Notes from the State Executive Director

ARC PLC Enrollment Open

Enrollment is now open for the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs for the 2020 crop year. Farmers who have not yet enrolled for 2019 can enroll for both 2019 and 2020 during the same visit to your FSA county office. See the 2020 Enrollment for Agriculture Risk Coverage and Price Loss Coverage Programs Now Open article below for more information.

Organic Certification Cost Share Program

Organic producers and handlers have until October 31 to apply for fiscal year 2019 federal funds to assist with the cost of receiving and maintaining organic certification through the Organic Certification Cost Share Program (OCCSP). See the Organic Certification Cost Share Program - Deadline Oct. 31 article below for more information.

Risk Protection for Perennial Fruit and Nut Farmers

Perennial fruit and nut farmers should examine available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the crop sales deadline on November 20. See the Consider NAP Risk Protection Before Crop Sales Deadline article below for more information.

Marketing Assistance Loans and Loan Deficiency Payments

We are now accepting requests for 2019 Marketing Assistance Loans (MALs) and Loan Deficiency Payments (LDPs) for all eligible commodities after harvest. Requests for loans and LDPs shall be made on or before the final availability date for the respective commodities. See the Now Accepting Applications for Marketing Assistance for Financing and Marketing Assistance for Harvested Commodities article below for more information.
2020 Enrollment for Agriculture Risk Coverage and Price Loss Coverage Programs Now Open

Agricultural producers now can enroll in the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs – two U.S. Department of Agriculture (USDA) safety net programs – for the 2020 crop year. Meanwhile, producers who enrolled farms for the 2018 crop year have started receiving more than $1.5 billion for covered commodities for which payments were triggered under such programs.

ARC provides income support payments on historical base acres when actual crop revenue declines below a specified guaranteed level. PLC provides income support payments on historical base acres when the effective price for a covered commodity falls below its reference price. The 2018 Farm Bill reauthorized and updated both programs.

Signup for the 2020 crop year closes June 30, 2020, while signup for the 2019 crop year closes March 15, 2020. Producers who have not yet enrolled for 2019 can enroll for both 2019 and 2020 during the same visit to an FSA county office.

ARC and PLC have options for the farm operator who is actively farming the land as well as the owner of the land. Farm owners also have a one-time opportunity to update PLC payment yields beginning with crop year 2020. If the farm owner and producer visit the FSA county office together, FSA can also update yield information during that visit.

(Continued below.)

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

2018 Crop Year ARC and PLC Payments

FSA began processing payments last week for 2018 ARC-County (ARC-CO) and PLC on covered commodities that met payment triggers on enrolled farms in the 2018 crop year. In addition to the $1.5 billion now in process, FSA anticipates it will issue another $1 billion in November once USDA’s National Agricultural Statistics Service publishes additional commodity prices for the 2018 crop.

Producers who had 2018 covered commodities enrolled in ARC-CO can visit www.fsa.usda.gov/arc-plc for payment rates applicable to their county and each covered commodity. For farms and covered commodities enrolled in 2018 PLC, the following crops met payment triggers: barley, canola, corn, dry peas, grain sorghum, lentils, peanuts, and wheat.

Oats and soybeans did not meet 2018 PLC payment triggers.

2018 PLC payment rates for the following covered commodities have not been determined: crambe, flaxseed, large and small chickpeas, long and medium grain rice, mustard seed, rapeseed, safflower, seed cotton, sesame seed, sunflower seed and temperate Japonica rice.

More Information

For more information on ARC and PLC including two online decision tools that assist producers in making enrollment and election decisions specific to their operations, visit the ARC and PLC webpage.
Organic Certification Cost Share Program - Deadline Oct. 31

USDA’s Farm Service Agency (FSA) announced that organic producers and handlers can apply for federal funds to assist with the cost of receiving and maintaining organic certification through the Organic Certification Cost Share Program (OCCSP). Applications for fiscal 2019 funding are due Oct. 31, 2019.

OCCSP received continued support through the 2018 Farm Bill. It provides cost-share assistance to producers and handlers of agricultural products for the costs of obtaining or maintaining organic certification under the USDA’s National Organic Program. Eligible producers include any certified producers or handlers who have paid organic certification fees to a USDA-accredited certifying agent. Eligible expenses for cost-share reimbursement include application fees, inspection costs, fees related to equivalency agreement and arrangement requirements, travel expenses for inspectors, user fees, sales assessments and postage.

