Important Dates to Remember

If you're done planting, now's the time to contact your local FSA office to report your crops. The deadline to report CRP, burley tobacco, corn, cotton, forage, grain sorghum, hay, hybrid corn seed, pasture, popcorn, rice, soybeans and all other crops is July 15.

Producers should report crop acreage they intended to plant, but due to natural disaster, were prevented from planting. Prevented planting acreage must be reported on form CCC-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and Risk Management Agency (RMA). Contact your local FSA office for a list of final planting dates by crop.

Additionally, producers with failed acres should also use form CCC-576, Notice of Loss, to report failed acres. Failed acreage should be timely reported prior to a subsequent crop being planted.

Before you get too busy, there are five things to keep in mind after planting.

The deadline to enroll in ARC or PLC for the 2020 crop year is June 30, 2020.

Producers with acreage enrolled in CRP are reminded of the current primary nesting season in Missouri. No maintenance
Farmers and Ranchers in Missouri Can Now Apply for Financial Assistance through USDA's Coronavirus Food Assistance Program

Online Tools and Toll-Free Number Available to Assist Producers

Agricultural producers can now apply for USDA's Coronavirus Food Assistance Program (CFAP), which provides direct payments to offset impacts from the coronavirus pandemic. The application and a payment calculator are now available online, and USDA’s Farm Service Agency (FSA) staff members are available via phone, fax and online tools to help producers complete applications. The agency set up a call center in order to simplify how they serve new customers across the nation.

Applications will be accepted through August 28, 2020. Through CFAP, USDA is making available $16 billion for vital financial assistance to producers of agricultural commodities who have suffered a five-percent-or-greater price decline due to COVID-19 and face additional significant marketing costs as a result of lower demand, surplus production, and disruptions to shipping patterns and the orderly marketing of commodities.

We also want to remind producers that the program is structured to ensure the availability of funding for all eligible producers who apply.

In order to do this, producers will receive 80 percent of their maximum total payment upon approval of the application. The remaining portion of the payment, not to exceed the payment limit, will be paid at a later date nationwide, as funds remain available.

Producers can download the CFAP application and other eligibility forms from farmers.gov/cfap. Also, on that webpage, producers can find a payment calculator to help identify sales and inventory records needed to apply and calculate potential payments.

Additionally, producers in search of one-on-one support with the CFAP application process can call 877-508-8364 to speak directly with a USDA employee ready to offer assistance. This is a good first step before a producer engages the team at the FSA county office at their local USDA Service Center.

Applying for Assistance

Producers of all eligible commodities will apply through their local FSA office. Those who use the online calculator tool will be able to print off a pre-filled CFAP application, sign, and submit to your local FSA office either electronically or via hand delivery. Please contact your local office to determine the preferred method. Find contact information for your local office at farmers.gov/cfap.
Documentation to support the producer’s application and certification may be requested after the application is filed. FSA has streamlined the signup process to not require an acreage report at the time of application and a USDA farm number may not be immediately needed.

**Additional Commodities**

USDA is also establishing a process for the public to identify additional commodities for potential inclusion in CFAP. Specifically, USDA is looking for data on agricultural commodities, that are not currently eligible for CFAP, that the public believes to have either:

1. suffered a five percent-or-greater price decline between mid-January and mid-April as a result of the COVID-19 pandemic,
2. shipped but subsequently spoiled due to loss of marketing channel, or
3. not left the farm or remained unharvested as mature crops.

More information about this process is available on farmers.gov/cfap.

**More Information**

To find the latest information on CFAP, visit farmers.gov/cfap or call 877-508-8364.

USDA Service Centers are open for business by phone appointment only, and field work will continue with appropriate social distancing. While program delivery staff will continue to come into the office, they will be working with producers by phone and using online tools whenever possible. All Service Center visitors wishing to conduct business with the FSA, Natural Resources Conservation Service, or any other Service Center agency are required to call their Service Center to schedule a phone appointment. More information can be found at farmers.gov/coronavirus.

---

**June 30 Last Day to Complete Enrollment for 2020 Agriculture Risk Coverage, Price Loss Coverage Programs**

**Call Today Regarding 2020 Crop Year Eligibility**

Agricultural producers who have not yet enrolled in the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs for 2020 must do so by June 30. Although program elections for the 2020 crop year remain the same as elections made for 2019, all producers need to contact their local USDA Farm Service Agency (FSA) office to sign a 2020 enrollment contract.

To date, more than 1.4 million ARC and PLC contracts have been signed for the 2020 crop year. This represents 89 percent of expected enrollment. FSA will send reminder postcards to producers who, according to agency records, have not yet submitted signed contracts for ARC or PLC for the 2020 crop year.

