USDA Creates More Bird Habitat Opportunities on Irrigated Farmland

USDA’s Farm Service Agency (FSA) announces more bird habitats to be established in irrigated farmland regions through the Conservation Reserve Program (CRP).

Declines in upland bird populations, such as the northern bobwhite, pheasant, and prairie chicken, led to the creation of new Conservation Reserve Program features to help restore habitats for these species in these agricultural areas. Since the program’s creation in 2004, more than 240,000 acres of marginal cropland has been converted to native grasslands, spurring an increase in upland bird populations.

In recent years, however, applications for this type of habitat creation have slowed. To encourage more participation, USDA’s new policy focuses on farmland with center-pivot irrigation systems where there are circular areas of cropland with patches of land beyond the reach of irrigation. Until now, these patches – known as pivot corners – were only eligible for habitat creation when connected by a linear strip of grassland also enrolled in the program. The new policy allows producers interested in habitat creation to use disconnected pivot corners to help increase the population of upland birds.

Other species that can benefit from today’s change include the mourning dove, wild turkey, several sparrows, meadowlark and bobolinks.

The Conservation Reserve Program is a voluntary program. FSA contracts with agricultural landowners so that environmentally sensitive land is not farmed but instead used for conservation. Participants establish long-term plant species that control soil erosion, sequester carbon, improve water quality, and strengthen declining wildlife populations. In return, participants receive annual
rental payments between 10 and 15 years.

Interested landowners can enroll pivot corners in the Conservation Reserve Program at any time. Participants and land must meet certain eligibility requirements. Other restrictions may apply. For additional details, contact your local Farm Service Agency office at offices.usda.gov or visit the website at www.fsa.usda.gov/conservation.

Noninsured Crop Disaster Assistance Program (NAP) Application Closing Date Quickly Approaching

_Free Basic Coverage Plans and Premium Discounts Available for New, Underserved and Limited Income Farmers_

The final closing date for 2015 NAP applications is Monday, March 16, 2015.

Greater protection is now available from the Noninsured Crop Disaster Assistance Program for crops that historically have been ineligible for federal crop insurance. The new options, created by the 2014 Farm Bill, provide greater coverage for losses when natural disasters affect specialty crops such as vegetables, fruits, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, and energy crops.

Previously, the program offered coverage at 55 percent of the average market price for crop losses that exceed 50 percent of expected production. Producers can now choose higher levels of coverage, up to 65 percent of their expected production at 100 percent of the average market price.

The expanded protection will be especially helpful to beginning and socially disadvantaged producers, as well as farmers with limited resources, who will receive fee waivers and premium reductions for expanded coverage. More crops are now eligible for the program, including expanded aquaculture production practices, and sweet and biomass sorghum. For the first time, a range of crops used to produce bioenergy will be eligible as well.

To help producers learn more about the Noninsured Crop Disaster Assistance Program and how it can help them, USDA, in partnership with Michigan State University and the University of Illinois, created an online resource. The Web tool, available at www.fsa.usda.gov/nap, allows producers to determine whether their crops are eligible for coverage. It also gives them an opportunity to explore a variety of options and levels to determine the best protection level for their operation.

To learn more, visit the Farm Service Agency (FSA) website at www.fsa.usda.gov/nap or contact your local FSA office at offices.usda.gov. The Farm Service Agency (FSA), which administers the program, also wants to hear from producers and other interested stakeholders who may have suggestions or recommendations on the program. Written comments will be accepted until Feb. 13, 2015 and can be submitted through www.regulations.gov.
Risk Management Agency Reminder

The Raleigh Regional Office of the Risk Management Agency reminds you that the previous definition for county was changed for 2015 for all tobacco program counties in your state. Producers impacted by this change need to update their insurance appropriately prior to the Sales Closing Dates of February 28, 2015 for North Carolina and March 15, 2015 for Connecticut, Maryland, Massachusetts, Pennsylvania, Virginia. For 2015 a policy must be established for each county where the acreage is physically located, unless the spanning FN is contiguous across county lines that are not readily discerned. A Basic Unit must now be established within each county that has a crop policy in effect for the 2015 crop year, in accordance with the 2015 Crop Insurance Handbook (CIH) Paragraph 787A. Policyholders impacted by this change can complete a new application or policy change form with their crop insurance agent. Update Your Records

FSA is cleaning up our producer record database. If you have any unreported changes of address or zip code or an incorrect name or business name on file they need to be reported to our office. Changes in your farm operation, like the addition of a farm by lease or purchase, need to be reported to our office as well. Producers participating in FSA and NRCS programs are required to timely report changes in their farming operation to the County Committee in writing and to update their CCC-902 Farm Operating Plan.

If you have any updates or corrections, please call your local FSA office to update your records.

2014 MAL and LDP Requests

The USDA Farm Service Agency (FSA) is accepting requests for marketing assistance loans (MALs) and loan deficiency payments (LDPs) for eligible 2014 commodities.

MALs and LDPs for the 2014 crop year become available to eligible producers beginning with harvest/shearing season and extending through a specific commodity’s final loan availability date. Sugar commodity loans for the 2014 crop became available to sugar processors on Oct. 1, 2014.