Certified producers and handlers are eligible to receive reimbursement for up to 75 percent of certification costs each year, up to a maximum of $750 per certification scope, including crops, livestock, wild crops, handling and state organic program fees.

More Information

To learn more about organic certification cost share, please visit the OCCSP webpage, view the notice of funds availability on the Federal Register, or contact your FSA county office. To learn more about USDA support for organic agriculture, visit usda.gov/organic.

Disaster Assistance for Michigan Farmers Hurt by 2018, 2019 Disasters

Agricultural producers affected by natural disasters in 2018 and 2019 can apply through the Wildfire and Hurricane Indemnity Program Plus (WHIP+). Sign-up for this U.S. Department of Agriculture (USDA) program began Sept. 11.

WHIP+ Eligibility

WHIP+ will be available for eligible producers who have suffered eligible losses of certain crops, trees, bushes or vines in counties with a Presidential Emergency Disaster Declaration or a Secretarial Disaster Designation (primary counties only) and losses as a result of hurricanes, floods, tornadoes, typhoons, volcanic activity, snowstorms or wildfires that occurred in 2018 or 2019. Producers in counties that did not receive a disaster declaration or designation may still apply for WHIP+ but must provide supporting documentation to establish that the crops were directly affected by a qualifying disaster loss.

A list of counties that received qualifying disaster declarations and designations is available at farmers.gov/recover/whip-plus. Because grazing and livestock losses, other than milk losses, are covered by other disaster recovery programs offered through FSA, those losses are not eligible for WHIP+.

Eligible crops include those for which federal crop insurance or Noninsured Crop Disaster Assistance Program (NAP) coverage is available, excluding crops intended for grazing. A list of crops covered by crop insurance is available through USDA’s Risk Management Agency (RMA) Actuarial Information Browser at webapp.rma.usda.gov/apps/actuarialinformationbrowser.

The WHIP+ payment factor ranges from 75 percent to 95 percent, depending on the level of crop insurance coverage or NAP coverage that a producer obtained for the crop. Producers who did not insure their crops in 2018 or 2019 will receive 70 percent of the expected value of the crop. Insured crops (either crop insurance or NAP coverage) will receive between 75 percent and 95 percent of expected value; those who purchased the highest levels of coverage will receive 95-percent of the expected value.

At the time of sign-up, producers will be asked to provide verifiable and reliable production records. If a producer is unable to provide production records, WHIP+ payments will be determined based on the lower of either the actual loss certified by the producer and determined acceptable by FSA or the county expected yield and county disaster yield. The
county disaster yield is the production that a producer would have been expected to make based on the eligible disaster conditions in the county.

WHIP+ payments for 2018 disasters will be eligible for 100 percent of their calculated value. WHIP+ payments for 2019 disasters will be limited to an initial 50 percent of their calculated value, with an opportunity to receive up to the remaining 50 percent after January 1, 2020, if sufficient funding remains.

Both insured and uninsured producers are eligible to apply for WHIP+. But all producers receiving WHIP+ payments will be required to purchase crop insurance or NAP, at the 60 percent coverage level or higher, for the next two available, consecutive crop years after the crop year for which WHIP+ payments were paid. Producers who fail to purchase crop insurance for the next two applicable, consecutive years will be required to pay back the WHIP+ payment.

Additional information about WHIP+ program eligibility and payment limitations can be found at farmers.gov/recover or by contacting your local USDA Service Center.

Additional Loss Coverage

The Milk Loss Program will provide payments to eligible dairy operations for milk that was dumped or removed without compensation from the commercial milk market because of a qualifying 2018 and 2019 natural disaster. Producers who suffered losses of harvested commodities, including hay, stored in on-farm structures in 2018 and 2019 will receive assistance through the On-Farm Storage Loss Program.

Additionally, producers with trees, bushes or vines can receive both cost-share assistance through FSA’s Tree Assistance Program (TAP) for the cost of replanting and rehabilitating eligible trees and WHIP+ will provide payments based on the loss value of the tree, bush or vine itself. Therefore, eligible producers may receive both a TAP and a 2017 WHIP or WHIP+ payment for the same acreage. In addition, TAP policy has been updated to assist eligible orchardists or nursery tree growers of pecan trees with a tree mortality rate that exceeds 7.5 percent (adjusted for normal mortality) but is less than 15 percent (adjusted for normal mortality) for losses incurred during 2018.

Additionally, the disaster relief measure expanded coverage of the 2017 WHIP to include losses from peach and blueberry crop losses that resulted from extreme cold.