Producers who do not complete enrollment by close of business local time on Tuesday, June 30 will not be enrolled in ARC or PLC for the 2020 crop year and will be ineligible to receive a payment should one trigger for an eligible crop.

ARC and PLC contracts can be mailed or emailed to producers for signature depending on producer preference. Signed contracts can be mailed or emailed back to FSA or, arrangements can
be made in advance with FSA to drop off signed contracts at the FSA county office – call ahead for local drop off and other options available for submitting signed contracts electronically.

Producers are eligible to enroll on farms with base acres for the following commodities: barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium- and short-grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

More Information

For more information on ARC and PLC including web-based decision tools, visit farmers.gov/arc-plc.

USDA Service Centers, including FSA county offices, are open for business by phone only, and field work will continue with appropriate social distancing. While program delivery staff will continue to come into the office, they will be working with producers by phone and using online tools whenever possible. All Service Center visitors wishing to conduct business with the FSA, Natural Resources Conservation Service or any other Service Center agency are required to call their Service Center to schedule a phone appointment. More information can be found at farmers.gov/coronavirus.

Visit offices.usda.gov to find location and contact information for the nearest FSA county office.

FSA Implements Set-Aside Loan Provision for Customers Impacted by COVID-19

Set-Aside Delays Loan Payments for Borrowers

USDA’s Farm Service Agency (FSA) will broaden the use of the Disaster Set-Aside (DSA) loan provision, normally used in the wake of natural disasters, to allow farmers with USDA farm loans who are affected by COVID-19, and are determined eligible, to have their next payment set aside. In some cases, FSA may also set aside a second payment for farmers who have already had one payment set aside because of a prior designated disaster.

FSA direct loan borrowers will receive a letter with the details of the expanded Disaster Set-Aside authorities, which includes the possible set-aside of annual operating loans, as well as explanations of the additional loan servicing options that are available. To discuss or request a loan payment Set-Aside, borrowers should call or email the farm loan staff at their local FSA county office.

The set-aside payment’s due date is moved to the final maturity date of the loan or extended up to twelve months in the case of an annual operating loan. Any principal set-aside will continue to accrue interest until it is repaid. This aims to improve the borrower’s cashflow in the current production cycle.

FSA previously announced it was relaxing the loan-making process and adding flexibilities for servicing direct and guaranteed loans to provide credit to producers in need. Direct loan applicants and borrowers are encouraged to contact their local FSA county office to discuss loan making and servicing flexibilities and other needs or concerns. Customers participating in FSA’s guaranteed loan programs are encouraged to contact their lender. Information on these flexibilities, and office contact information, can be found on farmers.gov/coronavirus.
FSA will be accepting most forms and applications by facsimile or electronic signature. Some services are also available online to customers with an eAuth account, which provides access to the farmers.gov portal where producers can view USDA farm loan information and certain program applications and payments. Customers can track payments, report completed practices, request conservation assistance and electronically sign documents. Customers who do not already have an eAuth account can enroll at farmers.gov/sign-in.

USDA Service Centers are open for business by phone appointment only, and field work will continue with appropriate social distancing. While program delivery staff will continue to come into the office, they will be working with producers by phone and using online tools whenever possible. All Service Center visitors wishing to conduct business with the FSA, Natural Resources Conservation Service or any other Service Center agency are required to call their Service Center to schedule a phone appointment. More information can be found at farmers.gov/coronavirus.

### Wool Triggers Loan Deficiency Payment in Missouri

Wool producers in Missouri may be eligible for loan deficiency payments (LDPs) from the U.S. Department of Agriculture (USDA) Farm Service Agency (FSA), which help producers under certain market conditions.

Marketing assistance loans (MALs) and LDPs are marketing tools available to producers beginning upon harvest or shearing. MALs help producers meet cash flow needs without selling commodities when market prices are at harvest-time lows.

Producers who are eligible for marketing loans, but choose to forgo the loan, are eligible for LDPs if the posted county price falls below the county loan rate. Producers also can purchase a commodity certificate that may be exchanged for the outstanding loan collateral. Producers can check their daily LDP rates online at fsa.usda.gov.

LDPs are no longer subject to payment limitations, actively engaged in farming and cash-rent tenant rules.

#### Eligibility Requirements

For a commodity to be eligible for a loan, LDP, or certificate, the producer must have beneficial interest in the commodity, defined as having title, possession and control of the commodity, and responsible for loss of or damage to the commodity. All related application forms must be completed at the local FSA office prior to loss of beneficial interest. Other eligibility requirements may apply; consult your local FSA office for more information.

