State Executive Director:
Joe Martin

Executive Officer:
Michelle Page

The Clock is Ticking...

As you may be aware, we have some very important deadlines coming up in terms of farm program participation.

Prepare for county offices being busy, and don't be surprised to get a call from the county office wanting to schedule an appointment. Appointment scheduling will be critical for the Agency to manage the anticipated workload over the coming weeks. We do not anticipate deadlines being extended, so please be proactive and visit your county office.

ARC/PLC Election

March 16 is the deadline for making your program election, that only leaves us a little over 30 working days to sign up over 90,000 farms in the State. You **MUST** make an election, or you will be

Division Leaders:

Cassie Buck
Brian Hartman
Angela Hanson

State Committee:

Scott Winslow - Chair
Kurt Blomgren
Jim Kukowski
Jay Nord
Mike Yost

ineligible for any future payments. You will NOT be defaulted into a program.

If you were unable to attend one of the 46 informational meetings that were held jointly with Minnesota Extension Service, you can view a webinar that has been recorded. The webinar can be found at <https://farmbill.umn.edu/>.

Conservation Reserve Program

February 28 is the deadline to submit land offers for the General CRP. Please contact the county office to schedule an appointment if you have land that you may be interested in offering into the program.

WHIP+ Disaster Program

You may have heard about the new WHIP+ program that pays farmers for crop losses due to “flooding”, “excessive moisture” and “quality losses” on 2018 and 2019 crop years. County offices are prepared to accept applications and make payments related to flood losses in 2018 and 2019. We are still awaiting national guidance in terms of handling “excessive moisture” and “quality loss” issues, so we are unable to compensate for those losses currently. There is no deadline for the WHIP+ program, so please be patient as more details become available.

Due to high workload in some offices over the next several weeks related to ARC/PLC sign-up and CRP, you may be asked to schedule a follow up visit with the office to work on WHIP+.

- SED Joe Martin

USDA Safety Net Program Enrollment for 2019 and 2020

Agricultural producers now can enroll in the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs – two U.S. Department of Agriculture (USDA) safety net programs – for the 2019 and 2020 crop year.

ARC provides income support payments on historical base acres when actual crop revenue declines below a specified guaranteed level. PLC provides income support payments on historical base acres when the effective price for a covered commodity falls below its reference price. The 2018 Farm Bill reauthorized and updated both programs.

Signup for the 2019 crop year closes March 15, 2020, while signup for the 2020 crop year closes June 30, 2020. Producers who have not yet enrolled for 2019 can enroll for both 2019 and 2020 during the same visit to an FSA county office.

ARC and PLC have options for the farm operator who is actively farming the land as well as the owner of the land. Farm owners also have a one-time opportunity to update PLC payment yields

beginning with crop year 2020. If the farm owner and producer visit the FSA county office together, FSA can also update yield information during that visit.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

Livestock Losses

The Livestock Indemnity Program (LIP) provides assistance to eligible producers for livestock deaths in excess of normal mortality caused by adverse weather, disease and attacks by animals reintroduced into the wild by the federal government or protected by federal law.

LIP compensates livestock owners and contract growers for livestock death losses in excess of normal mortality due to adverse weather, including losses due to hurricanes, floods, blizzards, wildfires, extreme heat or extreme cold.

For disease losses, FSA county committees can accept veterinarian certifications that livestock deaths were directly related to adverse weather and unpreventable through good animal husbandry and management.

For 2019 livestock losses, eligible livestock owners must file a notice within 30 calendar days of when the loss is first apparent.

Participants must provide the following supporting documentation to their local FSA office no later than 60 calendar days after the end of the calendar year in which the eligible loss condition occurred.

- Proof of death documentation
- Copy of grower's contracts
- Proof of normal mortality documentation

USDA has established normal mortality rates for each type and weight range of eligible livestock, i.e. Adult Beef Cow = 1.5% and Non-Adult Beef Cattle (less than 400 pounds) = 5%. These established percentages reflect losses that are considered expected or typical under "normal" conditions.

In addition to filing a notice of loss, producers must also submit an application for payment by March 1, 2020.

Additional Information about LIP is available at your local FSA office or online at: www.fsa.usda.gov.

