2016 PLC Payment Rates and ARC Actual Prices for Wheat, Barley and Oats

The Agricultural Act of 2014 provides for payments for covered commodities through the Price Loss Coverage (PLC) program when the market year average price is below the reference price. Agricultural Risk Coverage (ARC) program payments are triggered when the actual revenue is below the guarantee established for the program.

The Marketing Year Average (MYA) price for wheat, barley and oats was announced June 29, resulting in a PLC payment rate of \$1.61 per bushel for 2016 wheat and \$0.34 per bushel for 2016 oats. There is no PLC payment on 2016 barley.

For Agriculture Loss Coverage – County (ARC-CO), actual crop revenue is calculated by multiplying the actual average yield for your county times the higher of the MYA price or the national loan rate. For 2016, the following prices have been set – wheat at \$3.89

To find contact information for your local office go to www.fsa.usda.gov/md

per bushel; barley at \$4.96 per bushel; and oats at \$2.06 per bushel. 2016 county yields will not be available until this fall.

Agriculture Loss Coverage–Individual Option (ARC-IC) will utilize the same prices as ARC-CO, however the actual crop revenue cannot be calculated until participating producers report all production for all covered commodities planted on the farm and all MYA prices for all covered commodities planted on the farm are known. Both of these items are necessary to calculate the ARC-IC actual revenue for the farm.

All 2016 ARC and PLC payments cannot be made until after Oct. 1, 2017, or the announcement of the final 2016 MYA price for the applicable covered commodity.

For information on release dates for MYA prices, ARC-CO yields and projected and final PLC payment rates, visit www.fsa.usda.gov/arc-plc and click on the “ARC/PLC Program Data” link.

Dairy Producers Can Enroll for 2018 Coverage

Secretary Allows Producers to Opt Out

The U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) announced that starting Sept. 1, 2017, dairy producers can enroll for 2018 coverage in the Margin Protection Program (MPP-Dairy). Secretary Sonny Perdue has utilized additional flexibility this year by providing dairy producers the option of opting out of the program for 2018.

To opt out, a producer should not sign up during the annual registration period. By opting out, a producer would not receive any MPP-Dairy benefits if payments are triggered for 2018. Full details will be included in a subsequent Federal Register Notice. The decision would be for 2018 only and is not retroactive.

The voluntary program, established by the 2014 Farm Bill, provides financial assistance to participating dairy producers when the margin – the difference between the price of milk and feed costs – falls below the coverage level selected by the producer.

MPP-Dairy gives participating dairy producers the flexibility to select coverage levels best suited for their operation. Enrollment ends on Dec. 15, 2017, for coverage in calendar year 2018. Participating farmers will remain in the program through Dec. 31, 2018, and pay a minimum \$100 administrative fee for 2018 coverage. Producers have the option of selecting a different coverage level from the previous coverage year during open enrollment.

Dairy operations enrolling in the program must meet conservation compliance provisions and cannot participate in the Livestock Gross Margin Dairy Insurance Program. Producers can mail the appropriate form to the producer’s administrative county FSA office, along with applicable fees, without necessitating a trip to the local FSA office. If electing higher coverage for 2018, dairy producers can either pay the premium in full at the time of enrollment or pay 100 percent of the premium by Sept. 1, 2018. Premium fees may be paid directly to FSA or producers can work with their milk handlers to remit premiums on their behalf.

USDA has a web tool to help producers determine the level of coverage under the MPP-Dairy that will provide them with the strongest safety net under a variety of conditions. The online resource, available at www.fsa.usda.gov/mpptool, allows dairy farmers to quickly and easily combine unique operation data and other key variables to calculate their coverage needs based on price projections. Producers can also review historical data or estimate future coverage based on data projections.

The secure site can be accessed via computer, Smartphone, tablet or any other platform, 24 hours a day, seven days a week.

For more information, visit FSA online at www.fsa.usda.gov/dairy or stop by a local FSA office to learn more about the MPP-Dairy.

USDA Encourages Producers to Consider Risk Protection Coverage before Crop Sales Deadlines

The Farm Service Agency encourages producers to examine available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the applicable crop sales deadline.

Producers are reminded that crops not covered by insurance may be eligible for NAP. The 2014 Farm Bill expanded NAP to include higher levels of protection. Beginning, underserved and limited resource farmers are now eligible for free catastrophic level coverage, as well as discounted premiums for additional levels of protection."

Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent federal crop insurance program is available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

Producers can determine if crops are eligible for federal crop insurance or NAP by visiting <https://webapp.rma.usda.gov/apps/actuarialinformationbrowser2017/CropCriteria.aspx>. NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production, with higher levels of coverage, up to 65 percent of their expected production at 100 percent of the average market price, including coverage for organics and crops marketed directly to consumers.

Deadlines for coverage vary by state and crop. To learn more about NAP visit www.fsa.usda.gov/nap or contact your local USDA Service Center. To find your local USDA Service Centers go to <http://offices.usda.gov>.