Marketing assistance loans are available for the following commodities: wheat, corn, grain sorghum, barley, oats, upland cotton, extra-long staple cotton, long grain rice, medium grain rice, soybeans and other oilseeds (including sunflower seed, rapeseed, canola, safflower, flaxseed, mustard seed, crambe and sesame seed), dry peas, lentils, small chickpeas, large chickpeas, graded and non-graded wool, mohair, unshorn pelts, honey and peanuts.

#### More Information

For more information, visit fsa.usda.gov/pricesupport. To find your local USDA service center, visit farmers.gov/service-locator.
Nominations Open for 2020 County Committee Elections

The U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) encourages all farmers, ranchers, and FSA program participants to take part in this year’s County Committee election nomination process.

FSA’s county committees are a critical component of the day-to-day operations of FSA and allow grassroots input and local administration of federal farm programs.

Committees are comprised of locally elected agricultural producers responsible for the fair and equitable administration of FSA farm programs in their counties. Committee members are accountable to the Secretary of Agriculture. If elected, members become part of a local decision making and farm program delivery process.

A county committee is composed of three to 11 elected members from local administrative areas (LAA). Each member serves a three-year term. One-third of the seats on these committees are open for election each year.

County committees may have an appointed advisor to further represent the local interests of underserved farmers and ranchers. Underserved producers are beginning, women and other minority farmers and ranchers and landowners and/or operators who have limited resources.

All nomination forms for the 2020 election must be postmarked or received in the local USDA Service Center by Aug. 1, 2020 (or next business day). For more information on FSA county committee elections and appointments, refer to the FSA fact sheet: Eligibility to Vote and Hold Office as a COC Member available online at: fsa.usda.gov/elections.

Farmers, Ranchers and Private Forest Landowners Use Conservation to Protect Pollinator Habitat, Boost Crop Production

The next time you snack on almonds, add blueberries to your smoothie or eat pumpkin pie, thank a pollinator and thank farmers, ranchers and private forestland owners who work hard to create and maintain their habitat.

Pollinators, such as honeybees, bumblebees, butterflies, birds, bats, flies and many others, play a critical role in crop production. Without pollinators, we wouldn’t have many crops.

During the week of June 22-28, the nation will celebrate these iconic and crucial pollinators during National Pollinator Week. This year’s theme is “Pollinators, Plants, People and Planet.” Thirteen years ago, the U.S. Senate unanimously designated the third week in June as National Pollinator Week to increase awareness about the importance of pollinators and the challenges many of them face, including serious population declines and habitat losses, often due to land use changes and excessive or improper pesticide use. Nearly 200 species of pollinators are considered threatened or extinct.
Pollination occurs when pollen grains are moved between two flowers of the same species, or within a single flower by wind or insects and animals. Successful pollination results in healthy fruit and fertile seeds, allowing the plants to reproduce.

The extensive and critical world of crop pollinators is a $20 billion a year industry. About 75 percent of crop plants are pollinated by billions of animals and insects every year.

Many federal, state and local government agencies, non-government organizations and universities have launched extensive efforts to protect pollinators, especially honeybees and the Monarch butterfly. The U.S. Department of Agriculture (USDA) works closely with farmers, forest landowners and other private landowners to increase pollinator habitat in targeted areas nationwide.

The Environmental Quality Incentives Program (EQIP), through USDA’s Natural Resources Conservation Service (NRCS), offers financial incentives to agricultural producers and private forest landowners who enhance pollinator habitat by voluntarily implementing conservation practices such as cover crops, wildflower and native plantings in buffers and areas not in production.

Conservation Reserve Program (CRP) also can be used to enhance habitat to protect pollinators. Administered by USDA’s Farm Service Agency (FSA), CRP is a land conservation program in which enrolled landowners remove environmentally sensitive land from agricultural production and plant species that will improve environmental health and quality.

As owners and stewards of the land, many farmers, ranchers and private forest landowners manage their natural resources to work to achieve their production goals, they are protecting the rich and diverse ecology on or near their operations.

When we protect pollinators, we protect our ability to grow food. We thank our farmers, ranchers and private forest landowners for who offer a safe haven for pollinators and grow the products we enjoy.

Whether you are a large commodity producer, a small and diverse organic producer or even a suburban homeowner, you can have an important role in saving pollinators in Missouri.

Do your part to help protect pollinators. By taking action to diversify and beautify your operation or property, you could ensure that many fruits and vegetables are available and plentiful for future generations for many years to come.

For more information about pollinators and what you can do in Missouri, please contact your local USDA service center.
