Massachusetts FSA Newsletter

SED Comments

All Massachusetts counties were recently declared primary or contiguous disaster areas because of crop losses caused by the ongoing drought. These declarations join a similar declaration issued for all counties due to the frost/freeze events this past winter and spring. These designations make all qualified producers eligible for low interest emergency (EM) loans.

For more information about emergency loans and other programs you may be eligible for, please contact your local county office. To find an FSA county office near you, visit http://offices.usda.gov.

Best wishes,

Jon Niedzielski
Livestock Forage Losses

Producers in 11 Massachusetts counties are eligible to apply for 2016 Livestock Forage Disaster Program (LFP) benefits on native pasture and improved pasture. Those counties are Barnstable, Bristol, Essex, Franklin, Hampden, Hampshire, Middlesex, Norfolk, Plymouth, Suffolk and Worcester.

LFP provides compensation to eligible livestock producers who suffer grazing losses for covered livestock due to drought on privately owned or cash leased land or fire on federally managed land.

County committees can only accept LFP applications after notification is received by the National Office of qualifying drought or if a federal agency prohibits producers from grazing normal permitted livestock on federally managed lands due to qualifying fire.

Eligible livestock producers must complete a CCC-853 and the required supporting documentation no later than January 30, 2017 for 2016 losses.

Additional Information about LFP, including eligible livestock and fire criteria, is available at your local FSA office or online at: www.fsa.usda.gov.

Multiple Counties are Eligible for Emergency Loans

The following counties were declared a primary disaster due to drought and heat using the streamlined Secretarial Disaster Designation process: Barnstable, Bristol, Essex, Franklin, Hampden, Hampshire, Middlesex, Norfolk, Plymouth, Suffolk, and Worcester. Farmers in Dukes and Nantucket counties also qualify for assistance as their counties are contiguous. Berkshire county has also received a separate declaration for crop losses due to drought.

Under this designation, producers with operations in any primary or contiguous county are eligible to apply for low interest emergency loans.

The streamlined disaster designation process issues a drought disaster declaration when a county has experienced a drought intensity value of at least a D2 (severe drought) level for eight consecutive weeks based on the U.S. Drought Monitor during the crop year.

Emergency loans help producers recover from production and physical losses due to drought, flooding and other natural disasters or quarantine.

Producers have eight months from the date of the declaration to apply for emergency loan assistance. FSA will consider each loan application on its own merits, taking into account the extent of losses, security available and repayment ability. Producers can borrow up to 100 percent of actual production or physical losses, to a maximum amount of $500,000.

For more information about emergency loans, please contact your local FSA office or visit www.fsa.usda.gov.

Tree Assistance Program (TAP) Sign-up

Orchardists and nursery tree growers who experience losses from natural disasters during calendar year 2016 must submit a TAP application either 90 calendar days after the disaster event or the
date when the loss is apparent. TAP was authorized by the Agricultural Act of 2014 as a permanent
disaster program. TAP provides financial assistance to qualifying orchardists and nursery tree
growers to replant or rehabilitate eligible trees, bushes and vines damaged by natural disasters.

Eligible tree types include trees, bushes or vines that produce an annual crop for commercial
purposes. Nursery trees include ornamental, fruit, nut and Christmas trees that are produced for
commercial sale. Trees used for pulp or timber are ineligible.

To qualify for TAP, orchardists must suffer a qualifying tree, bush or vine loss in excess of 15
percent mortality from an eligible natural disaster. The eligible trees, bushes or vines must have
been owned when the natural disaster occurred; however, eligible growers are not required to own
the land on which the eligible trees, bushes and vines were planted.

If the TAP application is approved, the eligible trees, bushes and vines must be replaced within 12
months from the date the application is approved. The cumulative total quantity of acres planted to
trees, bushes or vines, for which a producer can receive TAP payments, cannot exceed 500 acres
annually.

**USDA Climate Hub Building Block: Conservation of Sensitive Lands**

USDA Climate Hubs are working with producers, ranchers, pasture and forest landowners to
effectively partner in ways to help reduce climate change. To aid in this partnership, USDA
established the 10 Building Blocks for Climate Smart Agriculture and Forestry.

One such Building Block is the “Conservation of Sensitive Lands”. The term “sensitive lands”
denotes soils and landscapes that are valuable due to properties (e.g., high organic matter, wet
hydrology) and/or function (e.g., wildlife habitat, filtration, and hydrologic storage). Typical examples
of these soils are organic rich histosols, floodplains, or wetlands along riparian areas. Properties
and functions of these soils are easily disrupted from agricultural or urban land use.

Sensitive lands that are used for agricultural production can be protected by changes in land use
(long-term cover). This reduction in land use intensity can provide multiple environmental benefits,
including substantial GHG mitigation that occurs as carbon is sequestered or preserved in soils and
vegetation. When land is removed from crop production, several activities—including tillage,
nitrogen fertilization, and energy use—are substantially reduced or eliminated, generating additional
GHG mitigation.

FSA and NRCS are committed to identifying these sensitive lands and encouraging landowners,
farmers, and ranchers to voluntarily adopt conservation systems--using financial and technical
assistance--to generate GHG benefits. To read more about Conservation of Sensitive Lands, click
the following link: [http://www.usda.gov/oce/climate_change/building_blocks/4_SensitiveLands.pdf](http://www.usda.gov/oce/climate_change/building_blocks/4_SensitiveLands.pdf)

**USDA Extends Margin Protection Program for Dairy
Enrollment Deadline**

USDA announced that it will extend the deadline for dairy producers to enroll in the Margin
Protection Program (MPP) for Dairy to Dec. 16, 2016, from the previous deadline of Sept. 30. This voluntary dairy safety net program, established by the 2014 Farm Bill, provides financial assistance to participating dairy producers when the margin – the difference between the price of milk and feed costs – falls below the coverage level selected by the producer. A USDA web tool, available at www.fsa.usda.gov/mpptool, allows dairy producers to calculate levels of coverage available from MPP based on price projections.

USDA is an equal opportunity provider, employer and lender.
