A Message to Our Producers...

While for the most part crops across the state are looking good, unfortunately we've had an interesting string of locally intense weather events recently. Crop losses at this point in the growing season can be devastating for those of you with spring planted crops. Your local USDA Service Center needs your help in keeping track of weather related damages of crops and structures. If you've suffered damages in recent storm events, please report them to your local office. It is important that our agency be able to track this information for possible physical loss and or crop disaster declarations.

Another U of M Extension Women in Ag event is coming soon! On September 13, Extension educators and more will come together at the West Central Research and Outreach Center in Morris, Minnesota to discuss important aspects of farm safety and work/life balance. We encourage you to mark it down on your calendars and
As many of you have seen in recent bulletins from the local offices, several key FSA program deadlines are fast approaching. The deadline to certify acreage for FSA program participation is **July 15**. That's just a few days away! If you have not completed this report with your local office, I encourage you to contact your Service Center as soon as possible to set up an appointment.

National and State elections are on the horizon for this fall but so are FSA County Committee elections. Each County is comprised of Local Administrative Areas (LAAs). Each LAA is represented by one member on the FSA county committee. You can ask in your local office which LAA is up for election this year and please consider nominating yourself for this important job. The last day to file a nomination form at your local USDA Service Center is **August 1**.

Last, but certainly not least, ARC/PLC sign-up must be completed with your local office no later than **August 1** for 2016 program participation. Please work with your local office to ensure your contracts are completed and ready to go.

As always, I wish you all a safe and productive month.

Grant Herfindahl
State Executive Director

**Dairy Producers Can Enroll to Protect Milk Production Margins**

USDA Farm Service Agency (FSA) in Minnesota announced that dairy producers can enroll for 2017 coverage in the Margin Protection Program for Dairy (MPP-Dairy) starting July 1. The voluntary program, established by the 2014 Farm Bill, provides financial assistance to participating dairy producers when the margin – the difference between the price of milk and feed costs – falls below the coverage level selected by the producer.

The Margin Protection Program gives participating dairy producers the flexibility to select coverage levels best suited for their operation. Enrollment began July 1 and ends on Sept. 30, 2016, for coverage in calendar year 2017. Participating farmers will remain in the program through 2018 and pay a minimum $100 administrative fee each year. Producers have the option of selecting a different coverage level during open enrollment each year.

USDA has a web tool to help producers determine the level of coverage under the Margin Protection Program that will provide them with the strongest safety net under a variety of conditions. The online resource, available at [www.fsa.usda.gov/mpptool](http://www.fsa.usda.gov/mpptool), allows dairy farmers to quickly and easily combine unique operation data and other key variables to calculate their coverage needs based on price projections. Producers can also review historical data or estimate future coverage needs, based on data projections. The secure site can be accessed via computer, Smartphone or tablet 24 hours a day, seven days a week.
To complete enrollment, producers must make coverage elections during the enrollment period and pay the annual $100 administrative fee that provides basic catastrophic protection that covers 90 percent of milk production at a $4 margin coverage level. For additional premiums, operations can protect 25 to 90 percent of production history with margin coverage levels from $4.50 to $8, in 50 cent increments. Once enrolled, dairy operations are required to participate through 2018 by making coverage elections each year. Producers can mail the appropriate form to the producer’s administrative county FSA office, along with applicable fees without necessitating a trip to the local FSA office. If electing higher coverage for 2017, dairy producers can either pay the premium in full at the time of enrollment or pay 100 percent of the premium by Sept. 1, 2017. Premium fees may be paid directly to FSA or producers can work with their milk handlers to remit premiums on their behalf.

Also beginning July 1, 2016, FSA will begin accepting applications for intergenerational transfers, allowing program participants who added an adult child, grandchild or spouse to the operation during calendar year 2014 or 2015, or between Jan. 1 and June 30, 2016, to increase production history by the new cows bought into the operation by the new family members. For intergenerational transfers occurring on or after July 1, 2016, notification to FSA must be made within 60 days of purchasing the additional cows.

Dairy operations enrolling in the new program must meet conservation compliance provisions and cannot participate in the Livestock Gross Margin Dairy Insurance Program.

For more information, visit FSA online at www.fsa.usda.gov/dairy or stop by a local FSA office to learn more about the Margin Protection Program. To find a local FSA office in your area, visit http://offices.usda.gov.

**USDA Offers Flood Impacted Minnesota Farmers and Ranchers Immediate Disaster Assistance**

**Farm Service Agency Stands Ready to Assist Agricultural Producers Slammed by Recent Heavy Rains**

Minnesota Farm Service Agency (FSA) reminds farmers and ranchers across the state of federal farm program benefits that may be available to help eligible producers recover from recent heavy rains and flooding.

