USDA Opens Signup March 23 for Added Causes of Loss Under WHIP+ and Announces Disaster Assistance for Sugar Beet Producers

USDA announced additional disaster assistance available to agricultural producers, including producers impacted by drought and excess moisture as well as sugar beet growers. Through WHIP+, USDA is helping producers recover from losses related to 2018 and 2019 natural disasters.

USDA's Farm Service Agency (FSA) will open signup on March 23 for producers to apply for eligible losses of drought (D3 or above) and excess moisture. USDA is also entering into agreements with six sugar beet processing cooperatives to distribute \$285 million to grower members of those cooperatives who experienced loss.

State Executive Director:
Jim Eichhorst

State Committee:
Jenny Rhodes, Chairperson
Steve Ernst
Steve Issacson
Pat Langenfelder

In June 2019, more than \$3 billion was made available through a disaster relief package passed by Congress and signed by President Trump. In December 2019, Congress passed, and President Trump signed the Further Consolidated Appropriations Act of 2020 that provides an additional \$1.5 billion for the continuation of disaster assistance program delivery.

WHIP+ New Qualifying Disaster Events

The bill added excessive moisture and D3 and D4 drought as qualifying losses for WHIP+ assistance.

Beginning March 23, producers who suffered either of these types of loss in 2018 and/or 2019 can apply for WHIP+ assistance at their local FSA office. For drought, a producer is eligible if any area of the county in which the loss occurred was rated D3 (Extreme Drought) or higher on the U.S. Drought Monitor during calendar years 2018 or 2019.

WHIP+ Sugar Beet Loss Assistance

As also directed in the bill, USDA will provide \$285 million through sugar beet processing cooperatives to compensate grower members for sugar beet crop losses in 2018 and 2019. Details will be finalized in agreements between USDA and participating sugar beet processing cooperatives. Sugar beet producers who are members of these cooperatives and experienced losses may contact their cooperative for more information about how this sugar beet crop assistance will be administered.

WHIP+ for Quality Loss

In addition, producers have reported widespread crop quality loss from eligible disaster events that results in price deductions or penalties when marketing the damaged crops. The Appropriations bill expands WHIP+ to include assistance for crop quality loss. FSA is gathering data and input from producers and stakeholders regarding the extent and types of quality loss nationwide.

Eligibility

To be eligible for WHIP+, producers must have suffered losses of certain crops, trees, bushes, or vines in counties with a Presidential Emergency Disaster Declaration or a Secretarial Disaster Designation (primary counties only) for the following named natural disaster events; hurricanes, floods, tornadoes, typhoons, volcanic activity, snowstorms, wildfires, and now excessive moisture that occurred in 2018 or 2019. Also, losses located in a county not designated by the Secretary as a primary county may be eligible if the producer provides documentation showing that the loss was due to a qualifying natural disaster event.

For drought, counties having a D3 or D4 Drought Monitor classification in any portion of the county anytime during calendar year 2018 or 2019 will also be eligible.

A list of counties that received qualifying hurricane declarations and designations is available at farmers.gov/recover/whip-plus. The U.S. Drought Monitor is available at <https://droughtmonitor.unl.edu/>.

Because livestock losses are covered by other disaster recovery programs offered through FSA, these losses are not eligible for WHIP+.

Farm Reconstitutions

When changes in farm ownership or operation take place, a farm *reconstitution* is necessary. The reconstitution — or recon — is the process of combining or dividing farms or tracts of land based on the farming operation.

To be effective for the current Fiscal Year (FY), farm combinations and farm divisions must be requested by **August 1 of the FY** for farms subject to the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) program. A reconstitution is considered to be requested when all:

- of the required signatures are on FSA-155
- other applicable documentation, such as proof of ownership, is submitted.

Total Conservation Reserve Program (CRP) and non-ARC/PLC farms may be reconstituted at any time.

The following are the different methods used when doing a farm recon:

Estate Method — the division of bases, allotments and quotas for a parent farm among heirs in settling an estate;

Designation of Landowner Method — may be used when (1) part of a farm is sold or ownership is transferred; (2) an entire farm is sold to two or more persons; (3) farm ownership is transferred to two or more persons; (4) part of a tract is sold or ownership is transferred; (5) a tract is sold to two or more persons; or (6) tract ownership is transferred to two or more persons. In order to use this method the land sold must have been owned for at least three years, or a waiver granted, and the buyer and seller must sign a Memorandum of Understanding;

DCP Cropland Method — the division of bases in the same proportion that the DCP cropland for each resulting tract relates to the DCP cropland on the parent tract;

Default Method — the division of bases for a parent farm with each tract maintaining the bases attributed to the tract level when the reconstitution is initiated in the system.

Transitioning Expiring CRP Land to Beginning, Veteran or Underserved Farmers and Ranchers

CRP contract holders are encouraged to transition their Conservation Reserve Program (CRP) acres to beginning, veteran or socially disadvantaged farmers or ranchers through the Transition Incentives Program (TIP). TIP provides annual rental payments to the landowner or operator for up to two additional years after the CRP contract expires, provided the transition is not to a family member.

Enrollment in TIP is on a continuous basis through 2023 or until the new statutory limit of \$50 million under the 2018 Farm Bill is reached.

