## State Executive Director Comments

While spring planting is proceeding in portions of the state; the late spring, heavy rains, flooding, and cool temperatures have proven challenging for many. This has been true for row crop producers, livestock operations, vegetable farmers, and others across the agriculture industry. Delayed and even prevented planting can complicate annual acreage reporting for farmers and ranchers. Filing an accurate and timely acreage report for all crops and land uses, including failed acreage and prevented planted acreage, can prevent the loss of benefits under multiple USDA programs. Minnesota producers are encouraged to contact their local Farm Service Agency office

immediately after planting to make arrangements to report and certify acreage. For more information on the annual certification process, please see the articles in the newsletter below. You can also watch this short video providing [2022 Minnesota USDA Farm Service Agency Acreage Reporting Instructions](#).

### Minnesota FSA State Committee Appointments Announced

On May 6, The USDA Farm Service Agency (FSA) announced the appointees who will serve on the Minnesota USDA FSA state committee.

Members of the FSA state committee are appointed by Secretary of Agriculture Tom Vilsack and are responsible for the oversight of farm programs and county committee operations, resolving program delivery appeals from the agriculture community, maintaining cooperative relations with industry stakeholders, keeping producers informed about FSA programs and operating in a manner consistent with USDA equal opportunity and civil rights policies.

The individuals appointed to serve on this committee for Minnesota are:

- **Committee Chair Eunice Biel - Harmony**
- **Hannah Bernhardt – Finlayson**
- **Kurt Blomgren - Butterfield**
- **Lisa Brunner - Mahnomen**
- **Tim Velde – Granite Falls**

The FSA state committee members play an important role in program administration and ensure the overall integrity of services to Minnesota's agricultural producers. These individuals have proven themselves to be leaders and key influencers in the agriculture industry in Minnesota. We are grateful for their service and look forward to working together.

Respectfully,

Whitney Place, State Executive Director

---

## **USDA Encourages Producers to Enroll in Grasslands CRP by May 13 Deadline**

*Producers Must Apply by **May 13***

The U.S. Department of Agriculture (USDA) encourages producers and landowners to enroll in the Grassland Conservation Reserve Program (CRP) starting next week through May 13, 2022. Grassland CRP provides a unique opportunity for farmers, ranchers, and agricultural landowners to keep land in agricultural production and supplement their income while improving their soils and permanent grass cover. The program had its highest enrollment in history in 2021 and is part of the Biden-Harris Administration's broader effort to equip producers with the tools they need to help address climate change and invest in the long-term health of our natural resources.

[Grassland CRP](#) is a federally funded voluntary working lands program. Through the program, USDA's Farm Service Agency (FSA) provides annual rental payments to landowners to maintain and conserve grasslands while allowing producers to graze, hay, and produce seed on that land. Maintaining the existing permanent cover provides several benefits, including reducing erosion, providing wildlife habitat and migration corridors, and capturing and maintaining carbon in the soil and cover.

FSA provides participants with annual rental payments and cost-share assistance. The annual rental rate varies by county with a national minimum rental rate of \$13 per acre for this signup. Contract duration is 10 or 15 years.

### **Grassland CRP National Priority Zones**

Because Grassland CRP supports not only grazing operations but also biodiversity and conserving environmentally sensitive land such as that prone to wind erosion, FSA created two [National Priority Zones](#) in 2021: the Greater Yellowstone Migration Corridor and Dust Bowl Zone. As part of the Biden-Harris Administration's focus on conservation in important wildlife corridors and key seasonal ranges, for this year's signup, FSA is expanding the Greater Yellowstone Wildlife Migration Corridor Priority Zone to include seven additional counties across Montana, Wyoming, and Utah, to help protect the big-game animal migration corridor associated with Wyoming elk, mule deer, and antelope.

Offers within one of these National Priority Zones will receive an additional 15 ranking points and \$5 per acre if at least 50% of the offer is located in the zone.

Alongside Grassland CRP, producers and landowners can also enroll acres in Continuous CRP under the ongoing sign up, which includes projects available through the Conservation Reserve Enhancement Program (CREP) and State Acres for Wildlife Enhancement (SAFE).