FSA offers disaster assistance and low-interest loan programs to assist agricultural producers in their recovery efforts following floods or similar qualifying natural disasters. Available programs and loans include:

- **Non-Insured Crop Disaster Assistance Program (NAP)** - provides financial assistance to producers of non-insurable crops when low yields, loss of inventory, or prevented planting occur due to natural disasters (includes native grass for grazing). Eligible producers must have purchased NAP coverage for 2015 crops.

- **Livestock Indemnity Program (LIP)** - offers payments to eligible producers for livestock death losses in excess of normal mortality due to adverse weather. Eligible losses may include those determined by FSA to have been caused by hurricanes, floods, blizzards, wildfires, tropical storms, tornados, lightning, extreme heat, and extreme cold. Producers will be required to provide verifiable documentation of death losses resulting from an eligible adverse weather event and must submit a notice of loss to their local FSA office within 30 calendar days of when the loss of livestock is apparent.
• **Tree Assistance Program (TAP)** – provides assistance to eligible orchardists and nursery tree growers for qualifying tree, shrub and vine losses due to natural disaster.

• **Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program (ELAP)** - provides emergency relief for losses due to feed or water shortages, disease, adverse weather, or other conditions, which are not adequately addressed by other disaster programs. ELAP covers physically damaged or destroyed livestock feed that was purchased or mechanically harvested forage or feedstuffs intended for use as feed for the producer's eligible livestock. In order to be considered eligible, harvested forage must be baled; forage that is only cut, raked or windrowed is not eligible. Producers must submit a notice of loss to their local FSA office within 30 calendar days of when the loss is apparent. ELAP also covers up to 150 lost grazing days in instances when a producer has been forced to remove livestock from a grazing pasture due to floodwaters.

For beekeepers, ELAP covers beehive losses (the physical structure) in instances where the hive has been destroyed by a natural disaster including flooding, high winds and tornadoes.

• **Emergency Loan Program** – Available to producers with agriculture operations located in a county under a primary or contiguous Secretarial Disaster designation. These low interest loans help producers recover from production and physical losses due to drought, flooding.

• **Emergency Conservation Program (ECP)** - provides emergency funding for farmers and ranchers to rehabilitate land severely damaged by natural disasters; includes fence loss.

• **HayNet** - is an Internet-based Hay and Grazing Net Ad Service allowing farmers and ranchers to share 'Need Hay' ads and 'Have Hay' ads online. Farmers also can use another feature to post advertisements for grazing land, specifically ads announcing the availability of grazing land or ads requesting a need for land to graze. [www.fsa.usda.gov/haynet](http://www.fsa.usda.gov/haynet).

To establish or retain FSA program eligibility, farmers and ranchers must report prevented planting and failed acres (crops and grasses). Prevented planting acreage must be reported on form FSA-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and Risk Management Agency (RMA).

**USDA Announces $210 Million to be Invested in Renewable Energy Infrastructure through the Biofuel Infrastructure Partnership**

**21 States and Private Partners Match Federal Funds to Expand Infrastructure and Increase Fuel Options for Consumers**

USDA is partnering with 21 states through the Biofuel Infrastructure Partnership (BIP) to nearly double the number of fueling pumps nationwide that supply renewable fuels to American motorists. In May 2015, USDA announced the availability of $100 million in grants through the BIP, and that to apply states and private partners match the federal funding by a 1:1 ratio. USDA received applications requesting over $130 million, outpacing the $100 million that is available. With the matching commitments by state and private entities, the BIP is investing a total of $210 million to strengthen the rural economy.
The 21 states participating in the BIP include Colorado, Florida, Illinois, Indiana, Iowa, Kansas, Louisiana, Maryland, Michigan, Minnesota, Missouri, Nebraska, North Carolina, North Dakota, Ohio, Pennsylvania, South Dakota, Texas, Virginia, West Virginia, and Wisconsin. The amount awarded to each state is available at: www.fsa.usda.gov/programs-and-services/energy-programs/bip/index.

The final awards being announced today are estimated to expand infrastructure by nearly 5,000 pumps at over 1,400 fueling stations.

A typical gas pump delivers fuel with 10 percent ethanol, which limits the amount of renewable energy that consumers can purchase. The new partnership will increase the number of pumps, storage and related infrastructure that offer higher blends of ethanol, such as E15, E85, and even intermediate combination blends.

USDA’s Office of the Chief Economist just released a comprehensive report on ethanol. The report, titled U.S. Ethanol: An Examination of Policy, Production, Use, Distribution, and Market Interactions, brings clarity to the complex interaction of ethanol production with agricultural markets and government policies. The corn ethanol industry is the largest biofuel producer in the country, with production increasing from about 1.6 billion gallons in 2000 to just over 14 billion gallons in 2014, stimulating economic activity in rural communities. Visit www.usda.gov/oce/reports/energy/EthanolExamination102015.pdf to read the complete report.

BIP is administered by the USDA Farm Service Agency. For more information, visit www.fsa.usda.gov/programs-and-services/energy-programs/index.

