Upcoming Important Dates

- Feb. 28 NAP signup deadline for spring seeded crops
- March 5 QLA signup deadline
- March 15 CRP Grasslands signup deadline
- March 15 election and enrollment for ARC/PLC for 2021 deadline
- March 15 deadline to purchase NAP for Hemp
- April 8 ECP and EFRP signup deadline
- CRP General signup has been extended with no deadline date at this time

Louisiana FSA now offers SMS texting; receive text message alerts on your cell phone regarding important deadlines, reporting
Emergency Conservation Program (ECP) Deadline Extended to April 8

FSA is accepting ECP applications in Allen, Beauregard, Calcasieu, Cameron and Vernon parishes. If you've suffered a loss from a natural disaster you may contact your local FSA County Office and request assistance until April 8, 2021.

ECP helps you with the cost to restore damaged farmland to pre-disaster conditions. You may receive up to 75 percent of the cost of approved restoration activity. Limited resource, socially disadvantaged and beginning farmers and ranchers may receive up to 90 percent cost-share.

In most cases, you must apply for assistance prior to beginning reconstructive work. FSA’s National Environmental Policy Act (NEPA) and environmental compliance review process is required to be completed before any actions are taken. Submitting an application after reconstructive work has been completed may not qualify for ECP. Conservation concerns that were present on the land prior to the disaster are not eligible for ECP assistance.

FSA County Committees will evaluate applications based on information provided and if applicable, an on-site inspection of the damaged land, taking into consideration the type and extent of the damage. Submission of an application does not guarantee that cost-share funding will be provided.

Contact your local FSA office for approved ECP practices

Emergency Forest Restoration Program (EFRP) Deadline Extended to April 8

FSA is accepting EFRP applications in Allen, Beauregard, Calcasieu and Vernon parishes. If you’ve suffered a loss from a natural disaster you may contact your local FSA County Office and request assistance until April 8, 2021.

EFRP provides payments to eligible owners of nonindustrial private forest (NIPF) land to enable them to carry out emergency measures to restore land damaged by a natural disaster. After applications are received, local FSA County Committees determine land eligibility using information provided and if applicable, an on-site damage inspection to assess the type and extent of damage.
Eligible forest restoration practices include debris removal, such as down or damaged trees, in order to establish a new stand or provide natural regeneration; site preparation, planting materials and labor to replant forest land; restoration of forestland roads, fire lanes, fuel breaks or erosion control structures; fencing, tree shelters and tree tubes to protect trees from wildlife damage; and wildlife enhancement to provide cover openings and wildlife habitat.

In order to meet eligibility requirements, NIPF land must have existing tree cover or had tree cover immediately before the natural disaster occurred and be sustainable for growing trees. The land must also be owned by any nonindustrial private individual, group, association, corporation or other private legal entity that has definitive decision-making authority over the land. The natural disaster must have resulted in damage that if untreated would impair or endanger the natural resources on the land and/or materially affect future use of the land.

**March 15 Last Day to Complete Enrollment for 2021 Agriculture Risk Coverage, Price Loss Coverage Programs**

Agricultural producers who have not yet enrolled in the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs for 2021 must do so by March 15. Producers who have not yet signed a 2021 enrollment contract or who want to make an election change should contact their local USDA Farm Service Agency (FSA) office to make an appointment. Program enrollment for 2021 is required in order to participate in the programs, but elections for the 2021 crop year are optional and otherwise remain the same as elections made for 2020.

ARC and PLC provide income support to farmers from substantial drops in crop prices or revenues and are vital economic safety nets for most American farms.

Although 1,033,310 contracts have been completed to date, this represents less than 59% of the more than 1.7 million contracts anticipated by the Agency. By enrolling soon, producers can beat the rush as the deadline nears.

Producers who do not complete enrollment by close of business local time on Monday, March 15 will not be enrolled in ARC or PLC for the 2021 crop year and will be ineligible to receive a payment should one trigger for an eligible crop.

