Minnesota FSA Updates

Minnesota FSA Hosting COC Webinar Today

Do you or someone you know have a passion to support fellow farmers? Consider a nomination for your local USDA FSA County Office Committee (COC). To help you learn more the U.S. Department of Agriculture's (USDA) Farm Service Agency (FSA) in Minnesota is hosting a webinar on COC nominations and elections that is open to the public **Today, July 16, at 2 p.m.** The nomination period for FSA's annual county committee elections began June 15 and continues through Aug. 1, 2020.

You can join the Minnesota FSA COC Election webinar through the following link or call in information:

[Click HERE to join Minnesota Webinar](#)

UMN Women in Ag Network Hosting Summer Tour

The [UMN Women in Ag Network](#) (WAGN) will be hosting a virtual summer tour on Wednesday, July 29 from 1:00-2:00 pm Central. This event will feature tours of the CW Pork Farm and Tersteeg Farms, a discussion on the impacts of COVID-19 on the pork industry, and opportunities to hear about industrial hemp processing from Prairie PROducers. Wanda Patsche, a Minnesota hog farmer and author of Minnesota Farm Living, will be joining the tour from her hog farm to highlight pork production in Minnesota and the impacts of processing plant closure for hog producers. Breanna Bauman, a hemp farmer, and Nicole Johnson, manager at Prairie PROducers, will discuss the process of turning hemp into industrial fibers and their experiences in niche marketing. This is a free event, to register participants can visit z.umn.edu/2020WAGN-SummerTour. To learn more about the Women in Ag Network, please visit z.umn.edu/WAGN.

To find contact information for your local office go to:
www.fsa.usda.gov/mn

Additional Commodities Eligible for Coronavirus Food Assistance Program

U.S. Secretary of Agriculture Sonny Perdue announced an initial list of additional commodities that have been added to the Coronavirus Food Assistance Program (CFAP), and that the U.S. Department of Agriculture (USDA) made other adjustments to the program based on comments received from agricultural producers and organizations and review of market data. Producers will be able to submit applications that include these commodities on Monday, July 13, 2020. USDA's Farm Service Agency (FSA) is accepting through Aug. 28, 2020, applications for CFAP, which helps offset price declines and additional marketing costs because of the coronavirus pandemic. USDA expects additional eligible commodities to be announced in the coming weeks.

USDA collected comments and supporting data for consideration of additional commodities through June 22, 2020.

Changes to CFAP include:

- Adding the following commodities: alfalfa sprouts, anise, arugula, basil, bean sprouts, beets, blackberries, Brussels sprouts, celeriac (celery root), chives, cilantro, coconuts, collard greens, dandelion greens, greens (others not listed separately), guava, kale greens, lettuce – including Boston, green leaf, Lolla Rossa, oak leaf green, oak leaf red and red leaf – marjoram, mint, mustard, okra, oregano, parsnips, passion fruit, peas (green), pineapple, pistachios, radicchio, rosemary, sage, savory, sorrel, fresh sugarcane, Swiss chard, thyme and turnip top greens.
- Expanding for seven currently eligible commodities – apples, blueberries, garlic, potatoes, raspberries, tangerines and taro – CARES Act funding for sales losses because USDA found these commodities had a 5 percent or greater price decline between mid-January and mid-April as a result of the COVID-19 pandemic. Originally, these commodities were only eligible for marketing adjustments.
- Determining that peaches and rhubarb no longer qualify for payment under the CARES Act sales loss category.
- Correcting payment rates for apples, artichokes, asparagus, blueberries, cantaloupes, cucumbers, garlic, kiwifruit, mushrooms, papaya, peaches, potatoes, raspberries, rhubarb, tangerines and taro.

Additional details can be found in the Federal Register in the [Notice of Funding Availability \(NOFA\)](#) and [Final Rule Correction](#) and at www.farmers.gov/cfap.