Emergency Assistance for Livestock, Honeybee, and Farm-Raised Fish Program (ELAP)

The Emergency Assistance for Livestock, Honeybees and Farm-Raised Fish Program (ELAP) provides emergency assistance to eligible livestock, honeybee, and farm-raised fish producers who

have losses due to disease, adverse weather or other conditions, such as blizzards and wildfires, not covered by other agricultural disaster assistance programs.

Eligible livestock losses include grazing losses not covered under the Livestock Forage Disaster Program (LFP), loss of purchased feed and/or mechanically harvested feed due to an eligible adverse weather event, additional cost of transporting water because of an eligible drought and additional cost associated with gathering livestock to treat for cattle tick fever.

Eligible honeybee losses include loss of purchased feed due to an eligible adverse weather event, cost of additional feed purchased above normal quantities due to an eligible adverse weather condition, colony losses in excess of normal mortality due to an eligible weather event or loss condition, including CCD, and hive losses due to eligible adverse weather.

Eligible farm-raised fish losses include death losses in excess of normal mortality and/or loss of purchased feed due to an eligible adverse weather event.

Producers who suffer eligible livestock, honeybee, or farm-raised fish losses from Oct. 1, 2018 to Dec. 31, 2019 must file:

- A notice of loss within 30 calendar days after the loss is apparent.
- An application for payment by Jan. 30, 2020

The following ELAP Fact Sheets (by topic) are available online:

- [ELAP for Farm-Raised Fish Fact Sheet](#)
- [ELAP for Livestock Fact Sheet](#)
- [ELAP for Honeybees Fact Sheet](#)

To view these and other FSA program fact sheets, visit the FSA fact sheet web page at www.fsa.usda.gov/factsheets.

USDA Announces Signup for Conservation Reserve Program

USDA opened signup for the Conservation Reserve Program (CRP) on December 9, 2019. The deadline for agricultural producers to sign up for general CRP is February 28, 2020, while signup for continuous CRP is ongoing.

Farmers and ranchers who enroll in CRP receive a yearly rental payment for voluntarily establishing long-term, resource-conserving plant species, such as approved grasses or trees (known as “covers”) to control soil erosion, improve water quality and develop wildlife habitat on marginally productive agricultural lands.

CRP has 22 million acres enrolled, but the 2018 Farm Bill lifted the cap to 27 million acres. This means farmers and ranchers have a chance to enroll in CRP for the first time or continue their participation for another term.

By enrolling in CRP, producers are improving water quality, reducing soil erosion, and restoring habitat for wildlife. This in turn spurs hunting, fishing, recreation, tourism, and other economic development across rural America.

CRP Enrollment Options

General Signup

CRP general signup will be held annually. The competitive general signup will now include increased opportunities for enrollment of wildlife habitat through the State Acres For Wildlife Enhancement (SAFE) initiative.

Continuous Signup

While some practices under SAFE will remain available through continuous signup, CRP continuous signup will focus primarily on water quality with the Clean Lakes, Estuaries, and Rivers (CLEAR) Initiative. The 2018 Farm Bill prioritizes water quality practices such as contour grass strips, filter strips, riparian buffers, wetlands and a new prairie strip.

USDA will also be working with Conservation Reserve Enhancement Program (CREP) partners to relaunch CREP continuous options in each state under new statutory provisions. CREP will continue to target high-priority local, state or regional conservation concerns.

Grasslands Signups

CRP Grasslands signup helps landowners and operators protect grassland, including rangeland, and pastureland and certain other lands while maintaining the areas as grazing lands. A separate CRP Grasslands signup will be offered each year following general signup.

Pilot Programs

Later in 2020, (FSA will roll out pilot programs within CRP: CLEAR 30, which allows contracts expiring with CLEAR practices to be reenrolled in 30-year contracts and in the Soil Health and Income Protection Program (SHIPP) in the prairie pothole region. More information on these programs will be announced in the new year.

Land Transition

The CRP Transition Incentives Program (TIP) is an option for producers interested in transitioning land to a beginning farmer or rancher or a member of a socially disadvantaged group to return land to production for sustainable grazing or crop production. CRP contract holders no longer need to be a retired or retiring owner or operator to transition their land. TIP participants may have a lease less than five years with an option to purchase, and they have two years before the end of the CRP contract to make conservation and land improvements.

Previously Expired Land

Land enrolled in CRP under a 15-year contract that expired in September 2017, 2018 or 2019, may be eligible for enrollment if there was no opportunity for re-enrollment and the practice under the expired contract has been maintained.