CRP contract holders no longer need to be a retired or retiring owner or operator to transition their land. TIP participants must agree to sell, have a contract to sell, or agree to lease long term (at least five years) land enrolled in an expiring CRP contract to a beginning, veteran, or socially disadvantaged farmer or rancher who is not a family member.

Beginning, veteran or social disadvantaged farmers and ranchers and CRP participants may enroll in TIP beginning two years before the expiration date of the CRP contract. For example, if a CRP contract is scheduled to expire on Sept. 30, 2022, the land may be offered for enrollment in TIP from October 1, 2020, through September 30, 2022. The TIP application must be submitted prior to completing the lease or sale of the affected lands.

New landowners or renters that return the land to production must use sustainable grazing or farming methods.

For more information on TIP, visit <https://www.fsa.usda.gov/conservation>.

New Farmers.gov Feature Helps Producers Find Farm Loans that Fit Their Operation

A new online tool can help farmers and ranchers find information on U.S. Department of Agriculture (USDA) farm loans that may best fit their operations. USDA has launched the new *Farm Loan Discovery Tool* as the newest feature on farmers.gov, the Department's self-service website for farmers.

USDA's Farm Service Agency (FSA) offers a variety of loan options to help farmers finance their operations. From buying land to financing the purchase of equipment, FSA loans can help. Compared to this time last year, FSA has seen an 18 percent increase in the amount it has obligated for direct farm ownership loans, and through the 2018 Farm Bill, has [increased the limits](#) for several loan products.

USDA conducted field research in eight states, gathering input from farmers and FSA farm loan staff to better understand their needs and challenges.

How the Tool Works

Farmers who are looking for financing options to operate a farm or buy land can answer a few simple questions about what they are looking to fund and how much money they need to borrow. After submitting their answers, farmers will be provided information on farm loans that best fit their specific needs. The loan application and additional resources also will be provided.

Farmers can download application quick guides that outline what to expect from preparing an application to receiving a loan decision. There are four guides that cover loans to individuals, entities, and youth, as well as information on microloans. The guides include general eligibility requirements and a list of required forms and documentation for each type of loan. These guides can help farmers prepare before their first USDA service center visit with a loan officer.

Farmers can access the *Farm Loan Discovery Tool* by visiting farmers.gov/fund and clicking the "Start" button. Follow the prompts and answer five simple questions to receive loan information that is applicable to your agricultural operation. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

About Farmers.gov

In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where farmers will be able to apply for programs, process transactions, and manage accounts.

The *Farm Loan Discovery Tool* is one of many resources on farmers.gov to help connect farmers to information that can help their operations. Earlier this year, USDA launched the *My Financial Information* feature, which enables farmers to view their loan information, history, payments, and alerts by logging into the website.

USDA is building farmers.gov for farmers, by farmers. In addition to the interactive farm loan features, the site also offers a Disaster Assistance Discovery Tool. Farmers can visit farmers.gov/recover/disaster-assistance-tool#step-1 to find disaster assistance programs that can help their operation recover from natural disasters.

With feedback from customers and field employees who serve those customers, farmers.gov delivers farmer-focused features through an agile, iterative process to deliver the greatest immediate value to America's agricultural producers – helping farmers and ranchers do right, and feed everyone.

For more information or to locate your USDA Service Center, visit farmers.gov.

USDA Announces Streamlined Guaranteed Loans and Additional Lender Category for Small-Scale Operators

Options Help More Beginning, Small and Urban Producers Gain Access to Credit

Producers can apply for a streamlined version of USDA guaranteed loans, which are tailored for smaller scale farms and urban producers. The program, called EZ Guarantee Loans, uses a simplified application process to help beginning, small, underserved and family farmers and ranchers apply for loans of up to \$100,000 from USDA-approved lenders to purchase farmland or finance agricultural operations.

A new category of lenders will join traditional lenders, such as banks and credit unions, in offering USDA EZ Guarantee Loans. Microlenders, which include Community Development Financial Institutions and Rural Rehabilitation Corporations, will be able to offer their customers up to \$50,000 of EZ Guaranteed Loans, helping to reach urban areas and underserved producers. Banks, credit unions and other traditional USDA-approved lenders, can offer customers up to \$100,000 to help with agricultural operation costs.

EZ Guarantee Loans offer low interest rates and terms up to seven years for financing operating expenses and 40 years for financing the purchase of farm real estate. USDA-approved lenders can issue these loans with the Farm Service Agency (FSA) guaranteeing the loan up to 95 percent.

More information about the available types of FSA farm loans can be found at www.fsa.usda.gov/farmloans or by contacting your local FSA office.

Queen Anne's and Dorchester County FSA Office Is Hiring

The Queen Anne's and Dorchester County Farm Service Agency (FSA) office in Centreville and Cambridge are hiring a full time Program Technician (PT). The deadline to apply is **March, 26 2020**.

Duties include general office activities supporting FSA programs administered at the field level. Successful applicants must be reliable, have a professional attitude and enjoy working with the public.

If you are interested or know of someone who might be interested, please share this information with them. Here is the direct link to the position with information on how to apply:

<https://www.usajobs.gov/GetJob/ViewDetails/562881700>

Applications must be completed through USAJOBS no later than close of business March 26, 2020.

Contact Terri Phillips at 443-482-2763 if you have specific questions regarding the position.