### **Broadening Reach of Program**

As part of the Agency's Justice40 efforts, producers and landowners who are historically underserved, including beginning farmers and military veterans, will receive 10 additional ranking points to enhance their offers.

Additionally, USDA is working to broaden the scope and reach of Grassland CRP by leveraging the [Conservation Reserve Enhancement Program](#) (CREP) to engage historically underserved communities. CREP is a partnership program that enables states, Tribal governments, non-profit, and private entities to partner with FSA to implement CRP practices and address high priority conservation and environmental objectives. Interested entities are encouraged to contact FSA.

---

## **File a Notice of Loss for Failed and Prevented Planted Acres**

USDA Farm Service Agency (FSA) reminds you to report prevented planted and failed acres in order to establish or retain FSA program eligibility for some programs.

You should report crop acreage you intended to plant, but due to natural disaster, were prevented from planting. Prevented planting acreage must be reported on form *CCC-576, Notice of Loss*, no later than 15 calendar days after the final planting date as established by FSA and Risk Management Agency (RMA).

If you're unable to report the prevented planting acreage within the 15 calendar days following the final planting date, a late-filed report can be submitted. Late-filed reports will only be accepted if FSA conducts a farm visit to assess the eligible disaster condition that prevented the crop from being planted. A measurement service fee will be charged.

Additionally, if you have failed acres, you should also use form *CCC-576, Notice of Loss*, to report failed acres.

For hand-harvested crops and certain perishables, you must notify FSA of damage or loss through the administrative County Office within 72 hours of the date of damage or loss first becomes apparent. This notification can be provided by filing a CCC-576, email, fax or phone. If you notify the County Office by any method other than by filing the CCC-576, you are still required to file a CCC-576, *Notice of Loss*, within the required 15 calendar days.

For losses on crops covered by the Non-Insured Crop Disaster Assistance Program (NAP), you must file a *Notice of Loss* within 15 days of the occurrence of the disaster or when losses become apparent. You must timely file a *Notice of Loss* for failed acres on all crops including grasses.

To file a *Notice of Loss*, contact your County USDA Service Center or visit [www.fsa.usda.gov](http://www.fsa.usda.gov).

# Policy Updates for Acreage Reporting

The USDA Farm Service Agency (FSA) recently made several policy updates for acreage reporting for cover crops, revising intended use, late-filed provisions, grazing allotments as well as updated the definitions of “idle” and “fallow.”

## Reporting Cover Crops:

Cover crop types can be chosen from the following four categories:

- **Cereals and other grasses**
- **Legumes**
- **Brassicas and other broadleaves**
- **Mixtures**

If the cover crop is harvested for any use other than forage or grazing and is not terminated according to policy guidelines, then that crop will no longer be considered a cover crop and the acreage report must be revised to reflect the actual crop.

## Permitted Revision of Intended use After Acreage Reporting Date:

New operators or owners who pick up a farm after the acreage reporting deadline has passed and the crop has already been reported on the farm, have 30 calendar days from the date when the new operator or owner acquired the lease on land, control of the land or ownership and new producer crop share interest in the previously reported crop acreage. Under this policy, appropriate documentation must be provided to the County Committee’s satisfaction to determine that a legitimate operator or ownership and producer crop share interest change occurred to permit the revision.

## Acreage Reports:

In order to maintain program eligibility and benefits, you must timely file acreage reports. Failure to file an acreage report by the crop acreage reporting deadline may result in ineligibility for future program benefits. FSA will not accept acreage reports provided more than a year after the acreage reporting deadline.

## Reporting Grazing Allotments:

FSA offices can now accept acreage reports for grazing allotments. You will use form “FSA-578” to report grazing allotments as animal unit months (AUMs) using the “Reporting Unit” field. Your local FSA office will need the grazing period start and end date and the percent of public land.

## Definitions of Terms

FSA defines “idle” as cropland or a balance of cropland within a Common Land Unit (CLU) (field/subfield) which is not planted or considered not planted and does not meet the definition of fallow or skip row.

Fallow is considered unplanted cropland acres which are part of a crop/fallow rotation where cultivated land that is normally planted is purposely kept out of production during a regular growing season.

For more information, contact your County USDA Service Center or visit [fsa.usda.gov](https://fsa.usda.gov).