Federal crop insurance coverage is sold and delivered solely through private insurance agents. Agent lists are available at all USDA Service Centers or at USDA's online Agent Locator: <http://prodwebnlb.rma.usda.gov/apps/AgentLocator/#>. Producers can use the USDA Cost Estimator, <https://ewebapp.rma.usda.gov/apps/costestimator/Default.aspx>, to predict insurance premium costs.

MAL and LDP Policy

The Agricultural Act of 2014 authorized 2014-2018 crop year Marketing Assistance Loans (MALs) and Loan Deficiency Payments (LDPs), with a few minor policy changes.

Among the changes, farm-stored MAL collateral transferred to warehouse storage will retain the original loan rate, be allowed to transfer only the outstanding farm-stored quantity with no additional quantity allowed and will no longer require producers to have a paid for measurement service when moving or commingling loan collateral.

MALs and LDPs provide financing and marketing assistance for wheat, feed grains, soybeans, and other oilseeds, pulse crops, rice, peanuts, cotton, wool and honey. MALs provide producers interim financing after harvest to help them meet cash flow needs without having to sell their commodities when market prices are typically at harvest-time lows. A producer who is eligible to obtain a loan, but agrees to forgo the loan, may obtain an LDP if such a payment is available. Marketing loan provisions and LDPs are not available for sugar and extra-long staple cotton.

FSA is now accepting requests for 2017 MALs and LDPs for all eligible commodities after harvest. Requests for loans and LDPs shall be made on or before the final availability date for the respective commodities.

Before MAL repayments with a market loan gain or LDP disbursements can be made, producers must meet the requirements of actively engaged in farming, cash rent tenant and member contribution.

Commodity certificates are available to loan holders who have outstanding nonrecourse loans for wheat, upland cotton, rice, feed grains, pulse crops (dry peas, lentils, large and small chickpeas), peanuts, wool, soybeans and designated minor oilseeds. These certificates can be purchased at the posted county price (or adjusted world price or national posted price) for the quantity of commodity under loan, and must be immediately exchanged for the collateral, satisfying the loan. MALs redeemed with commodity certificates are not subject to the actively engaged in farming, cash-rent tenant, Adjusted Gross Income provisions or the payment limitation.

To be considered eligible for an LDP, producers must have form CCC-633EZ, Page 1 on file at their local FSA Office before losing beneficial interest in the crop. Pages 2, 3 or 4 of the form must be submitted when payment is requested.

The 2014 Farm Bill also establishes payment limitations per individual or entity not to exceed \$125,000 annually on certain commodities for the following program benefits: price loss coverage payments, agriculture risk coverage payments, marketing loan gains (MLGs) and LDPs. These payment limitations do not apply to MAL loan disbursements or redemptions using commodity certificate exchange.

Adjusted Gross Income (AGI) provisions were modified by the 2014 Farm Bill, which states that a producer whose total applicable three-year average AGI exceeds \$900,000 is not eligible to receive an MLG or LDP. Producers must have a valid CCC-941 on file to earn a market gain of LDP. The AGI does not apply to MALs redeemed with commodity certificate exchange.

For more information and additional eligibility requirements, please visit a nearby USDA Service Center or FSA's website www.fsa.usda.gov.

USDA Financial Assistance Available to Help Organic Farmers Create Conservation Buffers

USDA is assisting organic farmers with the cost of establishing up to 20,000 acres of new conservation buffers and other practices on and near farms that produce organic crops.

The financial assistance is available from the USDA Conservation Reserve Program (CRP), a federally funded voluntary program that contracts with agricultural producers so that environmentally sensitive land is not farmed or ranched, but instead used for conservation benefits. CRP participants establish long-term, resource-conserving plant species, such as approved grasses or trees (known as "covers") to control soil erosion, improve water quality and develop wildlife habitat. In return, FSA provides participants with rental payments and cost-share assistance. Contract duration is between 10 and 15 years.

For conservation buffers, funds are available for establishing shrubs and trees, or supporting pollinating species, and can be planted in blocks or strips. Interested organic producers can offer eligible land for enrollment in this initiative at any time.

Other USDA FSA programs that assist organic farmers include:

- The Noninsured Crop Disaster Assistance Program that provides financial assistance for 55 to 100 percent of the average market price for organic crop losses between 50 to 65 percent of expected production due to a natural disaster.

- Marketing assistance loans that provide interim financing to help producers meet cash flow needs without having to sell crops during harvest when market prices are low, and deficiency payments to producers who forgo the loan in return for a payment on the eligible commodity.
- A variety of loans for operating expenses, ownership or guarantees with outside lenders, including streamlined microloans that have a lower amount of paperwork.
- Farm Storage Facility Loans for that provide low-interest financing to build or upgrade storage facilities for organic commodities, including cold storage, grain bins, bulk tanks and drying and handling equipment.
- Services such as mapping farm and field boundaries and reporting organic acreage that can be provided to a farm's organic certifier or crop insurance agent.