Producers have several options for applying to the CFAP program:

1. Using an online portal, accessible at farmers.gov/cfap, allows producers with secure USDA login credentials—known as eAuthentication—to certify eligible commodities online, digitally sign applications and submit directly to the local USDA Service Center. New commodities will be available in the system on July 13, 2020.
2. Completing the application form using our CFAP Application Generator and Payment Calculator found at farmers.gov/cfap. This Excel workbook allows customers to input information specific to their operation to determine estimated payments and populate the application form, which can be printed, then signed and submitted to their local USDA Service Center. An updated version with the new commodities will be available on the website on July 13, 2020.
3. Downloading the AD-3114 application form from farmers.gov/cfap and manually completing the form to submit to the local USDA Service Center by mail, electronically or by hand delivery to an office drop box. In some limited cases, the office may be open for in-person business by appointment. Visit farmers.gov/coronavirus/service-center-status to check the status of your local office.

USDA Service Centers can also work with producers to complete and securely transmit digitally signed applications through two commercially available tools: Box and OneSpan. Producers who are interested in digitally signing their applications should notify their local service centers when calling to discuss the CFAP application process. You can learn more about these solutions at farmers.gov/mydocs.

Getting Help from FSA

New customers seeking one-on-one support with the CFAP application process can call 877-508-8364 to speak directly with a USDA employee ready to offer general assistance. This is a recommended first step before a producer engages the team at the FSA county office at their local USDA Service Center.

All other eligibility forms, such as those related to adjusted gross income and payment information, can be downloaded from farmers.gov/cfap. For existing FSA customers, these documents are likely already on file.

USDA Offers Flood Impacted Minnesota Farmers and Ranchers Immediate Disaster Assistance

Farm Service Agency Stands Ready to Assist Agricultural Producers Slammed by Recent Heavy Rains

Minnesota Farm Service Agency (FSA) reminds farmers and ranchers across the state of federal farm program benefits that may be available to help eligible producers recover from recent heavy rains and flooding.

FSA offers disaster assistance and low-interest loan programs to assist agricultural producers in their recovery efforts following floods or similar qualifying natural disasters. Available programs and loans include:

- **Non-Insured Crop Disaster Assistance Program (NAP)** - provides financial assistance to producers of non-insurable crops when low yields, loss of inventory, or prevented planting occur due to natural disasters (includes native grass for grazing). Eligible producers must have purchased NAP coverage for 2019 crops.

- **Livestock Indemnity Program (LIP)** - offers payments to eligible producers for livestock death losses in excess of normal mortality due to adverse weather. Eligible losses may include those determined by FSA to have been caused by hurricanes, floods, blizzards, wildfires, tropical storms, tornados lightening, extreme heat, and extreme cold. Producers will be required to provide verifiable documentation of death losses resulting from an eligible adverse weather event and must submit a notice of loss to their local FSA office within 30 calendar days of when the loss of livestock is apparent.
- **Tree Assistance Program (TAP)** – provides assistance to eligible orchardists and nursery tree growers for qualifying tree, shrub and vine losses due to natural disaster.
- **Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program (ELAP)** - provides emergency relief for losses due to feed or water shortages, disease, adverse weather, or other conditions, which are not adequately addressed by other disaster programs. ELAP covers physically damaged or destroyed livestock feed that was purchased, or mechanically harvested forage or feedstuffs intended for use as feed for the **producer's** eligible livestock. In order to be considered eligible, harvested forage must be baled; forage that is only cut, raked or windrowed is not eligible. Producers must submit a notice of loss to their local FSA office within 30 calendar days of when the loss is apparent. For beekeepers, ELAP covers beehive losses (the physical structure) in instances where the hive has been destroyed by a natural disaster including flooding, high winds and tornadoes. For honeybee losses, producers must notify FSA within 15 calendar days of when a loss occurs or from when the loss is apparent. ELAP also covers up to 150 lost grazing days in instances when a producer has been forced to remove livestock from a grazing pasture due to floodwaters.
- **Emergency Loan Program** – Available to producers with agriculture operations located in a county under a primary or contiguous **Secretarial Disaster designation**. These low interest loans help producers recover from production and physical losses due to drought, flooding.
- **Emergency Conservation Program (ECP)** - provides emergency funding for farmers and ranchers to rehabilitate land severely damaged by natural disasters; includes fence loss.