---

# USDA Expands Online Access to Farm Records

Producers with farmers.gov accounts can now access farm records and maps online, the latest self-service feature added to the U.S. Department of Agriculture (USDA) website.

You can quickly and easily access your land information in real time by desktop computer, tablet or phone. Capabilities include:

- View, print and export detailed farm records such as cropland, base acres, yields, CRP acres, land ownership details, and much more;
- View, print and export farm/tract maps that can be provided to lenders, chemical or fertilizer providers, and FSA for reporting acreage and crop insurance agents; and
- Export common land unit (field) boundaries as ESRI shapefiles.

The ability to access these records on demand without a visit to the service center saves you time and money.

[Farmers.gov](#) now includes the most popular functionalities from FSAFarm+, the FSA portal for producers, while providing enhanced functionality and an improved user experience. A new enhancement expands the scope of accessibility to include farmers and ranchers who are members of an entity, as well as people with a power of attorney form (FSA-211) on file with FSA.

## Managing USDA Business Online

Using farmers.gov, producers, entities and those acting on their behalf can also:

- View, upload, download, and e-sign conservation documents.
- Request financial assistance, including submitting a program application.
- View and submit conservation requests.
- View technical references and submit questions.
- Access information on current and past conservation practices, plans and contracts.
- Report practice completion and request practice certification.
- View farm loan and interest information (producers only).

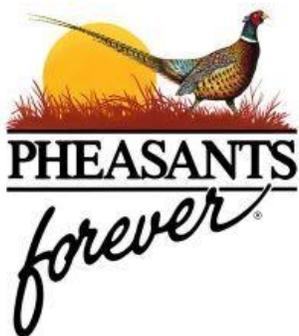

Future plans include adding the ability to import and view other shapefiles, such as precision agriculture planting boundaries.

To access your information, you'll will need a [USDA eAuth account](#) to login to farmers.gov. After obtaining an eAuth account, producers should visit [farmers.gov](#) and sign into the site's authenticated portal via the [Sign In/Sign Up link](#) at the top right of the website. Google Chrome, Mozilla Firefox or Microsoft Edge are the recommended browsers to access the feature.

In addition to the self-service features available by logging into farmers.gov, the website also has ample information on USDA programs, including pandemic assistance, farm loans, disaster assistance, conservation programs and crop insurance. Recently, USDA updated the navigation and organization of the site as well as added some new webpages, including "[Get Involved](#)," "[Common Forms](#)," and "[Translations](#)." [Learn more about these changes](#).

---

# USDA in Minnesota and Pheasants Forever to Hold Conservation Reserve Program Webinar on May 17

Do you own or operate farmland in Minnesota? Are you curious about how you can improve water quality, prevent soil erosion, and increase wildlife habitat on your farm? Are you looking for conservation solutions to address marginal or environmentally sensitive cropland? The Conservation Reserve Program may offer the solutions you are looking for on your farm.

To answer questions and provide more information on the [Conservation Reserve Program \(CRP\)](#) the United States Department of Agriculture's (USDA) Farm Service Agency (FSA) in partnership with Minnesota Pheasants Forever are holding a virtual information session on May 17, 2022, from 12:30 to 1:30 p.m. (CDT).

USDA staff from FSA and the Natural Resources Conservation Service will be joined by public and private partners to provide information on current opportunities under CRP. Information will be provided on Continuous CRP enrollment including [State Acres for Wildlife Enhancement](#) also known as [SAFE](#). Participants will also learn about specific CRP options that include the Conservation Reserve Enhancement Program (CREP) and the Clean Lakes, Estuaries, And Rivers initiative, called [CLEAR30](#).

Current landowners and producers that have utilized CRP on their farm will provide detailed examples of how they've benefited from the program.

## **Webinar: A CLEAR Path to Conservation Tuesday, May 17, 12:30 to 1:30 p.m. (CDT)**

To attend the webinar: [Register Here](#)

Persons with disabilities who require accommodations to participate in this meeting should contact Daniel Mahoney at 651-602-7710, or dial 7-1-1 to access telecommunication relay services.