Visit www.fsa.usda.gov/organic to learn more about how FSA can help organic farmers. For an interactive tour of CRP success stories, visit www.fsa.usda.gov/CRPis30 or follow #CRPis30 on Twitter. To learn more about FSA programs visit a local FSA office or www.fsa.usda.gov. To find your local FSA office, visit <http://offices.usda.gov>.

FSA Offers Joint Financing Option on Direct Farm Ownership Loans

The USDA Farm Service Agency's (FSA) [Direct Farm Ownership loans](#) are a resource to help farmers and ranchers become owner-operators of family farms, improve and expand current operations, increase agricultural productivity, and assist with land tenure to save farmland for future generations.

Depending on the applicant's needs, there are three types of Direct Farm Ownership Loans: regular, down payment and joint financing. FSA also offers a [Direct Farm Ownership Microloan](#) option for smaller financial needs up to \$50,000.

Joint financing allows FSA to provide more farmers and ranchers with access to capital. FSA lends up to 50 percent of the total amount financed. A commercial lender, a State program or the seller of the property being purchased, provides the balance of loan funds, with or without an FSA guarantee. The maximum loan amount for a Joint Financing loan is \$300,000 and the repayment period for the loan is up to 40 years.

To be eligible, the operation must be an eligible farm enterprise. Farm Ownership loan funds cannot be used to finance nonfarm enterprises and all applicants must be able to meet general eligibility requirements. Loan applicants are also required to have participated in the business operations of a farm or ranch for at least three years out of the 10 years prior to the date the application is submitted. The applicant must show documentation that their participation in the business operation of the farm or ranch was not solely as a laborer.

For more information about FSA Loan programs, contact your local FSA office or visit www.fsa.usda.gov. To find your local FSA office, visit <http://offices.usda.gov>.

USDA Offers Targeted Farm Loan Funding for Underserved Groups and Beginning Farmers

The USDA Farm Service Agency (FSA) reminds producers that FSA offers targeted farm ownership and farm operating loans to assist underserved applicants as well as beginning farmers and ranchers.

USDA defines underserved applicants as a group whose members have been subjected to racial, ethnic, or gender prejudice because of their identity as members of the group without regard to their individual qualities. For farm loan program purposes, targeted underserved groups are women,

African Americans, American Indians and Alaskan Natives, Hispanics and Asians and Pacific Islanders.

Underserved or beginning farmers and ranchers who cannot obtain commercial credit from a bank can apply for either FSA direct loans or guaranteed loans. Direct loans are made to applicants by FSA. Guaranteed loans are made by lending institutions who arrange for FSA to guarantee the loan. FSA can guarantee up to 95 percent of the loss of principal and interest on a loan. The FSA guarantee allows lenders to make agricultural credit available to producers who do not meet the lender's normal underwriting criteria.

The direct and guaranteed loan program provides for two types of loans: farm ownership loans and farm operating loans. In addition to customary farm operating and ownership loans, FSA now offers Microloans through the direct loan program. The focus of Microloans is on the financing needs of small, beginning farmer, niche and non-traditional farm operations. Microloans are available for both ownership and operating finance needs. To learn more about microloans, visit www.fsa.usda.gov/microloans.

To qualify as a beginning producer, the individual or entity must meet the eligibility requirements outlined for direct or guaranteed loans. Additionally, individuals and all entity members must have operated a farm for less than 10 years. Applicants must materially or substantially participate in the operation.

For more information on FSA's farm loan programs and targeted underserved and beginning farmer guidelines, visit www.fsa.usda.gov/farmloans.

Selected Interest Rates and Dates to Remember

Selected Interest Rates for September 2017	
90-Day Treasury Bill	1.250%
Farm Operating Loans — Direct	2.875%
Farm Ownership Loans — Direct	3.750%
Farm Ownership Loans — Direct Down Payment, Beginning Farmer or Rancher	1.500%
Emergency Loans	3.750%
Farm Storage Facility Loans (7 years)	2.125%
Commodity Loans 1996-Present	2.250%

Dates to Remember	
Sep 30	NAP application deadline for Biennial and Perennial forage crops, alfalfa, grass forages, mixed forages, and other forages
Nov 15	Crop reporting deadline for PRF (Pasture Rangeland Forage)
Nov 20	NAP application deadline for Perennial crops (other than those intended for forage), peaches, apples, cherries, grapes, berries
Dec 4	Last day to return COC Election ballots to the USDA Service Center
Dec 15	2018 MPP-Dairy Enrollment Deadline
Dec 15	Crop reporting deadline for Fall Forage Seeding, Perennial Forage, Fall-Seeded Small Grains
Dec 31	NAP application deadline for potatoes