**USDA Resumes Incentives to Grow and Harvest Biomass for Energy and Biobased Products**

Farm Service Agency (FSA) announced that incentives resume this month for farmers and foresters who grow and harvest biomass for renewable energy and biobased products. The funds come through the Biomass Crop Assistance Program (BCAP), which was reauthorized by the 2014 Farm Bill.

Facilities seeking to be qualified by USDA to accept biomass can begin enrollment between today, May 23, and June 6, 2016. BCAP provides financial assistance to farmers and ranchers who establish and maintain new crops of energy biomass, or who harvest and deliver forest or agricultural residues to a USDA-approved facility that creates energy or biobased products.

In fiscal year 2016, there is $3 million available for BCAP. A portion of the funds will be provided to two existing BCAP projects in New York and Ohio/Pennsylvania to expand acres planted to shrub willow and giant miscanthus. Farmers and forest landowners may enroll for biomass establishment and maintenance payments for these two projects between June 15 and Sept. 13, 2016.

Also, between June 15 to Aug. 4, 2016, USDA will accept applications from foresters and farmers seeking incentives to remove biomass residues from fields or national forests for delivery to energy generation facilities. The retrieval payments are provided at match of $1 for $1, up to $20 per dry ton. Eligible crops include corn residue, diseased or insect-infested wood materials, or orchard waste.

To learn more about BCAP or to enroll in updates, visit www.fsa.usda.gov/bcap or contact your local FSA county office. To find your local county office, visit http://offices.usda.gov.
Direct Loans
FSA offers direct farm ownership and direct farm operating loans to producers who want to establish, maintain or strengthen their farm or ranch. FSA loan officers process, approve and service direct loans.

Direct farm operating loans can be used to purchase livestock and feed, farm equipment, fuel, farm chemicals, insurance and other costs including family living expenses. Operating loans can also be used to finance minor improvements or repairs to buildings and to refinance some farm-related debts, excluding real estate.

Direct farm ownership loans can be used to purchase farmland, enlarge an existing farm, construct and repair buildings, and to make farm improvements.

The maximum loan amount for both direct farm ownership and operating loans is $300,000 and a down payment is not required. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact your local FSA office for more information or to apply for a direct farm ownership or operating loan.

Guaranteed Loan Program
FSA guaranteed loans allow lenders to provide agricultural credit to farmers who do not meet the lender's normal underwriting criteria. Farmers and ranchers apply for a guaranteed loan through a lender, and the lender arranges for the guarantee. FSA can guarantee up to 95 percent of the loss of principal and interest on a loan. Guaranteed loans can be used for both farm ownership and operating purposes.

Guaranteed farm ownership loans can be used to purchase farmland, construct or repair buildings, develop farmland to promote soil and water conservation or to refinance debt.

Guaranteed operating loans can be used to purchase livestock, farm equipment, feed, seed, fuel, farm chemicals, insurance and other operating expenses.

FSA can guarantee farm ownership and operating loans up to $1,399,000. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact your lender or local FSA farm loan office for more information on guaranteed loans.

Unauthorized Disposition of Grain
If loan grain has been disposed of through feeding, selling or any other form of disposal without prior written authorization from the county office staff, it is considered unauthorized disposition. The financial penalties for unauthorized dispositions are severe and a producer's name will be placed on a loan violation list for a two-year period. Always call before you haul any grain under loan.
Changing Administrative Counties
Producers who wish to transfer their farm records to a different administrative county for Fiscal Year (FY) 2016 must file a request no later than August 1, 2016. Restrictions do apply when transferring to an office other than the county in which the land is physically located. Contact your local FSA office for more information.

Filing CCC-941 Adjusted Gross Income (AGI) Certifications
Many producers have experienced delays in receiving Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) payments, Loan Deficiency Payments (LDPs) and Market Gains on Marketing Assistance Loans (MALs) because they have not filed form CCC-941, Adjusted Gross Income Certification. LDPs will not be paid until all eligible producers, including landowners who share in the crop, have filed a valid CCC-941.

Producers without a valid CCC-941 certifying their compliance with the average adjusted gross income provisions will not receive payments that have been processed. All farm operator/tenants/owners who have not filed a CCC-941 and have pending payments should IMMEDIATELY file the form with their recording county FSA office. Farm operators and tenants are encouraged to ensure that their landowners have filed the form. FSA has been issuing 2015 LDPs and Market Gains and will be issuing potential 2015 ARC/PLC payments in October.

FSA can accept the CCC-941 for 2015 and 2016. Unlike the past, producers must have the CCC-941 certifying their AGI compliance before any payments can be issued.

USDA is an equal opportunity provider, employer and lender. To file a complaint of discrimination, write: USDA, Office of the Assistant Secretary for Civil Rights, Office of Adjudication, 1400 Independence Ave., SW, Washington, DC 20250-9410 or call (866) 632-9992 (Toll-free Customer Service), (800) 877-8339 (Local or Federal relay), (866) 377-8642 (Relay voice users).