To register visit: <https://www.eventbrite.com/e/a-clear-path-to-conservation-tickets-335265898327>. For more information on FSA farm and loan programs visit [fsa.usda.gov](https://fsa.usda.gov). For more information on CRP visit [fsa.usda.gov/crp](https://fsa.usda.gov/crp).

---

## **USDA Updates Farm Loan Programs to Increase Equity**

The U.S. Department of Agriculture (USDA) is updating its farm loan programs to better support current borrowers, including historically underserved producers. These improvements are part of USDA's commitment to increase equity in all programs, including farm loans that provide important access to capital for covering operating expenses and purchasing land and equipment.

The 2018 Farm Bill authorized FSA to provide equitable relief to certain direct loan borrowers, who are non-compliant with program requirements due to good faith reliance on a material action of, advice of, or non-action from an FSA official. Previously, borrowers may have been required to immediately repay the loan or convert it to a non-program loan with higher interest rates, less favorable terms, and limited loan servicing.

Now, FSA has additional flexibilities to assist borrowers in such situations. If the agency provided incorrect guidance to an existing direct loan borrower, the agency may provide equitable relief to that borrower. FSA may assist the borrower by allowing the borrower to keep their loans at current rates or other terms received in association with the loan which was determined to be noncompliant or the borrower may receive other equitable relief for the loan as the Agency determines to be appropriate.

USDA encourages producers to reach out to their local loan officials to ensure they fully understand the wide range of loan and servicing options available that can assist them in starting, expanding or maintaining their operation.

### **Additional Updates**

Equitable relief is one of several changes authorized by the 2018 Farm Bill that USDA has made to the direct and guaranteed loan programs. Other changes that were previously implemented include:

- Modifying the existing three-year farming experience requirement for Direct Farm Ownership loans to include additional items as acceptable experience.
- Allowing socially disadvantaged and beginning farmer applicants to receive a guarantee equal to 95%, rather than the otherwise applicable 90% guarantee.
- Expanding the definition of and providing additional benefits to veteran farmers.
- Allowing borrowers who received restructuring with a write down to maintain eligibility for an Emergency loan.
- Expanding the scope of eligible issues and persons covered under the agricultural Certified Mediation Program.

Additional information on these changes is available in the March 8, 2022 [rule on the Federal Register](#).

### **More Background**

FSA has taken other recent steps to increase equity in its programs. Last summer, USDA announced it was providing \$67 million in competitive loans through its new Heirs' Property Relending Program to help agricultural producers and landowners resolve heirs' land ownership and succession issues. FSA also invested \$4.7 million to establish partnerships with organizations to provide outreach and technical assistance to historically underserved farmers and ranchers, which contributed to a fourfold increase in participation by historically underserved producers in the Coronavirus Food Assistance Program 2 (CFAP 2), a key pandemic assistance program, since April 2021.

Additionally, in January 2021, Secretary Vilsack announced a [temporary suspension of past-due debt collection and foreclosures](#) for distressed direct loan borrowers due to the economic hardship imposed by the COVID-19 pandemic.

Producers can explore available loan options using the [Farm Loan Discover Tool on farmers.gov](#) ([also available in Spanish](#)) or by contacting their local [USDA Service Center](#). Service Center staff continue to work with agricultural producers via phone, email, and other digital tools. Due to the pandemic, some USDA Service Centers are open to limited visitors. Producers can [contact their local Service Center](#) to set up an in-person or phone appointment to discuss loan options.

---

## **USDA Accepting New or Modified Proposals for the State Acres for Wildlife Enhancement**

The U.S. Department of Agriculture (USDA) is welcoming new and modified proposals from conservation partners for the State Acres for Wildlife Enhancement (SAFE) initiative, a part of the Conservation Reserve Program (CRP) focused on effectively managing wildlife habitat. USDA's Farm Service Agency (FSA) has expanded available practices under this initiative in response to feedback from partners.

Through SAFE, producers and landowners restore vital habitat in alignment with high-priority state wildlife conservation goals. Specifically, landowners establish wetlands, grasses, and trees. These practices are

---

designed to enhance important wildlife populations by creating critical habitat and food sources. They also protect soil and water health by working as a barrier to sediment and nutrient run-off before they reach waterways.

