Reminder of Upcoming Crop Reporting Deadlines

Producers are reminded to stop by the local FSA office to report spring-seeded crops before the applicable crop certification deadlines, as follows:

- **May 15, 2018:** Spring oats and potatoes;
- **July 15, 2018:** CRP, burley tobacco, corn, cotton, grain sorghum, hybrid corn seed, popcorn, rice, soybeans and all other crops.

Crops insured under the Non-Insured Crop Disaster Assistance Program (NAP) must be reported by the final reporting date or 15 days before harvest.

If a crop hasn't been planted by the final reporting date, it must be reported no later than 15 calendar days after planting is complete. If a producer acquires additional acreage after the final reporting date, the acreage must be reported no later than 30 calendar days after the purchase or new lease acquisition.

Please contact your local county office for more information or to schedule an appointment to file an acreage report.

The staff at the Missouri Farm Service Agency wishes everyone a safe planting season!

USDA Reopens Enrollment for Improved Dairy Safety Net Tool

USDA's Farm Service Agency encourages dairy producers to consider enrolling in the new and improved [Margin Protection Program for Dairy](#) (MPP-Dairy), which will provide better protections for dairy producers from shifting milk and feed prices. With changes authorized under the Bipartisan Budget Act of 2018, the U.S. Department of Agriculture's (USDA) Farm Service Agency (FSA) has set the enrollment period to run from April 9, 2018 to June 1, 2018.

About the Program:

The program protects dairy producers by paying them when the difference between the national all-milk price and the national average feed cost (the margin) falls below a certain dollar amount elected by the producer.

Changes include:

- Calculations of the margin period is monthly rather than bi-monthly.
- Covered production is increased to 5 million pounds on the Tier 1 premium schedule, and premium rates for Tier 1 are substantially lowered.
- An exemption from paying an administrative fee for limited resource, beginning, veteran, and disadvantaged producers. Dairy operators enrolled in the previous 2018 enrollment period that qualify for this exemption under the new provisions may request a refund.

Dairy operations must make a new coverage election for 2018, even if you enrolled during the previous 2018 signup period. Coverage elections made for 2018 will be retroactive to January 1, 2018. All dairy operations desiring coverage must sign up during the enrollment period and submit an appropriate form (CCC-782) and dairy operations may still "opt out" by not submitting a form. All outstanding balances for 2017 and prior years must be paid in full before 2018 coverage is approved.

Dairy producers can participate in FSA's MPP-Dairy or the Risk Management Agency's Livestock Gross Margin Insurance Plan for Dairy Cattle (LGM-Dairy), but not both. During the 2018 enrollment period, only producers with an active LGM-Dairy policy who have targeted marketings insured in 2018 months will be allowed to enroll in MPP-Dairy by June 1, 2018; however, their coverage will start only after active target marketings conclude under LGM-Dairy.

USDA has a web tool to help producers determine the level of coverage under the MPP-Dairy that will provide them with the strongest safety net under a variety of conditions. The online resource, which is now available at www.fsa.usda.gov/mpptool, allows dairy farmers to quickly and easily combine unique operation data and other key variables to calculate their coverage needs based on price projections. Producers can also review historical data or estimate future coverage based on data projections. The secure site can be accessed via computer, smartphone, tablet or any other platform. USDA is mailing postcards advising dairy producers of the changes. For more information, visit www.fsa.usda.gov/dairy or contact your [local USDA service center](#).

Livestock Inventory Records

Producers are reminded to keep updated livestock inventory records. These records are necessary in the event of a natural disaster.

When disasters strike, the USDA Farm Service Agency (FSA) can assist producers who suffered excessive livestock death losses and grazing or feed losses due to eligible natural disasters.

To participate in livestock disaster assistance programs, producers will be required to provide verifiable documentation of death losses resulting from an eligible adverse weather event and must submit a notice of loss to their local FSA office within 30 calendar days of when the loss of livestock is apparent. For grazing or feed losses, producers must submit a notice of loss to their local FSA office within 30 calendar days of when the loss is apparent and should maintain documentation and receipts.