MALs and LDPs provide financing and marketing assistance for wheat, feed grains, soybeans, and other oilseeds, pulse crops, rice, peanuts, cotton, wool and honey. MALs provide producers interim financing after harvest to help them meet cash flow needs without having to sell their commodities when market prices are typically at harvest-time lows. A producer who is eligible to obtain a loan, but agrees to forgo the loan, may obtain an LDP if such a payment is available. Marketing loan provisions and LDPs are not available for sugar and extra-long staple cotton.

Before MAL repayments and LDP disbursements can be made, producers must meet the requirements of actively engaged in farming, cash rent tenant and member contribution.

Additionally, form CCC-902 and CCC-901 must be submitted for the 2014 crop year, if applicable, with a county committee determination and updated subsidiary files.

To be considered eligible for an LDP, producers must have form CCC-633EZ, Page 1 on file at their local FSA Office before losing beneficial interest in the crop. Pages 2, 3 or 4 of the form must be submitted when payment is requested.

Please contact your local FSA office for additional eligibility requirements.
The 2014 Farm Bill also establishes payment limitations per individual or entity not to exceed $125,000 annually on certain commodities for the following program benefits: price loss coverage payments, agriculture risk coverage payments, marketing loan gains (MLGs) and LDPs. These payment limitations do not apply to MAL loan disbursements.

Adjusted Gross Income (AGI) provisions were modified by the 2014 Farm Bill, which states that a producer whose total applicable three-year average AGI exceeds $900,000 is not eligible to receive an MLG or LDP.

For more information, please visit a nearby USDA Service Center or FSA’s website [www.fsa.usda.gov](http://www.fsa.usda.gov).

### Final Availability Dates for Marketing Assistance Loans & Loan Deficiency Payments

- March 31, 2015 - Barley, Canola, Crambe, Flaxseed, Honey, Oats, Rapeseed, Wheat, Sesame Seed
- May 31, 2015 - Corn, Dry Peas, Grain Sorghum, Lentils, Mustard Seed, Rice, Safflower Seed, Chickpeas, Soybeans, Sunflower Seed

The AGI verification and compliance reviews for 2011, 2012, 2013 and 2014 are conducted on producers who the IRS indicated may have exceeded the adjusted gross income limitations described in [7 CFR 1400.500](http://www.fsa.usda.gov/pricesupport). Based on this review, producers will receive determinations of eligibility or ineligibility.

If the producer is determined to have exceeded the average AGI limitation of $900,000, receivables will be established for payments earned directly or indirectly by the producer subject to the $900,000 limitation. The Maryland FSA Office has begun notifying producers selected for review. If you have any questions about the review process or determinations, please contact the Maryland FSA Office at 443-482-2760. Producers who receive initial debt notification letters may only appeal the amount of the debt to their local FSA office. Adverse determinations become administratively final 30 days from the date of the adverse determination letter and can only be reopened if exceptional circumstances exist that prevented the producer from timely filing the appeal.
Youth Loans

The Farm Service Agency makes loans to youth to establish and operate agricultural income-producing projects in connection with 4-H clubs, FFA and other agricultural groups. Projects must be planned and operated with the help of the organization advisor, produce sufficient income to repay the loan and provide the youth with practical business and educational experience. The maximum loan amount is $5000.

Youth Loan Eligibility Requirements:

- Be a citizen of the United States (which includes Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands) or a legal resident alien
- Be 10 years to 20 years of age
- Comply with FSA’s general eligibility requirements
- Be unable to get a loan from other sources
- Conduct a modest income-producing project in a supervised program of work as outlined above
- Demonstrate capability of planning, managing and operating the project under guidance and assistance from a project advisor. The project supervisor must recommend the youth loan applicant, along with providing adequate supervision.

Stop by the county office for help preparing and processing the application forms.

USDA Enhances Farm Storage Facility Loan Program

The U.S. Department of Agriculture (USDA) announced the expansion of the Farm Storage and Facility Loan program, which provides low-interest financing to producers. The enhanced program includes 22 new categories of eligible equipment for fruit and vegetable producers.

Producers with small and mid-sized operations, and specialty crop fruit and vegetable growers, now have access to needed capital for a variety of supplies including sorting bins, wash stations and other food safety-related equipment. A new more flexible alternative is also provided for determining storage needs for fruit and vegetable producers, and waivers are available on a case-by-case basis for disaster assistance or insurance coverage if available products are not relevant or feasible for a particular producer.

Additionally, Farm Storage Facility Loan security requirements have been eased for loans up to $100,000. Previously, all loans in excess of $50,000 and any loan with little resale value required a promissory note/security agreement and additional security, such as a lien on real estate. Now loans up to $50,000 can be secured by only a promissory note/security agreement and some loans between $50,000 and $100,000 will no longer require additional security.

The low-interest funds can be used to build or upgrade permanent facilities to store commodities. Eligible commodities include grains, oilseeds, peanuts, pulse crops, hay, honey, renewable biomass commodities, fruits and vegetables. Qualified facilities include grain bins, hay barns and cold storage facilities for fruits and vegetables.

Contact your local FSA office or visit www.fsa.usda.gov for more about FSA programs and loans, including the Farm Storage Facility Loan Program.