CRP Rates and Payments

FSA recently posted updated soil rental rates for CRP. County average rates are posted on the [CRP Statistics webpage](#). Soil rental rates are statutorily prorated at 90 percent for continuous signup and 85 percent for general signup. The rental rates will be assessed annually. Under

continuous signup, producers also receive incentives, including a signup incentive payment and a practice incentive payment.

To enroll in CRP, contact your local FSA county office or visit fsa.usda.gov/crp. To locate your local FSA office, visit farmers.gov/service-locator.

Maintaining the Quality of Farm-Stored Loan Grain

Bins are ideally designed to hold a level volume of grain. When bins are overfilled and grain is heaped up, airflow is hindered and the chance of spoilage increases.

Producers who take out marketing assistance loans and use the farm-stored grain as collateral should remember that they are responsible for maintaining the quality of the grain through the term of the loan.

Unauthorized Disposition of Grain

If loan grain has been disposed of through feeding, selling or any other form of disposal without prior written authorization from the county office staff, it is considered unauthorized disposition. The financial penalties for unauthorized dispositions are severe and a producer's name will be placed on a loan violation list for a two-year period. Always call before you haul any grain under loan.

Supervised Credit

Farm Service Agency (FSA) Farm Loan programs are considered supervised credit. Unlike loans from a commercial lender, FSA loans are intended to be temporary in nature. Therefore, it is our goal to help you graduate to commercial credit, and our farm loan staff is available to help borrowers through training and credit counseling.

The FSA team will help borrowers identify their goals to ensure financial success. Through this process, FSA staff will advise borrowers in developing strategies and a plan to meet your operation's goals and graduate to commercial credit. Ultimately, the borrower is responsible for the success of the farming operation, but FSA's staff will help in an advisory role to provide the tools necessary to help you achieve your operational goals and manage your finances.

For more information on FSA farm loan programs, visit www.fsa.usda.gov.

Communication is the Key in Lending

Farm Service Agency (FSA) is committed to providing our farm loan borrowers the tools necessary to be a success. A part of ensuring this success is providing guidance and counsel from the loan application process through the borrower's graduation to commercial lending institutions. While it is FSA's commitment to advise borrowers as they identify goals and evaluate progress, it is crucial for borrowers to communicate with their farm loan staff when changes occur. It is the borrower's responsibility to alert FSA to any of the following:

- Any proposed or significant changes in the farming operation;
- Any significant changes to family income or expenses;
- The development of problem situations;
- Any losses or proposed significant changes in security

In addition, if a farm loan borrower cannot make payments to suppliers, other creditors, or FSA on time, contact your farm loan staff immediately to discuss loan servicing options.

For more information on FSA farm loan programs, visit www.fsa.usda.gov.

Policy Updates for Acreage Reporting

The USDA Farm Service Agency (FSA) recently made several policy updates for acreage reporting for cover crops, revising intended use, late-filed provisions, grazing allotments as well as updated the definitions of “idle” and “fallow.”

Reporting Cover Crops:

FSA made changes to the types of cover crops. Cover crop types can be chosen from the following four categories:

- **Cereals and other grasses** - Any cover crop that is classified as a grass plant or cereal grain, and would include, but not be limited to, the following cover crops: cereal rye, wheat, barley, oats, black oats, triticale, annual ryegrass, pearl millet, foxtail millet (also called German, Italian or Hungarian millet), sorghum sudan grass, sorghum and other millets and grasses.
- **Legumes** - Any cover crop that is classified as a legume, including, but not limited to, clovers, vetches, peas, sun hemp, cowpeas, lentils and other legumes.
- **Brassicas and other broadleaves** - Any cover crop that is classified as a non-legume broadleaf, including, but not limited to, Brassicas such as radishes, turnips, canola, rapeseed, oilseed rape, and mustards, as well as other broadleaf plants such as phacelia, flax, sunflower, buckwheat, and safflower.
- **Mixtures** - Mixes of two or more cover crop species planted at the same time, for example, oats and radishes.

If the cover crop is harvested for any use other than forage or grazing and is not terminated according to policy guidelines, then that crop will no longer be considered a cover crop and the acreage report must be revised to reflect the actual crop.