Producers should record all pertinent information regarding livestock inventory records including:

- Documentation of the number, kind, type, and weight range of livestock
- Beginning inventory supported by birth recordings or purchase receipts;

For more information on documentation requirements, contact your local FSA office.

Fire Management on CRP Acres

Landowners who participate in the Conservation Reserve Program (CRP) are responsible for fire management on their CRP acreage. Fireguard technical practices should be outlined in the Conservation Plan of Operations (CPO).

Landowners must complete the necessary management activities outside of the Primary Nesting Season. In Missouri, the Primary Nesting Season is May 1st through July 15th. The goal is to suppress the amount of fuel in the event of a wildfire while still promoting the diversity of the conservation cover.

FSA encourages producers to be proactive in preventing the spread of wildfire. Fire management includes installing firebreaks, which should be included in the contract support document and installed according to NRCS firebreak standards.

Barren firebreaks will only be allowed in high risk areas, such as transportation corridors, rural communities, and adjacent farmsteads. A conservationist must certify that there will not be an erosion hazard from the barren firebreak. If erosion becomes a problem, remedial action will be taken.

USDA Helps Cotton Producers Maintain, Expand Domestic Market

The U.S. Department of Agriculture (USDA) is taking action to assist cotton producers through a Cotton Ginning Cost Share (CGCS) program in order to expand and maintain the domestic marketing of cotton.

The sign-up period for the CGCS program runs from March 12, 2018, to May 11, 2018.

Under the program, which is administered by the Farm Service Agency (FSA), cotton producers may receive a cost share payment, which is based on a producer's 2016 cotton acres reported to FSA multiplied by 20 percent of the average ginning cost for each production region.

The CGCS payment rates for the Mid-South region are as follows:

State	Cost of Ginning	CGCS Payment Rate Per Acre
Arkansas, Illinois, Kentucky, Louisiana, Missouri, Mississippi, Tennessee	\$151.97	\$30.39

CGCS payments are capped at \$40,000 per producer. To qualify for the program, cotton producers must meet conservation compliance provisions, be actively engaged in farming and have adjusted gross incomes not exceeding \$900,000. FSA will mail letters and pre-filled applications to all eligible cotton producers.

The program was established under the statutory authority of the Commodity Credit Corporation Charter Act.

To learn more about the CGCS program, visit www.fsa.usda.gov/cgcs or contact a local FSA county office. To find your local FSA county office, visit the USDA's new website: <https://www.farmers.gov/>.

USDA to Immediately Assist Producers for Qualifying Livestock, Honeybee and Farm-raised Fish Program Losses

\$34 Million in Payments for 2017 Losses Part of Broad Suite of Programs Aiding Ag Operations

USDA will issue \$34 million to help agricultural producers recover from 2017 natural disasters through the [Emergency Assistance for Livestock, Honeybees and Farm-raised Fish Program](#) (ELAP), which covers losses not covered by certain other USDA disaster assistance programs. These payments are being made available today, and they are part of a broader USDA effort to help producers recover from hurricanes Harvey, Irma and Maria, wildfires and drought. A large portion of this assistance will be made available in [federally designated disaster areas](#).

ELAP aims to help eligible producers of livestock, honeybees and farm-raised fish for losses due to disease, certain adverse weather events or loss conditions, including blizzards and wildfires, as determined by the Secretary. ELAP assistance is provided for losses not covered by other disaster assistance programs such as the [Livestock Forage Disaster Program \(LFP\)](#) and the [Livestock Indemnity Program \(LIP\)](#).

The increased amount of assistance through ELAP was made possible by the Bipartisan Budget Act of 2018, signed earlier this year. The Act amended the 2014 Farm Bill to enable USDA's [Farm Service Agency](#) (FSA) to provide assistance to producers without an annual funding cap and

immediately for 2017. It also enables FSA to pay ELAP applications as they are filed for 2018 and subsequent program years.

Other USDA Disaster Assistance Programs

The Act removed program year payment limitations and increased the acreage cap for the [Tree Assistance Program](#) (TAP), a nationwide program that provides owners of orchards, vineyards and nurseries with cost share assistance to replant eligible trees, bushes, and vines following a natural disaster. For example, the program will help owners of citrus groves in Florida, avocado trees in California, coffee plantations in Puerto Rico and vineyards reduce the cost of replanting, and speed recovery from the loss of fruit and nut trees, bushes, and vines.

