Farm Loan Chief:

Census of Agriculture Countdown Begins for America's Farmers and Ranchers

America's farmers and ranchers will soon have the opportunity to strongly represent agriculture in their communities and industry by taking part in the 2017 Census of Agriculture. Conducted every five years by the U.S. Department of Agriculture's (USDA) National Agricultural Statistics Service (NASS), the census, to be mailed at the end of this year, is a complete count of all U.S. farms, ranches, and those who operate them.

The Census of Agriculture highlights land use and ownership, operator characteristics, production practices, income and expenditures, and other topics. The 2012 Census of Agriculture revealed that over three million farmers operated more than two million farms, spanning over 914 million acres. This was a four percent decrease in the number of U.S. farms from the previous census in 2007. However, agriculture sales, income, and expenses increased between 2007 and 2012. This telling information and thousands of other agriculture statistics are a direct result of responses to the Census of Agriculture.

Producers who are new to farming or did not receive a Census of Agriculture in 2012 still have time to sign up to receive the 2017 Census of Agriculture report form by visiting www.agcensus.usda.gov and clicking on the 'Make Sure You Are

Counted' button through June. NASS defines a farm as any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year (2017).

CRP Participants Must Maintain Approved Cover on Acreages Enrolled in CRP and the Farm Programs

Conservation Reserve Program (CRP) participants are responsible for ensuring adequate, approved vegetative and practice cover is maintained to control erosion throughout the life of the contract after the practice has been established. Participants must also control undesirable vegetation, weeds (including noxious weeds), insects and rodents that may pose a threat to existing cover or adversely impact other landowners in the area.

All CRP maintenance activities, such as mowing, burning, disking and spraying, must be conducted outside the primary nesting or brood rearing season for wildlife, which for Kentucky is May 15 through August 1. However, spot treatment of the acreage may be allowed during the primary nesting or brood rearing season if, left untreated, the weeds, insects or undesirable species would adversely impact the approved cover. In this instance, spot treatment is limited to the affected areas in the field and requires County Committee approval prior to beginning the spot treatment. The County Committee will consult with NRCS to determine if such activities are needed to maintain the approved cover.

Annual mowing of CRP for generic weed control, or for cosmetic purposes, is prohibited at all times.

Authorization Required for Incidental Grazing of CRP Acres

In certain situations, landowners and operators may need to graze a field containing Conservation Reserve Program (CRP) continuous practices such as grass waterways (CP8A), contour grass strips (CP15A); filter strips (CP21); quail and upland bird habitat buffers (CP33), denitrifying bioreactor on filter strips (CP21B), or saturated filter strips (CP21S). FSA must first authorize the incidental grazing on CRP in a field intended to be gleaned.

Grazing is incidental to the gleaning of the crop residue in a field, or before the harvest of a small grain and occurs after the harvest of crops from within the surrounding field, or during the dormant period of a small grain intended for harvest. The grazing cannot occur during the primary nesting season, which for Kentucky is May 15 through August 1. In addition, grazing can only occur if the approved cover for that practice has been established and the grazing will not adversely impact the purpose or performance of the practice.

All livestock shall be removed from CRP acreage **no later than two months** after incidental grazing begins. CRP participants utilizing incidental grazing will have a payment reduction for the acreage being grazed. Participants are also responsible, at their own expense, to reestablish a cover destroyed or damaged as a result of the incidental grazing.

If the acreage to be grazed is separated from the surrounding cropland by a fence, the CRP acreage shall not be grazed.

CRP Payment Limitation

Payments and benefits received under the Conservation Reserve Program (CRP) are subject to the following:

- payment limitation by direct attribution
- foreign person rule
- average adjusted gross income (AGI) limitation

The 2014 Farm Bill continued the \$50,000 maximum CRP payment amount that can be received annually, directly or indirectly, by each person or legal entity. This payment limitation includes all annual rental payments and incentive payments (Sign-up Incentive Payments and Practice Incentive Payments). Annual rental payments are attributed (earned) in the fiscal year in which program performance occurs. Sign-up Incentive Payments (SIP) are attributed (earned) based on the fiscal year in which the contract is approved, not the fiscal year the contract is effective. Practice Incentive Payments (PIP) are attributed (earned) based on the fiscal year in which the cost-share documentation is completed and the producer or technical service provider certifies performance of practice completion to the county office.

Such limitation on payments is controlled by direct attribution.

- Program payments made directly or indirectly to a person are combined with the pro rata interest held in any legal entity that received payment, unless the payments to the legal entity have been reduced by the pro rata share of the person.
- Program payments made directly to a legal entity are attributed to those persons that have a direct and indirect interest in the legal entity, unless the payments to the legal entity have been reduced by the pro rata share of the person.
- Payment attribution to a legal entity is tracked through four levels of ownership. If any part of the ownership interest at the fourth level is owned by another legal entity, a reduction in payment will be applied to the payment entity in the amount that represents the indirect interest of the fourth level entity in the payment entity.

Essentially, all payments will be “attributed” to a person’s Social Security Number. Given the current CRP annual rental rates in many areas, it is important producers are aware of how CRP offered acreages impact their \$50,000 annual payment limitation. Producers should contact their local FSA office for additional information.