To establish or retain FSA program eligibility, farmers and ranchers must report prevented planting and failed acres (crops and grasses). Prevented planting acreage must be reported on form *FSA-576, Notice of Loss*, no later than 15 calendar days after the final planting date as established by FSA and Risk Management Agency (RMA).

For more information on disaster assistance programs and loans visit fsa.usda.gov/ or contact your local FSA Office. To find your local FSA county office, visit offices.usda.gov.

How to Document Flood Losses

Producers who suffered excessive livestock death losses and grazing or feed losses due to recent floods may be eligible for disaster assistance programs through the USDA Farm Service Agency (FSA).

The Livestock Indemnity Program (LIP) offers payments to eligible producers for livestock death losses in excess of normal mortality due to adverse weather and the Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program (ELAP) provides emergency relief for losses due to feed or water shortages, disease, adverse weather, or other conditions, which are not adequately addressed by other disaster programs.

To participate in LIP, producers will be required to provide verifiable documentation of death losses resulting from an eligible adverse weather event and must submit a notice of loss to their local FSA office within 30 calendar days of when the loss of livestock is apparent. To participate in ELAP, producers must submit a notice of loss to their local FSA office within 30 calendar days of when the loss is apparent and should maintain documentation and receipts.

Producers should record all pertinent information regarding livestock losses due to the eligible adverse weather or loss condition, including:

- Documentation of the number, kind, type, and weight range of livestock that have died, supplemented if possible by photographs or video records of ownership and losses;
- Rendering truck receipts by kind, type and weight - important to document prior to disposal;
- Beginning inventory supported by birth recordings or purchase receipts;
- Documentation from Animal Plant Health Inspection Service, Department of Natural Resources, or other sources to substantiate eligible death losses due to an eligible loss condition;
- Documentation that livestock were removed from grazing pastures due to an eligible adverse weather or loss condition;
- Costs of transporting livestock feed to eligible livestock, such as receipts for equipment rental fees for hay lifts and snow removal;
- Feed purchase receipts if feed supplies or grazing pastures are destroyed;

For more information on these programs and documentation requirements, visit fsa.usda.gov/disaster or contact your local FSA office.

Preauthorized Debit Available for Farm Loan Borrowers

USDA Farm Service Agency (FSA) has implemented pre-authorized debit (PAD) for Farm Loan Program (FLP) borrowers. PAD is a voluntary and alternative method for making weekly, bi-weekly, monthly, quarterly, semi-annual or annual payments on loans.

PAD payments are pre-authorized transactions that allow the National Financial and Accounting Operations Center (NFAOC) to electronically collect loan payments from a customer's account at a financial institution.

PAD may be useful for borrowers who use nonfarm income from regular wages or salary to make payments on loans or adjustment offers or for payments from seasonal produce stands. PAD can only be established for future payments.

To request PAD, customers, along with their financial institution, must fill out form RD 3550-28. This form has no expiration date, but a separate form RD 3550-28 must be completed for each loan to which payments are to be applied. A fillable form can be accessed on the USDA Rural Development (RD) website at rd.usda.gov/publications/regulations-guidelines. Click forms and search for "Form 3550-28."

If you have a "filter" on the account at your financial institution, you will need to provide the financial institution with the following information: Origination ID: 1220040804, Agency Name: USDA RD DCFO.

PAD is offered by FSA at no cost. Check with your financial institution to discuss any potential cost. Preauthorized debit has no expiration date, but you can cancel at any time by submitting a written request to your local FSA office. If a preauthorized debit agreement receives three payment rejections within a three-month period, the preauthorized debt agreement will be cancelled by FSA. The payment amount and due date of your loan is not affected by a cancellation of preauthorized debit. You are responsible to ensure your full payment is made by the due date.