Prior to the Act, there was a combined program year payment limitation of \$125,000 for ELAP, LIP and LFP per person or legal entity. The Tree Assistance Program (TAP) had its own \$125,000 payment limitation. The Act removed the program year per person and legal entity payment limitation for LIP and TAP. As a result of the Act, a \$125,000 per person and legal entity single payment limitation applies to the total amount of program year payments received under both ELAP and the [Livestock Forage Disaster Program](#) (LFP) and program payments under LIP and TAP no longer have payment limits.

Under the updated program, as amended by the Act, growers are eligible to be partly reimbursed for losses on up to 1,000 acres per program year, double the previous acreage limit of 500 acres.

In total, it is estimated that the Act will enable USDA to provide more than \$3 billion in disaster assistance, including the \$2.36 billion announced last week to be made available through FSA's new 2017 Wildfires and Hurricanes Indemnity Program. This includes \$400 million made available for the [Emergency Conservation Program](#), which helps farmers and ranchers repair damage to farmlands caused by natural disasters. As signups across the country are completed, additional applications will be funded.

According to the U.S. National Oceanic and Atmospheric Administration (NOAA), the United States was impacted by 16 separate billion-dollar disaster events in 2017 including: three tropical cyclones; eight severe storms, two inland floods, a crop freeze, drought and wildfire. More than 25 million people - almost eight percent of the population - were affected by major disasters. From severe flooding in Puerto Rico and Texas to mudslides and wildfires in California, major natural disasters caused catastrophic damages, with an economic impact totaling more than \$300 billion.

For Assistance

Producers with operations impacted by natural disasters and diseases in 2018 are encouraged to contact their [local USDA service center](#) to apply for assistance through ELAP, TAP, LIP and LFP. Producers with 2017 ELAP claims need to take no action as FSA will begin paying those claims today.

Maintaining Good Credit History

Farm Service Agency (FSA) Farm Loan programs require that applicants have a satisfactory credit history. A credit report is requested for all FSA direct farm loan applicants. These reports are reviewed to verify outstanding debts, if bills are paid timely and to determine the impact on cash flow.

Information found on a customer's credit report is strictly confidential and is used only as an aid in conducting FSA business.

Our farm loan staff will discuss options with you if you have an unfavorable credit report and will provide a copy of your report. If you dispute the accuracy of the information on the credit report, it is up to you to contact the issuing credit report company to resolve any errors or inaccuracies.

There are multiple ways to remedy an unfavorable credit score.

- Make sure to pay bills on time. Setting up automatic payments or automated reminders can be an effective way to remember payment due dates.
- Pay down existing debt.
- Keep your credit card balances low.
- Avoid suddenly opening or closing existing credit accounts.

FSA's farm loan staff will guide you through the process, which may require you to reapply for a loan after improving or correcting your credit report. For more information on FSA farm loan programs, visit www.fsa.usda.gov.

Interest Rates and Dates to Remember

Selected Interest Rates for April 2018	
90-Day Treasury Bill	1.375%
Farm Operating Loans — Direct	3.50%
Farm Ownership Loans — Direct	4.00%
Farm Ownership Loans — Direct Down Payment, Beginning Farmer or Rancher	1.50%
Emergency Loans	3.75%
Farm Storage Facility Loans (3 years)	2.375%
Farm Storage Facility Loans (5 years)	2.625%
Farm Storage Facility Loans (7 years)	2.75%
Farm Storage Facility Loans (10 years)	2.875%
Farm Storage Facility Loans (12 years)	2.875%
Commodity Loans 1996- Present	3.00%

Dates to Remember	
May 1	NAP application closing date for ornamental nursery for subsequent year.
May 1	Beginning of primary nesting season for Missouri. No maintenance (mowing, spraying, burning or disking) on CRP acreage.
May 15	Final date to report spring oats & potatoes.
May 28	Memorial Day Holiday. USDA offices are closed.
May 31	Final availability date for 2017 Marketing Assistance Loans & LDPs for feed grains, upland cotton, soybeans & minor oilseeds.