ARC and PLC contracts can be emailed, faxed or physically signed and mailed back to FSA. Producers with level 2 eauthentication access can electronically sign contracts. Service Center staff can also work with producers to sign and securely transmit contracts electronically through two commercially available tools: Box and OneSpan. You can learn more about these solutions at [farmers.gov/mydocs](http://farmers.gov/mydocs). Producers may also make arrangements to drop off signed contracts at the FSA county office. Please call ahead for local mailing or drop off information and options for submitting signed contracts electronically.

Producers are eligible to enroll on farms with base acres for the following commodities: barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium- and short-grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

**Yield Data and Web-Based Decision Tools Available**

FSA recently updated the annual and benchmark yields for ARC/PLC program years 2019, 2020 and 2021. This data is useful to producer in choosing to participate in either ARC or PLC.

For added assistance with ARC and PLC decisions, USDA partnered with the University of Illinois and Texas A&M University to offer web-based decision tools to assist producers in making
informed, educated decisions using crop data specific to their respective farming operations. Tools include:

- **Gardner-farmdoc Payment Calculator**, the University of Illinois tool that offers farmers the ability to run payment estimate modeling for their farms and counties for ARC-County and PLC.
- **ARC and PLC Decision Tool**, the Texas A&M tool that allow producers to analyze payment yield updates and expected payments for 2019 and 2020. Producers who have used the tool in the past should see their username and much of their farm data will already be available in the system.

**Crop Insurance Considerations**

Producers are reminded that enrolling in ARC or PLC programs can impact eligibility for some crop insurance products. Producers who elect and enroll in PLC also have the option of purchasing Supplemental Coverage Option (SCO) through their Approved Insurance Provider. Producers of covered commodities who elect ARC are ineligible for SCO on their planted acres.

Unlike SCO, RMA’s Enhanced Coverage Option (ECO) is unaffected by participating in ARC for the same crop, on the same acres. You may elect ECO regardless of your farm program election.

Upland cotton farmers who choose to enroll seed cotton base acres in ARC or PLC are ineligible for the stacked income protection plan (STAX) on their planted cotton acres.

**More Information**

For more information on ARC and PLC including web-based decision tools, visit [farmers.gov/arc-plc](http://farmers.gov/arc-plc).

Visit [farmers.gov/service-center-locator](http://farmers.gov/service-center-locator) to find location and contact information for the nearest FSA county office.

---

**Applying for Farm Storage Facility Loans**

The Farm Service Agency’s (FSA) Farm Storage Facility Loan (FSFL) program provides low-interest financing to help you build or upgrade storage facilities and to purchase portable (new or used) structures, equipment and storage and handling trucks.

Eligible commodities include corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley, minor oilseeds harvested as whole grain, pulse crops (lentils, chickpeas and dry peas), hay, honey, renewable biomass, fruits, nuts and vegetables for cold storage facilities, floriculture, hops, maple sap, rye, milk, cheese, butter, yogurt, meat and poultry (unprocessed), eggs, and aquaculture (excluding systems that maintain live animals through uptake and discharge of water). Qualified facilities include grain bins, hay barns and cold storage facilities for eligible commodities.

Loans up to $50,000 can be secured by a promissory note/security agreement, loans between $50,000 and $100,000 may require additional security, and loans exceeding $100,000 require additional security.

You do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.
New to Farming Because of the Pandemic? USDA Can Help

USDA Service Centers across the country, are hearing from people who are interested in more space and working the land and we want to let you know we can help. Are you new to farming because of the pandemic? USDA can help you get started in farming – on everything from helping you register your farm to getting financial assistance and advice.

Get Started with USDA

First, you want to make sure your farm is registered. If you purchased land, it might already be established with USDA’s Farm Service Agency (FSA) with a farm number on file. If not, FSA can help you register your farm.

To obtain a farm number, you’ll bring an official tax ID (Social Security number or an employer ID) and a property deed. If you do not own the land, bring a lease agreement to your FSA representative to show you have control of the property. If your operation is incorporated or an entity, you may also need to provide proof that you have signature authority and the legal ability to enter into contracts with USDA.