For more information about PAD, contact your local FSA office. To find a local FSA office, visit offices.usda.gov

Cover Crop Guidelines

Recently the Farm Service Agency (FSA), Natural Resources Conservation Service (NRCS) and Risk Management Agency (RMA) worked together to develop consistent, simple and a flexible policy for cover crop practices.

The termination and reporting guidelines were updated for cover crops.

Termination:

The cover crop termination guidelines provide the timeline for terminating cover crops, are based on zones and apply to non-irrigated cropland. To view the zones and additional guidelines visit nrcs.usda.gov/wps/portal/nrcs/main/national/landuse/crops/ and click "Cover Crop Termination Guidelines."

Reporting:

The intended use of cover only will be used to report cover crops. This includes crops

that were terminated by tillage and reported with an intended use code of green manure. An FSA policy change will allow cover crops to be hayed and grazed. Program eligibility for the cover crop that is being hayed or grazed will be determined by each specific program.

If the crop reported as cover only is harvested for any use other than forage or grazing and is not terminated properly, then that crop will no longer be considered a cover crop.

Crops reported with an intended use of cover only will not count toward the total cropland on the farm. In these situations a subsequent crop will be reported to account for all cropland on the farm.

Cover crops include grasses, legumes, and forbs, for seasonal cover and other conservation purposes. Cover crops are primarily used for erosion control, soil health improvement, and water quality improvement. The cover crop may be terminated by natural causes, such as frost, or intentionally terminated through chemical application, crimping, rolling, tillage or cutting. A cover crop managed and terminated according to NRCS Cover Crop Termination Guidelines is **not** considered a crop for crop insurance purposes.

Cover crops can be planted: with no subsequent crop planted, before a subsequent crop, after prevented planting acreage, after a planted crop, or into a standing crop.

CLEAR30 the first USDA program to offer 30-year Signup

The U.S. Department of Agriculture's Farm Service Agency (FSA) will open signup this summer for CLEAR30, a new pilot program that offers farmers and landowners an opportunity to enroll in a 30-year Conservation Reserve Program (CRP) contract. This pilot is available to farmers and landowners with expiring water-quality practice CRP contracts in the Great Lakes and Chesapeake Bay regions. The program signup period is July 6 to Aug. 21, 2020.

The pilot is available in Delaware, Illinois, Indiana, Maryland, Michigan, Minnesota, New York, Ohio, Pennsylvania, Virginia, West Virginia and Wisconsin. Eligible producers must have expiring Clean Lakes, Estuaries and Rivers (CLEAR) initiative contracts, including continuous CRP Cropland contracts with water-quality practices or marginal pasturelands CRP contracts devoted to riparian buffers, wildlife habitat buffers or wetland buffers.

The longer contracts will help ensure that practices remain in place for 30 years, which will help reduce sediment and nutrient runoff and help prevent algal blooms. Traditional CRP contracts run from 10 to 15 years.

Annual rental payment for landowners who enroll in CLEAR30 will be equal to the current Continuous CRP annual payment rate plus an inflationary adjustment of 27.5 percent, since CLEAR30 contracts will be for 30 years – much longer than the 10 to 15-year contracts for Continuous CRP offers.

Another unique program feature is that FSA will help producers maintain CLEAR30 contract acreage.

USDA Service Centers are open for business by phone appointment only, and field work will continue with appropriate social distancing. While program delivery staff will continue to come into the office, they will be working with producers by phone and using online tools whenever possible. Anyone wishing to conduct business with the FSA, Natural Resources Conservation Service or any other Service Center agency is required to call to schedule a phone appointment. More information can be found at farmers.gov/coronavirus.

Farm Reconstitutions

When changes in farm ownership or operation take place, a farm *reconstitution* is necessary. The reconstitution — or recon — is the process of combining or dividing farms or tracts of land based on the farming operation.

To be effective for the current Fiscal Year (FY), farm combinations and farm divisions must be requested by **August 1 of the FY** for farms subject to the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) program. A reconstitution is considered to be requested when all:

- of the required signatures are on FSA-155
- other applicable documentation, such as proof of ownership, is submitted.