### **Expanded Practices**

To help improve the planning and implementation of the SAFE initiative, FSA is adding two new practices with the assistance of USDA's Natural Resources Conservation Service (NRCS), FSA's sister agency. In partnership with FSA, NRCS employees across the country provide CRP participants with critical conservation planning assistance, which will now include managing for early successional habitat cover establishment or management, as well as wildlife habitat planting. These additional eligible practices will enable SAFE partners to better target a wide variety of wildlife species, such as the Northern bobwhite, lesser prairie-chicken, and the New England cottontail.

As part of this year's SAFE signup, FSA will also authorize cost-share assistance for producers who would like to re-enroll acres in CRP but need assistance updating their vegetative cover to align with NRCS practice standards for early successional habitat or wildlife planting.

### **Submitting Proposals**

Eligible entities for SAFE include government entities, non-profits, or private organizations.

Additionally, partners with SAFE projects with both General and Continuous CRP practices must submit modified proposals to continue in the program.

New and modified proposals for SAFE projects must be submitted to the FSA State Office in CITY in June. Contact your State Office for the state-specific deadline. More information on developing proposals is available at [fsa.usda.gov/crp](https://fsa.usda.gov/crp).

### **More Information**

SAFE is part of the Continuous CRP signup, and producers can begin enrolling in new or updated SAFE programs beginning October 1, 2022. Meanwhile, the Continuous and Grassland signups are currently open, and producers can learn more by contacting their local [USDA Service Center](#). To learn more about SAFE and its benefits, see the initiative's [fact sheet](#).

Signed into law in 1985, CRP is one of the largest voluntary private-lands conservation programs in the United States. It was originally intended to primarily control soil erosion and potentially stabilize commodity prices by taking marginal lands out of production. The program has evolved over the years, providing many conservation and economic benefits.

CRP complements other USDA conservation programs, including several programs offered by NRCS for working lands and conservation easements. Earlier this month, NRCS released its [Northern Bobwhite, Grasslands and Savannas Framework for Conservation Action](#) to help guide voluntary conservation work over the next five years across 25 states, including over 7 million acres of new conservation practices on productive, working lands, and will contribute to the Biden-Harris administration's efforts to make our nation a leader on climate change mitigation, adaptation and resilience. The plan will accelerate voluntary conservation efforts for the Northern bobwhite quail and the grassland and savanna landscapes that the species calls home.

---

# USDA To Compensate Drought-Stricken Ranchers for Above Normal Costs to Haul Livestock to Forage

Due to the persistent drought conditions in the Great Plains and West, the U.S. Department of Agriculture (USDA) is offering additional relief through the [Emergency Assistance for Livestock, Honeybees and Farm-raised Fish Program \(ELAP\)](#) to help ranchers cover above normal costs of hauling livestock to forage or other grazing acres. This policy enhancement complements previously announced ELAP compensation for hauling feed to livestock. ELAP livestock and feed hauling assistance is retroactive for 2021 and will be available for losses in 2022 and subsequent years.

## ELAP Assistance Overview

ELAP provides financial assistance to eligible producers of livestock, honeybees and farm-raised fish for losses due to disease, certain adverse weather events or loss conditions as determined by the Secretary of Agriculture. In addition to ELAP covering feed transportation costs where grazing and hay resources have been depleted, ELAP now also covers transportation costs associated with hauling livestock to feed sources. This includes places where:

- Drought intensity is D2 for eight consecutive weeks as indicated by the [U.S. Drought Monitor](#); or
- Drought intensity is D3 or greater.

Additionally, FSA has updated ELAP policy to also cover water hauling in areas experiencing D2 for eight consecutive weeks, lowering the drought intensity threshold (previously D3) triggering the availability of this financial assistance.

## Eligibility

To be eligible for ELAP assistance, livestock must be intended for grazing and producers must have incurred feed or livestock transportation costs on or after Jan. 1, 2021. Although producers will self-certify losses and expenses to FSA, producers are encouraged to maintain good records and retain receipts and related documentation in the event these documents are requested for review by the local FSA County Committee.

## Payment Calculations

USDA will reimburse eligible ranchers 60% of livestock transportation costs above what would have been incurred in a normal year. Producers qualifying as underserved (socially disadvantaged, limited resource, beginning or military veteran) will be reimbursed for 90% of the feed transportation cost above what would have been incurred in a normal year.

