Loans for Targeted Underserved Producers

The Farm Service Agency (FSA) has several loan programs to help you start or continue an agriculture production. Farm ownership and operating loans are available.

While all qualified producers are eligible to apply for these loan programs, FSA has provided priority funding for members of targeted underserved applicants.

A targeted underserved applicant is one of a group whose members have been subjected to racial, ethnic or gender prejudice because of his or her identity as members of the group without regard to his or her individual qualities.

For purposes of this program, targeted underserved groups are women, African Americans, American Indians, Alaskan Natives, Hispanics, Asian Americans and Pacific Islanders.

FSA loans are only available to applicants who meet all the eligibility requirements and are unable to obtain the needed credit elsewhere.

Applying for Youth Loans

The Farm Service Agency (FSA) makes loans to youth to establish and operate agricultural income-producing projects in connection with 4-H clubs, FFA and other agricultural groups. Projects must be planned and operated with the help of the organization advisor, produce sufficient income to repay the loan and provide the youth with practical business and educational experience. The maximum loan amount is $5,000.
Youth Loan Eligibility Requirements:

- Be a citizen of the United States (which includes Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands) or a legal resident alien
- Be 10 years to 20 years of age
- Comply with FSA’s general eligibility requirements
- Be unable to get a loan from other sources
- Conduct a modest income-producing project in a supervised program of work as outlined above
- Demonstrate capability of planning, managing and operating the project under guidance and assistance from a project advisor. The project supervisor must recommend the youth loan applicant, along with providing adequate supervision.

For help preparing the application forms, contact your local County USDA Service Center or visit fsa.usda.gov.

USDA Reminds Producers to File Crop Acreage Reports

Agricultural producers who have not yet completed their crop acreage reports after spring planting should make an appointment with the local County Farm Service Agency (FSA) office before the applicable deadline.

An acreage report documents a crop grown on a farm or ranch and its intended uses. Filing an accurate and timely acreage report for all crops and land uses, including failed acreage and prevented planted acreage, can prevent the loss of benefits.

How to File a Report

Service Center staff continue to work with agricultural producers via phone, email, and other digital tools. Because of the pandemic, some USDA Service Centers are open to limited visitors. Contact your local County FSA office to set up an in-person or phone appointment.

To file a crop acreage report, you will need to provide:

- Crop and crop type or variety.
- Intended use of the crop.
- Number of acres of the crop.
- Map with approximate boundaries for the crop.
- Planting date(s).
- Planting pattern, when applicable.
- Producer shares.
• Irrigation practice(s).
• Acreage prevented from planting, when applicable.
• Other information as required.

Acreage Reporting Details

The following exceptions apply to acreage reporting dates:

• If the crop has not been planted by the acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
• If a producer acquires additional acreage after the acreage reporting date, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.

Producers should also report crop acreage they intended to plant, but due to natural disaster, were unable to plant. Prevented planting acreage must be reported on form CCC-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and USDA’s Risk Management Agency.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP-covered crops is the earlier of the dates listed above or 15 calendar days before grazing or harvesting of the crop begins.

For questions, please contact the your County FSA office.

---

**FSA is Accepting CRP Continuous Enrollment Offers**

The Farm Service Agency (FSA) is accepting offers for specific conservation practices under the Conservation Reserve Program (CRP) Continuous Signup.

In exchange for a yearly rental payment, farmers enrolled in the program agree to remove environmentally sensitive land from agricultural production and to plant species that will improve environmental health and quality. The program’s long-term goal is to re-establish valuable land cover to improve water quality, prevent soil erosion, and reduce loss of wildlife habitat. Contracts for land enrolled in CRP are 10-15 years in length.

Under continuous CRP signup, environmentally sensitive land devoted to certain conservation practices can be enrolled in CRP at any time. Offers for continuous enrollment are not subject to competitive bidding during specific periods. Instead they are automatically accepted provided the land and producer meet certain eligibility requirements and the enrollment levels do not exceed the statutory cap.

For more information, including a list of acceptable practices, contact your County USDA Service Center or visit [fsa.usda.gov/crp](http://fsa.usda.gov/crp).
**FSA Offers Loan Servicing Options**

There are options for Farm Service Agency (FSA) loan customers during financial stress. If you are a borrower who is unable to make payments on a loan, contact your local FSA Farm Loan Manager to learn about your options.

**USDA Announces Updates for Honeybee Producers**

The Farm Service Agency (FSA) announced updates to the Emergency Assistance for Livestock, Honeybees and Farm-Raised Fish Program (ELAP) specific to honeybee producers. For honeybees, ELAP covers colony losses, honeybee hive losses (the physical structure) and honeybee feed losses in instances where the colony, hive or feed has been destroyed by a natural disaster or, in the case of colony losses, because of Colony Collapse Disorder. Colony losses must be in excess of normal mortality.

Updates include:

- Starting in 2020, you have 15 days from when the loss is first apparent, instead of 30 days, to file a honeybee notice of loss, which provides consistency between ELAP and the Noninsured Crop Disaster Assistance Program, which also has a 15-day notice of loss period for honey.
- ELAP will now run according to the calendar year. Since you are still required to apply for payment within 30 calendar days of the end of the program year, the new signup deadline for calendar year 2021 losses is January 30, 2022.
- If you were paid for the loss of a honeybee colony or hive in either or both of the previous two years, you will be required to provide additional documentation to substantiate how your current year inventory was acquired.
- If the honeybee colony loss was caused by Colony Collapse Disorder, you must provide a producer certification that the loss was a direct result of at least three of the five symptoms of Colony Collapse Disorder, which include:
  - the loss of live queen and/or drone bee populations inside the hives;
  - rapid decline of adult worker bee population outside the hives, leaving brood poorly or completely unattended;
  - absence of dead adult bees inside the hive and outside the entrance of the hive;
  - absence of robbing collapsed colonies; and
  - at the time of collapse, varroa mite and Nosema populations are not at levels known to cause economic injury or population decline.

For more information contact your local County USDA Service Center or visit [farmers.gov/recover](http://farmers.gov/recover).
Persons with disabilities who require accommodations to attend or participate in any meeting/event/function should contact Mary Anne Coffin at 207-990-9140 or Federal Relay Service at 1-800-877-8339.

Service Center staff continue to work with agricultural producers via phone, email, and other digital tools. Because of the pandemic, USDA Service Centers are open to limited visitors with masks. Contact your Service Center to set up an in-person or phone appointment. Additionally, more information related to USDA’s response and relief for producers can be found at farmers.gov/coronavirus.