Access to Capital

USDA can provide access to capital through its farm loans, which is a great resource when producers aren’t able to get a loan from a traditional lender. Loans can help with purchasing land or equipment or with operating costs, and FSA even offers microloans, which are especially popular among producers with smaller farms. For more information, check out our Farm Loan Discovery Tool.

Conservation Practices

We can help you make conservation improvements to your farm, which are good for your bottom line and your operation. We’ll help you develop a conservation plan and apply for financial assistance that’ll cover the bulk of the costs for implementing. To learn more about some of the conservation practices that we help producers with, check out our Conservation at Work Video Series.

If you purchase land, and you don’t want to farm all of it, you can look at either a conservation easement or managing for native shrubs and grasses through either the Agricultural Conservation Easement Program (ACEP) or Conservation Reserve Program (CRP). Easements are long-term, while a CRP contract is 10-15 years. These are good options for land that is not optimal for production or sensitive lands like wetlands and grasslands.

Additional Resources

Depending on your farm, you may want to look at crop insurance. The USDA’s Risk Management Agency provides crop insurance to help you manage risks on your farm. There are many types of insurance products available for a wide variety of production practices, including organic and sustainable agriculture.

Your local communities also have great resources for farmers including conservation districts, Rural Development, cooperative extensions, and different farming groups. To get started with USDA, contact your local FSA county office.
Update Your Records

FSA is cleaning up our producer record database and needs your help. Please report any changes of address, zip code, phone number, email address or an incorrect name or business name on file to our office. You should also report changes in your farm operation, like the addition of a farm by lease or purchase. You should also report any changes to your operation in which you reorganize to form a Trust, LLC or other legal entity.

FSA and NRCS program participants are required to promptly report changes in their farming operation to the County Committee in writing and to update their Farm Operating Plan on form CCC-902.

To update your records, contact your local USDA Service Center.

Change to Policy on Filing a Notice of Loss for Grazed Forage Producers with NAP Coverage

For the 2021 and subsequent crop years, NAP forage producers with the intended use of grazing who elect to use independent assessments or other approved alternative loss percentage methods to establish their loss are no longer required to file a CCC-576 Notice of Loss with FSA. However, a CCC-576 Application for Payment form must be submitted to FSA no later than 60 calendar days after the coverage period ends.

Producers that elect to have the grazing loss determined using similar mechanically harvested units still must timely file a CCC-576 Notice of Loss within 15 days of the disaster event or damage to the crop first becomes apparent or within 15 days of harvest.

USDA Extends General Signup for Conservation Reserve Program

The USDA is extending the Conservation Reserve Program (CRP) General Signup period, which had previously been announced as ending on Feb. 12, 2021. USDA will continue to accept offers as it takes this opportunity for the incoming Administration to evaluate ways to increase enrollment. Under the previous Administration, incentives and rental payment rates were reduced resulting in an enrollment shortfall of over 4 million acres. The program, administered by USDA’s Farm Service Agency (FSA), provides annual rental payments for 10 to 15 years for land devoted to conservation purposes, as well as other types of payments. Before the General CRP Signup period ends, producers will have the opportunity to adjust or resubmit their offers to take advantage of planned improvements to the program.

This signup for CRP gives producers an opportunity to enroll land for the first time or re-enroll land under existing contracts that will be expiring Sept. 30, 2021. All interested producers, including those on Indian reservations and with trust lands, are encouraged to contact their local USDA Service Center for more information.
Know your Final Planting Dates

All producers are encouraged to contact their local FSA office for more information on the final planting date for specific crops. The final planting dates vary by crop, planting period and county so please contact your local FSA office for a list of county-specific planting deadlines. The timely planting of a crop, by the final planting date, may prevent loss of program benefits.

Keeping Livestock Inventory Records

Livestock inventory records are necessary in the event of a natural disaster, so remember to keep them updated.

When disasters strike, the USDA Farm Service Agency (FSA) can help you if you’ve suffered excessive livestock death losses and grazing or feed losses due to eligible natural disasters.

To participate in livestock disaster assistance programs, you’ll be required to provide verifiable documentation of death losses resulting from an eligible adverse weather event and must submit a notice of loss to your local FSA office within 30 calendar days of when the loss of livestock is apparent. For grazing or feed losses, you must submit a notice of loss to your local FSA office within 30 calendar days of when the loss is apparent and should maintain documentation and receipts.