USDA uses a national cost formula to determine reimbursement costs that will not include the first 25 miles and distances exceeding 1,000 transportation miles. The calculation will also exclude the normal cost to transport hay or feed if the producer normally purchases some feed. For 2021, the initial cost formula of \$6.60 per mile will be used (before the percentage is applied).

## Online Decision Tool

Producers can use the updated ELAP Feed Livestock Transportation Producer Tool to help producers document and estimate payments to cover both feed and livestock transportation costs caused by drought. The tool (a Microsoft Excel workbook) and other resources are available at [fsa.usda.gov/elap](https://fsa.usda.gov/elap). Final payments may vary depending on eligibility.

Eligible ranchers should contact their FSA county office to apply for ELAP assistance. To simplify the application process, ranchers can print or email payment estimates generated by the online tool for

submission to FSA. The deadline to request ELAP assistance for hauling livestock to forage in 2021 is June 30, 2022. The deadline to request all ELAP assistance for 2022 calendar year losses will be Jan. 31, 2023.

### More Information

Additional USDA disaster assistance information can be found on [farmers.gov](https://farmers.gov), including USDA resources specifically for producer impacted by [drought](#) and [wildfire](#) and the [Disaster Assistance Discovery Tool](#), [Disaster-at-a-Glance fact sheet](#) and [Farm Loan Discovery Tool](#). For FSA and Natural Resources Conservation Service programs, producers should contact their local [USDA Service Center](#). For assistance with a crop insurance claim, producers and landowners should contact their [crop insurance agent](#).

---

## Maintaining ARC/PLC Acreage

If you're enrolled in the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs, you must protect all cropland and noncropland acres on the farm from wind and water erosion and noxious weeds. By signing ARC county or individual contracts and PLC contracts, you agree to effectively control noxious weeds on the farm according to sound agricultural practices. If you fail to take necessary actions to correct a maintenance problem on your farm that is enrolled in ARC or PLC, the County Committee may elect to terminate your contract for the program year.

## Farmers.gov Feature Helps Producers Find Farm Loans that Fit Their Operation

Farmers and ranchers can use the *Farm Loan Discovery Tool* on [farmers.gov](https://farmers.gov) to find information on USDA farm loans that may best fit their operations.

USDA's Farm Service Agency (FSA) offers a variety of loan options to help farmers finance their operations. From buying land to financing the purchase of equipment, FSA loans can help.

USDA conducted field research in eight states, gathering input from farmers and FSA farm loan staff to better understand their needs and challenges.

### How the Tool Works

Farmers who are looking for financing options to operate a farm or buy land can answer a few simple questions about what they are looking to fund and how much money they need to borrow. After submitting their answers, farmers will receive information on farm loans that best fit their specific needs. The loan application and additional resources also will be provided.

Farmers can download application quick guides that outline what to expect from preparing an application to receiving a loan decision. There are four guides that cover loans to individuals, entities, and youth, as well as information on microloans. The guides include general eligibility requirements and a list of required forms and documentation for each type of loan. These guides can help farmers prepare before their first USDA service center visit with a loan officer.

Farmers can access the *Farm Loan Discovery Tool* by visiting [farmers.gov/fund](https://farmers.gov/fund) and clicking the "Start" button. Follow the prompts and answer five simple questions to receive loan information that is applicable to your agricultural operation. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

## About Farmers.gov

In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where farmers will be able to apply for programs, process transactions, and manage accounts.

The *Farm Loan Discovery Tool* is one of many resources on farmers.gov to help connect farmers to information that can help their operations. Earlier this year, USDA launched the *My Financial Information* feature, which enables farmers to view their loan information, history, payments, and alerts by logging into the website.

USDA is building farmers.gov for farmers, by farmers. In addition to the interactive farm loan features, the site also offers a Disaster Assistance Discovery Tool. Farmers can visit [farmers.gov/recover/disaster-assistance-tool#step-1](https://farmers.gov/recover/disaster-assistance-tool#step-1) to find disaster assistance programs that can help their operation recover from natural disasters.

For more information, contact your County USDA Service Center or visit [farmers.gov](https://farmers.gov).