NOTE: The information in the above article only applies to contracts subject to 4-PL and 5-PL regulations. It does not apply to contacts subject to 1-PL regulations.

Filing CCC-941 Adjusted Gross Income (AGI) Certifications

Many producers have experienced delays in receiving Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) payments, Loan Deficiency Payments (LDPs) and Market Gains on Marketing Assistance Loans (MALs) because they have not filed form CCC-941, Adjusted Gross Income Certification. LDPs will not be paid until all eligible producers, including landowners who share in the crop, have filed a valid CCC-941.

Producers without a valid CCC-941 certifying their compliance with the average adjusted gross income provisions will not receive payments that have been processed. All farm operator/tenants/owners who have not filed a CCC-941 and have pending payments should IMMEDIATELY file the form with their recording county FSA office. Farm operators and tenants are encouraged to ensure that their landowners have filed the form. FSA has been issuing 2016 LDPs and Market Gains.

FSA can accept the CCC-941 for 2015, 2016 and 2017. Unlike the past, producers must have the CCC-941 certifying their AGI compliance before any payments can be issued.

MAL and LDP Policy

The Agricultural Act of 2014 authorized 2014-2018 crop year Marketing Assistance Loans (MALs) and Loan Deficiency Payments (LDPs), with a few minor policy changes.

Among the changes, farm-stored MAL collateral transferred to warehouse storage will retain the original loan rate, be allowed to transfer only the outstanding farm-stored quantity with no additional quantity allowed and will no longer require producers to have a paid for measurement service when moving or commingling loan collateral.

MALs and LDPs provide financing and marketing assistance for wheat, feed grains, soybeans, and other oilseeds, pulse crops, rice, peanuts, cotton, wool and honey. MALs provide producers interim financing after harvest to help them meet cash flow needs without having to sell their commodities when market prices are typically at harvest-time lows. A producer who is eligible to obtain a loan, but agrees to forgo the loan, may obtain an LDP if such a payment is available. Marketing loan provisions and LDPs are not available for sugar and extra-long staple cotton.

FSA is now accepting requests for 2016 MALs and LDPs for all eligible commodities after harvest. Requests for loans and LDPs shall be made on or before the final availability date for the respective commodities. May 31 is the final loan availability date for Corn, Dry Peas, Grain Sorghum, Lentils, Mustard Seed, Rice, Safflower Seed, Chickpeas, Soybeans, Sunflower Seed, and Cotton.

To be considered eligible for an LDP, producers must have form [CCC-633EZ](#), Page 1 on file at their local FSA Office before losing beneficial interest in the crop. Pages 2, 3 or 4 of the form must be submitted when payment is requested.

Before MAL repayments with a market loan gain or LDP disbursements can be made, producers must meet the requirements of actively engaged in farming, cash rent tenant and member contribution.

Update Your Records

FSA is cleaning up our producer record database. If you have any unreported changes of address or zip code or an incorrect name or business name on file they need to be reported to our office. Changes in your farm operation, like the addition of a farm by lease or purchase, need to be reported to our office as well. Producers participating in FSA and NRCS programs are required to timely report changes in their farming operation to the County Committee in writing and update their CCC-902 Farm Operating Plan.

If you have any updates or corrections, please call your local FSA office to update your records.

USDA Announces Streamlined Guaranteed Loans and Additional Lender Category for Small-Scale Operators

Options Help More Beginning, Small and Urban Producers Gain Access to Credit

The U.S. Department of Agriculture (USDA) announced the availability of a streamlined version of USDA guaranteed loans, which are tailored for smaller scale farms and urban producers. The program, called EZ Guarantee Loans, uses a simplified application process to help beginning, small, underserved and family farmers and ranchers apply for loans of up to \$100,000 from USDA-approved lenders to purchase farmland or finance agricultural operations.

A new category of lenders will join traditional lenders, such as banks and credit unions, in offering USDA EZ Guarantee Loans. Microlenders, which include Community Development Financial Institutions and Rural Rehabilitation Corporations, will be able to offer their customers up to \$50,000

of EZ Guaranteed Loans, helping to reach urban areas and underserved producers. Banks, credit unions and other traditional USDA-approved lenders, can offer customers up to \$100,000 to help with agricultural operation costs.

EZ Guarantee Loans offer low interest rates and terms up to seven years for financing operating expenses and 40 years for financing the purchase of farm real estate. USDA-approved lenders can issue these loans with the Farm Service Agency (FSA) guaranteeing the loan up to 95 percent.

More information about the available types of FSA farm loans can be found at www.fsa.usda.gov/farmloans or by contacting your local FSA office.

Borrower Training

Borrower training is available for all Farm Service Agency customers. This training is required for all direct loan applicants, unless the applicant has a waiver issued by the agency.

Borrower training includes instruction in production and financial management. The purpose is to help the applicant develop and improve skills that are necessary to successfully operate a farm and build equity in the operation. It aims to help the producer become financially successful. Borrower training is provided, for a fee, by agency approved vendors. Contact your local FSA Farm Loan Manager for a list of approved vendors.

Loan Servicing

There are options for Farm Service Agency loan customers during financial stress. If you are a borrower who is unable to make payments on a loan, contact your local FSA Farm Loan Manager to learn about the options available to you.