Prevented Planting

Agricultural producers faced significant challenges planting crops in 2019 in many parts of the country. All producers with flooding or excess moisture-related prevented planting insurance claims in calendar year 2019 will receive a prevented planting supplemental disaster (“bonus”) payment equal to 10 percent of their prevented planting indemnity, plus an additional 5 percent will be provided to those who purchased harvest price option coverage.

As under 2017 WHIP, WHIP+ will provide prevented planting assistance to uninsured producers, NAP producers and producers who may have been prevented from planting an insured crop in the 2018 crop year and those 2019 crops that had a final planting date prior to January 1, 2019.

For more information on FSA disaster assistance programs, please contact your local USDA service center or visit farmers.gov/recover. For all available USDA disaster assistance programs, go to USDA’s disaster resources website.

Consider NAP Risk Protection Coverage Before Crop Sales Deadlines

The Farm Service Agency encourages producers to examine available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the applicable crop sales deadline.

Producers are reminded that crops not covered by insurance may be eligible for NAP. Beginning, underserved and limited resource farmers are now eligible for free catastrophic level coverage.
Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent federal crop insurance program is available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

Producers can determine if crops are eligible for federal crop insurance or NAP by visiting https://webapp.rma.usda.gov/apps/ActuarialInformationBrowser2020/CropCriteria.aspx.

The 2018 Farm Bill reinstates higher levels of coverage, from 50 to 65 percent of expected production in 5 percent increments, at 100 percent of the average market price. Producers of organics and crops marketed directly to consumers also may exercise the “buy-up” option to obtain NAP coverage of 100 percent of the average market price at the coverage levels of between 50 and 65 percent of expected production. NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production.

For all coverage levels, the NAP service fee is the lesser of $325 per crop or $825 per producer per county, not to exceed a total of $1,950 for a producer with farming interests in multiple counties.

Deadlines for coverage vary by state and crop. To learn more about NAP visit www.fsa.usda.gov/nap or contact your local USDA Service Center. To find your local USDA Service Centers go to http://offices.usda.gov.

Federal crop insurance coverage is sold and delivered solely through private insurance agents. Agent lists are available at all USDA Service Centers or at USDA’s online Agent Locator: http://prodwebnlb.rma.usda.gov/apps/AgentLocator/#. Producers can use the USDA Cost Estimator, https://ewebapp.rma.usda.gov/apps/costestimator/Default.aspx, to predict insurance premium costs.

Now Accepting Applications for Financing and Marketing Assistance for Harvested Commodities

FSA is now accepting requests for 2019 MALs and LDPs for all eligible commodities after harvest. Requests for loans and LDPs shall be made on or before the final availability date for the respective commodities. Marketing Assistance Loans (MALs) and Loan Deficiency Payments (LDPs) provide financing and marketing assistance for wheat, feed grains, soybeans, and other oilseeds, pulse crops, rice, wool and honey.

MALs provide producers interim financing after harvest to help them meet cash flow needs without having to sell their commodities when market prices are typically at harvest-time lows. A producer who is eligible to obtain a loan, but agrees to forgo the loan, may obtain an LDP if such a payment is available. Marketing loan provisions and LDPs are not available for sugar.

Commodity certificates are available to loan holders who have outstanding nonrecourse loans for wheat, rice, feed grains, pulse crops (dry peas, lentils, large and small chickpeas), wool, soybeans and designated minor oilseeds. These certificates can be purchased at the posted county price (or adjusted world price or national posted price) for the quantity of commodity under loan, and must be immediately exchanged for the collateral, satisfying the loan. MALs redeemed with commodity certificates are not subject to Adjusted Gross Income provisions.

To be considered eligible for an LDP, producers must have form CCC-633EZ Page 1 on file at their local FSA Office before losing beneficial interest in the crop. Pages 2, 3 or 4 of the form must be submitted when payment is requested.

Marketing loan gains (MLGs) and loan deficiency payments (LDPs) are no longer subject to payment limitations, actively engaged in farming and cash-rent tenant rules.

Adjusted Gross Income (AGI) provisions state that a producer whose total applicable three-year average AGI exceeds $900,000 is not eligible to receive an MLG or LDP. Producers must have a valid CCC-941 on file to earn a market gain of LDP. The AGI does not apply to MALs redeemed with commodity certificate exchange.

For more information and additional eligibility requirements, please visit a nearby USDA Service Center or FSA’s website fsa.usda.gov.