Permitted Revision of Intended use After Acreage Reporting Date:

New operators or owners who pick up a farm after the acreage reporting deadline has passed and the crop has already been reported on the farm, have 30 days to change the intended use. Producer share interest changes alone will not allow for revisions to intended use after the acreage reporting date. The revision must be performed by either the acreage reporting date or within 30 calendar days from the date when the new operator or owner acquired the lease on land, control of the land or ownership and new producer crop share interest in the previously reported crop acreage. Under this policy, appropriate documentation must be provided to the County Committee’s satisfaction to determine that a legitimate operator or ownership and producer crop share interest change occurred to permit the revision.

Acreage Reports:

In order to maintain program eligibility and benefits, producers must timely file acreage reports. Failure to file an acreage report by the crop acreage reporting deadline may result in ineligibility for future program benefits. FSA will not accept acreage reports provided more than a year after the acreage reporting deadline.

Reporting Grazing Allotments:

FSA offices can now accept acreage reports for grazing allotments. Producers will use form "FSA-578" to report grazing allotments as animal unit months (AUMs) using the "Reporting Unit" field. The local FSA office will need the grazing period start and end date and the percent of public land.

Definitions of Terms

FSA defines "idle" as cropland or a balance of cropland within a Common Land Unit (CLU) (field/subfield) which is not planted or considered not planted and does not meet the definition of fallow or skip row. For example, the balance of a field that could not be planted due to moisture or a turn area that is not planted would be reported as idle.

Fallow is considered unplanted cropland acres which are part of a crop/fallow rotation where cultivated land that is normally planted is purposely kept out of production during a regular growing season. Resting the ground in this manner allows it to recover its fertility and conserve moisture for crop production in the next growing season.

Reconstitutions

When changes in farm ownership or operation take place, a farm *reconstitution* is necessary. The reconstitution — or recon — is the process of combining or dividing farms or tracts of land based on the farming operation.

To be effective for the current Fiscal Year (FY), farm combinations and farm divisions must be requested by **August 1 of the FY** for farms subject to the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) program. A reconstitution is considered to be requested when all:

- of the required signatures are on FSA-155
- other applicable documentation, such as proof of ownership, is submitted.

Total Conservation Reserve Program (CRP) and non-ARC/PLC farms may be reconstituted at any time.

The following are the different methods used when doing a farm recon:

Estate Method — the division of bases, allotments and quotas for a parent farm among heirs in settling an estate;

Designation of Landowner Method — may be used when (1) part of a farm is sold or ownership is transferred; (2) an entire farm is sold to two or more persons; (3) farm ownership is transferred to two or more persons; (4) part of a tract is sold or ownership is transferred; (5) a tract is sold to two or more persons; or (6) tract ownership is transferred to two or more persons. In order to use this

method the land sold must have been owned for at least three years, or a waiver granted, and the buyer and seller must sign a Memorandum of Understanding;

DCP Cropland Method — the division of bases in the same proportion that the DCP cropland for each resulting tract relates to the DCP cropland on the parent tract;

Default Method — the division of bases for a parent farm with each tract maintaining the bases attributed to the tract level when the reconstitution is initiated in the system.

USDA Fruit, Vegetable and Wild Rice Planting Rules Unchanged from Previous Farm Bill

Farm Service Agency (FSA) has announced fruit, vegetable and wild rice provisions that affect producers who intend to participate in certain programs authorized by the Agricultural Act of 2014 as amended by the Agricultural Improvement Act of 2018.

Producers who intend to participate in the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs are subject to an acre-for-acre payment reduction when fruits and nuts, vegetables or wild rice are planted on the payment acres of a farm. Payment reductions do not apply to mung beans, dry peas, lentils or chickpeas. Planting fruits, vegetables or wild rice on acres that are not considered payment acres will not result in a payment reduction. Farms that are eligible to participate in ARC/PLC but are not enrolled for a particular year may plant unlimited fruits, vegetables and wild rice for that year but will not receive ARC/PLC payments for that year. Eligibility for succeeding years is not affected.

Planting and harvesting fruits, vegetables and wild rice on ARC/PLC acreage is subject to the acre-for-acre payment reduction when those crops are planted on more than 15 percent of the base acres of a farm enrolled in ARC using the county coverage or PLC, or more than 35 percent of the base acres of a farm enrolled in ARC using the individual coverage.

Fruits, vegetables and wild rice that are planted in a double-cropping practice will not cause a payment reduction if the farm is in a double-cropping region as designated by the USDA's Commodity Credit Corporation.