You should record all pertinent information regarding livestock inventory records including:

- Documentation of the number, kind, type, and weight range of livestock
- Beginning inventory supported by birth recordings or purchase receipts;

For more information on documentation requirements, contact your local USDA Service Center at or visit fsa.usda.gov.

Reminders for FSA Direct and Guaranteed Borrowers with Real Estate Security

Farm loan borrowers who have pledged real estate as security for their Farm Service Agency (FSA) direct or guaranteed loans are responsible for maintaining loan collateral. Borrowers must obtain prior consent or approval from FSA or the guaranteed lender for any transaction that affects real estate security. These transactions include, but are not limited to:

- Leases of any kind
- Easements of any kind
- Subordinations
- Partial releases
- Sales

Failure to meet or follow the requirements in the loan agreement, promissory note, and other security instruments could lead to nonmonetary default which could jeopardize your current and future loans.

It is critical that borrowers keep an open line of communication with their FSA loan staff or guaranteed lender when it comes to changes in their operation. For more information on borrower responsibilities, read Your FSA Farm Loan Compass.
**USDA Microloans Help Farmers Purchase Farmland and Improve Property**

Farmers can use USDA farm ownership microloans to buy and improve property. These microloans are especially helpful to beginning or underserved farmers, U.S. veterans looking for a career in farming, and those who have small and mid-sized farming operations.

Microloans have helped farmers and ranchers with operating costs, such as feed, fertilizer, tools, fencing, equipment, and living expenses since 2013.

Microloans can also help with farmland and building purchases and soil and water conservation improvements. FSA designed the expanded program to simplify the application process, expand eligibility requirements and expedite smaller real estate loans to help farmers strengthen their operations. Microloans provide up to $50,000 to qualified producers and can be issued to the applicant directly from the USDA Farm Service Agency (FSA).

To learn more about the FSA microloan program, contact your local USDA Service Center or visit [fsa.usda.gov/microloans](http://fsa.usda.gov/microloans).

---

**USDA Offers Secure New Options for Signing and Sharing Documents Online**

Farmers and ranchers working with USDA’s Farm Service Agency or Natural Resources Conservation Service can now sign and share documents online in just a few clicks. By using Box or OneSpan, producers can digitally complete business transactions without leaving their homes or agricultural operations. Both services are free, secure, and available for multiple FSA and NRCS programs.

Box is a secure, cloud-based site where FSA or NRCS documents can be managed and shared. Producers who choose to use Box can create a username and password to access their secure Box account, where documents can be downloaded, printed, manually signed, scanned, uploaded, and shared digitally with Service Center staff. This service is available to any FSA or NRCS customer with access to a mobile device or computer with printer connectivity.

OneSpan is a secure eSignature solution for FSA and NRCS customers. Like Box, no software downloads or eAuthentication is required for OneSpan. Instead, producers interested in eSignature through OneSpan can confirm their identity through two-factor authentication using a verification code sent to their mobile device or a personalized question and answer. Once identity is confirmed, documents can be reviewed and e-signed through OneSpan via the producer’s personal email address. Signed documents immediately become available to the appropriate Service Center staff.

Box and OneSpan are both optional services for customers interested in improved efficiency in signing and sharing documents with USDA, and they do not replace existing systems using eAuthentication for digital signature. Instead, these tools provide additional digital options for producers to use when conducting business with FSA or NRCS.

USDA Service Center staff are available to help producers get started with Box and OneSpan through a few simple steps. Please visit [farmers.gov/service-locator](http://farmers.gov/service-locator) to find your local office and let Service Center staff know you’re interested in signing and sharing documents through these new features. In most cases, one quick phone call will be all that is needed to initiate the process.

Visit [farmers.gov/mydocs](http://farmers.gov/mydocs) to learn more about Box and OneSpan, steps for getting started, and additional resources for conducting business with USDA online.
To learn more about program flexibilities and Service Center status during the coronavirus pandemic, visit farmers.gov/coronavirus.
