible commodities include grains, oilseeds, pulse crops, hay, honey, renewable biomass commodities, fruits and vegetables, floriculture, hops, maple sap, milk, cheese, yogurt, butter, eggs, meat/poultry (unprocessed), rye and aquaculture.

For more information or to apply for a FSFL, contact your local [FSA Service Center](#).

Livestock Inventory Records

Producers are reminded to keep updated livestock inventory records. These records are necessary in the event of a natural disaster.

When disasters strike, the USDA Farm Service Agency (FSA) can assist producers who suffered excessive livestock death losses and grazing or feed losses due to eligible natural disasters.

To participate in livestock disaster assistance programs, producers will be required to provide verifiable documentation of death losses resulting from an eligible adverse weather event and must submit a notice of loss to their local FSA office within 30 calendar days of when the loss of livestock is apparent. For grazing or feed losses, producers must submit a notice of loss to their local FSA office within 30 calendar days of when the loss is apparent and should maintain documentation and receipts.

Producers should record all pertinent information regarding livestock inventory records including:

- Documentation of the number, kind, type, and weight range of livestock
- Beginning inventory supported by birth recordings or purchase receipts;

For more information on documentation requirements, contact your local FSA office.

Livestock Losses

The Livestock Indemnity Program (LIP) provides assistance to eligible producers for livestock deaths in excess of normal mortality caused by adverse weather, disease and attacks by animals reintroduced into the wild by the federal government or protected by federal law.

LIP compensates livestock owners and contract growers for livestock death losses in excess of normal mortality due to adverse weather, including losses due to hurricanes, floods, blizzards, wildfires, extreme heat or extreme cold.

For disease losses, FSA county committees can accept veterinarian certifications that livestock deaths were directly related to adverse weather and unpreventable through good animal husbandry and management.

For 2019 livestock losses, eligible livestock owners must file a notice within 30 calendar days of when the loss is first apparent.

Participants must provide the following supporting documentation to their local FSA office no later than 60 calendar days after the end of the calendar year in which the eligible loss condition occurred.

- Proof of death documentation
- Copy of growers contracts
- Proof of normal mortality documentation

USDA has established normal mortality rates for each type and weight range of eligible livestock, i.e. Adult Beef Cow = 1.5% and Non-Adult Beef Cattle (less than 400 pounds) = 4.5%. These established percentages reflect losses that are considered expected or typical under "normal" conditions.

In addition to filing a notice of loss, producers must also submit an application for payment by March 1, 2020.

Additional Information about LIP is available at your local FSA office or online at: www.fsa.usda.gov.

Reminder to FSA Direct and Guaranteed Borrowers with Real Estate Security

Farm Service Agency would like to remind farm loan borrowers who have pledged real estate as security for their loans, of key items for maintaining loan collateral. It is required that borrowers must obtain prior consent, or approval, by either FSA, for direct loans, or by a guaranteed lender, for any transaction affecting real estate security. Examples of these transactions include, but are not limited to:

- Leases of any kind;
- Easements of any kind;
- Subordinations;
- Partial releases, and
- Sales

Failure to meet or follow the requirements set forth in the loan agreement, promissory note, and other security instruments could lead to nonmonetary default which could jeopardize your current and future loans.

It is critical that borrowers keep an open line of communication with their FSA loan staff or guaranteed lender when it comes to changes in their operation. For more information on borrower responsibilities, read [Your FSA Farm Loan Compass](#).

Using FSA Direct Farm Ownership Loans for Construction

The USDA Farm Service Agency's (FSA) [Direct Farm Ownership loans](#) are a resource to help farmers and ranchers become owner-operators of family farms, improve and expand current operations, increase agricultural productivity, and assist with land tenure to save farmland for future generations.

Depending on the applicant's needs, there are three types of Direct Farm Ownership Loans: regular, down payment and joint financing. FSA also offers a [Direct Farm Ownership Microloan](#) option for smaller financial needs up to \$50,000.

Amongst other purposes, Direct Farm Ownership Loans can be used to construct, purchase or improve farm dwellings, service buildings or other facilities and improvements essential to an operation.

To do this, applicants must provide FSA with an estimate of the total cost of all planned development that completely describe the work, prior to loan approval and must show proof of sufficient funds to pay for the total cost of all planned development at or before loan closing. In some instances, applicants may be asked to provide certified plans, specifications or contract documents. The applicant cannot incur any debts for materials or labor or make any expenditures for development purposes prior to loan closing with the expectation of being reimbursed from FSA funds.

Construction and development work may be performed either by the contract method or the borrower method. Under the contract method, construction and development contractors perform work according to a written contract with the applicant or borrower. An applicant for a direct loan to

finance a construction project must obtain a surety bond that guarantees both payment and performance in the amount of the construction contract from a construction contractor.

A surety bond is required when a contract exceeds \$100,000, an authorized agency official determines that a surety bond appears advisable to protect the borrower against default of the contractor or a contract provides for partial payments in excess of the amount of 60 percent of the value of the work in place.

Under the borrower method, the applicant or borrower will perform the construction and development work. The borrower method may only be used when the authorized agency official determines, based on information from the applicant, that the applicant possesses or arranges to obtain the necessary skill and managerial ability to complete the work satisfactorily and that such work will not interfere with the applicant's farming operation or work schedule.

Potential applicants should visit with FSA early in the initial project planning process to ensure environmental compliance.

For more eligibility requirements and information about FSA Loan programs, contact your local FSA office or visit www.fsa.usda.gov. To find your local FSA office, visit <http://offices.usda.gov>.