Total Conservation Reserve Program (CRP) and non-ARC/PLC farms may be reconstituted at any time.

The following are the different methods used when doing a farm recon:

Estate Method — the division of bases, allotments and quotas for a parent farm among heirs in settling an estate;

Designation of Landowner Method — may be used when (1) part of a farm is sold or ownership is transferred; (2) an entire farm is sold to two or more persons; (3) farm ownership is transferred to two or more persons; (4) part of a tract is sold or ownership is transferred; (5) a tract is sold to two or more persons; or (6) tract ownership is transferred to two or more persons. In order to use this method the land sold must have been owned for at least three years, or a waiver granted, and the buyer and seller must sign a Memorandum of Understanding;

DCP Cropland Method — the division of bases in the same proportion that the DCP cropland for each resulting tract relates to the DCP cropland on the parent tract;

Default Method — the division of bases for a parent farm with each tract maintaining the bases attributed to the tract level when the reconstitution is initiated in the system.

Borrower Training

Borrower training is available for all Farm Service Agency customers. This training is required for all direct loan applicants, unless the applicant has a waiver issued by the agency.

Borrower training includes instruction in production and financial management. The purpose is to help the applicant develop and improve skills that are necessary to successfully operate a farm and build equity in the operation. It aims to help the producer become financially successful. Borrower training is provided, for a fee, by agency approved vendors. Contact your local FSA Farm Loan Manager for a list of approved vendors.

USDA Announces Loan Maturity for Marketing Assistance Loans Now Extended to 12 Months

Agricultural producers now have more time to repay Marketing Assistance Loans (MAL) as part of the U.S. Department of Agriculture's implementation of the Coronavirus Aid, Relief, and Economic Security (CARES) Act of 2020. The loans now mature at 12 months rather than nine, and this flexibility is available for most commodities.

Effective immediately, producers of eligible commodities now have up to 12 months to repay their commodity loans. The maturity extension applies to nonrecourse loans for crop years 2018, 2019 and 2020. Eligible open loans must in good standing with a maturity date of March 31, 2020, or later or new crop year (2019 or 2020) loans requested by September 30, 2020. All new loans requested by September 30, 2020, will have a maturity date 12 months following the date of approval.

The maturity extension for current, active loans will be automatically extended an additional 3 months. Loans that matured March 31 have already been automatically extended by USDA's Farm Service Agency (FSA). Producers who prefer a nine-month loan will need to contact their local FSA county office. Loans requested after September 30, 2020, will have a term of nine months.

Eligible commodities include barley, chickpeas (small and large), corn, cotton (upland and extra-long staple), dry peas, grain sorghum, honey, lentils, mohair, oats, peanuts, rice (long and medium grain), soybeans, unshorn pelts, wheat, wool (graded and nongraded); and other oilseeds, including canola, crambe, flaxseed, mustard seed, rapeseed, safflower, sunflower seed, and sesame seed. Seed cotton and sugar are not eligible.

About MALs

Placing commodities under loan provides producers interim financing to meet cash flow needs without having to sell their commodities when market prices are low and allows producers to store production for more orderly marketing of commodities throughout the year.

These loans are considered nonrecourse because the commodity is pledged as loan collateral, and producers have the option of delivering the pledged collateral to the Commodity Credit Corporation (CCC) for repayment of the outstanding loan at maturity.

MAL Repayment

Under the new maturity provisions, producers can still repay the loan as they would have before the extension:

- repay the MAL on or before the maturity date;
- upon maturity by delivering or forfeiting the commodity to CCC as loan repayment; or
- after maturity and before CCC acquires the farm-stored commodity by repaying the outstanding MAL principle and interest.

Marketing Loan Gains

A Marketing Loan Gain occurs when a MAL is repaid at less than the loan principal. If market gain is applicable during the now-extended loan period, producers can receive a gain on the repayment made before the loan matures.

For more information on MALs, contact the nearest FSA county office. USDA Service Centers, including FSA county offices, are open for business by phone appointment only, and field work will continue with appropriate social distancing. While program delivery staff will continue to come into the office, they will be working with producers by phone and using online tools whenever possible. All Service Center visitors wishing to conduct business with the FSA, Natural Resources Conservation Service, or any other Service Center agency are required to call their Service Center to schedule a phone appointment. More information can be found at farmers.gov/coronavirus.

FSA Offers Livestock Indemnity Program (LIP) for Livestock Losses due to Recent Flooding

The Livestock Indemnity Program (LIP) provides assistance to eligible producers for livestock deaths in excess of normal mortality caused by adverse weather, disease and attacks by animals reintroduced into the wild by the federal government or protected by federal law.

LIP compensates livestock owners and contract growers for livestock death losses in excess of normal mortality due to adverse weather, including losses due to floods, hurricanes, blizzards, wildfires, extreme heat or extreme cold.

For disease losses, FSA county committees can accept veterinarian certifications that livestock deaths were directly related to adverse weather and unpreventable through good animal husbandry and management.

Eligible livestock owners must file a notice of loss within 30 calendar days of when the loss is first apparent.

Participants must provide the following supporting documentation to their local FSA office no later than 60 calendar days after the end of the calendar year in which the eligible loss condition occurred.

- Proof of death documentation
- Copy of grower's contracts
- Proof of normal mortality documentation

USDA has established normal mortality rates for each type and weight range of eligible livestock, i.e. Adult Beef Cow = 1.5% and Non-Adult Beef Cattle (less than 400 pounds) = 5%. These established percentages reflect losses that are considered expected or typical under "normal" conditions. In addition to filing a notice of loss, producers must also submit an application for payment by March 1, 2021.

Additional Information about LIP is available at your local FSA office or online at: fsa.usda.gov.

USDA Encourages Producers to Consider NAP Risk Protection Coverage Before Crop Sales Deadlines

The Farm Service Agency encourages producers to examine available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the applicable crop sales deadline.

Producers are reminded that crops not covered by insurance may be eligible for NAP. Beginning, underserved and limited resource farmers are now eligible for free catastrophic level coverage.

Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent federal crop insurance program is available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

Producers can determine if crops are eligible for federal crop insurance or NAP by visiting <https://webapp.rma.usda.gov/apps/ActuarialInformationBrowser2018/CropCriteria.aspx>.

The 2018 Farm Bill reinstates higher levels of coverage, from 50 to 65 percent of expected production in 5 percent increments, at 100 percent of the average market price. Producers of organics and crops marketed directly to consumers also may exercise the “buy-up” option to obtain NAP coverage of 100 percent of the average market price at the coverage levels of between 50 and 65 percent of expected production. NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production.

For all coverage levels, the NAP service fee is the lesser of \$325 per crop or \$825 per producer per county, not to exceed a total of \$1,950 for a producer with farming interests in multiple counties.

Deadlines for coverage vary by state and crop. To learn more about NAP visit www.fsa.usda.gov/nap or contact your local USDA Service Center. To find your local USDA Service Centers go to <http://offices.usda.gov>.

Federal crop insurance coverage is sold and delivered solely through private insurance agents. Agent lists are available at all USDA Service Centers or at USDA’s online Agent Locator: <http://prodwebnlb.rma.usda.gov/apps/AgentLocator/#>. Producers can use the USDA Cost Estimator, <https://ewebapp.rma.usda.gov/apps/costestimator/Default.aspx>, to predict insurance premium costs.

USDA is an equal opportunity provider, employer and lender. To file a complaint of discrimination, write: USDA, Office of the Assistant Secretary for Civil Rights, Office of Adjudication, 1400 Independence Ave., SW, Washington, DC 20250-9410 or call (866) 632-9992 (Toll-free Customer Service), (800) 877-8339 (Local or Federal relay), (866) 377-8642 (Relay voice users).
